GOSPORT, March 14.

At our election yesterday, on the Governor vote, Smyth received 18 and Sinclair 7. George Beebe, republican, was elected Representative. S.

IN THE U. S. SENATE, Tuesday March 13, the bill for the admission of Colorado was taken up. After debate the Senate, by a vote of 14 against 21, refused to order the bill to a third reading, so the bill fails.

IN THE HOUSE.—The Civil Rights bill, with amendments, was reported back from the Judiciary Committee. The first section, as amended, declares all persons born in the United States, not subjects of foreign powers, excluding Indians not taxed, to be citizens of the United States, without distinction of color, and endows all civil rights upon inhabitants of every race and color, without regard to any other laws or customs to the contrary notwithstanding. This amendment was agreed to. Some other unimportant amendments were agreed to: "That in all questions of law arising in any case under the provisions of this act a final appeal shall be taken to the Supreme Court."

The bill was then passed—100 against 38.

Mr. Lawrence, from the Judiciary Committee, reported back, with sundry amendments, the joint resolution proposing amendments to the Constitution. The entire bill with amendments was ordered to be printed, and re-committed.

Mr. Laflin, from the Committee on printing, reported back a resolution for printing 25,000 copies of each of the reports and testimony taken by the Committee on Reconstruction, without covers, for the use of the House; adopted, 109 against 50.

The Fortification Bill was considered in committee of the whole, and amended. The committee arose. The amendments were concurred in and the bill passed.

☞ An Ethiopic edition of the Siamese twins is exciting much curiosity at Raleigh, N. C. The twins are female, and are natives of Anson county in that State. The Standard describes them as follows:

The connection between these girls is closer than in the Siamese twins, there being more of the physical and mental organs common to each. The connection begins below the neck and terminates at the extremity of the spine. To touch one at any point of her body below the connection sends a sensation to the brain of each; while a touch of either above the connection is felt by that one only. They can talk to different persons at the same time on entirely different subjects; and one can engage in a game of whist while the other reads or sings. The lady who has them in charge was their former mistress, and is now commencing a tour with them under a contract with their parents, who are both living.

☞ Adams & Co., 21 Bromfield Street, Boston, have just published three new Songs: "There's No Such Girl as Sally," words by Philander Jones Ye Squire; "Love Never Sleeps," words and music by L. H. Gurney; "Lost Marguerite," words by P. S. Vining, music by L. H. Gurney.

— Stephen Girard, than whom no shrewder business man ever lived, used to say in his old age: "I have always considered advertising liberally and long to be the great medium of success in business, and the prelude to wealth. And I have made it an invariable rule, too, to advertise in the dullest times, as well as the busiest, long experience having taught me that money thus spent is well laid out; as by keeping my business continually before the public it has secured me many sales that I would otherwise have lost."

ENCOURAGEMENT IN DUTY.—Another young lady now in South Carolina writes:

The poor *white* people about here are ambitious to have their children taught. I have met and talked with scores of them; they are quite as ignorant as the colored population. If you ask their age, they give the usual reply of the black: 'I don't rightly know, ma'am.' They are just as destitute, and in point of health, the colored race have a decided advantage. They are troubled to know that the colored children are learning to read so rapidly, while their own (I speak only of the women) remain untaught. To such I have said—'If you will send them to our school, I will gladly teach them;' and to my great surprise, a class of 20 are ready to enter.

I feel it to be my duty not to confine my labors to the colored people. The poor among the whites appeal less to your sympathy, but when the evils accruing from slavery are considered, you find they, too, have been the victims of oppression; and were you here, I know you would deplore its effects upon them also. The clothing received I felt you designed for the freedmen, and have distributed it accordingly; but when the white children come into our school, I shall desire to treat them without distinction, and to clothe and teach them in the same spirit.

A gentleman teacher writes from Virginia, Feb. 19:

I am satisfied that the best way to serve the colored people is to do also something for the poor whites, who are equally needy, though not perhaps equally deserving, and through whom, if at all, we must control the South politically. But it is a harder and more thankless task. To work for the whites is duty, for the colored people duty and pleasure.

These facts speak for themselves, and they condemn all that "conservative" boobyism which sneers or snarls at New England fanatics and radicals; for these proscribed people are exactly those who aim to educate and elevate the poor and ignorant of all colors at the South, as well as in New England.

MR. SEWARD'S INFLUENCE. — The Washington correspondent of the Hartford Press attributes the treatment of traitors to the influence of Mr. Seward. He says—"Mr. Seward wanted to forgive the rebels long before the war was over. After one year's fighting, he said, 'The less fighting, the more certainly will reunion come.' He was finally cured of the preposterous idea that the rebellion could be put down by the blowing of horns, or the saying of pleasant words. Seward backed up McClellan to the last. McClellan's policy just suited his (Seward's) temperament. So, from the moment of Mr. Lincoln's death, Seward pleaded for the pardon of the entire South, and would have let the whole body of traitors back into Congress without a pledge for the future. This able man has impressed himself on the President very deeply, and the the latter has abandoned all his favorite plans of punishing treason."

NEW PROJECT.—The New York Tribune's Washington correspondent is authority for the statement that loyal men, and they only, both black and white, in the States of Arkansas, North Carolina, Louisiana and elsewhere, have taken steps towards the formation of new State Governments. These loyal men, without respect to color, will shortly issue calls in their respective States for State Conventions, and elect delegates thereto; the Conventions so formed will frame State constitutions embodying the principles of loyalty, freedom and equal rights: will pledge themselves to the payment of the National debt, the repudiation of the rebel debt, and the disfranchisement of the rebels. This being done they will then proceed to elect Governors, State officers, Representatives and Senators; the latter of whom will at once demand admission to Congress. The question being thrust upon that body, there is no doubt of the recognition of the Governments so formed, and the admission of the loyal members so elected. A number of true and loyal men of the South have been in Washington for some days, consulting and deciding upon the best method to be adopted, and having determined upon the plan presented above, have left for their homes to carry the same into execution.

AN ERROR OF THE TIMES.—Dr. John E. Tyler of the McLean Asylum for the Insane, in a recent report, alludes to the increasing number of persons who are carried to the Asylum, owing to the overworked brains. Dr. Tyler urges upon all the necessity of taking proper recreation, of being regular at meals, and he asserts "over-workers deceive themselves by the belief that they can bear more than others, or that they can bear what they are doing because they have so long borne it without breaking down." The over-worked class which have come under the Doctor's particular notice are merchants, professional men, and overtasked female scholars and teachers in our public schools. A few dollars less, a few cases passed over to younger lawyers, and a little less knowledge, would to-day have kept several who are now inmates of asylums, happy members of society.

— The Washington Republican says there is no truth in the report that the Navy Department has determined not to try the rebel pirate Semmes.

— Ten persons were arrested at Rouse's Point, N. Y., Wednesday, for smuggling, and are now under examination by the Commissioner for that district. One of them was a wealthy Montreal merchant with about six thousand dollars' worth of clothes.

— The divorce case of Congressman Kasson, in Warren County, Iowa, has been decided. Mr. Kasson, the defendant in the case, appeared in court and offered no opposition, whereupon a decree was entered in accordance with the prayer of Mrs. Kasson's petition. The cause of divorce was adultery on the part of the Congressman.

Cleanse the Blood.
With corrupt, disordered or vitiated Blood, you are miserable. It may burst out in Pimples, or Sores, or in some active disease, or it may merely keep you listless, depressed and good for nothing. But you cannot have good health while your blood is impure. AYER'S SARSAPARILLA purges out these impurities and stimulates the organs of life into vigorous action, restoring the health and expelling disease. Hence it rapidly cures a variety of complaints which are caused by impurity of the blood, such as Scrofula, or King's Evil, Tumors, Ulcers, Sores, Eruptions, Pimples, Blotches, Boils, St. Anthony's Fire, Rose or Erysipelas, Tetter or Salt Rheum, Scald Head, Ring Worm, Cancer or Cancerous Tumors, Sore Eyes, Female Diseases, such as Retention, Irregularity, Suppression, Whites, Sterility, also Syphilis or Venereal Diseases, Liver Complaints, and Heart Diseases. Try AYER'S SARSAPARILLA, and see for yourself the surprising activity with which it cleanses the blood and cures these disorders.
During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsaparilla, but often no curative properties whatever. Hence, bitter disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the name itself has become synonymous with impositions and humbugs. We call our compound "Sarsaparilla," and intend to supply such a remedy as shall rescue the name from the load of obloquy which rests upon it. We think we have ground for believing it has virtues which are irresistible by the ordinary run of the diseases it is intended to cure. We can only assure the sick, that we offer them the best alterative which we know how to produce, and we have reason to believe it is by far the most effectual purifier of the blood yet discovered by any body.
AYER'S CHERRY PECTORAL is so universally known to surpass every other remedy for the cure of Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease, that it is useless here to recount the evidence of its virtues. The world knows them.
Prepared by DR. J. C. AYER & CO., Lowell, Mass., and sold by all Druggists and Dealers in Medicine everywhere. mh9—2aw4w2m

Lyon's Periodical Drops!
THE GREAT FEMALE REMEDY FOR IRREGULARITIES.
These Drops are a scientifically compounded fluid preparation, and better than any Pills, Powders or Nostrums. Being liquid, their action is direct and positive, rendering them a reliable, speedy and certain specific for the cure of all obstructions and suppressions of nature. Their popularity is indicated by the fact that over 100,000 bottles are annually sold and consumed by the ladies of the United States, every one of whom speak in the strongest terms of praise of their great merits. They are rapidly taking the place of every other Female Remedy, and are considered by all who know aught of them, as the surest, safest and most infallible preparation in the world for the cure of all female complaints, the removal of all obstructions of nature, and the preservation of health, regularity and strength. Explicit directions stating when they may be used, and explaining when and why they should not, nor could not be used without producing effects contrary to nature's chosen laws, will be found carefully folded around each bottle, with the written signature of JOHN L. LYON, without which none are genuine. **Price $1.50.**
Prepared by Dr. JOHN L. LYON, 196 Chapel Street, New Haven, Conn., who can be consulted either personally, or by mail, (enclosing stamp,) concerning all private diseases and female weaknesses. **Price $1.50 per bottle.**

MAGGIEL'S
Spring and Summer Remedies.
"*Great oaks from little acorns grow.*" The worst diseases known to the human race spring from causes so small as to almost defy detection. The volumes of scientific love that fill the tables and shelves of the medical fraternity only go to prove and elaborate these facts. Then guard yourselves while you may. The smallest pimple on the skin is a tell-tale and indicator of disease. It may fade and die away from the surface of the body, but it will reach the vitals, perhaps, at last, and death be the result and final close. MAGGIEL'S BILIOUS, DYSPEPTIC and DIARRHŒA PILLS cure where all others fail. While for Burns, Scalds, Chilblains, Cuts, and all abrasions of the skin, MAGGIEL'S SALVE is infallible. Sold by J. MAGGIEL, 43 Fulton street, New York. PRESCRIPTIONS and TRADEMEN in this city, and all Druggists, at 25 cents per box. dec4eod&wly

Perry's Moth and Freckle Lotion.
☞ Chloasma, or Mothpatch, (also called Liver-erspot,) and Lentigo, or Freckles, are often very annoying, particularly to ladies of light complexion, for the discolorations spots show more plainly on the face of a blonde than of a brunette; but they greatly mar the beauty of either and any preparation that will effectually remove them, *without injuring the texture or color of the skin*, is certainly a desideratum. Dr. B. C. PERRY, who has made diseases of the skin a specialty, has discovered a remedy for those discolorations, which is at once prompt, infallible and harmless.

CLOCK'S
Excelsior Hair Restorer
Is warranted to restore GRAY HAIR in all cases to its original color, whether black or brown.
It will not stain the skin or the finest linen.
It will instantly arrest the hair from falling off; causes a new hair to grow on BALD HEADS when fallen off by disease; and is a complete dressing for the hair, keeping it moist and glossy and preserved longer than any other preparation in the market.
This article is warranted to do as represented, or the money will be refunded. It is positively the greatest discovery in hair preparations of the age.
For sale in Portsmouth by J. H. THACHER, Apothecary, opposite the Post Office, and at No. 12 Market Square.
Also by WILLIAM R. PRESTON, Apothecary, 2 Congress Block.
FRANK B. CLOCK, Druggist and Chemist, Proprietor, Manchester, N. H. j4

Local.

POLICE COURT.—Election day in this city was unusually quiet, there being but few cases of drunkenness demanding the attention of justice. Isabella Leonard alias Ashe, a domestic looking female of Irish extraction was arraigned to answer to the charge of going through Mrs. Mary Parker's wardrobe, after she had trespassed upon Mary's generosity to the extent of three weeks' board at the "Three Decker" on Bow street. It appears that Miss Leonard after leaving her boarding-house at the above mentioned place, having upon her person Mrs. Parker's shawl, scarf, dress, and some unmentionable articles, procured a free pass and took the 9 o'clock train for Boston. The City Marshal, as soon as he was informed of the robbery aforesaid, telegraphed to Conductor West, through whose vigilance the thief was arrested in Boston, and Officer Marsh of this city was sent after her and brought her down on the evening train. Sentenced to 30 days in jail—pay $12 57 costs, and $19 less the value of the property returned.

☞ Mr. Wendell on Wednesday, sold at auction the fine house of Capt. Henry Libbey, on Islington street, to Dr. A. P. Stevens—for $6400, cash. This, though much less than the premises could be built for now, and not so much as they were expected to bring,—is still, so far as our recollection extends, rather more than a house was ever sold for at auction here.

☞ All interested in the subject of Fenianism, which is now attracting the greatest attention throughout the land, should go to Union Hall, at half-past 7 this evening, and listen to the Lecture by Mr. J. J. Crowley, of Boston, who is said to be a good speaker, and one thoroughly acquainted with the matter of Fenianism in all its aspects. Seats free. 59

Important.
DR. STEVENS, No 5 Daniel Street, would give notice that he has REDUCED the price of Permanent Sets of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.
He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is nominally in advance of that charged for the Vulcanite alone, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the Teeth. mh12

GEORGE F. WEED,
S-u-r-g-e-o-n D-e-n-t-i-s-t,
FIRST ASSISTANT in the Office of DR. STEVENS, No. 5 DANIEL STREET.
DR. WEED can be found at his place of business at all hours of the day and night, for the performance of any of the operations that come within the call of his profession.

Dr. A. P. STEVENS, No. 5 Daniel St., makes the saving of ULCERATED and painful front teeth, a specialty in his business. He also successfully restores to their natural shape decayed or badly decayed teeth, by building out corners and sides with PURE GOLD. (In many cases teeth so restored are as strong as any of their brother members, and in all cases are rendered eminently useful for a long series of years.) DR. MARY FLETCHER, is at all stages, treated, and in a very large majority of cases entire success attained.
Charges for such operations necessarily high, but nothing in comparison to the value of the Teeth. mch14

DENTAL NOTICE!
No. 60 Congress Street.
Having adopted the C. O. D. system of doing business, **Dr. C. B. GOODALL** informs his patients and the public that he now inserts whole sets of block teeth on VULCANITE BASE for $30.00 each (upper and lower,) and warrants them as good and as serviceable as sets on GOLD, which cost more than double the above.
He also keeps a fresh supply of PURE NITROUS OXYDE GAS to answer the numerous calls for this popular anæsthetic, and administers PURE ETHER, when desirable.
All other operations in Dentistry performed at reasonable remuneration. mch14

PLANTATION BROKEN UP.—A man named Ransom, in Marshall county, Tenn., recently subdivided his plantation and rented it in small lots to about forty negro families, who commenced working the same, much to the disgust of a few worthless villains in the neighborhood, who, too lazy to work themselves, were unwilling to see the blacks thrive by industry, and they accordingly determined to break up Mr. Ransom's plantation by some means—fair or foul. They visited the place several times, but were beaten off every time by the planter and the freedmen. To secure protection against these outrageous proceedings, Mr. Ransom went to Nashville to ask the interference of the military, and while absent the marauders returned and drove the negroes from the plantation. A military force was sent to the locality.

SINGULAR DISCOVERY.—In the vicinity of Stratford-upon-Avon, the birth place of Shakspeare, about three thousand human skeletons were recently found while digging. They were all laid closely side by side, and the bones were in a remarkable state of preservation. It is supposed that they were the remains of the slain of some great battle, but history is silent regarding any encounter between armies near the spot.

LIFE INSURANCE COMPANIES.—A life insurance company is about to begin business in Albany. It proposes to issue policies of insurance upon the lives of persons who are patrons of homœopathy, at ten per cent. less than the rate imposed upon persons employing allopathic treatment. A similar company exists in Cleveland, Ohio, and the General Provident Assurance Company of London has also opened a special section for persons treated by the homœopathic system, at a lower rate of premium than that charged on other lives.

— At a fancy ball at the Tuileries lately, there was a quadrille of all nations. The prettiest girl in Paris was chosen to represent France. It was the charming Miss Beckwith, an American! She wore a white satin dress, with a tri-color sash. Brunettes rejoice! Miss Beckwith is described as having beautiful black hair.

To the Honorable Judge of Probate for the County of Rockingham in the State of New Hampshire.

Respectfully shews JAMES R. HALL of Portsmouth, in the County of Rockingham, that he is Guardian of ALICE A. FERNALD, a minor child of CHARLES H. FERNALD, late of said Portsmouth, deceased, by the appointment of the Judge of Probate for the said County of Rockingham; that his said Ward is seized of three fourths in common and undivided of a certain piece or parcel of land, situated in said Portsmouth, bounded easterly on Anthony Street fifty feet; southerly one hundred feet on land of Leonard Cotton; westerly by land of Lorenda Patchen; and northerly by land of Ebenezer H. Blisdell—together with the house and buildings thereon.

Three fourths, also, of a piece of land situate in said Portsmouth, with the buildings thereon, bounded easterly by Manning Street, seventy feet, more or less; southerly by Hancock Street, ninety feet, more or less; westerly by Walton's Lane, so called, twenty-six feet, more or less; and northerly by land of Charles Walker. Also three-fourths of another piece of land in said Portsmouth, bounded as follows: beginning at the north westerly corner of last named land of said Ward and running northerly by said Walton's Lane fourteen feet, then turning and running easterly by land now or formerly owned by Mary Jane Brackett, forty-eight feet, thence turning and running southerly by land before named of said Ward fourteen feet, thence turning and running westerly by the last mentioned land forty-eight feet to Walton's Lane, the place began at. The last-named lot being premises conveyed to Charles H. Fernald by Mary Jane Brackett Jan. 24, 1855. The whole of each of the above premises being subject to the right of dower of the widow of said Charles H. Fernald, as necessary for the support of his said Ward, and will be conducive to her interest to have the premises sold; wherefore he prays that he may be licensed and authorized to sell the same at public auction, according to statute in such case made and provided.

JAMES R. HALL, Guardian.
By his Attorney WILLIAM H. HACKETT.

ROCKINGHAM, SS. Probate Office at EXETER in said County, March 6th, A. D. 1866.

Upon the foregoing Petition, it is *Ordered*, that a hearing be had thereon at the Court of Probate to be holden at Portsmouth in said County, on the second Tuesday of May next; and that the Petitioner notify all persons concerned to appear at said Court, and show cause, if any they have, why the prayer of said petition should not be granted, by causing said petition and this order thereon to be published three weeks successively in the DAILY CHRONICLE, a newspaper printed at Portsmouth in said County, the last publication whereof to be at least thirty days prior to said Court.

By order of the Judge.

SUFFERERS
From Dyspepsia
READ! REFLECT!! ACT!!!
TARRANT & CO

Gentlemen, I am a resident of Curacoa, and have often been disposed to write to you concerning the real value of your SELTZER APERIENT as a remedy for indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.

For four or five years my wife has been radly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Cabialis, of Venezuela, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.

I feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known. And I rested that you will give this publicity, and repeating my earnest gratitude and thanks,

I am very respectfully yours,
S. DEL HENRIQUER,
Merchant, Curacoa, S. A.

New York, June 28th, 1865.

WE ASK
The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of

Dyspepsia, Heartburn, Sour Stomach, Sick Headaches, Flatulence, Indigestion, Piles, Costiveness, Bilious Attacks, Liver Complaints, Rheumatic Affections, &c.

Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your Physician.

AMERICAN AND FOREIGN PATENTS.
R. H. EDDY,
Solicitor of Patents,
Late Agent of the U. S. Patent Office, Washington, under the Act of 1857,
78 State Street, opposite Kilby Street,
BOSTON.

After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds, Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Research made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.

The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The Testimonials below prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove to any inventor, that the kind and the charges for professional service so moderate.

The immense practice of the subscriber during twenty years past has enabled him to secure late a vast collection of specifications and official decisions relative to patents.

These, together with a large library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond doubt, to offer superior facilities for obtaining Patents.

All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.

TESTIMONIALS.

"I regard Mr. Eddy as one of the *most capable and successful practitioners* with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.

"I have no hesitation in assuring inventors that they cannot employ a person *more competent* and *trustworthy*, and more capable of putting their applications in a form to secure them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents.

Mr. R. H. Eddy has made for me THIRTEEN applications, on all but one of which patents have been granted, and that is now pending. Such unmistakable proof of great talent and ability on his part leads me to recommend *all* inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."
JOHN TURLAY.

During eight months, the subscriber, in course of his large practice, made on *twice* rejected applications SIXTEEN APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents.
R. H. EDDY.

The Old Established Hospital.
No. 5 Beaver Street, Albany, N. Y.
QUICK CURES AND LOW PRICES.
Over Twenty Thousand Patients Cured Annually;
DR. J. TELLER continues to be confidentially and successfully consulted on all forms of private diseases, at his old Established Hospital, No. 5 Beaver Street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and his facilities are such (being in correspondence with the most eminent Physicians of the Old World,) of obtaining the safest and most efficacious remedies for these diseases, offer inducements to the unfortunate of a quick and rapid cure, to be obtained at no other office in America.
In Syphilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cords, Bubo, Ulcerated Throat, Sore Nose, Pimples, Bones, Cutaneous Eruptions, Biles, Ulcers, Abscesses, and all other impurities of the system, are perfectly under the control of the Doctor's Medicines, and have been tested in more than 20,000 cases annually, with immense Success.
YOUNG MEN.
Young Men addicted to secret habits, who have impaired their healths and destroyed the vigor of their minds, thus depriving themselves of the pleasure of life, and Married Life, are notified that in consulting Dr. J. Teller, they will find a friend to counsele and a Physician who has cured thousands, in almost every part of the United States, who applied to Dr. J. broken down in health, now rejoice in all that makes life desirable and man happy. The reader is of course aware that the delicacy of this subject will prevent a more minute description of this terrible disease.
DR. TELLER'S GREAT WORK.
A book for everybody—Startling disclosures. Dr. TELLER's great work for the Married or those contemplating marriage—200 pages—full of plates—price 25 cts. Sent to all parts, under seal, by mail, post paid. 50,000 copies sold the past year. The single Married and the Married Help, py. A lecture on Love, or how to choose a Partner—a complete work on Midwifery. It contains hundreds of secrets, never before published.—Warranted to be worth three times the amount asked for it. 25 cents, in specie or postage stamps, inclosed, will secure a copy by return mail. Dr TELLER has devoted a lifetime to the cure of those diseases upon which his books treat
TO THE LADIES.
Dr. TELLER still remains the only Agency in America, for the sale of Dr. Vichoi's Italian Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unapproached, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in females.
CAUTION.—Married ladies in certain delicate situations should avoid their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent, by mail or express, to any part of the world, secure from curiosity or damage.
Office hours from 8 A.M. to 8 P.M., and on Sundays from 9 to 2 P.M.
N. B.—Persons at a distance can be cured at home by addressing a letter to Dr. J. Teller, enclosing a remittance. Medicine securely packed from observation, sent to any part of the world. All cases warranted. No charge for advice.—N. B.—No students or boys employed. Notice this, address all letters to

Important to the Afflicted.
DR. DOW continues to be consulted at his office, Nos. 7 and 9 EDICOTT STREET, BOSTON, on all diseases of a PRIVATE OR DELICATE NATURE. By a long course of study and practical experience of unlimited extent, Dr. D. has now the gratification of presenting the unfortunate with remedies that have never, since he first introduced them, failed to cure the most alarming cases of GONORRHŒA AND SYPHILIS.
SEMINAL WEAKNESS.—Dr. Dow devotes a great part of his time to the treatment of those cases caused by a secret habit, which has ruined the body and mind, unfitting the unfortunate individual for business or society. Patients who wish to remain under Dr. Dow's treatment a few days or weeks, will be furnished with pleasant rooms, and charges for board moderate.—Medicines sent to all parts of the country, with full directions for use, on receiving description of your cases. Dr. Dow has also for sale the French Capottes, warranted the best preventive. Order by mail. Three or $1 and a red stamp.
Highly Important to Females
IN DELICATE HEALTH.
Dr. DOW, Physician and Surgeon, No. 7 Endicott Street, Boston, is consulted daily for all diseases incident to the female system. Dr. Dow has no doubt had greater experience in the cure of diseases of women than any other physician in Boston. Boarding accommodations for patients who may wish to stay in Boston a few days under his treatment. Dr. Dow, since 1845, having confined his whole attention to an office practice for the cure of Private Diseases and Female Complaints, acknowledges no superior in the United States.
N. B.—All letters must contain one dollar, or they will not be answered. Office hours from 8 A. M. to 9 P. M.
CERTAIN CURE
in all cases, or No Charges Made.
Among the physicians in Boston, none stands higher in the profession than the celebrated DR. DOW, No. 7 Endicott street. Those who need the service of an experienced physician and surgeon should give him a call.
P. S.—Dr. Dow imports and has for sale a new article, called the FRENCH SECRET. Order by mail. Two for $1 and a red stamp.

ISRAEL MARDEN & CO.,
No. 39 Congress St., Portsmouth, N. H.,
—DEALERS IN—
S. Vance's Submerged Well PUMP.
This unsurpassable invention, now being first introduced, will, it is believed, supersede all other Well Pumps now in use.
ITS ADVANTAGES.
FIRST, SIMPLICITY.—This Pump is composed of but three parts, and is so simple in its construction that any one can easily put it together.
SECOND, DURABILITY.—Its peculiar construction, and the fact that it is always submerged combine to make it the most durable of all Pumps yet invented.
THIRD, NEVER FREEZES.—The valves are so constructed that, when not in motion, they allow all the water above to pass down into the well, and thus prevent freezing.
FOURTH, POWER.—For the amount of power applied, this Pump excels anything known. It throws one-third part more water than any hand pump, and works so easily that even a child can pump without fatigue. It is in this way the greatest labor-saving pump now offered to the public.
FIFTH, IT IS INVALUABLE.—For a well pump it is invaluable, as all the iron which is submerged consists of but three small pieces and these galvanized. It can in no way corrode, consequently it brings up pure water at every stroke.
SIXTH, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to keep in use for years. No repairs at all are needed, it is very light and thus the cost of transportation is very small.
☞ Manufactured by S. VANCE & CO., No. 31 Liberty Street, Newburyport, and for sale in Portsmouth by the Sole Agents for N. H.,
ISRAEL MARDEN & CO.,
39 Congress Street.
☞ We are permitted to refer to Mr. MONROE HOLMES and to Mr. FRANK W. MILLER of the Daily Chronicle, who have these new Pumps in use on their premises,—for testimony to their excellence.

Light! Light! Light!
PHOTOLEUM.
This is a new discovery, the product of Petroleum, and affords the very best light of this enlightened age, has been thoroughly tested, and is offered with confidence as the most *excellent, safe and valuable* illuminating oil ever before the public, giving a *soft, steady* and *brilliant* flame, surpassing even gas-light for reading and leaving all other oils far out of sight. It needs but a trial to convince the most sceptical of its superiority. *Photoleum* emits no sickening odor when burning, even with the smallest flame, rendering it invaluable in a sick room, requiring it char the wick or smoke the chimney, so that once trimming will suffice for a week or more. Photoleum produces a flame that does *not diminish*, but continues the same until every drop of oil is consumed. It is, therefore, very desirable for lighting churches, railroad and horse cars, manufactories and public buildings. The public are invited to call and examine.
Manufactured and for sale by the AMERICAN PHOTOLEUM COMPANY, Office at C. F. WYMAN & Co.'s, 37 Water Street, Boston.
☞ For sale in Portsmouth by BAILEY & GLINES, 72 State St., at wholesale and retail.

VINELAND
FARM AND FRUIT LANDS,
In a mild and healthful climate. Thirty miles *south* of Philadelphia by Railroad, in New Jersey, on the same line of latitude as Baltimore, Md.
The soil is rich and *productive*, varying from a clay to a sandy loam, suitable for Wheat, Grass Corn, Tobacco, Fruits and Vegetables. This is a *great fruit country.* Five hundred Vineyards and Orchards have been planted out by experienced fruit-growers. Grapes, Peaches, Pears, &c., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste.* It has increased five thousand people within the past three years. Churches, stores, Schools, Academies, Societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are coming and settling. Hundreds of new houses are being constructed. Price of Farm land, twenty acre lots and upward, $25 per acre. Five and ten acre and Village Lots for sale.
Fruits and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Yards, Manufactories, Foundries, Stores and the usual and useful trades, should come forward.
For persons who desire mild winters, a healthful climate, and a good soil, in a country beautiful by nature, abundant in fruits, abounding in every social and other social privileges, in the heart of civilization, it is worthy of a visit.
Letters answered, Pamphlet, Vineland Rural, a paper giving full information, and containing Reports of Solon Robinson, sent to applicants.
Address CHAS. K. LANDIS, Vineland P. O., Landis Township, New Jersey.
From Report of Solon Robinson, Agricultural Editor of The Tribune: *It is one of the most extensive fertile tracts, in an almost level position and suitable condition for pleasant farming that we know of this side of the Western Prairies.* n1—dawim

THE LIGHT OF THE WORLD.
DR. MAGGIEL'S
PILLS AND SALVE
These Life-giving remedies are now, for the first time, given publicly to the world. For over a quarter of a century of private practice the ingredients in these
Life-giving Pills!
Have been used with the greatest success. Their mission is not only to prevent disease, but to cure. The research on the various maladies by which the patient is suffering, and to re-invigorate the failing system. To the aged and infirm a few doses of these valuable PILLS will prove to be
A Very Fountain of Youth,
For in every case they add new life and vitality, and restore the waning energies to their pristine state. To the young and middle aged, they will prove most invaluable, as a ready, specific, and sterling medicine. Here is a dream realized, that Ponce-de-Leon sought for three hundred years ago, and never found. He looked for a fountain that would restore the old to youth and make youth ever
AN ETERNAL SPRING!
It was left for this day and hour to realize the dream, and show, in one glorious fact, the magic that time is fled.
These Famous Remedies
Cannot stay the flight of years, but they can force back and hold aloof, diseases that might triumph over the aged and the young. Let none hesitate then, but seize the favorable opportunity that offers. When taken as prescribed,
FOR BILIOUS DISORDERS
Nothing can be more productive of cure than these Pills. Their almost magic influence is felt at once; and the usual concomitants of this most distressing disease are removed. These remedies are made from the purest
VEGETABLE COMPOUNDS.
They will not harm the most delicate female, and can be given with good effect in prescribed doses to the youngest babe.
For Cutaneous Disorders
And all eruptions of the skin, the SALVE is most invaluable. It does not heal externally alone, but penetrates with the most searching effects to the very root of the evil.

Morning Chronicle.

Portsmouth, N. H.

FRIDAY, MARCH 16, 1866.

NEW HAMPSHIRE, WASHINGTON, &c. Perley says:

The good news from New Hampshire made all the Republicans excessively agreeable, while the Democrats were rather sulky. Gov. Fred. Smyth telegraphed the President—"We have carried New Hampshire by about 5000 majority;" and Mr. Johnson regards the victory among the Granite hills as indicative of what may be accomplished by harmonious co-operation between himself and Congress. (1)

The Democrats declare that in Connecticut Gen. Hawley has not the confidence of the President as Gov. Smyth had, and that in the coming election the Executive power may be used against Gen. Hawley. I can hardly credit this, yet it is asserted by those who should know; and it is said that a postmaster who denounced the President's 22d of February speech was removed Wednesday.

Secretary Welles declined to give permission to the New Hampshire clerks in the Navy Department to go home and vote. (2)

The same day the city government of Georgetown visited the President, with resolutions adopted by them at a recent meeting indorsing the President and his policy. Mr. Johnson made one of his characteristic speeches in reply, repeating what he has so often said of late, and declaring his determination to adhere to the course which he has marked out, which he believes to be in accordance with his constitutional duties and with the wishes of the people of the country. (3)

[NOTE, *by Uncle Toby.*—What a hotch-potch have we here. In No. 1, the President counts the defeat of his copperhead admirers in New Hampshire a victory! In No. 2, the conservative Sec. Welles did what he could to *present* this same victory; and in No. 3, the President says he adheres to the very policy which New Hampshire has just condemned. We are quite inclined to believe, however, that by Congress, and the President, and Mr. Seward, it will be perceived that New Hampshire will sustain them *all*—so far as they sustain liberty and honesty—but no farther.]

IN THE U. S. SENATE, Wednesday, March 14, the Regular Army Bill was taken up. It provides that the military peace establishment of the United States shall consist of five regiments of artillery, twelve regiments of cavalry and fifty regiments of infantry. The Professors and Corps of the United States Military Academy, and such other forces as shall be provided for by this act, are to be known as the Army of the United States. It also provides in detail for the organization and officering of the army.

Various amendments were adopted, and the bill then passed—27 to 5—and goes to the House.

Mr. Wilson entered a motion to reconsider the vote rejecting the bill for the admission of Colorado.

The House went into Committee of the Whole on the joint resolution to provide for the expenses attending the Paris Exhibition. The Committee rose and reported the bill as amended, and in the House the amendments were all agreed to, and the bill passed—yeas 69, nays 50. Gen. Banks' speech in favor of the measure changed the vote of the House.

RHODE ISLAND.—The Rhode Island Democratic State Convention, which was called to meet in Providence Wednesday, adjourned until the 21st, the day after the Republican Convention meets, in order to see what that body does in the matter of nominations. They might as well have adjourned *sine die*, for if the Republicans nominate Gen. Burnside, as it now seems to be generally conceded they will do, it will only be a waste of time and effort for the Democrats to nominate any one against him. The Providence Journal publishes an appeal, signed by a large number of officers who served during the war, asking that Gen. Burnside may be nominated. He will, according to the present indications, be the nominee of the Republicans for Governor, and it is not unlikely that his nomination will be endorsed by the Democrats.

From Hon. Isaac Adams, Esq., of Sandwich, N. H., a very thorough and searching pamphlet, exposing the injustice and unconstitutionality, as well as illegality of the "New Hampshire Act Taxing United States Securities."

— It is said that a Baptist meeting house at East Haddam, Conn., over which there has been a vast amount of quarreling for sometime past, disappeared very mysteriously one night last week.

Local.

PORTSMOUTH ALES have come to be almost as well known as the Albany Ales of old; and (although we are not a practical judge) we have no doubt that our citizens' brewings are by far the better. For while it was always stated, if not proved, that the early ales were decocted of every unclean thing; it seems to be as generally accepted that the Portsmouth ales are entirely pure and scrupulously clean.

There are, as is well known, two large breweries here, the products of which are eagerly swallowed by denizens of Maine, New Hampshire, Massachusetts, &c., wherever the names of Messrs. Frank Jones & Co. and Eldredge & Fisher are known. And although there is difference of opinion as to the healthfulness of this popular beverage, and the tendency of its use to intemperance, we have nothing to do with that now—but business having called us in the vicinity of Mr. Jones' establishment, a day or two since, we improved the occasion to look over his extensive and busy premises; and as an important part of our local manufacting interest, we shall say a few words of what we saw in a ten minutes' stop.

Messrs. Fisher & Co.'s brewery is located on the beautiful and eligible site of the old Portsmouth Stocking Factory; that of Mr. Jones, lies between upper State street and Islington street. Both are quite extensive establishments, and the several thousand barrels annually turned out from each finds ready sale at highly remunerative prices, no doubt. One great item of expense in this business, is the heavy investment in the costly casks essential for use, amounting to many thousands of dollars; and the nicest accuracy and skill is essential to good success, throughout the entire process of manufacture.

In connection with his brewery, Mr. Jones has within a year or two erected a large brick building for a malt house—and here the process of brewing (malting) commences. In the bins, lay immense piles of pure Canada barley, 25,000 or 30,000 bushels—certainly "looking good enough to eat," as the ale does to drink, after that is made. About 500 bushels of the grain is thrown into the great circular wooden water tank, the sides of which are higher than your head, located in the lower room; and soaked for a couple of days—then, having been winnowed of all bad kernels, peas, other grains, weed seeds, &c. by dipping off these extraneous matters, which all float on top of the water, and which are sold at a low price, for light feed for horses, and for pigs, hens, &c.,—the soaked and perfect barley is spread on the smooth and clean floor, to the depth of six inches or so, and there lies for a few days, to swell and sprout, heat and ferment. There were three of these piles or "beds" of soaked barley, of 500 bushels each, spread over the floor, in different stages of preparation.

From here, the grain goes into the drying room, the floor of which is of iron, punctured with innumerable little holes, like a strainer or seive; and the coal fires in the furnaces under which are never allowed to go out, day or night, the year round, except for repairs. When entirely dry, the grain, which is now malt, or malted barley, is conveyed to the brewery proper, and cracked in a mill, then soaked again, (this time in hot water—pure, from the aqueduct,) and placed on another seive or strainer, and the liquid caught below, which is the "extract of barley" and all of the grain which is wanted. The residue is the brewer's "grains" which are sold for feed for animals, and are valuable manure.

The hops are now added to this liquid extract, in such quantities as to produce ale of the desired strength and quality, whether "stock, amber or cream;" and after fermenting to the proper point, is barrelled for use. In *pure* ale there is no other ingredient besides these—barley, water and hops; but adulteration by means of quassia (the wood and bark of tropical trees) instead of hops, may be made at a greatly reduced price; and this injurious ingredient, which is intensely bitter, is used extensively in some places, but not at all here, as judges of the article can readily discern.

The manufacture of ale in the city, gives employment to a considerable number of men, and circulates a good deal of money here. As was suggested by a Nashua correspondent a few days since, in reference to a great tobacco factory,—there is difference of opinion as to the effect and influence of both these institutions; but there is no question, that the Portsmouth brewers are enterprising and energetic business men, and their goods very popular wherever they are known. We understand that Mr. Jones' accommodations, spacious and complete as they are, are by no means sufficient for his increasing business; and he has extensive stables and sheds already in course of erection, and contemplates considerable additions to his brewery and malt house in due season.

A good and perhaps pious bishop who flourished two centuries ago, wrote a poem in praise of Ale, in which he desired his back and limbs to "Go bare, go bare; but belly, God send thee good ale enough, whether it be new or old." And no doubt there be many now who echo the reverend old toper's prayer.

Mr. Josiah H. Morrison, who for several years has been connected with Mr. Jones' establishment, is now promoted to head brewer; and under Mr. J's instructions, bids fair to become an expert brewer. A man who has proved himself so faithful and trustworthy in whatever position placed, as has 'Siah, is deserving of any trust.

NEW HAMPSHIRE ITEMS.

—— At town meeting, last Tuesday, the citizens of Claremont voted, almost unanimously, the sum of $100,000 as a gift to the Concord and Claremont Railroad. This is liberality indeed.

—— About one o'clock on Wednesday morning James Gray, while crossing the bridge over the canal at Suncook, fell over into the water and was drowned. It was very dark at the time, and the bridge had no railing. Gray leaves a family.

—— Monday morning last Frank Bachelor, in his sixteenth year, hung himself in a barn at Acton, Maine. He lived with Mr. William F. Cutts, at Milton Mills, and was a son of Rev. O. R. Bachelor, a Freewill Baptist Foreign Missionary in India. There is no apparent cause for his committing such a deed.

—— Rev. Willet Vary, lately pastor of a Freewill Baptist Church in Dover, has become a Baptist preacher. A council of the latter denomination, of which Rev. N. Hooper was moderator, and Rev. H. F. Lane clerk, "recognize him as a minister of the Baptist church," are "convinced of the sincerity of the radical change of his theological views, from those of the Freewill to those of the Regular Baptists," and publish their proceedings in the Watchman & Reflector.

To this publication, the Morning Star replies as follows:

Who are these "Regular Baptists?" We know of two Free Baptist churches in this city and one Calvinistic Baptist church, and we have heard of Seventh Day and Six Principle Baptists, but there is no church in this city known as the "Regular Baptist church, and we have yet to learn that there is any in the country. If by the term "Regular Baptists" the Calvinistic or Close Communion Baptists are meant, we claim that the Free Baptists are as regular as they, and to our mind it savors not a little of presumption for them to apply to themselves the term "regular."

☞ We call attention to the advertisement of the "Ames Plow Co.," the most extensive dealers in agricultural implements and machines in New England. They occupy the immense halls over Quincy Market, and their place is a museum of all articles needed by the farmer, well worth a visit from any one spending a few days in Boston.

— John B. Gough was robbed recently at the Lindell House, St. Louis.

— Medical men, both Allopathic and Homœopathic, unanimously concur that the strong alkali contained in common Saleratus is detrimental to health, and paves the way for disease. They also concur that Herrick Allen's Gold Medal Saleratus is the only perfectly harmless article in the market which can be relied upon. Use it with cream tartar instead of soda. Call on the Grocers for it. Their depot is 112 Liberty St, New York. 59

PHOTOLEUM.

This is a new discovery, the product of Petroleum, and affords the very best light of this enlightened age, has been thoroughly tested, and is offered with confidence as the most *excellent, safe* and *valuable* illuminating oil ever before the public, giving a *soft, steady* and *brilliant* flame, surpassing even gas-light for reading and leaving all other oils far out of sight. It needs but a trial to convince the most skeptical of its superiority. *Photoleum* emits no sickening odor when burning, even with the smallest flame, rendering it invaluable in a sick room, neither does it chill the wick or smoke the chimney, so that once trimming will suffice for a week or more. Photoleum produces a flame that does not *diminish*, but continues the same until every drop of oil is consumed. It is, therefore, very desirable for lighting churches, railroad and horse cars, manufactories and public buildings. The public are invited to call and examine.

Important.

DR. STEVENS, No 5 Daniel Street, would give notice that he has REDUCED the price of Permanent Sets of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.

He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite alone, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the fresh. mh12

Dr. A. P. STEVENS, No. 5 Daniel St., makes the saving of DECIMATED and painful front teeth, a specialty in his business. He also succes-fully restores to their natural shape broken-or badly decayed teeth, by building out corners and sides with pure GOLD. (In many cases teeth so restored are as strong as any of their brother members, and in all cases are rendered eminently useful for a long series of years.) DISEASED TEETH, in all stages, treated, and in a very large majority of cases entire success attained.

Charges for such operations necessarily high, but nothing in comparison to the value of the Teeth. mch14

Cleanse the Blood.

With corrupt, disordered or vitiated Blood, you are sick all over. It may burst out in Pimples, or Sores, or in some other disease, or it may merely keep you listless, depressed and good for nothing. But you cannot have good health while your blood is impure. AYER'S SARSAPARILLA purges out these impurities and stimulates the organs of life into vigorous action, restoring the health and expelling disease. Hence it rapidly cures a variety of complaints which are caused by impurity of the blood, such as Scrofula, or King's Evil, Tumors, Cancer or Cancerous Tumors, Sore Eyes, Female Diseases, such as Retention, Irregularity, Suppression, Whites, Sterility, also Syphilis or Venereal Disease, Liver Complaints, and Heart Diseases. Try AYER'S SARSAPARILLA, and see for yourself the surprising activity with which it cleanses the blood and cures these disorders.

During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsaparilla, but often no curative properties whatever. Hence, bitter disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the name itself has become synonymous with imposition and cheat. Still we call this compound Sarsaparilla, and we offer it to supply such a remedy as shall rescue the name from the load of obloquy which rests upon it.—We think we may safely say that we offer them the best alterative which we know how to produce, and we have reason to believe it is by far the most effectual purifier of the blood yet discovered by any body.

AYER'S CHERRY PECTORAL is so universally known to surpass every other remedy for the cure of Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease, that it is needless here to recount the evidence of its virtues. The world knows them.

Prepared by Dr. J. C. AYER & Co., Lowell, Mass., and sold by all Druggists and Dealers in Medicine everywhere. mh9—2awa2m

ALLCOCK'S POROUS PLASTERS

CURE LUMBAGO, PAINS OF THE SIDE, VARICOSE VEINS, SORE CHEST, &c.

An Electrician, who has great experience of their effects in *local rheumatism*, in *tic doloreaux*, and deep-seated nervous and other pains, and in affections of the kidneys, etc., etc., attributes all their sedative, stimulative, and pain-relieving effects to their *electric* qualities. He asserts they restore the healthy electric condition (equilibrium) of the part, and *that* being restored, pain and morbid action cease.

LAME BACK.

Brandreth House, N. Y., Nov. 23, 1859.

T. ALLCOCK & Co.—Gentlemen: I lately suffered severely from a weakness in my back. Having heard your plasters much recommended in cases of this kind, I procured one, and the result was all that I could desire. A single Plaster cured me in a week.

Yours respectfully, J. G. BRIGGS.

CLOCK'S
Excelsior Hair Restorer

is warranted to restore GRAY HAIR in all cases to its original color, whether black or brown.

It will not stain the skin or the finest linen.

It will instantly arrest the hair from falling off; causes hair to grow on a BALD HEAD when fallen off by disease; and is a complete dressing for the hair, keeping it moist and glossy and perfumed longer than any other preparation in the market.

This article is warranted to do as represented, or the money will be refunded. It is positively the greatest discovery in hair preparations of the age.

For sale in Portsmouth by J. H. THACHER, Apothecary, opposite the Post Office, and at No. 15 Market Square.

Also by WILLIAM R. PRESTON, Apothecary, 2 Congress Block.

Local.

☞ In our list of deaths to-day, we record the sudden decease of another citizen in middle life, Mr. Jeremiah M. Mathes, of heart disease or apoplexy. On Wednesday, after dining as well and heartily as usual, he was preparing to attend the funeral of his father-in-law, Mr. Folsom, when he was arrested by the fatal disease, which terminated his life early on Thursday, in a manner so painless and silent that his family thought him sleeping, and were not aware of his actual decease for some time.

PUBLIC LIBRARY.—*Editors Chronicle:* Will not some of our public spirited citizens lay the foundation for a public library, by presenting a number of readable volumes as a commencement? Who will honor themselves and our city by first commencing this noble work? No doubt a majority of our citizens may have from one to a dozen volumes at their homes, seldom seen and never perused by them, which if collected might make up quite a respectable library. Let those who can, leave one or more books at the City Rooms; a few such examples will become contagious and contributions will increase, until we realize that a public library is an accomplished fact.

CITIZEN.

☞ The usual amusing incidents seemed to be lacking at our State election. In one of our Wards a voter, who evidently had neglected to join the "Dashaways," stoutly maintained that he would carry no ticket but one bearing the name of Gilman Marston for Senator, and no amount of explanation would convince him that neither of the aspirants for Congressional honors were to be voted for in a direct manner. He was finally satisfied by the erasure of Mr. Frink's name and the substitution of Gen. Marston's, and thus the latter gentleman received one vote for State Senator.

☞ The California Minstrels will give a good concert on Monday evening, as all can testify who have ever heard them.

FORTIFICATION BILL.—Among the appropriations are the following items for the New England States: For Fort Scammell, Portland, $35,000; Fort Georges, Portland, $50,000; Fort Constitution, Portsmouth, $75,000; Fort Winthrop, Boston, $30,000; Fort Warren, Boston, $25,000; sea wall of Great Brewster Island, Boston Harbor, $75,000; sea walls on Deer and Lovell's Islands, Boston Harbor, $50,000; fort at entrance of New Bedford Harbor, $30,000. No appropriation was made either for Fort Knox, on the Penobscot, or Fort Popham, on the Kennebec, in Maine, for the reason that there is an unexpended appropriation of $71,000 for the former, and of $31,000 for the latter work.

WASHINGTON ITEMS.—The King of Belgium has sent an Embassy to Washington to announce his accession to the Throne of that Kingdom.

Over 100 officers of the Veteran Reserve Corps were ordered on Wednesday to report for duty in the Freedmen's Bureau. This does not look like abandoning the Bureau.

The Ways and Means Committee will probably allow the income tax to remain as it is. It will increase the import duty on foreign wines at least 100 per cent.

☞ The Concord Monitor has received an account of the destruction by fire, on Wednesday evening, of the Norwich (Vt.) Military University. The libraries, paintings, and furniture were mostly saved. Amount of insurance not ascertained. The fire was supposed to have caught from a defective chimney. It is feared that this calamity will prove a death blow to an honored institution which has sent forth many brave men to battle for the nation.

☞ The Gloucester Telegraph of the 14th says that in the four days preceding thirty-one vessels had arrived from George's Banks, most of them with large fares. They have had good weather, and found fish plenty, bringing in upwards of a million pounds.

— The Cork Reporter says that emigration to the United States has already commenced on a large scale. It is not the poorer classes that are departing, but those who could live at home if they could only be taught to be content with their lot.

— A man in Buffalo was fatally stabbed the other day by a third party who interfered when he was breaking his wife's head with a bottle. Many a man breaks his wife's heart with a bottle with impunity.

— A Wednesday's Washington dispatch says Senator Saulsbury of Delaware appeared upon the floor of the Senate that afternoon in an offensive state of intoxication, and was removed by two Senators. Drunkenness is one of the vices of Washington.

— The demand for fractional currency exhibits a trifling loss. Not more than two hundred and seventy-five thousand dollars is expected to be issued this week. No reissues of three cent notes are being made; all are destroyed as fast as received at the department.

MAXIMILIAN'S EUROPEAN HOME.—A writer in Blackwood thus describes Miramar, Maximilian's palace in the Adriatic:

On a grand bold bluff over the Adriatic stands one of the most picturesque chateaux I ever beheld, almost covering the plateau, save where a little space is stolen from the projecting arms of the building for a flower knot or a fountain. It displays all that can be accomplished by irregular outline and varied color. Tower and minaret and buttress, projecting window and deep shadowing cornice, with ornamented architrave and stained glass, have done their very best, and made one of the most delightful houses to live in, and one of the handsomest to look at, in Europe. Splendid gardens lie to the rear, backed by a noble forest, stretching away to the foot of a mountain.

This elegant establishment was built by Maximilian, who lavished upon it all the resources which wealth and refined taste could command, to make it an earthly paradise; yet he has left this scene of peaceful enjoyment for the cares and dangers of imperial life among a hostile people. It is only another illustration of the restlessness of man, and the folly of preferring shadow to substance, and empty honor to substantial comfort.

THE STATE OF MATRIMONY is one of the United States. It is bounded by hugging and kissing on one side, and babies and cradles on the other. Its chief products are population, broomsticks, and staying out late o' nights. It was discovered by Adam and Eve, in trying to find a northern passage out of Paradise. The climate is sultry, till you pass the tropics of housekeeping, when equally weather generally sets in with such power as to make all hands as cool as cucumbers. For the principal roads to this interesting State, consult the first pair of bright eyes you run against.

SUFFERERS
From Dyspepsia.
READ! REFLECT!! ACT!!!
TARRANT & CO
Gentlemen. I am a resident of Curacoa, and have often been disposed to write advice concerning the real value of your SELTZER APERIENT as a remedy for indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.
For four or five years my wife has been sadly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to use the advice of a learned Physician, Doctor Cubinis, of Venezuela, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.
Feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.
Trusting that you will give this publicity, and repeating my earnest gratitude and thanks,
I am very respectfully yours,
S. D. C. HENRIQUER,
Merchant, Curacoa, S. A.
New York, June 28th, 1865.
WE ASK
The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of
Dyspepsia, Heartburn, Sour Stomach, Sick Headache, Dizziness, Indigestion, Piles, Costiveness, Bilious Attacks, Liver Complaints, Rhematic Affections, &c.
Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your Physician.

AMERICAN AND FOREIGN PATENTS.
R. H. EDDY,
Solicitor of Patents,
Late Agent of the U. S. Patent Office, Washington, under the Act of 1837,
78 State Street, opposite Kilby Street, BOSTON.
After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds, Assignments and all Papers or Drawing for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works to determine the validity or utility of patents or Inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.
The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The Testimonials below given prove that one is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the chances of successes so great as at his agency.
The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.
These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.
All necessary of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.
TESTIMONIALS.
"I regard Mr. Eddy as one of the most capable and successful practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.
"I have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents
Mr. R. H. Eddy has made for me THIRTEEN applications, on all but one of which patents have been granted, and that is now pending. Such unmistakeable proof of great talent and ability on his part leads me to recommend all inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."
JOHN TAGGART
During eight months, the subscriber, in course of his large practice, made on twelve rejected applications CAVEATS, EVERY ONE of which was decided in his favor, by the Commissioner of Patents. R. H. EDDY.

CHEROKEE CURE,
THE GREAT
INDIAN MEDICINE,
Cures all diseases caused by self-abuse, viz:—Spermatorrhœa, Seminal Weakness, Night-Emissions, Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Nervous Timidity, Insanity, Consumption, and all diseases that follow as a sequence of youthful indiscretions.
The Cherokee Cure will restore health and vigor, stop the emissions, and effect a permanent cure after all other medicines have failed. Thirty-two page pamphlet sent in a sealed envelope, free to any address.
Price $2 per bottle, or three bottles for $5. Sold by all druggists; or will be sent by express to any portion of the world, on receipt of price, by the sole proprietor,
Dr. W. R. MERWIN, 37 Walker St., N. Y.

Cherokee Remedy,
Cures all Urinary Complaints, viz: Gravel, Inflammation of the Bladder and Kidneys, Retention of Urine, Strictures of the Urethra, Dropsical Swellings, Brick Dust Deposits, and all diseases that require a diuretic, and when used in conjunction with the
CHEROKEE INJECTION,
does not fail to cure Gonorrhœa, Gleet and all Mucous Discharges, in Males or Females, curing recent cases in from one to three days, and is especially recommended in those cases of Fluor Albus or Whites in Females. The two medicines used in conjunction will not fail to remove this disagreeable complaint, and in those cases where other medicines have been used without success.
Price, Remedy, One Bottle, $2, Three Bottles, $5.
" Injection, " " $2, " " $5.
The Cherokee "Cure," "Remedy," and "Injection" are so well known and in all well regulated drug stores, and are recommended by physicians and druggists all over the world, for their intrinsic worth and merit. Some unprincipled dealers, however, try to deceive their customers, by selling cheap and worthless compounds,—in order to make money—in spite of them. Be not deceived. If the druggists will not buy them for you, write to us, and we will send them to you by express, securely packed and free from observation. We treat all diseases to which the human system is subject, and will be pleased to receive full and explicit statements from those who have failed to receive relief heretofore. Ladies or gentlemen can address us in perfect confidence. We desire to send our thirty-two page pamphlet free to every lady and gentleman in the land. Address all letters for pamphlets, medicines, or advice, to the sole proprietor,
Dr. W. R. MERWIN, 37 Walker St., N. Y.

DR BRISCOE'S FEMALE DROPS are unsurpassed by virtue and efficacy in removing all complaints, of whatever nature, incident to females. He continues, with his usual success, to medically and surgically remove Obstructions, Prolapsus, Leucorrhœa, Whites, Chronic Debility, &c., and suppressions of all kinds; also all complaints of the Lungs, Liver, Kidneys, Spleen, Bladder, &c.
His medicines will be sent to any part of the country by express or mail; addressed by a communication stating particulars, will receive prompt attention.
Office, No. 23 Endicott street.
Persons at a distance can consult Dr. Briscoe, by letter, describing the case, and have the medicines securely put up, and forwarded to any part of the United States, with full directions for use. Office arranged with separate apartments, so that patients see none but the Doctor himself.
Address Dr. Briscoe, at No. 23 Endicott St., Boston, Mass., stating symptoms. All communications are confidential.
Patients furnished with rooms and board if desired, and secresy observed in every case.
Office hours from 9 A. M. to 9 P. M.
Boston, July 16, 1865. ThSly
DR. R. M. BRISCOE still continues his successful treatment of all Private Diseases and also Female Complaints, at his old established office, No. 23 Endicott street.
N. B.—The sick and afflicted will do well to give him a call. A short consultation will cost you nothing, but a word of friendly advice may save you years of suffering.
P. S.—Ladies who wish to stay in the city under my care a few days, can be furnished with kind nurses. Charges moderate.

CHARACTERISTICS OF GRANT AND SHERMAN.—Professor D. H. Mahan, of West Point, under whose tuition Generals Grant and Sherman were when at West Point, publishes a letter giving some reminiscences of their student life, from which the following extract is taken:

Grant always showed himself a clear thinker and a steady worker. He belonged to the class of compactly strong men who went at their task at once, and kept at it until finished, never being seen, like the slack-twisted class, yawning, lolling on their elbows over their work, and looking as if just ready to sink down from mental inanity.

Sherman was the reverse of this in manner. Eager, impetuous, restless, he always worked with a will—being one of those of whom Byron says: "Quiet to quick souls is a hell." If he wasn't at work, he was in for mischief. If, while explaining a something to his class at the blackboard, I heard any slight disturbance, denoting some fun, I was seldom wrong, in turning round, in holding up my finger to Mr. Sherman. But one was more than repaid for any slight annoyance of this kind, by his irrepressible good nature, and by the clear thought and energy he threw into his work.

That he should accomplish something great, I was prepared to learn. But not so in Grant, whose round, cheery, boyish face, though marked with character and quiet manner, gave none of that evidence of what he has since shown he possesses.

Grant's mental machine is of the powerful low-pressure class, which condenses its own steam and consumes its own smoke; and which pushes steadily forward and drives all objects before it. Sherman's belongs to the high-pressure class, which lets off both with a puff and a cloud, and dashes at its work with resistless vigor, the result of a sound boiler and plenty of fuel.

The question is often put to me whether I look upon Grant and Sherman as great men. To this there is but one reply. Posterity alone, when the clouds raised by passion, prejudice and partisanship shall have been dissipated, and truth revealed in all her distinctness, will be competent to pronounce upon this point. But if great deeds, the results of high mental and moral powers, of magnanimity and generosity toward public and private enemies, are characteristics of greatness, then cannot the meed of this ennobling patent be withheld, in our own day, from either of these men.

VINELAND
FARM AND FRUIT LANDS.
In a mild and healthful climate. Thirty miles *south* of Philadelphia by Railroad, in New Jersey, on the same line of latitude as Baltimore, Md.
The soil is rich and *productive*, varying from a clay to a sandy loam, suitable for Wheat, Grass Grain, Tobacco, Fruits and Vegetables. This is a *great fruit country*. Five hundred Vineyards and Orchards have been planted out by experienced fruit-growers. Grapes, Peaches, Pears, &c., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste*. It has increased five thousand people within the past three years. Churches, Stores, Schools, Academies, Societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are constantly settling. Hundreds of new houses are being constructed. Price of farm land, twenty acre lots and upward, $25 per acre. Five and ten acre and Village lots for sale.
Fruits and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Yards, Manufactories, Foundries, Stores and the like; and Steam Power, with room, can be rented.
For persons who desire mild winters, a healthful climate, and a good soil, in a country beautifully improved, abounding in fruits, and possessing all other social privileges, in the heart of civilization, it is worthy of a trial.
Letters answered, and the Vineland Rural, a paper giving full information, and containing Reports of Solon Robinson, Agricultural Editor of The Tribune: *It is one of the most extensive fertile tracts, in an almost level position and suitable condition, for pleasant farming that we know of this side of the Western Prairies.* m1—dawGm

THE LIGHT OF THE WORLD.
DR. MAGGIEL'S
PILLS AND SALVE
These Life-giving remedies are now, for the first time, given publicly to the world. For over a quarter of a century of private practice the ingredients in these

Life-giving Pills!
Have been used with the greatest success. Their mission is not only to prevent disease, but to cure. They search out the various maladies by which the patient is suffering, and re-invigorate the failing system. To the aged and infirm a few doses of these valuable PILLS will prove to be

A Very Fountain of Youth,
For in every case they add new life and vitality, and restore the waning energies to their pristine state. To the young and middle aged, they will prove most invaluable, as a ready, specific, and sterling medicine. Here is a dream realized, that Ponce-de-Leon sought for three hundred years ago, and never found. He looked for a fountain that would restore the old to youth and make youth ever

AN ETERNAL SPRING!
It was left for this day and hour to realize the dream, and show, in one glorious fact, the magic that made it fair.

These Famous Remedies
Cannot stay the flight of years, but they can force back, and hold aloof, diseases that might triumph over the aged and the young. Let none hesitate then, but seize the favorable opportunity that offers. When taken as prescribed—

FOR BILIOUS DISORDERS
Nothing can be more productive of cure than these Pills. Their almost magic influence is felt at once; and the usual concomitants of this most distressing disease are removed. These remedies are made from the purest
VEGETABLE COMPOUNDS.
They will not harm the most delicate female, and can be given with good effect in prescribed doses to the youngest babe.

For Cutaneous Disorders
And all eruptions of the skin, the SALVE is most invaluable. It does not heal externally alone, but penetrates with the most searching effects to the very root of the evil.

SATURDAY, MARCH 17, 1866.

THE PRESIDENT AND CONNECTICUT.—An item in the papers a day or two ago, stated that the postmaster at Forrestville, Ct., has been removed on a charge of speaking disrespectfully of the President.

Now the Washington Republican is *authorized* to say that the President has *not* authorized the removal of some postmasters in Connecticut who are hostile to him. But one postmaster has been removed in that whole State for sometime past, and that man was removed because he denounced the President as a "scoundrel and traitor," upon which the leading citizens of the place petitioned for his removal, which the Postmaster General at once ordered. The President was not even aware of the removal, much less a party to it.

[We are glad to hear it; it is not worth while to charge the president with any sins of which he is not guilty. The above false story, we suppose, was invented to help the copperheads, and make republicans in New Hampshire or Connecticut, either indignant or discouraged.

The Washington special of the Boston Herald said a day or two ago: "The President has informed several Congressmen that he will remove every office-holder who denounces him as a traitor or assassin. Seventy-five Republicans have signed a request for the removal of a Connecticut postmaster who used such language."

This latter statement, no doubt, relates to the case just mentioned above, of which the president knew nothing. It seems absurd to charge Mr. Johnson with being an *assassin;* and we don't believe any one has done so; though it is thought by a great many persons, and said by some (though not by any U. S. officers about here,) that he has come very near committing suicide.]

NEW HAMPSHIRE ITEMS.

—— Rev Henry S. Kimball of Manchester has accepted a call to settle over the Freewill Baptist Church in Sutton.

—— A coppery dispatch from Concord, to the Boston Herald, says:

Returns from 170 towns give Smyth 30,070, Sinclair 25,256. The remaining towns will give some 15,000 votes, and reduce Smyth's majority of last year from 6070 to 4600. The Republicans here, however, insist on a majority of 5000.

☞ At New Haven, Conn., Wednesday evening, Hon. Eli Thayer, formerly member of Congress from the Worcester (Mass.) district, addressed the Democrats in Music Hall. He maintained that all the members elect from the South ought to be admitted to Congress, and said the object of the government is to let the people alone and make them let each other alone. He said the Republicans were entitled to no credit for subduing the rebellion, for it might and ought to have been put down in a year. If an energetic man had been President, the war would have been finished in 1862. He denounced the Freedmen's Bureau bill, advocated free trade, and urged that the paper money ought to be issued by the Treasury at Washington. He closed by challenging Mr. Sumner or any other man to a debate before the people of Connecticut.

[No one will choose to debate with such a crazy man as could say such things to a meeting of Democrats, who voted for the Dolittle or Donothing Gen. McClellan, and who did not wish the rebellion subdued at all.]

☞ The fact that Gov. Bullock has appointed the day for the execution of Green, the Malden murderer, seems to have satisfied the public mind that justice would at last be meted out to that criminal, but high officials in Massachusetts are by no means so sanguine that the execution of the prisoner will be allowed to proceed, if by any human possibility the hangman's hitch can be superseded by any legal hitch.

GOLD, Friday, 130 3 8.

— On Sunday night a fearful land slide took place at Pittsburg Rocks, estimated to weigh about 6000 tons, covering the Connellsville railroad track for a distance of 100 feet, and fell upon a portion of the rolling mill of Everson, Preston & Co., crushing it and destroying the machinery.

— An Iron theatre with a hotel attached to be erected at the new gold field of Hokitika, New Zealand, will be built in Sydney and carried down in pieces. The hotel is to be fitted up with every convenience. The soap used will be of the very finest cast steel, and the hams will be cured from the best pigs of Iron.

— It is announced in the fashionable saloons of St. Petersburg that Princess Catharine, whose oldest sister Alexandra, is wife to the Emperor's brother, Nicholas, has conceived a violent attachment for the son of one of the grandest of grand seigneurs, Count Sheremetieff; that her mother, who is daughter to the Grand Duke of Nassau, is violently opposed to the match, and that the young lady threatens to go into consumption if she is not allowed to espouse the object of her choice.

☞ At a Republican Meeting in Manchester, on the evening after the election, Judge Upton said:

He considered the issue upon which the State had just pronounced in this election, to be one of the most important ever met, and thought that the Government had made a grand mistake in not asking from the South, at the time of Lee's surrender, full guarantees for loyalty. He thought that about the only evidence the Copperheads had that they had won over President Johnson, was found in the fact that he had paid the funeral expenses of four of them—assassins of Mr. Lincoln—and had appointed others to private situations in Fortress Monroe, at the expense of the nation. If they were satisfied with this evidence, so was he.

Gen. E. W. Hinks being called to the stand, said he had been invited to remain and witness the burial of the Democratic party. On seeing the returns from this city, he had almost made up his mind that it was to be a pretty lively funeral, in which the deceased might possibly vie with the mourners, but the returns from the country towns had reassured him. Judging from these returns, the State, by a majority of 5000 votes, had decided—not from a momentary enthusiasm, but from calm convictions—that the Southern men who asked to be admitted to Congress should stay out until they have purged themselves of treason.

It has decided that the President should stand by the principles on which he was elected. The Republican party is not to be dissolved, and the fruits of its victories given to the Democracy. It was a decision in consonance with those of New Jersey, Pennsylvania, New York, the great Northwest, Maryland, and every election since the war.

WASHINGTON ITEMS.—The Boston Herald's Washington special of the 14th, says: "Gov. Curtin, of Pennsylvania, had a protracted interview with the President to-day, after which he informed a friend that he should sustain the President." [How far? and in what?]

Senator Doolittle is drafting a new Freedmen's Bureau bill, which corresponds with the views of the President.

The Committee on Reconstruction has reported the testimony of Gen. Custar, who states that he has travelled all over Texas, and found the masses of the people exceedingly bitter against the government, more so than fire or six months ago. He mentions among other facts that the grand juries have, during the few months past, found five hundred indictments for murder of Union men and others, but not one of the guilty parties have been convicted.

The Washington correspondent of the Baltimore Sun says the President is very angry over Thad. Stevens' speech on Saturday, and has commented upon it in a defiant manner.

[He may defy Thad., but he can't destroy the laughter of everybody over the hard hits. Angry petulance is not very dignified; and if great men can't bear ridicule, they should not make themselves appear ridiculous.]

LONDON ITEMS.—In the House of Commons on the 2d, Mr. Gregory moved an address to the Queen in favor of establishing the principle that private property at sea should be free from capture. He said it was almost suicidal for England to allow things to remain as they are, for in the event of a war she might lose her entire carrying trade. The question was debated *pro* and *con* by numerous speakers. The motion was finally withdrawn.

The West India mails, with Jamaica dates of Feb. 8th, have reached England. The papers published voluminous details of the proceedings of the special commission from special correspondents.

The correspondent of the Star says the sober truth is more frightful than the wildest imagination could have conceived.

The Daily News says the first impressions of terrible and unanswerable cruelty are undoubtedly confirmed by the evidence.

A scandalous divorce case has been tried in London. The petitioner was Mr. Cavendish, whose wife, a daughter of Lord Clare, eloped with Lord Cecil Gordon. The jury gave Mr. Cavandish a verdict for £10,000 sterling damages.

☞ Since the great feat late last fall, in which the horse "Captain McGowan" trotted twenty miles, in harness, within an hour, and beat Trustee's time, there has been a good deal of curiosity respecting him. The Captain is a horse of singular appearance and turbulent habits, as well as enormous bottom, and Bufford & Co., of Boston, have got out a fine picture of him trotting the twentieth mile of that famous feat. He is going with a slashing gait, and there is evidently a little weight upon the arms of his driver, Bowen. It is hardly credible to those who do not know the horse, but a fact, nevertheless, that when pulled up at the end of the twenty miles, he cared no more for the performance than common horses do for a mile heat.

— It is somewhat singular that the Legislatures of Maine and Missouri, which came into the Union together as opposing forces, should on the same day ratify the Constitutional amendment, and also on the same day pass resolutions sustaining the action of Congress on the Freedmen's Bureau bill.

— There are now in the vaults of the Treasury about $14,000,000 in notes and coin, which is the largest sum they have ever contained.

CONDITION OF THE SEA ISLANDS.—General Howard has received an interesting report from General Tillson, who was sent to inspect the condition of the freedmen on the Sea Islands. He states that all the questions in dispute between the freed people on the islands and the former white inhabitants are now amicably settled; those having grants of land have had them consolidated on one part of the island upon which they were given, as directed in Special Field Order No. 3:

In addition to these satisfactory results, a saving of from 6000 to 8000 rations per month to the Government has been effected.

The Assistant Commissioner feats that, owing to the want of implements, seeds, animals and food, the freedmen having grants of land will fail in raising a fair crop. There are scarcely three families of freed people on the Sea Islands whose grants of land are of any value whatever. Land is abundant enough, but labor is scarce and commands a very high price; and he thinks the freedmen would find it much more to their advantage to go to work for wages than to attempt to cultivate land for themselves with inadequate means. He is fully convinced from personal examination that the question over which there has been so much dispute as to whether or not the freedmen shall retain their lands for a few years has ceased—from the cheapness of land and the scarcity of labor—to be of the slightest consequence to them. He says that the real want in that State is a sufficient military force to insure the prompt arrest of criminals, and such an organization of the United States Courts as shall enable the people, white and black, to stand on an equality before the law and obtain justice.

JAMAICA.—Late advices from Jamaica state that the examination into the particulars of the late revolt has already included the testimony of over six hundred witnesses, including Governor Eyre himself, and that there were yet a thousand to examine. The evidence was beginning to bear more strongly against Governor Eyre in regard to the severe measures taken by him to suppress the outbreak, and it was thought probable that the result of the investigation would at least be fatal to his reputation.

☞ On Thursday, the U. S. Senate concurred in the amendments of the House to the bill for the protection of all persons in the United States in their civil rights, and for furnishing the means of their vindication. Mr. Garrett Davis spoke for an hour opposing the bill, and it was then passed. It is not believed that the President will sign the bill, although some think that he will since it has been amended.

The House commenced the consideration of an Indemnity bill to protect government officials from civil writs and prosecutions for their official acts. Mr. Conkling urged some legislation on this subject as necessary for the protection of the Secretary of War.

— The Pithole oil wells are yielding eyeless fish.

— A horrid and almost unheard-of horse incident occurred in Beloit, Wisconsin, recently. A pair of matched horses, were standing in adjoining stalls in apparent good friendship. In the morning, one of the pair would not eat, and upon examination it was found that he had four or five inches of his tongue bitten off, apparently by his mate, as the piece of tongue was found in his mate's manger.

— The J. Monroe Taylor Gold Medal Soap has acquired pre-eminence over all other soaps, in point of utility and economy, from the wash-tub to the printer's devil. It is without doubt the best soap made; it has many inferior imitations, but no rivals, and can be safely said to be ahead of all others. 60

Perry's Moth and Freckle Lotion.

☞ Chloasma, or Mothpatch, (also called Liverspot,) and Lentigo, or Freckles, are often very annoying, particularly to ladies of light complexion, for the discolored spots show more plainly on the face of a blonde than of a brunette; but they greatly mar the beauty of either and any preparation that will effectually remove them, *without injuring the texture or color of the skin*, is certainly a desideratum. DR. B. C. PERRY, who has made diseases of the skin a specialty, has discovered a remedy for these discolorations, which is at once prompt, infallible and harmless.

Prepared by B. C. PERRY, Dermatologist, No. 49 Bond Street, New York, and for sale by all druggists; price $2 per bottle. Call for PERRY'S MOTH & FRECKLE LOTION.

Sold by all Druggists in Portsmouth and elsewhere. 1yeudaw—oct19

MAGGIEL'S

Spring and Summer Remedies.

"Great oaks from little acorns grow." The worst diseases known to the human race spring from causes so small as to almost defy detection. The volumes of scientific lore that fill the tables and shelves of the medical fraternity only go to prove and elaborate these facts. Then guard yourselves while you may. The smallest pimple on the skin is a tell tale and indicator of disease. It may fade and die away from the surface of the body, but it will reach the vitals, perhaps, at last, and death be the result and final close. MAGGIEL'S BILIOUS, DYSPEPTIC and DIARRHŒA PILLS cure where all others fail. While for Burns, Scalds, Chilblains, Cuts, and all abrasions of the skin, MAGGIEL'S SALVE is infallible. Sold by J. MAGGIEL, 42 Fulton street, New York, PRESTON and THATCHER in this city, and all Druggists, at 25 cents per box. deoeeod&wly

A Card to Invalids.

A Clergyman, while residing in South America as a missionary, discovered a safe and simple remedy for the Cure of Nervous Weakness, Early Decay, Diseases of the Urinary and Seminal Organs, and the whole train of disorders brought on by baneful and vicious habits. Great numbers have been already cured by this noble remedy. Prompted by a desire to benefit the afflicted and unfortunate, I will send the recipe for preparing and using this medicine, in a sealed envelope, to any one who needs it, *free of charge.*

Lyon's Periodical Drops!

THE GREAT FEMALE REMEDY FOR IRREGULARITIES.

These Drops are a scientifically compounded fluid preparation, and better than any Pills, Powders or Nostrums. Being liquid, their action is direct and positive, rendering them a reliable, speedy and certain specific for the cure of all obstructions and suppressions of nature. Their popularity is indicated by the fact that over 100,000 bottles are annually sold and consumed by the ladies of the United States, every one of whom speak in the strongest terms of praise of their great merits. They are rapidly taking the place of every other Female Remedy, and are considered by all who know aught of them, as the surest, safest and most infallible preparation in the world, for the cure of all female complaints, the removal of all obstructions of nature, and the promotion of health, regularity and strength. Explicit directions stating when they should not, nor could not be used without producing effects contrary to nature's chosen laws, will be found carefully folded around each bottle, with the written signature of DR. LYON, without which none are genuine. **Price $1.50.**

Prepared by Dr. JOHN L. LYON, 195 Chapel Street, New Haven, Conn., who can be consulted either personally, or by mail, (enclosing stamp,) concerning all private diseases and female weaknesses. **Price $1.50 per bottle.**

Sold by Druggists everywhere.

PROMPT PAYMENT.—We are authorized to state that the agent of the Continental Life Insurance Co., of Hartford, Conn., Mr. George N. Loomis, of this city, paid—within two days from the notification of a loss by death—the insurance of a person whose life had only been insured some three months. Such prompt payment of a loss is not often met with; and we take pleasure in calling the attention of the community to a Company who are so prompt in their delivery.

☞ Even in these days of astounding rascality some persons still cling to their faith in human nature. Our reporter while entering the Journal Office, during the heavy rain yesterday, noticed an umbrella leaning against the outside door, left there by some unsuspecting individual. So irresistible is the penchant for appropriating this species of property, that it was with difficulty he refrained from taking it, but his moral education in early youth triumphed, and he hopes that after comers were equally successful in resisting temptation and that the owner was not rudely awakened from his dream of security by the disappearance of his parachute.

☞ A small audience was inveigled into the Temple on Thursday evening to listen to a concert by "The Virginia Minstrels," a troupe that "challenge the world." Composed of four darkies who probably have never been nearer the Old Dominion than Richmond street, in Boston, the *troupe* tortured their victims in such a manner that long ere the programme was completed the audience had nearly melted away. A man would be poor, indeed, with a plantation stocked with such "trash."

☞ Union Hall held a good audience on Thursday evening, to listen to Mr. Crowley's lecture on Fenianism. The speaker, though worn down by constant speaking of late, shew himself to be a young man of capability, and earnest for the good cause in which he is engaged.

☞ The large and convenient premises on Pleasant Street, known as the Mugridge House, are to be sold at Auction at noon to-day.

Also, the Martine Farm, on Sagamore Creek, next Tuesday.

Also, sales at the stores of Messrs. Betton & Co., and Mr. Wendell, this morning.

POLICE COURT, March 16.—John Leary, for being drunk on Pleasant street, received the usual fine of $6.86. Now that the famous "444" is no more, "686" seems destined hereafter to become an equally well known number.

☞ In consequence of the prevalence of the horrible pork disease styled *trichina*, which may, through meteorological influences, unhappily prove to be epidemical in its nature, certain nervous and susceptible people have lately confined themselves very closely within doors, from fear that this disorder may go in the air while the wind holds *sou' west by sou'*.

P. S.—The wind has considerately changed. N.

A REMARKABLE COURT INCIDENT.—In the Court of Common Pleas, Boston, on Tuesday last, a case was under trial in which the sum of about $50 was in dispute. It had occupied the greater part of Monday, and there was a fair prospect that it would take nearly all of Tuesday to conclude. An important case was next on the calendar. A proposition was made by counsel in the latter action to pay the amount—$50—in dispute, if the other trial were abandoned at once. The proposition was accepted, and the litigants with their counsel in the $50 suit, left the Court, the Judge very aptly remarking, "Blessed are the peacemakers!"

THE CAPTURE OF RICHMOND.—The Richmond Whig says there will not be left an unridden beast in that city on the 3d of April, anniversary of the entry of the United States troops into Richmond, so eager are freedmen to procure them for the celebration which they propose giving on that day in honor of the event.

— Cleveland has no water to drink. The petroleum refineries throw their waste into the river, and the result is that the water supply is fouled past remedy. Even the ice which has been cut for use next summer is impregnated with oil. It is proposed to extend pipes far out into the lake, in imitation of Chicago.

— In Marylebone Co. Court, Eng., it has been decided that if a railway passenger find a purse, or watch, or trinket, or any similar article, for which, if lost, the railway company would not be responsible, he has a right to retain it against all the world excepting the rightful owner.

— A few days ago a highly respectable Friend was disowned by the monthly meeting of New York Friends, for having a piano in his house.

— An explosion of "fire damp" took place in the Chicago lake tunnel on Sunday night, and two of the laborers were severely burned.

— According to the Lynn Reporter the firm of C. A. Johnson & Co., of that town, cut up last year thirty thousand two hundred and fifty sides of leather, producing not far from one million six hundred thousand pairs of soles, of various sizes and qualities.

— The Massachusetts State Constables, aided by the police of Taunton, seized the stocks of liquor in the shops of James Greenan, Edward Galligan and John Hoyt, in that city—about a thousand gallons in each place.

— The statement that there was a plot to assassinate Gov. Brownlow of Tennessee was not a canard. The prime mover in it has been arrested at Grenada, Miss., and is now on the way to Nashville, where he will be tried by a Military Commission.

— The vegetable gardens near Norfolk, Va., promise large crops, especially of early potatoes and tomatoes.

PHOTOLEUM.

This is a new discovery, the product of Petroleum, and affords the very best light of this enlightened age, has been thoroughly tested, and is offered with confidence as the most *cheap, safe* and *valuable* illuminating oil ever before the public, giving a *soft, steady* and *brilliant* flame, surpassing our gas-light for reading and leaving all other oils far out of sight. It needs but a trial to convince the most skeptical of its superiority. *Photoleum* emits no sooting odor when burning, even with the smallest flame, rendering it invaluable in a sick room, neither does it char the wick or smoke the chimney, so that once trimming will suffice for a week or more. Photoleum produces a flame that does *not diminish*, but continues the same until every drop of oil is consumed. It is, therefore, very desirable for lighting churches, railroad and horse cars, manufactories and public buildings. The public are invited to call and examine.

Manufactured and for sale by the AMERICAN PHOTOLEUM COMPANY. Office at C. F. WYMAN & CO.'s, 87 Water Street, Boston.

Important.

DR. STEVENS, No 5 Daniel Street, would give notice that he has REDUCED the price of Permanent Sets of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.

He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite alone, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the Teeth. mh12

GEORGE F. WEED,

S-u-r-g-e-o-n D-e-n-t-i-s-t,

FIRST ASSISTANT in the Office of DR. STEVENS, No. 5 DANIEL STREET.

DR. WEED can be found at his place of business at all hours of the day and night, for the performance of any of the operations that come within the call of his profession.

Dr. A. P. STEVENS, No. 5 Daniel St., makes the saving of UNCRATED and painful front teeth, a speciality in his business. He also successfully restores to their natural shape broken or badly decayed teeth, by building out corners and sides with PURE GOLD. (In many cases teeth so restored are as strong as any of their brother members, and in all cases are rendered eminently useful for a long series of years.) DISEASED TEETH, in all stages, treated, and in a very large majority of cases entire success attained.

Charges for such operations necessarily high, but nothing in comparison to the value of the Teeth. mch14

DENTAL NOTICE!

No. 60 Congress Street.

Having adopted the C. O. D. system of doing business, **Dr. E. B. GOODALL** informs his patients and the public that he now inserts whole sets of block teeth on VULCANITE BASE for $30.00 each (upper and lower,) and warrants them as good and as serviceable as sets on GOLD, which cost more than double the above.

He also keeps a fresh supply of PURE NITROUS OXYDE GAS to answer the numerous calls for this popular anæsthetic; and administers PURE ETHER, when desirable.

All other operations in Dentistry performed at reasonable remuneration. mch14

SAD AFFAIR.—In Roanoke county, Va., last week, two ladies living alone were preparing to retire one evening, when a rap was heard at the door, and no response being given to the inquiry as to who was there, one of the ladies dropped dead from sheer fright. The other uttered a scream, when the door was thrown open and in walked a brother of the ladies, who had been mourned as dead for nearly three years, and who had intended to surprise his sisters by not making himself known till they had admitted him. His grief at the result of his freak may be imagined.

— Anti-monopoly meetings are constantly held through the West. At Orland, Cook county, (Ill.) the farmers have formed a league for the purpose of working in concert towards the reduction of the present evil. SUFFERERS
From Dyspepsia
READ! REFLECT!! ACT!!!
TARRANT & CO
Gentlemen, I am a resident of Curacoa, and have often been disposed to write to you concerning the real value of your SELTZER APERIENT as a remedy for Indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.
For four or five years my wife has been sadly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Cabalda, of Venezuela, who immediately prescribed with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.
I feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.
Trusting that you will give this publicity, and repeating my earnest gratitude and thanks,
I am very respectfully yours,
S. D. C. HENRIQUEZ,
Merchant, Curacoa, S. A,
New York, June 28th, 1865.

WE ASK
The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of
Dyspepsia, Heartburn, Sour Stomach, Sick Headache, Dizziness, Indigestion, Piles, Costiveness, Bilious Attacks, Liver Complaints, Rheumatic Affections, &c.
Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your Physician.

AMERICAN AND FOREIGN PATENTS.
R. H. EDDY,
Solicitor of Patents,
Late Agent of the U. S. Patent Office, Washington, under the Act of 1857,
78 State Street, opposite Kilby Street, BOSTON.
After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Reveats, Specifications, Bonds, Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all cases touching the same. Opinions of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.
The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The testimonials here given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE RESULT OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that no other office of the kind are the charges for professional service so moderate.
The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.
These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.
All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.
TESTIMONIALS.
"I regard Mr. Eddy as one of the most capable and successful practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.
"I have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents
Mr. R. H. Eddy has made for me THIRTEEN applications, on all but ONE of which patents have been granted, and that is now pending. Such unmistakable proof of great talent and ability on his part leads me to recommend all inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."
JOHN TAGGART
During eight months, the subscriber, in course of his large practice, made on twelve rejected applications SIXTEEN APPEALS, EVERY ONE of which was decided in his favor, by the Commissioner of Patents.
R. H. EDDY.

—DEALERS IN—
S. Vance's Submerged Well PUMP,
This unsurpassable invention, now being first introduced, will, it is believed, supersede all other Well Pumps now in use.
ITS ADVANTAGES.
First, SIMPLICITY.—This Pump is composed of but three parts, and is so simple in its construction that any one can easily put it together.
Second, DURABILITY.—Its peculiar construction, and the fact that it is always submerged combine to make it the most durable of all Pumps yet invented.
Third, NEVER FREEZES.—The valves are so constructed that, when not in motion, they allow all the water above to pass down into the well, and thus prevent freezing.
Fourth, POWER.—For the amount of power applied, this Pump excels anything known. It throws one-third part more water than ordinary pumps, and works so easily that a child can pump without fatigue. It is in this way the greatest labor-saving pump now offered to the public.
Fifth, IT IS INVALUABLE.—For a well pump it is invaluable, as all the iron which is submerged consists of but three small pieces, and brass galvanized. It can in no way corrode, consequently it brings up pure water at every stroke.
Sixth, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to keep in use for years. No repairs at all are needed. It is very light, and thus the cost of transportation is very small.
☞ Manufactured by S. VANCE & CO., No. 31 Liberty Street, Newburyport, and for sale in Portsmouth by the Sole Agents for N. H.,

☞ We are permitted to refer to Mr. MONROE HOLMES and to Mr. FRANK W. MILLER of the Daily Chronicle, who have these new Pumps in use on their premises,—for testimony to their excellence.

CHEROKEE CURE,
THE GREAT
INDIAN MEDICINE,
Cures all diseases caused by self-abuse, viz:—Spermatorrhea, Seminal Weakness, Night Sweats, Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Pale Countenance, Insanity, Consumption, and all diseases that follow as a sequence of youthful indiscretions.
The Indian Medicine will restore health and vigor, stop the emissions, and effect a permanent cure after all other medicines have failed. Thirty-two page pamphlet sent in a sealed envelope, free to any address.
Price $2 per bottle, or three bottles for $5. Sold by druggists; or will be sent by express to any portion of the world, on receipt of price, by the sole proprietor,
Dr. W. R. MEEWIN, 37 Walker St., N. Y.

Cherokee Remedy,
Cures all Urinary Complaints, viz:—Gleet, Inflammation of the Bladder and Kidneys, Retention of Urine, Stricture of the Urethra, Tropical Swellings, Brick Dust Deposits, and all diseases that require a diuretic, and when used in conjunction with the
CHEROKEE INJECTION,
does not fail to cure Gonorrhea, Gleet and all Mucous Discharges in Male or Female, curing recent cases in from one to three days, and is especially recommended in those cases of Fluor Albus or Whites in Females. The two medicines used in conjunction will not fail to remove the most obstinate complaint, and in those cases where other medicines have been used without success.
Price, Remedy, One Bottle, $2, Three Bottles, $5.
" Injection, " " $2, " " $5.
The Cherokee "Cure," "Remedy," and "Injection" are to be found in all well regulated drug stores, and are recommended by physicians and druggists all over the world, for their intrinsic worth and merit. Some unprincipled dealers, however, try to deceive the public, by selling cheap and worthless compounds,—in order to make money—in place of these. Be not deceived. If the druggists do not buy them for you, write to us, and we will send them to you by express, securely packed and free from observation. We treat all diseases to which the human system is subject, and will be pleased to receive full and explicit statements from those who have failed to receive relief heretofore. Ladies or gentlemen can address us in perfect confidence. We desire to send our thirty-two page pamphlet free to every lady and gentleman in the land. Address all letters for pamphlets, medicines, or advice, to the sole proprietor,
Dr. W. R. MEEWIN, 37 Walker St., N. Y.

The Chronicle.

AN AFFECTING SCENE.—On Monday night Mr. McKean Buchanan and his daughter Virginia, were announced for "Hamlet" at Terre Haute. Mrs. Buchanan was at the time lying very dangerously ill at the Terre Haute House, of neuralgia of the heart. After the first scene it was announced that Miss B. would not be able to appear as "Ophelia," on account of her mother's sickness, and if the play went on her part would have to be omitted. The audience desired the play to proceed, but when Mr. Buchanan appeared, and commenced the soliloquy "To be or not to be," he was noticed to lack his usual fire and energy. He had not proceeded half a dozen lines when his faltering voice broke, and falling into a chair, he exclaimed—"My wife is dying—take your money—run down the curtain—I cannot play!" and the audience slowly and sadly dispersed. Mrs. Buchanan was dead when her husband reached the hotel.

GEN. BANKS.—Some of the semi-Copperhead papers have intimated that Gen. Banks is inclined to sell out his constituents to the enemy, and lend his aid and influence to a policy which would admit the Southern representatives at once, without ceremony. No one, of course, but those who wished it might be true, believed it. Mr. Baldwin, Representative from the Worcester district, in a letter written March 13, alludes to these rumors, and says: "I assure you, on the highest authority, that it is his [Gen. Banks] purpose to stand by the views expressed in his speeches delivered at the time of his election to Congress, and thus faithfully represent his constituents."

Important to the Afflicted.
DR. DOW continues to be consulted at his office, Nos. 7 and 9 ENDICOTT STREET, BOSTON, on all diseases of a PRIVATE OR DELICATE NATURE. By a long course (twenty years) practical experience of unlimited extent, Dr. D. has now the gratification of presenting the unfortunate with remedies that have never, since he first introduced them, failed to cure the most alarming cases of GONORRHŒA AND SYPHILIS!
SEMINAL WEAKNESS—Dr. Dow devotes a great part of his time to the treatment of those cases caused by a secret and solitary habit, which ruins the body and mind, unfitting the unfortunate individual for business or society. Patients who wish to remain under Dr. Dow's treatment a few days or weeks, will be furnished with pleasant rooms, and charges for board moderate.—Medicines sent to all parts of the country, with full directions for use, on receiving descriptions of your cases. Dr. Dow has also for sale the French Capottes, warranted the best preventive. Order by mail. Three or $1 and a red stamp.

Highly Important to Females
IN DELICATE HEALTH.
Dr. DOW, Physician and Surgeon, No. 7 Endicott Street, Boston, is consulted daily for all diseases incident to the female system. Dr. Dow has no doubt had greater experience in the cure of diseases of women than any other physician in Boston. Boarding accommodations for patients who may wish to stay in Boston a few days under his treatment. Dr. Dow, since 1845, having confined his whole attention to an office practice for the cure of Private Diseases and Female Complaints, acknowledges no superior in the United States.
N. B.—All letters must contain one dollar, or they will not be answered. Office hours from 8 A. M. to 9 P. M.

CERTAIN CURE
in all cases, or No Charges Made.
Among the physicians in Boston, none stand higher in the profession than the celebrated DR. DOW, No. 7 Endicott street. Those who need the service of an experienced physician and surgeon should give him a call.
P. S.—Dr. Dow imports and has for sale a new article, called the FRENCH SECRET. Order by mail. Two for $1 and a red stamp.

The soil is rich and *productive*, varying from a clay to a sandy loam, suitable for Wheat, Grass Corn, Tobacco, Fruits and Vegetables. This is a *great fruit country*. Vineyards of Ten Acres and Orchards have been planted out by experienced fruit-growers. Grapes, Peaches, Pears, &c., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste*. It has increased five thousand people within the past three years. Churches, Stores, Schools, Academies, Societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are constantly settling. Hundreds of new houses are being constructed. Price of Farm land, twenty acre lots and upward, $25 per acre. Five and ten acre and Village lots for sale.
Fruits and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Cards, Manufactories, Foundries, Stores and the like; and Steam Power, with room, can be rented.
For persons who desire mild winters, a healthful climate, and a good, $25 per acre, beautifully improved, abounding in fruits, and possessing all other social privileges, in the heart of civilization, it is worthy of a visit.
Letters answered, and the Vineland Rural, a paper giving full information, and containing Reports of Solon Robinson, sent to applicants.
Address CHAS. K. LANDIS, Vineland P. O., Landis Township, New Jersey.
From Report of Solon Robinson, Agricultural Editor of The Tribune: "*I know of no more extensive fertile tracts, in an almost level position and suitable condition for pleasant farming that we know of this side of the Western Prairies.*" m1—dawtu

Morning Chronicle.

Portsmouth, N. H.

MONDAY, MARCH 19, 1866.

☞ The Alden Type Setting and Distributing Machine, is pronounced one of the most wonderful inventions of modern times, or of all times; and such authorities as the Scientific American, New York Tribune and Citizen, &c., declare it second only in importance to the invention of the art of printing itself, and as certain to produce an era in the profession and all interests connected therewith.

Charles C. Yeaton, Esq., formerly of this city, is Superintendent for the corporation owning the patent and which manufactures the machines; and to his great skill, untiring enterprise and indomitable perseverance, is the world indebted for this valuable invention. Frank Leslie's Illustrated Newspaper recently gave a life-like (and so of course very handsome) portrait of our old friend Yeaton, with a sketch of his life and experiences, especially in connection with the Type Setter.

Several of the Machines are at work in New York, and Miles O'Reilley's "Citizen" newspaper has ordered three of them, and says that "before ten years we shall probably look back on the present system of setting and distributing type by hand, as an irksome and tedious imposition of a less civilized past."

We learn that patents have already been procured for the protection of the invention in all the leading countries of Europe; and, in connection with its manufacture, Mr. Yeaton has published a most remarkable volume, of great size, and costing we believe no less than $1500 for one hundred copies,—giving (with details of weight, form, size and cost) exact illustrations of every portion of the machine and the tools requisite to make the same in the factory; each portion of the mechanism being numbered, and all so exactly and precisely similar as to be interchangeable through a thousand machines by simply calling for the number which each portion bears. No volume more remarkable has been produced in the entire history of our manufactures, its directions and illustrations being so perfect that any good mechanic in any part of the world, even without previous experience, could produce an exact and perfect Alden Machine by simply following its directions.

In the U. S. Senate, Friday, March 16, Mr. Stewart introduced a series of resolutions declaring in favor of universal suffrage in return for universal amnesty. Ordered to be printed.—This is a remarkable movement, as Stewart is one of the three or four special "supporters of the President's policy," in the Senate. Perley says, "They caused quite a sensation when first made known, as it was rumored that the President approved of them. After careful inquiry I am convinced that Mr. Johnson knew nothing of them when they were presented, and that he does not approve of them. Perhaps Mr. Henry S. Foote, late of the rebel Congress, who is father-in-law of Mr. Stewart, had a hand in their preparation. They certainly indicate which way the tide of events is setting," i. e. towards freedom.

The Boston Advertiser's correspondent says that Stewart is silent as to the President's approval of the resolutions, but says they have been *read* to him: and adds, that whether they define the President's position or not, the debate shows that Stewart hereafter acts with the Union men in the Senate.

The Senate passed the Deficiency Bill.

The House, 65 to 70, after a protracted session, lasting until nearly midnight, defeated Sec. McCulloch's Loan Bill.

The Reno Oil and Land Company. In another column will be found the advertisement of this Company. The Company proposes to build a town in the very heart of the great Venango Oil Region, and to develop an estate of twelve hundred acres. No royalties or leases are given on the wells. To thoroughly test it, the Company has a working capital of half a million of dollars.

The feature in this Company which will recommend it is the guarantee of the stock. The capital is placed in the Government Treasury, or invested in Government securities, and kept there until the land pays its full value in dividends. Then only does the guarantee cease. The party still retains his stock. If the holder wishes to withdraw his money, he can take his stock to the office and receive its par value. The wells sunk upon the property thus far have proved productive, and there seems to be every reason for believing that the anticipations of the managers will be realized. A national guaranteed legal tender oil stock is a novelty in our finance. Such a stock is Reno.

— the net Republican gain in the New York town elections thus far over those of last year is forty-two.

Local.

Rev. N. L. Chase is commencing to take up a collection in this city for the N. H. Bible Society. He will pass from house to house, and from one place of business to another, and receive what the citizens are prepared to contribute to this institution. They will remember that it is an institution of our fathers, now approaching the close of its first half century, and in which all may unite in holding forth to their fellow men the word of life.

Lost, and Yet Not Lost.—A lady of this city attended some friends to the depot on Friday last, and while there thought she had lost a package of money containing $250. After considerable anxiety of mind, the money was found on Saturday, safely put away at home. She had taken good care of it, but had forgotten the place of deposit.

A gentleman who advertised a watch as lost some weeks since, found his property a few days ago, under a woodpile, where he had been wont to take a little "gentle exercise" during the winter. The watchmaker who has the timepiece to repair, thinks it will be hard work to Ham-mer the cases back to their original shape.

☞ The Mugridge house, owned by Thos. McGrath, corner of Franklin and Pleasant streets, which was advertised for sale at auction, was put up by Mr. Wendell on Saturday last, and bid off by Thos. G. Connelly, at $2400.

☞ The City Rooms are being newly painted and grained. They will look much better when this needed improvement shall have been completed.

☞ A notice of interest to real estate owners, from the Assessors of Taxes, may be found on our fourth page.

The Naval Appropriation Bill, with amendments, was considered in the U. S. Senate, March 16. Perley says:—"The total amount of appropriations added in the Senate to-day is $327,000, which makes the entire Naval appropriations sanctioned by the bill $19,181,142. The bill may be somewhat changed when on its final passage through the Senate, and some of the Senate's amendments may be lost in the Committee of Conference, but the following appropriations, having met the approval of both Houses, may be considered as *certain* to be made: At the Portsmouth yard, for iron foundry, $5946; for slip for iron cladding, $16,632; for condenser, $7660; for road and timber slips, $28,303; for enlarging office building, $9748; for furnishing plumbers' shop, $3600; for machinery and tools, $48,000; for repairs, $70-000; for completing plumbers' shop, $10,-000; for the purchase of Seavey's Island, $100,000 (provided that a perfect and approved title in fee to the whole island can be obtained and vested in the United States for that sum); to this the Senate have added another proviso, that, if the owners of the island should not agree to these terms, the Secretary of the Navy discontinue the use of communication now existing with the Island after the first of January next; for purchase of the right of drainage through the yard, $25,000; for a new steam fire engine, $5000; for widening main entrance $12,000; for tools for machine and forge shops, $71,500; for machinery for ropewalk, $31,000; for filling in a portion of the timber dock, $40,000; for addition to stable, $8000, and for repairs of all kinds, $85,000."

The same writer also adds:—The pay of the clerks of the yards at Portsmouth and Philadelphia was raised from $900 to $1200—now paid to clerks at other yards.

An amendment dispenses with Navy Agents, which is practically done already; and another amendment so changes the existing law granting bounties for destruction of enemies' vessels, so as to make it apply to all classes of destruction of enemies' vessels during the recent rebellion.

☞ The President has probably "heard something drop." We remember that Mr. Sturoc of Sunapee said, in the Democratic convention, something about "Satan's Kingdom's tumbling down." Now, Perley writes from Washington, March 16;—"President Johnson, since the New Hampshire election, has declared to several prominent politicians that he is in the Union party and does not intend to be read out of it."

— The Providence Journal says that of thirty delegates thus far elected to the Union State Convention of Rhode Island, twenty-six were elected as avowedly in favor of the nomination of Gen. Burnside for Governor.

— A Washington dispatch says the President is determined to have the 4000 colored troops, now stationed at the South, mustered out within the coming month. Some say 40,000.—Probably 4000 of the forty thousand are to be discharged.—The House Suffrage bill will probably be amended in the Senate by the insertion of a proviso that intelligence shall be a requisite qualification.

NOTES OF FORMER DAYS.

Collected and Collated by Uncle Tony.

Gen. Washington's Proclamation of Neutrality in 1793, endorsed by Portsmouth—Rev. Geo. Richards.

The proclamation of the President of the United States, requiring the people to observe a strict neutrality towards the belligerent powers, excited different sensations in the minds of the different existing parties. By some, who thought that we were under the greatest obligation to France, and ought to unite with them in all their opposition to Great Britain, it was highly condemned. The more cool and dispassionate part of the community, who dreaded the horrors of war, and thought it for the interest of this country, to avoid the politics of Europe, warmly applauded it.

At a town meeting, held the 13th of August, 1793, the following resolutions were passed.

First—That the inhabitants of this town do heartily approve of the proclamation of the Supreme Executive of the United States, warning all persons to refrain from violating the law of Nations, and declaring the neutrality of the United States, and their disposition to observe a conduct friendly and impartial towards all the belligerent powers.

Second—That in our opinion, the President of the United States, in issuing his proclamation, has acted in strict conformity to the nature and duties of his office, as the executor of the laws, and guardian of the public welfare; and thereby rendered effectual service to the public in general, and most seasonable relief to the mercantile interests, at a time, when it was doubted in foreign parts whether our shipping would remain neutral or not.

Third—That we are determined to assist, to the utmost of our ability, the Government in maintaining the neutrality and peace of the United States, and will use our best endeavors to detect and bring to justice all persons, who by their arts and proceedings, shall violate the law of nations, and endanger the peace and welfare of the Union.

Fourth—That we rely on the support and energy of the Government of the United States, that our navigation shall be freed from the present depredations and insults committed by the powers at war; and that just compensation shall be made to those who have suffered by such unwarrantable conduct.

Arthur Brown, Esq. L. L. D. late a Fellow of Trinity College, Dublin, and King's Professor of Greek, Representative in Parliament for the University of Dublin, in Ireland, presented to the Episcopal Church a very elegant bible, printed at the Clarendon press, in token of his affection and respect for a congregation, of which his grandfather was formerly pastor.

The society of Universalists was incorporated by an act of the Legislature, passed June 17, 1793. This society gave an invitation to Rev. George Richards to settle with them in the ministry, which he accepted, and commenced preaching to them the 29th of August, 1793. His ministry lasted 16 years,—viz 'till 1809, and the Society largely increased.

IT IS A FACT, that more suffering, disease and distress is alleviated by Coe's Dyspepsia Cure than by any other one medicinal preparation extant. It is infallible in Dyspepsia, General Debility, Lassitude, Weakness, no Appetite, Indigestion, and is an immediate cure for any disease of the stomach and bowels.

We would also say in this connection, that Coe's Cough Balsam, compounded by the same firm, is invaluable in all cases of Croup, Sore Throat, Whooping Cough, and all throat and lung complaints. mh19—1weodaw

Holloway's Pills and Ointment.—Asthma.—Though this disease has baffled the skill, and been pronounced by eminent medical men as irremediable, the numerous certificates daily received by Dr. Holloway are a direct refutation to such ill-founded and fallacious conclusions. Coughs, colds and asthma in all its ramifications of bronchial affections, diseases of the chest, throat, &c, have been cured in their worst stages by these expectorant and laxative remedies. Sold by all Druggists. mh6—1w

— Fires have become so frequent and destructive at Pit-Hole City, Pa., that the insurance companies have withdrawn most of their policies from the place.

— A certain President of a Theological Institution convened the students at his room one evening, and said to them that he had observed that they were all growing thin and dyspeptical from the neglect of the matron in not providing herself with Herrick Allen's Gold Medal Saleratus; the announcement of which caused great confusion. The lady of the house has now provided herself with the Gold Medal Saleratus, and the students are each growing quite portly, and are more healthy than ever. Taken internally, it cures sudden colds, coughs, etc., weak stomach, general debility, nursery sore mouth, canker, liver complaint, dyspepsia or indigestion, cramp and pain in the stomach, bowel complaint, painters' colic, Asiatic cholera, diarrhea, and dysentery. Applied externally, cures felons, boils and old sores, severe burns and scalds, cuts, bruises and sprains, swelled joints, ringworm and tetter, broken breasts, frosted feet and chilblains, toothache, pain in the face, neuralgia and rheumatism. It is a sure Remedy for Ague and Chills and Fever. M1 dawlm

Perry's Moth and Freckle Lotion.

☞ Chloasma, or Mothpatch, (also called Liver-spot,) and Lentigo, or Freckles, are often very annoying, particularly to ladies of light complexion, for the discolored spots show more plainly on the face of a blonde than of a brunette; but they greatly mar the beauty of either and any preparation that will effectually remove them, *without injuring the texture or color of the skin*, is certainly a desideratum. Dr. B. C. Perry, who has made diseases of the skin a specialty, has discovered a remedy for these discolorations, which is at once prompt, infallible and harmless.

Prepared by B. C. PERRY, Dermatologist, No. 49 Bond Street, New York, and for sale by all druggists; price $2 per bottle. Call for

MAGGIEL'S

Spring and Summer Remedies.

"Great oaks from little acorns grow." The worst diseases known to the human race spring from causes so small as to almost defy detection. The volumes of scientific lore that fill the tables and shelves of the medical fraternity only go to prove and elaborate these facts. Then guard yourselves while you may. The smallest pimple on the skin is a tell tale and indicator of disease. It may fade and die away from the surface of the body, but it will reach the vitals, perhaps, at last, and death be the result and final close. Maggiel's Bilious, Dyspeptic and Diarrhea Pills cure where all others fail. While for Burns, Scalds, Chilblains, Cuts, and all abrasions of the skin, Maggiel's Salve is infallible. Sold by J. Maggiel, 48 Fulton street, New York, Preston and Thacher in this city, and all Druggists, at 25 cents per box. decdeod&wly

Local.

☞ We understand that operations will be speedily commenced, to rebuild Congress Block, by the company of ten who have bought the lot. The owners and the city may thank Mr. B. F. Webster for this probable speedy restoration of these fine premises—for to his enterprise and pluck at first is due all the credit of the movement. Ben wouldn't be afraid to pay *his* share of the tax for a new City Hall, we don't believe—and, speaking of this, why can't some sort of an arrangement be made, to remove the old Bell (Belle) Tavern hulk, and extend the new Congress Block down at least to Somerby's stable entrance, if not to Fleet street?

THE LATE FIRE.—The has been considerable commenting as to the cause of the fire on Vaughan street a week since. It was reported that a colored woman was heard to say, that on the afternoon of the day that the fire occurred she overheard two Irishmen make the remark, that Miss Walker's house was to be burned down.—It has also been reported that certain persons who have an enmity against Miss Walker, were seen at the fire among the first persons there. There is little or no doubt but that the fire was the work of an incendiary, but the officers as yet have been unable to trace the cause to any particular person, nor have they any suspicion of any particular one. The colored woman, who it has been stated overheard the remark, is Mrs. Elizabeth Washington, and she states to the Marshal that nothing of the kind has happened.

IN BOARD OF ALDERMEN, Thursday evening, the report of School Committee of District No. 3, was ordered to be printed in the City Accounts.

A petition was received from Steam Fire Engine Co. No. 2, asking to be allowed ten additional members in consequence of the present number being too small, and referred to the Committee on Fire Department.

The Committee on Fire Department, with the Mayor, were authorized to purchase 1000 feet hose.

Petitions of James N. Tarlton and S. H. Goodall for sidewalks, on Middle and State streets, referred to Committee on Streets. Petitions of John Woodman Moses for sidewalk on Islington street, and of Dr. Adams Perry for sidewalk on High street, were referred to same Committee; also like petition of Neil, Tarlton & Co. on Market St.

Voted, that the High School Committee be requested to furnish the names of scholars attending the High Schools, who belong in other places.

IN COMMON COUNCIL, an ordinance relating to Night Police was laid on the table for one week. Yeas 8, nays 5.

☞ To-morrow is the day appointed for the "general Town Meeting," to get the sense of our voters on the matter of a new City Hall. Let all friends to the measure, see to it that they are on hand—and in fact, *every* legal voter in the city should be there and vote or speak as seemeth him good. Of course the action of the meeting can have no legal effect, but only a moral bearing on the case. We don't know as Portsmouth will get a new Hall at present, or ever; but one thing we do know, and that is, that there is no place in the land so destitute of public halls, as this.

Communication.

☞ The officers of the High School Cadets, not wishing it thought that they had received their offices by unfair or improper means, have resigned them. As new officers were to be appointed, the Cadets were examined by Col. John H. Jackson, and the following chosen, viz:

Captain—R. V. Noble.
Lieutenants—E. D. Childs, C. H. Davis, F. W. Robinson.
Sergeants—J. F. Hill, W. P. Pray, E. L. F. Holbrook, E. A. Stevens jr., M. Yeatou jr.
Corporals—H. W. Odion, F. M. Hatch, A. B. Parker, S. Rowell, Jr., J. C. Noble, J. F. Senter, C. A. Lord, R. Annable.
(Signed)
One who wishes the High School Cadets of Portsmouth to have a good name.

TOO BAD.—A little boy nine years of age was found in Market street on Saturday, by officer Johnson, very thinly clad and barefooted. His feet were very sore, evidently having been frozen. He was taken to the Marshal's office, and cared for by the Overseers of the Poor.

☞ The Portsmouth Philharmonic Society are to give a Concert in Dover City Hall, on Tuesday evening March 20th. Tickets for the excursion will be furnished to members, by Mr. E. A. Joy, Treasurer, at the Eastern Railroad Depot in Portsmouth, on Tuesday afternoon at half past 4 o'clock. The Society will return in a special train, after the Concert and supper at the American House.

☞ Cotton, Murphy & Smith's California Ministrels give one of their first-rate Concerts at the Temple to-night—and all who enjoy good music of this sort, ought to hear them. They are pronounced the best troupe travelling—their music sweet, and their jokes and jigs fine as a fiddle.

THE LANDS OF THE COMPANY
consist of Twelve Hundred acres, at Reno, on the Alleghany River in Venango County, Pennsylvania—*the heart of the Oil District in that State.*

ONE THOUSAND WELLS
Can be sunk upon the Property without Interference.

Test wells have been sunk on the Estate, and Oil found in paying quantities in every instance. FIFTY WELLS are now being put down, to be followed by others as rapidly as possible to the extent necessary *to fully develope the property.* One hundred wells yielding only ten barrels a day each at six dollars a barrel, a price much below the average price at Reno, would give one million eight hundred thousand dollars a year of income, making a profit probably fifteen per cent over expenses and taxes of every kind. If large flowing wells are found, *a single acre of the territory may yield the entire capital within two years.*

☞ The Company owns the Town of Reno, together with Several Hundred Lots for Business and Dwelling Houses. There is an Extensive Demand for them, and the Revenue from their Sale will be very great.

The Stock is Guaranteed.
The Price of Stock has been fixed at ONE HUNDRED AND FIVE DOLLARS per share. Five Dollars go into the Treasury of the Company as a contribution to the Working Fund.—*The Par Value of the Stock, One Hundred Dollars, is paid to the Trustees, to be Deposited in the Treasury of the United States, or Invested in Government Securities,* **and may be Withdrawn by the Stockholder at any time.**
By the payment of Ten Dollars, persons that desire to await the Result of the First Year's Development, can Secure the Right of obtining A FULL PAID SHARE OF GUARANTEED STOCK for One Hundred Dollars Additional at any time before the First day of April, 1867.

☞ It is an Investment with the Chances of Large Profit, *and is always convertible into* **Cash** *at Par.* It might be called

A Legal Tender Oil Stock.
So large a Working Fund (**$500 000**) has never been provided or expended by any Company in the Oil Region. SUBSCRIPTIONS will be received by agents and by the principal Banks and Bankers throughout the country. Prospectuses and other information will be furnished by Agents, and by

Important.
DR. STEVENS, No 5 Daniel Street, would give notice that he has REDUCED the price of Permanent sets of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.
He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite alone, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the teeth. mh12

GEORGE F. WEED,
Surgeon Dentist,
FIRST ASSISTANT in the Office of Dr. STEVENS, No. 5 DANIEL STREET.
DR. WEED can be found at his place of business at all hours of the day and night, for the performance of any of the operations that come within the call of his profession.

Dr. A. P. STEVENS, No. 5 Daniel St., makes the saving of ULCERATED and painful front teeth, a speciality in his business. He also successfully restores to their natural shape broken or badly decayed teeth, by building out corners and sides with PURE GOLD. (In many cases teeth so restored are as strong as any of their brother members, and in all cases are rendered eminently useful for a long series of years.) DISEASED TEETH, in all stages, treated, and in a very large majority of cases entire success attained.
Charges for such operations necessarily high, but nothing in comparison to the value of the Teeth. mch14

DENTAL NOTICE!
No. 60 Congress Street.
Having adopted the C. O. D. system of doing business, **Dr. E. B. GOODALL** informs his patients and the public that he now inserts whole sets of block teeth on VULCANITE BASE for $20.00 (upper and lower), and warrants them as good and as serviceable as sets on GOLD, which cost more than double the above.
He also keeps a fresh supply of PURE NITROUS OXYDE GAS to answer the numerous calls for this popular anæsthetic; and administers PURE ETHER, when desirable.
All other operations in Dentistry performed at reasonable remuneration. mch14

CRIME IN MOBILE.

The Freedmen's Bureau bill, vetoed by the President, was suggested by Gen. Howard as necessary, as in conferred strengthened power to the Bureau in existence, (and which is limited to Feb. 7, 1867,) in preserving the rights and personal safety of the Freedmen. The General, and Senator Trumbull, who prepared the bill, waited on the President with it. It was discussed and explained, and *approved* by the President! Sin ce the veto, the Provost Marshal of Mobile writes:

"For the past tour months the average number of cases arising before the Bureau has been about *four hundred per week*, of which about *one-fifth* were for *assault, robbery, murder*, and attempts at murder. Such criminal horrors are *almost universally* the acts *of citizens!* But *five* cases have come before the Bureau, in which white soldiers were the aggressors. The habits and prejudices against the colored race seem with the white people to have been rendered more *cruel* and *extreme* by the *emancipation of the slaves*."

Fourteen hundred cases of "assault, robbery and murder" in four months, in a single district! What will be the state of the Freedmen in one year, when the present bill of protection expires? Yet the President suddenly refuses any *better protection*, and is now contending for the admission of all the Senators and rebel States to assist in framing laws for the *public safety*.

MISSOURI RIGHT.

Both Houses of the Missouri Legislature, on the 23d Feb. ult., passed the following resolutions:

Resolved. That the conflict which has existed for the last five years between loyalty and disloyalty is still pending, and the safety of the nation demands that the government should be retained in loyal hands.

Resolved. That in the thirty Senators who voted to sustain the Freedmen's Bureau bill, vetoed by the President, and in the Union majority of the House of Representatives who support the same and kindred measures, we recognize true and worthy Representatives of principles which saved the country in the late rebellion, and we tender such Representatives the hearty support and sympathy of ourselves and our constituents."

The resolutions passed the House by a vote of 77 to 25, and the Senate by a vote of 21 to 5.

The above resolutions, coming from Missouri, where there were lately many slaveholders, looks auspicious to the liberties of our country. Let al copperheads reflect upon the same.

RIGHT NOW TO EDUCATE BLACKS.

Gov. Orr, in his recent message to the legislature of South Carolina, said—"So long as the African was a slave, though his moral training was not neglected, it was our policy to prohibit him from learning to read and write. Now it is our policy to enlighten and elevate him, for it makes him more trustworthy, and reduces crime and poverty in our midst." When was there ever a more noble sentiment uttered in South Carolina, where the people rallied recently under the Palmetto rattle snake flag, and it was a penal offence to teach a colored person to read or write? Yes, should the white population receive education, they would be elevated to manhood and equal rights, and down would go the oligarchy.

The New Orleans Picayune of 11th Feb., ult., says that President Johnson has written a letter dated January 21, 1866, to Hon. John Purcell, which he publishes. The editor says that it "expresses what could have hardly been doubted by any one conversant with the President's views and policy, to wit, his desire to see the government of New Orleans placed in the hands of those to whom the laws of the State have confided it." That is, the elections are to be, as the President says, "in conformity with regulations prescribed by the State legislature." It is well known that the loyal whites, as well as the colored citizens, are oppressed and deprived of essential rights under the government of New Orleans. The freedmen own much property for which they are taxed, yet are debarred, under the city regulations, from the means of education, as appears from the report of Gen. Carl Shurz.

IMPORT DUTIES.—Upon the expiration of the Reciprocity Treaty, on the 17th of March, the following articles, exempt of impost, will be subject to the following rates:—Wheat, 20 cents per bushel; timber, lumber, &c., unmanufactured or manufactured in whole or in part, fire-wood, animals of all kinds, and flour, 20 per cent. ad valorem, corn and oats, 12 cts. per bushel; rye, 15 cts. per bush.; beans, peas, hides, furs and skins, 10 per cent ad valorem; sabes 10 cts. ad val.; flax $15 per ton; butter and cheese, 4 cts. per pound; tallow, 1 cent per pound; poultry, 20 per cent ad valorem; plants, shrubs and trees, 20 per cent. ad valorem.

"AS GOES NEW CASTLE SO GOES THE STATE."—The copperhead papers throughout the State last week made a great parade about the result in New Castle over the election of a selectman, who they say was a democrat. How is New Castle now? Three to one Republican. Now we say as goes New Castle so goes the State.

WELL DONE LEE!—Lee, for the first time with in the memory of man, elects this year a Republican Representative—John E. Bassett. The vote for Governor was 91 for Smyth to 112 for Sinclair—21 dem. majority—but the Republican candidate went in by a handsome vote over his democratic competitor, Alfred Snell, the representative of last year.

The old Hall of the House of Representatives at Washington is now devoted to State contributions of Art. The Legislature of Massachusetts has voted for her States, Gov. Winthrop of the Colonial period, John Adams of the Revolutionary age, and Wm. Lloyd Garrison of the "struggle for freedom," the present age.

Assessors' Notice.

THE inhabitants of the City of Portsmouth are hereby required to exhibit to the Assessors of said city a just and true account of their Polls and Estates, ratable by law, on or before the fourth day of April next. And all persons who do not comply with the above requirements in handing in an inventory of their ratable estate, and making oath to the same, may not expect any abatement.

The Assessors, or any Justice of the Peace, or the City Clerk, are proper persons to administer the oath; and each individual making his inventory, will have an endorsement on the same, certifying that it has been duly sworn to, and the same to be handed to one of the Assessors, or left with their Secretary at the City Clerk's office, on or before the said fourth day of April next.

SUFFERERS

From Dyspepsia

READ! REFLECT!! ACT!!!

TARRANT & CO

Gentlemen, I am a resident of Curacoa, and have often been disposed to write to you concerning the real value of your SELTZER APERIENT as a remedy for indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.

For four or five years my wife has been sadly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Cabbage, of Venezuela, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.

I feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.

I trust that you will give this publicity, and repeating my earnest gratitude and thanks,

I am very respectfully yours,
S. D. C. HENRIQUER,
Merchant, Curacoa, S. A.

New York, June 28th, 1865.

WE ASK

The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of

Dyspepsia, Heartburn, Sour Stomach, Sick Headache, Dizziness, Indigestion, Piles, Costiveness, Billious Attacks, Liver Complaints, Rheumatic Affections, &c.

Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your Physician.

AMERICAN AND FOREIGN PATENTS.

R. H. EDDY,

Solicitor of Patents,

Late Agent of the U. S. Patent Office, Washington, under the Act of 1857,

78 State Street, opposite Kilby Street, BOSTON.

After an extensively practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries, Specifications, Reissues, Reports, Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with despatch. Researches made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters involving the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.

The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The Testimonials here given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE MEASURE OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.

The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.

These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.

All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.

TESTIMONIALS.

"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."

CHARLES MASON,
Commissioner of Patents.

"I have no hesitation in assuring inventors that they cannot employ a person *more competent and trustworthy*, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office."

EDMUND BURKE,
Late Commissioner of Patents.

Mr. R. H. Eddy has made for me THIRTEEN applications, on all but ONE of which patents have been granted, and that is *now pending*. Such unmistakable proof of great talent and ability on his part leads me to recommend *all* inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."

JOHN TAGGART

During eight months, the subscriber, in course of his large practice, has made over rejected applications SIXTEEN APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents.

R. H. EDDY.

S. Vance's Submerged Well PUMP.

This unsurpassable invention, now being first introduced, will, it is believed, supersede all other Well Pumps now in use.

ITS ADVANTAGES.

FIRST, SIMPLICITY.—This Pump is composed of but three parts, and is so simple in its construction that any one can easily put it together.

SECOND, DURABILITY.—Its peculiar construction, and the fact that it is always submerged, combine to make it the most durable of all Pumps yet invented.

THIRD, NEVER FREEZES.—The valves are so constructed that, when not in motion, they allow all the water above to pass down into the well, and thus prevent freezing.

FOURTH, POWER.—For the amount of power applied, this Pump excels anything known. It throws one-third part more water than ordinary pumps, and works so easily that even a child can pump without fatigue. It is in this way the greatest labor-saving pump now offered to the public.

FIFTH, IT IS INVALUABLE.—For a well pump it is invaluable, as all the iron which is submerged consists of but three small pieces, and these galvanized. It can in no way corrode, consequently it brings up pure water at every stroke.

SIXTH, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to keep in use for years. No repairs at all are needed. It is very light, and thus the cost of transportation is very small.

☞ Manufactured by S. VANCE & CO., No. 31 Liberty Street, Newburyport, and for sale in Portsmouth by the Sole Agents for N. H.,

TRAGEDY.—In the absence of Mr. and Mrs. Todd from their home at Paris, Jennings county, Indiana, a short time since, a man named Wash. Sage went to the house and stole a pocket-book that he supposed contained money which Mr. Todd had just received from the sale of his farm. He then, to conceal his crime, beat three little children in a horrible manner, and left them for dead. One of them has since died, but the other two recovered and revealed the circumstances of the terrible affair, and Sage was arrested. By a singular blunder he took the wrong pocket-book, leaving the one with the money in it untouched. The stolen book was found on his person, and he confessed the deed.

☞ In Massachusetts, the raid by the State Constables upon the liquor sellers of Taunton created a great excitement among the fraternity in other places in Bristol County. The Fall River news says that in that place the keepers of the low rum shops procured teams, regardless of expense, and barrels, kegs and demijohns were piled in and hurried off to some retreat, beyond the reach of legal suasion. The next morning quite a number of the "dens" were found closed.

The Old Established Hospital.
No. 5 Beaver Street, Albany, N. Y.
QUICK CURES AND LOW PRICES.
Over Twenty Thousand Patients Cured annually.
DR. J. TELLER continues to be confidentially and successfully consulted on all forms of private diseases, at his old Established Hospital, No. 5 Beaver Street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and his facilities are such (being in correspondence with the most eminent Physicians of the Old World,) of obtaining the safest as well as the latest remedies for these diseases, offer inducements to the unfortunate of a quick and rapid cure, to be obtained at no other office in America.
In Syphilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cords Bubo, Ulcerated Sore Throat, Nodes on the Bones, Cutaneous Eruptions, Biles, Ulcers, Abscesses, and all other impurities of the system, are perfectly under the control of the Doctor's Medicines; and have been tested in more than 20,000 cases annually, with immense Success.
YOUNG MEN.
Young Men addicted to secret habits, who have impaired their healths and destroyed the vigor of their minds, thus depriving themselves of the pleasures of the Married Life, are notified that in consulting Dr. J. Teller, they will find a friend to console and a Physician who has cured thousands, in almost every part of the United States, who applied to Dr. T. broken down in health, now rejoice in all that makes life desirable and man happy. The reader is of course aware that the delicacy of this subject will prevent a more minute description of this terrible disease.
DR. TELLER'S GREAT WORK.
A book for every body:—Startling disclosures. Dr. TELLER's great work for the benefit of those contemplating marriage—200 pages—full of plates—price 25 cts. Sent to all parts, under seal, by mail, post paid. 50,000 copies sold the past year. The single Married and the Married Happy. A lecture on Love, or how to choose a Partner—a complete work on Midwifery, it contains hundreds of secrets, never before published.—Warranted to be worth three times the amount asked for it. 25 cents, in specie or postage stamps, inclosed, will secure a copy by return mail. Dr. TELLER has devoted a lifetime to the cure of those diseases upon which his books treat.
TO THE LADIES.
Dr. TELLER still remains the only Agency in America, for the sale of Dr. Yshoy's Italian Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unapproached; and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in females.
CAUTION.—Married ladies in certain delicate situations should avoid their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent by mail or express, to any part of the world, secure from curiosity or damage.
Office hours from 8 A.M. to 8 P.M., and on Sundays from 2 to 5 P.M.
N. B.—Persons at a distance can be cured at home by addressing a letter to Dr. J. Teller, enclosing a remittance. Medicines securely packed from observation, sent to any part of the world. All cases warranted. No charge for advice.—N. B.—No students or boys employed. Notice this, address all letters to

VINELAND
FARM AND FRUIT LANDS.
In a mild and healthful climate. Thirty miles *south* of Philadelphia by Railroad, in New Jersey, on the same line of latitude as Baltimore, Md.
The soil is rich and *productive*, varying from a clay to a sandy loam, suitable for Wheat, Grass Corn, Tobacco, Fruits and Vegetables. This is a *great fruit country*. Hundreds of new Vineyards and Orchards have been planted out by experienced fruit-growers. Grapes, Peaches, Pears, &c., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste*. It has increased five thousand people within the past three years. Churches, Stores, Schools, Academies, Societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are constantly settling. Hundreds of new houses are being constructed. Price of Farm land, twenty acre lots and upward, $25 per acre. Five and ten acre and Village lots for sale.
Fruits and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Yards, Manufactories, Foundries, Stores and the like; and Steam Power, with Factories, to be rented.
For persons who desire mild winters, a health ful climate, and a good soil, in a country beautifully improved, abounding in fruits, and possessing all other social privileges, in the heart of civilization, it is worthy of a visit.
Letters answered, and the Vineland Rural, a paper giving full information, and containing Reports of Solon Robinson, sent to applicants.
Address CHAS. K. landis, Vineland P. O., Landis Township, New Jersey.
From Report of Solon Robinson, Agricultural Editor of The Tribune: *It is one of the most extensive fertile tracts, in an almost level position and suitable condition for pleasant farming that we know of this side of the Western Prairies.* n1—dawûn

TUESDAY, MARCH 20, 1866.

REVIEW OF THE FIGURES.—The Concord Statesman says Gov. Smyth's majority in all the State but 17 towns, is 5004; and if these 17 vote as last year, his majority will be 4589. The Republican canvass, just *before* election, made it 4774. Since the election, the Concord Patriot says:

"The Democrats have cast a handsome vote, quite as large as could have been expected, under the circumstances. They have made a handsome gain over their last year's vote, although they have had the whole power of the Administration against them, while they were laboring to sustain the President."

On this the Boston Traveller remarks:

"The fact that while they sustain the President, *he* does not sustain *them*, does not seem to be well relished by the New Hampshire Democrats."

If it were all true, then it would show Republics and Presidents to be very ungrateful—especially to such *disinterested* people as the democratic party in New Hampshire. But let us see how far it is true.

The day before election, a special copper-y dispatch from Concord to the Boston Post said:

"From present indications, the vote throughout the State will be rather light, with encouraging prospects for a Democratic victory."

So much for the *expectations*: but the vote was heavy, and the democratic victory turned out to be a defeat! Now for the *circumstances*.

Was the whole power of the Administration exerted against them? There is some power in a *name*; and the Concord special of the Boston Herald, just before election, said: "The Johnson vote of the State will be, from present appearances, very large." Then, as to the *person* of the President,—Did President Johnson, in his 22d of February speech to the Washington copperheads, use his power *against* the Democratic party? If he did, why did they applaud it to the echo? and why did the Dover Gazette applaud and endorse it, only the Saturday before election. Did the President's speeches, to the Montana delegation, and to Fred. Douglas, exert influence *against* the Democratic party? If so, why did almost every paper of that party praise those documents?

Now for the Cabinet. Did Sec. Seward's speech at *New York*, and his saying the President's policy "*is my policy*," go against the Democratic party? Did Sec. Welles go *against* the Democratic party in New Hampshire, when he refused to let his Republican clerks come home to vote; and when he or some crafty copperhead who used his name, made out to induce some Navy Yard clerks from crossing the river to vote?

Under the influence of a late order, about 75 men, who had voted the Republican ticket for a year or two back, to get work on the Navy Yard, voted the other day for Sinclair as Governor. Many of these men used to work there years before, when they must vote the Democratic ticket, or be discharged. Was the late movement *against* the Democratic party? We think not; for this change made a *net gain* for the Democratic party in Portsmouth, of something near 300 votes.

One item more, under this head, must suffice *for the present*.—Among all the Republicans who hold office here under the U. S., we do not know of any one who made special effort to carry the election.

But there was, and is, a POWER in New Hampshire, which controlled the late election, viz., the same loyal PEOPLE who sustained the U. S. government as well as they could during the war, while the rebels at the South, and their allies in New Hampshire, were doing all they could to defeat and break it down! Their numbers this year are swelled somewhat by the vote of three-quarters of the returned soldiers; and they have prevailed, notwithstanding the cry of "State Debt—Stand by the President—and Johnson party." *Democracy* has triumphed,—but the Democratic *party* has not. U. T.

ST. PATRICK'S DAY IN NEW YORK.—There has not been during many years such a turn-out as the Irish Societies made in New York on Saturday. It is estimated that the procession numbered about thirty thousand men, mostly in regalia. The military escort comprised four regiments, of between three and four hundred men each, with several companies; and this branch of the procession numbered, perhaps, two thousand men. There were between thirty and forty societies, mostly of Hibernians, with benevolent and temperance organizations. There was not, so far as was observed, a single banner or inscription denoting the prevalent Irish sentiment in regard to their national wrongs and the crimes and oppression of the English government.

— The Selma Times says a colored woman left that city recently aged 127 years. She is the mother of 15 children, having had triplets three times.

Local.

IN SEARCH OF HIS WIFE.—One of New Hampshire's sons enlisted in the 9th N. H. Regiment, and at the battle of South Mountain was reported killed. At a village not far distant, he left a wife and one child, both of whom after hearing of his death, left the place for parts unknown to any of the residents thereof. A few days since the husband, in the "prime of life and manhood," turned up at his former home. He had been a prisoner of war at the South, and after the war, had engaged in business there, and has been, financially, very successful. He came North for his family, and was astonished to learn that they did not live where he left them. On Friday the photograph of the wife was shown to the City Marshal, who recognized her as a person who had been here and left about a month since. The soldier was put on the right track, and marched to the tune of "The Girl I left behind me."

☞ At the election in Kittery, on Monday, the following named gentlemen were chosen town officers for the ensuing year:

Moderator—J. H. Sanborn.
Town Clerk—Denis M. Shapleigh.
Selectmen — John Wentworth, Albert Wilson, Wm. W. Locke.
Treasurer and Collector—Benj. R. Frisbee.
Town Agent—J. H. Sanborn.
Superintending School Committee—Moses A. Safford.
Auditors—Alexander Dennett, Ephraim C. Spinney.

☞ At the Annual Town Meeting in Kittery, Monday, March 19, the following Resolution was passed:

Whereas, The sale of intoxicating liquors is being carried on in this town contrary to law, therefore

Resolved, That a Committee of twenty-five be appointed by the town, whose duty it shall be to notify all persons engaged in the unlawful sale of liquor, that they have been authorized by the town to request them to stop the sale of liquor at once. If, after having such notice, they refuse to comply with the request of said Committee, they are hereby instructed to see that the sale of all intoxicating liquors is suppressed and kept so, within the limits of the town of Kittery, without delay.

The following gentlemen were appointed the Committee, viz: Mark Dennett, Haskell Pierce, Chandler Brooks, E. C. Spinney, Mark F. Wentworth, Oliver Wilson, Joshua Lewis, Chas. G. Bellemey, Charles Duncan, Isaac D. Phillips, Wm. G. Parker, Limon Lewis, John Wentworth, Thomas Lydston, Chas. W. Stinson, Daniel Parry, Francis Bacon, J. H. Sanborn, Joel Wilson, J. G. Chambers, A. J. Stinson, A. A. Hayes, Oliver Cutts, T. J. Pettigrew, John Remick, Geo. B. Preble.

☞ Besides the Town Meeting, a session of the U. S. District Court, and the Probate Court, are all to be held at 10 o'clock this morning—and Capt. Robt. Shillaber has them all in charge.

☞ The Catholics of this city, being about to make extensive repairs and improvements upon their Church, have, we understand, already received contributions and subscriptions for that purpose to the amount of nearly $4000.

NAVAL.—Paymaster C. J. Emery, recently ordered to the Supply, will perform in addition the duties of Naval Storekeeper and Purchasing Paymaster of the East India Squadron.

☞ The ship Sierra Nevada, built at this port, while entering one of the docks at Liverpool, with a cargo of guano on board from the Chincha Islands, broke in two and became a wreck. The owners of the vessel and cargo sued the Dock Company to recover the value of the ship and cargo, and were successful in obtaining decisions in their favor in every court; but the Dock Company would not pay, and finally brought the case before the House of Lords. After remaining two years before the Lords, it was recently decided in favor of the claimants, the Chancellor presiding. Thus the decisions of all the law courts were confirmed by this court of last appeal.

The object of the Dock Company in contesting the decisions of the Admiralty Courts was to deter others from suing them; and hence induce future parties who may have claims against them to settle on their own terms. The ship was owned by Messrs. Glidden & Williams, of Boston, and was valued at $130,000 in gold at the time of the disaster. She was subsequently repaired and is now as good as ever. The decision of the Law Lords was unanimous.

☞ The Phrenological Journal for April, contains among other matter of interest, a humorous illustrated article on "Comic Physiognomy." Fowler & Wells, publishers, New York.

☞ Godey's Lady's Book for April has a fine steel engraving—"The Last Bouquet"—a double page colored fashion plate, and a multitude of articles and illustration concerning the dress of ladies and children.

— A letter from Florence Nightingale, dated at London, Feb. 23, speaks of her health as even more delicate than it has been. She says: "I am always and entirely a prisoner to my room, and latterly to one position."

NEW HAMPSHIRE ITEMS.

— Ex-President Pierce will build a summer residence at North Hampton this season, and have it completed by July 1. He owns about forty acres of land there, in one of the finest locations on the Atlantic coast, on Little Boar's Head, near the Atlantic House, Rye Beach.

— Rev. S. N. Greeley, of Grand Rapids, Mich., late Chaplain of the 6th Michigan Cavalry, has received a call from the Congregational Church in Oswego, N. Y. Mr. G. is a son of Stephen L. Greeley, Esq., of Gilmanton.

— Rev. Geo. W. Bailey, for several years pastor of the Universalist Church in Lebanon, preached a farewell discourse on the 4th inst. He was two years a member of the Legislature.

— At Manchester, on Saturday afternoon, Mr. Stephen Smyth, father of Governor Smyth, received a fall while entering a house upon Manchester street, bruising his arm and hip so severely that he had to be carried home. He is eighty years old.

ENTERPRISING.—At a town meeting, the citizens of Claremont voted, almost unanimously, the sum of $100,000 as a gift to the Concord & Claremont Railroad. This is liberality indeed. We understand that the question of taking stock by the town of Rochester in the Portland & Rochester Railroad, will come up soon. The enterprise has not met with that encouragement at the hands of our leading men, and there may be some doubt about Rochester being the terminus of the road. The town would make money by following the course of Claremont, (which is not so large as Rochester), and voting a gift of $50,000 to the road, rather than it should give us the go-by, and strike Great Falls or Farmington. Rochester, at the last election, cast a larger vote than any other town in the State, with the exception of Keene, and we believe its wealth in proportion to its numbers is not excelled by ten other towns in New Hampshire. It certainly cannot be said, that we are not able to follow the example of Claremont.—*Rochester Courier.*

RAILROAD PROJECT.—Some prominent capitalists from Portland have been in Manchester a day or two, for the purpose of talking up the subject of a railroad from Rochester, N. H., to Nashua. The road from Portland will be completed to Rochester during the present year, and a new road from thence to Nashua would lessen the distance to New York and the West fifty-five miles, and would become the main thoroughfare between Portland and the Middle and Western States. The plan is either to build a new road from Rochester to Nashua direct, or to make an arrangement so as to strike the Portsmouth railroad at Candia and come through Manchester. These gentlemen have gone to Concord, to ascertain if the latter plan is practicable. *Miror.*

☞ At New Orleans, March 17, Gov. Wells having persistently refused to give certificates to the newly elected Mayor and other city officials, Gen. Canby was applied to by their attorney. He took the official returns and promised to issue the order requested either to-night or on Monday.

THE LANDS OF THE COMPANY consist of Twelve Hundred acres, at Reno, on the Alleghany River in Venango County, Pennsylvania—*the heart of the Oil District in that State.*

ONE THOUSAND WELLS

Can be sunk upon the Property without Interference.

Test wells have been sunk on the Estate, and Oil found in paying quantities in every instance. FIFTY WELLS are now being put down, to be followed by others as rapidly as possible to the extent necessary *to fully develope the property.* One hundred wells yielding only ten barrels a day each at six dollars a barrel, a fortune much below the average price at Reno, would give one million eight hundred thousand dollars a year of income, making a profit probably fifteen per cent over expenses and taxes of every kind. If large flowing wells are found, *a single acre of the territory may yield the entire capital within two years.*

☞ The Company owns the Town of Reno, together with Several Hundred Lots for Business and Dwelling Houses. There is an Extensive Demand for them, and the Revenue from their Sale will be very great.

The Stock is Guaranteed.

The Price of Stock has been fixed at ONE HUNDRED AND FIVE DOLLARS per share. Five Dollars go into the Treasury of the Company as a contribution to the Working Fund.—*The Par Value of the Stock, One Hundred Dollars, is held in the Trustees, to be Deposited in the Treasury of the United States, or Invested in Government Securities,* **and may be Withdrawn by the Stockholder at any time.**

By the payment of Ten Dollars, persons that desire to await the Result of the First Year's Development, can Secure the Right of obtaining A FULL PAID SHARE OF GUARANTEED STOCK for One Hundred Dollars Additional at any time before the First day of April, 1867.

☞ It is an Investment with the Chances of Large Profit, *and is always convertible into* **Cash** *at Par.* It might be called

A Legal Tender Oil Stock.

Lyon's Periodical Drops!

THE GREAT FEMALE REMEDY FOR IRREGULARITIES.

These Drops are a scientifically compounded fluid preparation, and better than any Pills, Powders or Nostrums. Being liquid, their action is direct and positive, rendering them a reliable, speedy and certain specific for the cure of all obstructions and suppressions of nature. Their popularity is indicated by the fact that over 100,000 bottles are annually sold and consumed by the ladies of the United States, every one of whom speak in the strongest terms of praise of their great merits. They are rapidly taking the place of every other Female Remedy, and are considered by all who know aught of them, as the surest, safest and most infallible preparation in the world for the cure of all female complaints, the removal of all obstructions of nature, and the promotion of health, regularity and strength. Explicit directions stating when they may be used, and explaining when and why they should not, nor could not be used without producing effects contrary to nature's chosen laws, will be found carefully folded around each bottle, with the written signature of JOHN L. LYON, without which none are genuine. **Price $1.50.**

Prepared by Dr. JOHN L. LYON, 195 Chapel Street, New Haven, Conn., who can be consulted either personally, or by mail, (enclosing stamp,) concerning all private diseases and female weaknesses. **Price $1.50 per bottle.**

Sold by Druggists everywhere.

Local.

☞ The inhabitants of Portsmouth qualified to vote, are duly and legally notified and warned to meet at the Court House, this (Tuesday) morning, March 20th, at 10 o'clock, for the following purposes: To choose a Moderator to preside at said meeting. To determine by ballot the following proposition, namely: 'Is it expedient to build a new City Hall, to be paid for out of the Treasury of the City of Portsmouth?'"

Now we hope a good strong vote will be thrown, so as to get at "the sense of the people" in this regard—though some folks think there *is* no "sense" in proposing the matter at all "now," while others think it equally foolish to oppose it. So just please show your hands, gentlemen, and let us all see who's who. Everybody else can build city and town halls—Boston, Lynn, Newburyport, Portland, Lewiston, and where not—but if Portsmouth is too poor or too mean, why let us grub along for another generation without a Hall, a Park, or anything else to ornament or improve the place. Only do please vote, somehow, all of you.

And in this connection, we call attention to an "enterprising" item elsewhere in this paper. The live men, who build City Halls, Railroads, &c., are the same who make business and drive dull times away.

"Middling Interest," in a communication against building a hall, published in the Journal of last week, was guilty of a most egregious error, in his statement of our city debt—the reader being led to understand that our debt is $523,532, whereas it is not nearly one-half that amount. On the 31st of December, 1865, our city debt was $225,635.82, having been reduced $4,926.-06 during the year, notwithstanding there were soldiers' bounties (previously voted) amounting to nearly $30,000, to be provided for during that period. It will no doubt be reduced $11,000 or more the current year.

POLICE COURT, March 19th.—The first subject on the docket was John O'Brien, who has seen better days, and has served his country four years on the tented field. Some three months ago he was discharged in Boston, and received in payment for his services, the round sum of $900. He now locks the picture of despair, and from the appearance of his wardrobe, we should judge him a fit subject for a paper mill. He says, "Rum did it." He was honored with the usual fine of $6.86; and in the absence of the nesessary "wherewithal," he has taken up his abode with Farmer Philbrick, at the western portion of the city.

Professor Andrew P. Clarke,—the gentleman with the "broad brim," who teaches music,—next complained of Reuben E. Gilpatrick, one of the members of Knight's Cornet Band, for assaulting him. The proof was conclusive that the music teacher was wrong and Gilpatrick was right. Clarke insinuated his presence into the Band room, where he had no business, and he was asked to go out, he refused; and Gilpatrick "boated" him. Gilpatrick was discharged.

Dennis Megrah, who keeps a drinking saloon on Daniel street, near the Navy Yard Slip, was charged with selling liquor on Sunday. The prosecution proved the selling of the liquor, but Dennis had a convenient witness to swear that he sold the liquor without Megrah's knowledge. As he, the *convenient* witness, was not attached to the house as bar keeper or *head clerk*, but merely a person who takes his meals there, and is considered in no way responsible for the conduct of the house—and it not being proven that Megrah knew of the sale, he was *honorably* discharged.

John Allison, proprietor of the New England House (it should be New England Rum House) on Hanover street, was caught in a similar fix with his confederate in business. The defence stoutly denied the soft impeachment; but it was not only clearly proved that a man bought "whiskey" there on the "first day of the week, commonly called the Lords Day," but that two persons came out of the Second Advent Church and went into the N. E. House, or N. E. R. House, on the same day. Allison was fined $14.80, paid up and went home.

Jane Dixon, "fair, fat and forty," who keeps a place on Langdon street, dignified by the name of "Grocery Store" on a shingle over the door—not having the fear of the City Marshal and officer Johnson before her sign, sold some "Gin" to a countryman (?) from Portland, on Sunday. Jane, keep your doors closed on Sunday, and you won't get caught in a trap. Mrs. Dixon was fined $14.80; and like her predecessor, "stepped up to the Captain's Office and settled." *Moral*—dealers in intoxicating beverages, obey the law—shut up Sundays,—and "the countryman (?) from Portland" won't be round.

☞ A rare chance to procure a beautiful site for a summer residence, and a good farm, on Sagamore Creek, is offered to-day, in the sale of the Martine place, by Auctioneer Wendell.

— A ferryboat went over the falls at Columbus, Georgia, the other day, but the passengers were rescued.

DUTCHESS NURSERIES,
POUGHKEEPSIE, NEW YORK,
FERRIS & CAYWOOD, Proprietors.

We call the attention of our customers and the public to our stock of GRAPE VINES, which is larger than ever before. Having had over twenty years' experience in the management of Vineyards and the propagation of Vines, and our present stock having been grown from bearing wood only, with constant care during the season, we think they will compare favorably with any others that are offered for sale.
Our stock of MONTGOMERY VINES is very large. This variety not being generally known, we will give a brief description: White, a seedling of the White Chasselas, an unparalled grower and bearer, clusters often weighing two pounds, with a mild subacid flavor. It is classed with the best grapes, but we protect it in winter as we do all other varieties in this part of the State.
Our stock of the various kinds of EVERGREEN and DECIDUOUS TREES is very large, and is offered at moderate price; and at very low rates by the quantity, to those who are laying out and improving their places, cemeteries, or public grounds, and to nurserymen. We challenge competition.

Important.
DR. STEVENS, No 5 Daniel Street, would give notice that he has REDUCED the price of Permanent Sets of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.
He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite alone, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the Teeth. mh12

FIRST ASSISTANT in the Office of DR. STEVENS, No. 5 DANIEL STREET.
DR. WEED can be found at his place of business at all hours of the day and night, for the performance of any of the operations that come within the call of his profession.

Dr. A. P. STEVENS, No. 5 Daniel St., makes the saving of UNCERTAIN and painful front teeth, a specialty in his business. He also successfully restores to their natural shape broken or badly decayed teeth, by building out corners and sides with PURE GOLD. (In many cases teeth so restored are as strong as any of their brother members, and in all cases are rendered eminently useful for a long series of years.) DISEASED TEETH, in all stages, treated, and in a very large majority of cases entire success attained.
Charges for such operations necessarily high, but nothing in comparison to the value of the Teeth. mch14

DENTAL NOTICE!
No. 60 Congress Street.
Having adopted the C. O. D. system of doing business, **Dr. C. B. He also keeps a fresh supply of PURE NITROUS OXYDE GAS to answer the numerous calls for this popular anæsthetic; and administers PURE ETHER, when desirable.
All other operations in Dentistry performed at reasonable remuneration. mch14

Morning Chronicle.

THE REPUBLICAN MEMBERS OF CONGRESS.—Mr. Baldwin of the 8th Massachusetts District writes from Washington to the Worcester Spy:

"In the reports of proceedings in Congress you will notice a free discussion of their minor differences of opinion among the Union members. Do not allow yourselves to infer from this that there are any grave differences of opinion or purpose among them. There is a general desire to put every measure adopted in the best form; but there are no substantial differences among the great mass of the Union members; and you may assure yourselves that the great mass of them will be true to their constituents, and mindful of the momentous interests interests at stake."

RATHER CRUEL.—Mrs. Reardon, wife of Peter Reardon, was brought from the Police Court in Old Cambridge to East Cambridge jail in a carriage on Tuesday, with iron darbies on her wrists. They were so small that she could hardly move her hands. Two stout officers were in charge of the woman and her husband, and it would seem impossible for her to escape without the "irons," while in the carriage under their charge.—*Boston Herald.*

Just as *cruel* as 'twould be to hang a traitor. Three officers went to the house of these Reardons, to arrest their son, a criminal,—Mrs. Reardon and husband assailed the officers with bricks, stones, and shovel, the latter weapon almost killing one officer by a blow on the head. The other two officers arrested Peter and wife, and very *properly* put them in irons.

A HUMBUG.—A California dispatch of March 11, says:

It has been stated that the steamer Oriflamme, which arrived here on the 6th inst. from China, brought advices of an advance of 10 to 15 cents per pound on tea. Upon careful inquiry it is ascertained that no public advices of this nature were received, and it such was the fact it was known only to a few private parties, and not to the general public. Files of papers brought by the Oriflamme do not mention any particular change in the tea market, and the major portion of the trade discredit the reported advance.

THE LIGHT OF THE WORLD.

DR. MAGGIEL'S

PILLS AND SALVE

These Life-giving remedies are now for the first time, given publicly to the world. For over a quarter of a century of private practice the ingredients in these

Life-giving Pills!

Have been used with the greatest success. Their mission is not only to prevent disease, but to cure. They search out the various maladies by which the patient is suffering, and re-invigorate the failing system. To the aged and infirm a few doses of these valuable PILLS will prove to be

A Very Fountain of Youth,

For in every case they add new life and vitality, and restore the waning energies to their pristine state. To the young and middle aged, they will prove most invaluable, as a ready, specific, and sterling medicine. Here is a dream realized, that Ponce-de-Leon sought for three hundred years ago, and never found. He looked for a fountain that would restore the old to youth and make youth ever

AN ETERNAL SPRING!

It was left for this day and hour to realize the dream, and show, in one glorious fact, the magic that made it fair.

These Famous Remedies

Cannot stay the flight of years, but they can force back, and hold aloof, disease, that might triumph over the aged and the young. Let none hesitate then, but seize the favorable opportunity that offers. When taken as prescribed—

FOR BILIOUS DISORDERS

Nothing can be more productive of cure than these Pills. Their almost magic influence is felt at once; and the usual concomitants of the most distressing disease are removed. These remedies are made from the purest

VEGETABLE COMPOUNDS.

They will not harm the most delicate female, and can be given with good effect in prescribed doses to the youngest child.

For Cutaneous Disorders

And all eruptions of the skin, the SALVE is most invaluable. It does not heal externally alone, but penetrates with the most searching effects to the very root of the evil.

SUFFERERS

From Dyspepsia

READ! REFLECT!! ACT!!!

FARRANT & CO

Gentlemen, I am a resident of Curacoa, and have often been disposed to write to you concerning the real value of your SELTZER APERIENT as a remedy for indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.

For four or five years my wife has been sadly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Cabialje, of Venezuela, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.

I feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.

Trusting that you will give this publicity, and repeating my earnest gratitude and thanks,

I am very respectfully yours,

S. D. C. HENRIQUEZ,

Merchant, Curacoa, S. A.

New York, June 28th, 1865.

WE ASK

The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of

Dyspepsia, Heartburn, Sour Stomach, Sick Headache, Dizziness, Indigestion, Piles, Costiveness, Bilious Attacks, Liver Complaints, Rheumatic Affections, &c.

Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your Physician.

AMERICAN AND FOREIGN PATENTS.

R. H. EDDY,

Solicitor of Patents,

Late Agent of the U. S. Patent Office, Washington, D. C., under the Act of 1861.

78 State Street, opposite Kilby Street,

BOSTON.

After an extensive practice of upwards of twenty years, continued to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds, Assignments, and all Papers and Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.

The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The Testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has an abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.

The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.

These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.

All necessary drawings to Washington, to procure a patent, and the usual great delay there, are here saved inventors.

TESTIMONIALS.

"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."

CHARLES MASON,

Commissioner of Patents.

"I have no hesitation in assuring inventors that they cannot employ a person *more competent* and trustworthy, or more capable of securing their applications in a form to secure for them an early and favorable consideration at the Patent Office."

EDMUND BURKE,

Late Commissioner of Patents

Mr. R. H. Eddy has made for me THIRTEEN applications, on all but one of which patents have been granted, and that is *now pending.* Such unmistakable proof of great talent and ability on his part leads me to recommend all inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."

JOHN TAGGART

During eight months, the subscriber, in course of his large practice, made on *twelve* rejected application for Patents, for Claims, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents. **R. H. EDDY.**

S. Vance's Submerged Well PUMP.

This unsurpassable invention, now being first introduced, will, it is believed, supersede all other Well Pumps now in use.

ITS ADVANTAGES.

FIRST, SIMPLICITY.—This Pump is composed of but three parts, and is so simple in its construction that any one can easily put it together.

SECOND, DURABILITY.—Its peculiar construction, and the fact that it is always submerged combine to make it the most durable of all Pumps yet invented.

THIRD, NEVER FREEZES.—The valves are so constructed that, when not in motion, they allow all the water above to pass down into the well, and thus prevent freezing.

FOURTH, POWER.—For the amount of power applied, this Pump excels anything known. It throws one-third part more water than ordinary pumps, and works so easily that even a child can pump without fatigue. It is in this way the greatest labor-saving pump now offered to the public.

FIFTH, IT IS INVALUABLE.—For a well pump it is invaluable, as all the iron which is submerged consists of but three small pieces, and these galvanized. It can in no way corrode, consequently it brings up pure water at every stroke.

SIXTH, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to keep in use for years. No repairs at all are needed. It is very light, and thus the cost of transportation is very small.

CHEROKEE PILLS,

Or Female Regulator,

Cure Suppressed, Excessive and Painful Menstruation, Green Sickness, Nervous and Spinal Affections, Pains in the Back, Side, Headache, Giddiness, and all diseases that spring from irregularity, by removing the cause and all the effects that arise from it. They are perfectly safe in all cases, *except those forbidden by the directions*, and are easy to administer, as they are nicely *sugar coated*. They should be in the hands of every Maiden, Wife, and Mother in the land.

Ladies can address us in perfect confidence, and state their complaints in full, as we treat all Female Complaints, and prepare a separate pill for all diseases to which they are subject.—Thirty-two page pamphlet, in a sealed envelope, free.

The Cherokee Pills are sold by all druggists at $1 per box, or six boxes for $5; or they are sent by mail, free of postage, in an ordinary letter, free from observation, by addressing the sole proprietor,

Dr. W. R. MERWIN, 37 Walker St., N. Y.

N. B.—Cherokee Pills No. 2 are prepared for *special cases*, when milder medicines fail; these are sent by mail, free of postage, on receipt of $5, *the price of each box.*

DR. WRIGHT'S

REJUVENATING ELIXIR,

Or, Essence of Life,

"As the Phenix rises from the ashes of its fire, animated with new life—so does this Elixir restore, as the system and old fail vigor, thus proving a *veritable Elixir of Life.*" It gives a new lease of life, causing the weak and debilitated to have renewed strength and vigor, and the entire system to thrill with joy and pleasure.

Cures *General Debility, Weakness, Hysterics in Females, Palpitation of the Heart and all Nervous Diseases.* It restores now life and vigor to the aged, causing the hot blood of youth to course the veins, restoring the *Organs of Generation, remembering impotency and Debility, restoring Manliness and Vigor*, thus proving a *veritable Elixir of Life.*

Price, one bottle $2; three bottles $5; sent by express to any address.

Our medicines are sold and recommended by all respectable druggists in every part of the civilized globe; some unprincipled dealers, however, try to deceive their customers by selling cheap and worthless compounds in order to make money. Be not deceived—ask for these medicines and take no others. If your druggist does not keep them, write to us, and we will send them by express, carefully packed, free from observation. We will be pleased to receive letters with full statements in regard to any disease with which ladies or gentlemen are afflicted. Address all letters for medicines, pamphlets, or advice, to the sole proprietor,

Dr. W. R. MERWIN, 37 Walker St., N. Y

HIGHLY IMPORTANT

—TO—

UNFORTUNATE FEMALES!

DR BRISCOE'S FEMALE DROPS are unsurpassed by virtue and efficacy in removing all complaints, of whatever nature, incident to females. He continues, with his usual success, to medically and surgically remove Obstructions, Engorgements, Leucorrhœa, Whites, General Debility, &c., and suppressions of all kinds; also all complaints of the Lungs, Liver, Kidneys, Spleen, Bladder, &c.

His medicines will be sent to any part of the country by express or mail; addressed by a communication stating particulars, will receive prompt attention.

Office, No. 23 Endicott street.

Persons at a distance can consult Dr. BRISCOE, by letter, describing the case, and have the medicines securely put up, and forwarded to any part of the United States, with full directions for use. Office arranged with separate apartments, so that patients see none but the Doctor himself.

Address DR. BRISCOE, at No. 23 Endicott St., Boston, Mass., stating symptoms. All communications are confidential.

Patients furnished with rooms and board if desired, and nursing observed in every case.

Office hours from 9 A. M. to 9 P. M.

Boston, July 16, 1865. ThSly

DR. M. BRISCOE still continues his successful treatment of all Private Diseases and also Female Complaints, at his old established office, No 23 Endicott street.

N. B.—The sick and afflicted will do well to give him a call. A short consultation will cost you nothing, but a word of friendly advice may save you years of suffering.

P. S.—Ladies who wish to stay in the city under my care a few days, can be furnished with kind nurses. Charges moderate.

☞ The New Orleans Times states that oil has been struck by parties who were boring for it at Gadsden, Alabama, on the Coosa river, and that the whole country thereabout is in a state of intense oleaginous excitement. In Louisiana, boring has been commenced near Lake Charles, where a sandstone formation was struck at a depth of one hundred and twenty feet. Quite a number of natural oil springs have been found in the same vicinity and in the interior of the State. A valuable spring has also been discovered within two miles of Red river, above the raft, and the prospect on the Ouachita river, in Arkansas, is extremely flattering.

☞ Hon. John Covode, M. C. in his report to the President, after his enquiries of the condition of Louisiana and several other States in respect to the reconstruction of their society, says: "The colored people of New Orleans possess considerable property. They pay taxes on about $14,000,000 worth of property, and many of them are men of superior business capacity and intelligence." Other reports speak of millions of property owned by the colored citizens of Cincinnati, Washington city, and many other places. Now to this class of oppressed citizens, let us apply the principle laid down by President Johnson in respect to the readmission of Tennessee, that there should be no taxation without representation.

☞ The London Times says: "The courage and decision exhibited by President Johnson in refusing his assent to the Freedmen's Bureau question, confirms the respect in which his policy has been held in England, and will entitle him to be credited as one of the ablest of Statesmen who have ever conducted a great nation successfully through a perilous crisis by firmness, moderation and wisdom." The president is entitled to all the praise of the London Times: —but loyal men in this country remember, that all through the war, this same Times kept patting the rebels on the back, and praising Jeff. Davis & Co. quite as heartily as they praise president J. now.

Important to the Afflicted.
DR. DOW continues to be consulted at his office, Nos. 7 and 9 ENDICOTT STREET, BOSTON, on all diseases of a PRIVATE OR DELICATE NATURE. By a long course of study and practical experience of unlimited extent, Dr. D. has now the gratification of presenting the unfortunate with remedies that have never, since he first introduced them, failed to cure the most alarming cases of GONORRHŒA AND SYPHILIS.
SEMINAL WEAKNESS.—Dr. Dow devotes a great part of his time to the treatment of those cases caused by a secret and solitary habit, which ruins the body and mind, unfitting the unfortunate individual for business or society. Patients who wish to remain under Dr. Dow's treatment a few days or weeks, will be furnished with pleasant rooms, and charges for board moderate.—Medicines sent to all parts of the country, with full directions for use, on receiving descriptions of your cases. Dr. Dow has also for sale the French Capoches, warranted the best preventive. Order by mail. Three or $1 and a red stamp.
Highly Important to Females
IN DELICATE HEALTH.
Dr. DOW, Physician and Surgeon, No. 7 Endicott Street, Boston, is consulted daily for all diseases incident to the female system. Dr. Dow has no doubt had greater experience in the cure of diseases of women than any other physician in Boston. Boarding accommodations for patients who may wish to stay in Boston a few days under his treatment. Dr. Dow, since 1845, having confined his whole attention to an office practice for the cure of Private Diseases and Female Complaints, acknowledges no superior in the United States.
N. B.—All letters must contain one dollar, or they will not be answered. Office hours from 8 A. M. to 9 P. M.
CERTAIN CURE
in all cases, or No Charges Made.
Among the physicians in Boston, none stands higher in the profession than the celebrated DR. DOW, No. 7 Endicott street. Those who can secure the service of an experienced physician and surgeon should give him a call.
P. S.—Dr. Dow imports and has for sale a new article, called the FRENCH SECRET. Order by mail. Two for $1 and a red stamp.

VINELAND
FARM AND FRUIT LANDS.
In a mild and healthful climate. Thirty miles *south* of Philadelphia by Railroad, in New Jersey, on the same line of latitude as Baltimore, Md. Large sales are made yearly from the Northern States, for $50, a clay to a sandy loam, suitable for Wheat, Grass Corn, Tobacco, Fruits and Vegetables. This is a *great fruit country*. Five hundred Vineyards and Orchards have been planted out by experienced fruit-growers. Grapes, Peaches, Pears, &c., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste*. It has increased five thousand people within the past three years. Churches, Stores, Schools, Academies, Societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are constantly settling. Hundreds of new houses are being constructed. Price of Farm land, twenty acre lots and upward, $25 per acre. Five and ten acre lots and Village lots for sale.
Fruits and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Yards, Manufactories, Foundries, Stores and the like; and Steam Power, with room, can be rented.
For persons who desire mild winters, a healthful climate, and a good soil, in a country beautifully improved, abounding in fruits, and possessing all other social privileges, in the heart of civilization, it is worthy of a visit.
Letters answered, and Vineland Rural, a paper giving full information, and containing Reports of Solon Robinson, sent to applicants.
Address CHAS. K. LANDIS, Vineland P. O., Landis Township, New Jersey.
From Report of Solon Robinson, Agricultural Editor of The Tribune: *It is one of the most extensive fertile tracts, in an almost level position and suitable condition for pleasant farming that we know of this side of the Western Prairies.* n1—dawtou

WASHINGTON ITEMS.—Perley says, under date of Sunday:

There is much speculation as to whether President Johnson will sign the Civil Rights bill, and the Congressmen elect from the Southern States are known to be protesting against some of its provisions. It only reached the President on Friday afternoon, so several days may elapse before the President's determination regarding it is known. But the prevalent opinion here is that it will be signed and will become a portion of the law of the land. Black men at the South will then "entitled to the full and equal benefit of all laws for the security of person and property as is enjoyed by white citizens, and shall be subject to like punishment, and to none other.

[The President *should* sign it, unless he intends to deny and contradict all his previous promises and professions. We shall soon see.]

Perley adds:

The question then arises, if these black men can receive civil rights from Congress, should they not also receive from the same source the political right of suffrage?

[True;—but this is *another* question, and the president has (in our opinion very unwisely) committed himself to the negative side.]

The same writer also says:

The amendment to the Constitution adopted by the Caucus Committee of the Senate, which is that originally drawn by Mr. Broomhall and submitted by Mr. Grimes, with slight verbal alteration, is certain to receive within one vote of the necessary two-thirds vote in the Senate, and can be easily carried by the requisite majority in the House. The alteration is to prevent any diminution in the representation of those States which have disfranchised rebels for participation in the rebellion.

The Washington special of the Boston Hearal says:

If the new Constitutional amendment basing representation on the number of votes is reported to the Senate to morrow or next day it will be considered as soon as the pending appropriation bills are disposed of. The requisite two-thirds vote on the amendment is insured from opinions expressed in the Senatorial caucus.

Nearly every Savings Bank in the country has petitioned Congress to remove the tax on deposits.

The amount of fractional currency issued daily from the Printing Bureau is seldom less than $50,000.

The Civil Rights Bill was laid before the President Saturday. The impression is quite strong that he will sign the bill.

☞ A Washington item says:

Mr. Raymond and others engaged in the movement have ordered to be printed a very large number of President Johnson's speech of Feb. 22, as revised and remodelled by himself.

We remember perfectly, that the late lamented Daniel Webster, in a night session of Congress, made a flaming speech, in which he recommended that the President of the U. S. should take military possession of the disputed Madawaca country, some Fourth of July! His friends were astonished: his foes greatly tickled. By and by Mr. Webster revised and *remodelled* his speech, and it was published. But is was no more like what he *said*, than a dove is like a serpent, and Mr. Webster and Lord Ashburton afterward settled the dispute in peace.

Mr. Webster's *two* speeches did not add to his fame. And Mr. Johnson's *two* will not add to his. But if he, under Mr. Raymond's advice, backs out of his folly as Webster did out of his, it will be well for the country, and better for him.

GOLD, Tuesday, 128.

☞ Prof. Beck, of Harvard University, died suddenly at Cambridge, on Monday evening.

☞ The news from Mexico is confused, like the affairs in that country. The French troops have not left, and the Republicans are not yet all subdued.

☞ The people of Toronto, Canada, were alarmed on Saturday night by rumors of the Fenian Gen. Sweeney and an army at Detroit and Niagara.

— John Pendleton, a native of New York, who introduced lithrography into this country, and who assisted in putting up all the cotton presses of the South, died in New Orleans on the 10th inst., aged 68 years.

NEW HAMPSHIRE ITEMS.

—— Rev. T. H. Miller is to preach at South Hampton next Sunday,—and at Nottingham on Easter Sunday, April 1.

—— The house and outbuildings of B. B. Grant, of Walpole, were destroyed by fire on the night of the 9th. Loss $6000; insured $1900.

—— The Supreme Judicial Court has decided, that it is lawful for towns to appropriate money to reimburse persons for expenditures incurred in filling the quotas of the towns; and that towns are not authorized to raise money by tax to reimburse individuals for money paid to procure themselves substitutes.

—— On Saturday last, Henry C. Rittenbush, of Merrimack, found two young men looking at his stock. An unsatisfactory answer being returned as to what they were there for, he ordered them off. They did not leave, and he discharged a double-barreled gun at one of them, putting twenty shot into his face, chest and arms; but on account of the small amount of powder in the gun, the wounds are not serious.

—— Among the recent appointments of Second Lieutenants by President Johnson in the regular army of the United States, are the following from this State:

In 1st Artillery—Geo. P. Thing, late Captain 1st N. H. Heavy Artillery.

3d Artillery—Geo. K. Dakin, late Captain 1st N. H. Heavy Artillery.

2d Infantry—John F. Thompson, late 2d Lieut. 1st N. H. Cavalry.

11th Infantry—Chas. O. Bradley, late captain 13th New Hampshire.

14th Infantry—Oscar A. Converse, late 1st Lieut. 1st N. H. Cavalry.

—— Hon. J. W. Patterson of this State is making telling speeches in Connecticut, and thinks that State safe for the Republican nominee.

—— The citizens of Manchester have voted to furnish a new high school building at an expense of $40,000. They have also appropriated $500 for the purchase of new maps for the school rooms.

INFANTICIDE. — The Keene Sentinel gives the particulars of a horrible case of infanticide at Fitzwilliam on the 5th inst. The murderer was a girl about eighteen years of age, named Alfaretta Boyce, who is mother of another child about 5 years old. The child killed was about four weeks old. The mother was seen to get out of the cars at the Fitzwilliam depot on the day named, with the child in her arms. She immediately started on foot for Howville, a place about three miles distant. She had proceeded but a short distance, when she stepped into the woods by the roadside, stripped the child of nearly all its clothing, bound a handkerchief over its mouth, laid it down in a thicket and left it to die. She proceeded on her way to Howville, but gave no indication to her relative, of what she had done. In a day or two it came to the knowledge of her brother that she had been seen at the depot with a child in her arms, on his demanding an explanation she confessed the whole story. He took her to the selectmen and they at once proceeded to look for the child, which was found at the place she indicated, frozen firmly to the ground. She was arraigned before a magistrate, and plead guilty. As they were taking her to the jail, on being questioned as to her motives for killing the child, she merely said she had one child and did not want to be troubled with another.

IN CONGRESS, on Monday, the House reconsidered the vote by which the Loan Bill had been rejected, and recommitted the bill, by a vote of 81 to 67. The bill, amended and improved, will doubtless pass and become a law.

The Civil appropriation bill was considered, and most of the Amendments made in Committee were adopted by the House.

A resolution to adjourn Congress in May, passed 80 to 64.

☞ Perley writes from Washington March 19:—"Melinda Carroll, a colored woman, known to be 117 years old, was buried in Georgetown to-day.

Col. Tom Florence is not over jubilant now-a-days, and he declares that President Johnson is not easily managed.

[Tom is a copperhead editor:—and the President has heard from New Hampshire.]

☞ Col. Robert Carr, the oldest surviving field officer of the war of 1812, from Pennsylvania, died at his residence in Philadelphia on Thursday last, aged 89 years. Col. Carr was a native of Scotland, and came to Philadelphia in the ship Friendship, from Glasgow, in 1784. He subsequently obtained employment in the office of Benjamin Franklin, and served the printer-philosopher as an errand boy for some time. He learned the trade of a printer, and in his boyish days he read proof with Washington. On the breaking out of the war of 1812 he joined the army as a volunteer, and he served under Scott on the Canadian line.

— When may a man be said to breakfast before he gets up? When he takes a roll in bed.

— Gen. Sickles has issued a stringent order for the better protection from outrages of the black and white loyalists in South Carolina, and for the extermination of a band of outlaws under an ex-rebel Major named Coleman, now riding raids through the State.

— A young man named John Moran, 21 years old, shot and killed Mary Ann Carney, aged 19, on Monday evening, in Roxbury, Mass. Patrick Carney, father of the girl, had forbidden Moran's visiting his house, and also forbidden Mary's association with him. Yet, when he tapped at the window, she went to the door, and met her death at the hands of a professed lover, though no one knows of anything unpleasant between them previously.

— We have heard of people asking for bread and receiving a stone. We should consider ourselves much worse treated, after asking for Herrick Allen's Gold Medal Saleratus, to have some other kind palmed off on us. We state this that our readers may enjoy the same pleasure we have—viz: to eat a better Biscuit than was ever made with any other Saleratus or soda. Most of the Merchants have it for sale. See that the name of Herrick Allen is on the wrapper, and no mistake can occur. 61

Headache constantly impaired my health till I found American Life Drops.—An Old Sufferer.

IT IS A FACT, that more suffering, disease and distress is alleviated by Coe's Dyspepsia Cure than by any other one medicinal preparation extant. It is infallible in Dyspepsia, General Debility, Lassitude, Weakness, no Appetite, Indigestion, and is an immediate cure for any disease of the stomach and bowels.

We would also say in this connection, that Coe's Cough Balsam, compounded by the same firm, is invaluable in all cases of Croup, Sore Throat, Whooping Cough, and all throat and lung complaints. mh19—1weodaw

Holloway's Pills and Ointment.—Asthma.—Through this disease has baffled the skill, and been pronounced by eminent medical men as irremediable, the numerous certificates daily received by Dr. Holloway are a direct refutation to such ill-founded and fallacious conclusions. Coughs, colds and asthma in all its ramifications of bronchial affections, diseases of the chest, throat, &c., have been cured in their worst stages by these expectorant and laxative remedies. THE LANDS OF THE COMPANY

consist of Twelve Hundred acres, at Reno, on the Alleghany River in Venango County, Pennsylvania—*the heart of the Oil District in that State.*

ONE THOUSAND WELLS

Can be sunk upon the Property without Interference.

Test wells have been sunk on the Estate, and Oil found in paying quantities in every instance. FIFTY WELLS are now being put down, to be followed by others as rapidly as possible to the extent necessary *to fully develope the property.* One hundred wells yielding only ten barrels a day each at six dollars a barrel, a price much below the average price at Reno, would give one million eight hundred thousand dollars a year of income, making a profit probably fifteen per cent over expenses and taxes of every kind. If large flowing wells are found, *a single acre of the territory may yield the entire capital within two years.*

☞ The Company owns the Town of Reno, together with Several Hundred Lots for Business and Dwelling Houses. There is an Extensive Demand for them, and the Revenue from their Sale will be very great.

The Stock is Guaranteed.

The Price of Stock has been fixed at ONE HUNDRED AND FIVE DOLLARS per share. Five Dollars go into the Treasury of the Company as a contribution to the Working Fund.—*The Par Value of the Stock, One Hundred Dollars, is paid to the Trustees, to be Deposited in the Treasury of the United States, or Invested in Government Securities,* **and may be Withdrawn by the Stockholder at any time.**

By the payment of Ten Dollars, persons that desire to await the Result of the First Year's Development, can Secure the Right of obtaining A FULL PAID SHARE OF GUARANTEED STOCK for One Hundred Dollars Additional at any time before the First day of April, 1867.

☞ It is an Investment with the Chances of Large Profit, *and is always convertible into* **Cash** *at Par.* It might be called

A Legal Tender Oil Stock.

So large a Working Fund ($500 000) has never been provided or expended by any Company in the Oil Region. *SUBSCRIPTIONS* will be received by agents and by the principal Banks and Bankers throughout the country. Prospectuses and other information will be furnished by Agents, and by

Perry's Moth and Freckle Lotion.

☞ Chloasma, or Mothpatch, (also called Liver-spot,) and Lentigo, or Freckles, are often very annoying, particularly to ladies of light complexion, for the discolored spots show more plainly on the face of a blonde than of a brunette; but they greatly mar the beauty of either and any preparation that will effectually remove them, *without injuring the texture or color of the skin,* is certainly a desideratum. DR. B. C. PERRY, who has made diseases of the skin a specialty, has discovered a remedy for these discolorations, which is at once prompt, infallible and harmless.

MAGGIEL'S

Spring and Summer Remedies.

"*Grea: oaks from little acorns grow.*" The worst diseases known to the human race spring from causes so small as to almost defy detection. The volumes of scientific lore that fill the tables and shelves of the medical fraternity only go to prove and elaborate these facts. Then guard yourselves here while you may. The smallest pimple on the skin is a full tale and indicator of disease. It may fade and die away from the surface of the body, but it will reach the vitals, perhaps, at last, and death be the result and final close. MAGGIEL'S BILIOUS, DYSPEPTIC and DIARRHEA PILLS cure where all others fail. While for Burns, Scalds, Chilblains, Cuts, and all abrasions of the skin, MAGGIEL'S SALVE is infallible. Sold by J. MAGGIEL, 45 Fulton street, New York, FRESTON AND TRACHER in this city, and all Druggists, at 25 cents per box. decseod&wly

Local.

☞ At the special town meeting on Tuesday morning, Hon. Horton D. Walker was chosen Moderator. The polls were open but about three-quarters of an hour, and at their close the vote stood upon the question of the expediency of building a City Hall: Yeas 88, Nays 209.

☞ If there be anybody who thinks the new City Hall movement was in any manner privately commenced or urged on by the publisher of this Chronicle; or that any action on it can in any way affect his feelings or opinions—that body is very much mistaken, that's all. We care very little if anything about it, personally—but as educators of the public taste, we deem it ever the duty of the press to urge on all real improvements. As to old fogyism, the "noes," &c.,—if anybody is green enough to expect a City Hall or anything else ever to be agreed to unanimously, they must wait some time for it, we guess.

As to the question for to-day, we do not regard the vote of yesterday as in any manner conclusive; for we are *sure* a large majority of our voters are really in favor of a Hall now, and we *think* also a majority of the taxes. But let it go to the City Council, who really have all the power in the premises, and will give us a new Hall if they see fit—even though it throw some folks *into* fits.

☞ Several of our live men—traders and others—have questioned us about Street Sprinklers. We understand Mr. Wm. Plaisted is making arrangements to keep down the dust next summer, for those who will "down with *their* dust" for the purpose. And he will do it well, if he undertakes it; but there are some men, who call themselves "business men," too, who will never pay a cent for any such purpose—and for them we hope a liberal supply of dust, and recommend a dose of salt to keep them.

Communication.

CITY HALL.—The result of the town meeting on Tuesday morning proves one thing, viz: That the owners of the Temple look much more closely after their own interest, than the friends of public improvement do after those of the city. In the very short time allowed for voting, the opponents of the measure probably threw nearly every vote they could have secured, had the polls been open all day; and shew their finesse by closing them while they had the power. This is offering a premium for our present hall accommodations, that I've no doubt the proprietors thereof are shrewd enough to make the most of,—but possibly the question may not be settled yet.

ONE WHO DID NOT VOTE.

☞ A responsible man, and friend of the friendless, sends us the following communication, designed as an offset and correction of our Police Court Report:

Professor Andrew P. Clarke is a quiet, inoffensive citizen, of good moral habits, and one who treats everybody well and minds his own business. But there are rowdies in this city who, when full of fighting rum, wish to distinguish themselves, and "pitch into" Mr. Clark—they being too great cowards to fight any one when they thought there was a chance of getting whipped. Mr. Clark having borne this treatment long enough, arrested one of those assailants, and after having him imprisoned twenty hours, had him brought before the Police Court, but lost his case for want of sufficient witnesses.

Mr. Clark has for the past four or five months been connected with Knight's Cornet Band; has had one of their instrument; has practiced with the Band in their hall; and considered himself a member. A few weeks since he was sent to Boston as agent, to make an engagement for the Band to play on St. Patrick's Day. Having many friends there, he succeeded in making the engagement; but on his return, was informed by the Band that they were not willing that he should go with them, although he had been led to expect that privilege. On his entering the Band Room the night previous to St. Patrick's Day, he was ordered out of the hall, and not immediately obeying, he was very unceremoniously kicked down stairs by one Gilpatrick, of the Band, who would have looked through a grated window for a few weeks, if the case of Prof. C. could have been so presented as to secure STRICT JUSTICE.

☞ Lieut. Col. Geo. Frank Towle, of this city, late of the 4th N. H. regiment, has been appointed 2d Lieutenant in the 19th U. S. Infantry.

☞ Auctioneer Wendell on Tuesday knocked off the Martine Place, at Sagamore Creek, to James Hennessy, at $4150.

☞ "Our Young Folks," for April, contains all those features which have hitherto rendered it so successful.

☞ Our thanks to a Manchester friend, for a copy of the pamphlet "Report of the Route surveyed for the Manchester & Keene Railroad." It may be seen at the Mechanics' Exchange.

Correspondence of the Chronicle.

ELIOT, March 20, 1866.

Editor Chronicle:—The result of the annual election in Eliot, which took place yesterday, seemed to be as gratifying to the Republicans as it was disheartening to the Copperheads. The election was hotly contested by both parties, and a very full vote was polled, the "Coppers" bringing up to their aid the lame, halt, blind and infirm, but all to no purpose. The following named persons were chosen town officers for the ensuing year by about 60 majority:

Moderator—Timothy Dame.

ESPERANCE, by Meta Lander, author of "Life on the Dark River." 1 vol., pp. 336.

A story of girlhood, pleasantly told, that will recall many an incident of the past to its readers; of days when hope was high and hearts beat joyously.

MARION ROOKE, or the Quest for Fortune, by HOPE CAY Selley. 1 vol., pp. 475.

A well written account of the eager struggle for wealth wherein most mortals do engage; showing much of Californian life in the early days of the gold fever, and not a little of what has transpired nearer home since war and petroleum has made "the sudden rich" a feature of society.

Both books are very neatly gotten up, and published by Sheldon & Co., N. Y.

We call the attention of our customers and the public to our stock of GRAPE VINES, which is larger than ever before. Having had over twenty years' experience in the management of Vineyards and the propagation of Vines, and our present stock having been grown from bearing wood only, with constant care during the season, we think they will compare favorably with any others that are offered for sale.

Our stock of MONTGOMERY VINES is very large. This variety not being generally known, we will give a brief description: White, a seedling of the White Chasselas, an unparalled grower and bearer, clustered often weighing two pounds, with a mild subacid flavor. It is classed with the hardy grapes, but we protect it in winter as we do all other varieties in this part of the State.

Our stock of the various kinds of EVERGREEN and DECIDUOUS TREES is very large, and is offered at moderate price; and at very low rates by the quantity, to those who are laying out and improving their farms, cemeteries, or public grounds, and to nurserymen. We challenge competition.

THE LIGHT OF THE WORLD.

DR. MAGGIEL'S

PILLS AND SALVE

These Life-giving remedies are now, for the first time, given publicly to the world. For over a quarter of a century of private practice the ingredients in these

Life-giving Pills!

Have been used with the greatest success. Their mission is not only to prevent disease, but to cure. They search out the various maladies by which the patient is suffering, and re-invigorate the failing system. To the aged and infirm a few doses of these valuable PILLS will prove to be

A Very Fountain of Youth,

Fot in every case they add new life and vitality, and restore the waning energies to their pristine state. To the young and middle aged, they will prove most invaluable, as a ready, specific, and sterling medicine.—Here is a dream realized, that Ponce-de-Leon sought for three hundred years ago, and never found. He looked for a fountain that would restore the old to youth and make youth ever

AN ETERNAL SPRING!

It was left for this day and hour to realize the dream, and show, in one glorious fact, the magic that made it fair.

These Famous Remedies

Cannot stay the flight of years, but they can force back and hold aloof, diseases that might triumph over the aged and the young. Let none hesitate then, but seize the favorable opportunity that offers. When taken as prescribed—

FOR BILIOUS DISORDERS

Nothing can be more productive of cure than these Pills. Their almost magic influence is felt at once; and the usual concomitants of this most distressing disease are removed. These remedies are made from the purest

VEGETABLE COMPOUNDS.

They will not harm the most delicate female, and can be given with good effect in prescribed doses to the youngest babe

For Cutaneous Disorders

And all eruptions of the skin, the SALVE is most invaluable. It does not heal externally alone, but penetrates with the most searching effects to the very root of the evil.

SUFFERERS
From Dyspepsia
READ! REFLECT!! ACT!!!

TARRANT & CO

Gentlemen, I am a resident of Curacoa, and have often been disposed to write to you concerning the real value of Your SELTZER APERIENT as a remedy for indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.

For four or five years my wife has been sadly afflicted with dyspepsia, and after trying under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Calatrillo, of Venezuela, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.

I feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.

Trusting that you will give this publicity, and repeating my earnest gratitude and thanks,

I am very respectfully yours,
S. D. C. HENRIQUER,
Merchant, Curacoa, S. A.

New York, June 28th, 1865.

WE ASK

The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of

Dyspepsia, Heartburn, Sour Stomach, Sick Headache, Dizziness, Indigestion, Piles, Costiveness, Bilious Attacks, Liver Complaints, Rheumatic Affections, &c.

Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your Physician.

AMERICAN AND FOREIGN PATENTS,
R. H. EDDY,
Solicitor of Patents,
Late Agent of the U. S. Patent Office, Washington, under the Act of 1837,
78 State Street, opposite Kilby Street, BOSTON.

After an extensive practice of upwards of twenty years, obtained Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds, Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of patents of inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.

The Agency is not only the largest in New England, but through it inventors have an advantage for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not unsurpassable by any other, any vehicle can be obtained there elsewhere. The Testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.

The immense practice of the subscriber for twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.

These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.

All necessary of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.

TESTIMONIALS.

"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."

CHARLES MASON,
Commissioner of Patents.

"I have no hesitation in assuring inventors that they cannot employ a person *more competent and trustworthy*, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office."

EDMUND BURKE,
Late Commissioner of Patents

Mr. R. H. Eddy has made for me THIRTEEN applications, on all but one of which patents have been granted, and that is *now pending*. Such unmistakeable proof of great talent and ability on his part leads me to recommend all inventors to apply to him on procuring their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."

JOHN TURLAGHANT

During eight months, the subscriber, in course of his large practice, made on *twelve* rejected appli cations TRIPLE APPEALS, SEVEN of which was decided in *his favor*, by the Commissioner of Patents. R. H. EDDY.

S. Vance's Submerged Well PUMP.
This unsurpassable invention, now being first introduced, will, it is believed, supersede all other Well Pumps now in use.

ITS ADVANTAGES.

FIRST, SIMPLICITY.—This Pump is composed of but three parts, and is so simple in its construction that any one can easily put it together.

SECOND, DURABILITY.—Its peculiar construction, and the fact that it is always submerged combine to make it the most durable of all Pumps yet invented.

THIRD, NEVER FREEZES.—The valves are so constructed that, when not in motion, they allow all the water above to pass down into the well, and thus prevent freezing.

FOURTH, POWER.—For the amount of power applied, this Pump excels anything known. It throws one third part more water than ordinary pumps, and works so easily that even a child can pump without fatigue. It is in this way the greatest labor-saving pump now offered to the public.

FIFTH, IT IS INVALUABLE.—For a well pump it is invaluable, as all the iron which is submerged consists of but three small pieces, and these galvanized. It can in no way corrode, consequently it brings up pure water at every stroke.

SIXTH, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to keep in use for years. No repairs at all are needed. It is very light, and thus the cost of transportation is very small.

☞ Manufactured by S. VANCE & CO., No. 31 Liberty Street, Newburyport, and for sale in Portsmouth by the Sole Agents for N. H.,

CHEROKEE PILLS,
Or Female Regulator,

Cure *Suppressed, Excessive and Painful Menstruation, Green Sickness, Nervous and Spinal Affections, Pains in the Back, Side, Headache, Giddiness*, and all diseases that spring from irregularity. Robbed of health by the cause and all the effects that arise from it. They are perfectly safe in all cases, except those *forbidden by directions*, and are easy to administer, as they are nicely *sugar coated*, so that none can detect them by any of their taste, and may be in the hands of every Maiden, Wife, and Mother in the land.

The ladies can address us in perfect confidence, and state their complaints in full, as we treat all Female Complaints, and prepare the medicine for all diseases to which they are subject.—Thirty-two page pamphlet, in a sealed envelope, free.

The Cherokee Pills are sold by all druggists at $1 per box, or six boxes for $5; or they are sent by mail, free of postage, in an ordinary letter, free from observation, by addressing the sole agent,

Dr. W. R. MERWIN, 37 Walker St., N. Y.

N. B.—Cherokee Pills No. 2 are prepared for *special cases*, when milder medicines fail; these are sent by mail, free of postage, on receipt of $5, *the price of each box.*

DR. WRIGHT'S
REJUVENATING ELIXIR,
Or, Essence of Life,

Cures *General Debility, Weakness, Hysteria in Females, Palpitation of the Heart and all Nervous Diseases.* It restores new life and vigor to the aged, causing the hot blood of youth to course the veins, restoring the *Organs of Generation* to full vigor, *curing Impotency and Debility, restoring Manliness at the system and full vigor*, thus proving a *overcome disease.* This "Elixir of Life," is removing *Sterility* and Barrenness in both sexes. To the young, middle-aged, and aged, there is no greater boon than this "Elixir of Life." It gives a new lease of life, causing the weak and debilitated to have renewed strength and vigor, and the entire system to feel with joy and pleasure.

Price, one bottle $3; three bottles $5; sent by express to any address.

Our medicines are sold and recommended by all respectable druggists in every part of the civilized globe; some unprincipled dealers, however, try to deceive their customers by selling cheap and worthless compounds in order to make money. Be not deceived—ask for these medicines and take no other. If the druggist does not keep them, write to us, and we will send them by express, carefully packed, free from observation. We will be pleased to receive letters and full statements in regard to any disease with which ladies or gentlemen are afflicted. Address all letters for medicines, pamphlets, or advice, to the sole proprietor,

Dr. W. R. MERWIN, 37 Walker St., N. Y.

HIGHLY IMPORTANT
TO
UNFORTUNATE FEMALES!
DR. BRISCOE'S FEMALE DROPS are unsurpassed by virtue and efficacy in removing all complaints, of whatever nature, incident to females. He continues, with his usual success, to medically and surgically remove Obstructions, Engorgements, Leucorrhœa, Whites, General Debility, the consequences of all kinds; also all complaints of the Lungs, Liver, Kidneys, Spleen, Bladder, &c.

His medicines will be sent to any part of the country by express or mail; addressed by a communication stating particulars, will receive prompt attention.

Office, No. 23 Endicott street.

Persons at a distance can consult Dr. Briscoe, by letter, describing the case, and have the medicine securely put up, and forwarded to any part of the United States, with full directions for use. Office arranged with separate apartments, so that patients see none but the Doctor himself.

Address Dr. Briscoe, at No. 23 Endicott St., Boston, Mass., stating symptoms. All communications are confidential.

Patients furnished with rooms and board if desired, and every care observed in every case.

Office hours from 9 A. M. to 9 P. M.

Boston, July 16, 1865. ThSly

DR. E. R. BRISCOE still continues his successful treatment of all Private Diseases and also Female Complaints, at his old established office, No. 23 Endicott street.

N. B.—The sick and afflicted will do well to give him a call. A short consultation will cost you nothing, but a word of friendly advice may save you years of suffering.

P. S.—Ladies who wish to stay in the city under my care a few days, can be furnished with kind nurses. Charges moderate.

☞ Four gentlemen from Worcester, Massachusetts, have purchase a plantation of one thousand two hundred and twenty acres in Madison county, Mississippi. They propose to keep about twenty ploughs running, and will employ from thirty to forty negroes, and no less than thirty mules. They intend to raise this year about five hundred acres of cotton, and from one hundred and fifty to two hundred acres of corn. All the articles of consumption are also raised on the plantation.

☞ As an instance of the spread of divorce in the West, we are told that there are at present living in Columbus, Wisconsin, two women, and a man who has been married to both women aforesaid. The man has been married four times, has now two wives living, and has now no wife. The first woman has been married three times, has two husbands living, and has no husband. The second woman has been married twice, has two husbands living, and has no husband.

To the Honorable Judge of Probate for the County of Rockingham in the State of New Hampshire.

Respectfully shews JAMES R. HALL of Portsmouth, in the County of Rockingham, that he is Guardian of ALICE A. TERNALD, a minor child of CHARLES H. FERNALD, late of said Portsmouth, deceased, by the appointment of the Judge of Probate for the said County of Rockingham; that his said Ward is seized of three-fourths in common and undivided of a certain piece or parcel of land, situated in said Portsmouth, bounded easterly on Alley Street, fifty feet; southerly one hundred feet on land of Leonard Cotton; westerly by land of Lorenda Patchen; and northerly by land of Ebenezer H. Hill said—together with the house and buildings thereon.

Three fourths, also, of a piece of land situate in said Portsmouth, with the buildings thereon, bounded easterly by Manning Street, seventy feet, more or less; southerly by Walton's Lane, so called, twenty six feet, more or less; and northerly by land of Charles Walton. Also three-fourths of another piece of land in said Portsmouth, bounded as follows: beginning at the north westerly corner of land named in said Ward and running northerly by Walton's Lane fourteen feet, then turning and running easterly by land now or formerly owned by Mary Jane Brackett, forty-eight feet, thence turning and running southerly by land before named of said Ward fourteen feet, thence turning and running westerly by the last mentioned land forty-eight feet to Walton's Lane, the place begun at. The last-named lot being premises conveyed to Charles H. Fernald by Mary Jane Brackett Jan. 24, 1858. The whole of each of the above premises being subject to the right of dower of the widow of said deceased, and that it is necessary for the support of his said Ward, and will be conducive to her interest to have the premises sold; wherefore he prays that he may be licensed and authorized to sell the same at public auction, according to statute in such case made and provided.
JAMES R. HALL, Guardian.
By his Attorney WILLIAM H. HACKETT.

ROCKINGHAM, SS. Probate Office at EXETER, in said County, March 5th, A. D. 1866.
Upon the foregoing Petition, it is *Ordered*, that a hearing be had thereon at the Court of Probate to be holden at Portsmouth in said County, on the second Tuesday of May next; and that the Petitioner notify all persons concerned therein to appear at said Court, and show cause, if any they have, why the prayer of said petition should not be granted, by causing said petition and this order thereon to be published three weeks successively in the DAILY CHRONICLE, a newspaper printed at Portsmouth in said County, the last publication whereof to be at least thirty days prior to said Court.
By order of the Judge,
THOMAS LEAVITT, Register of Probate.

VINELAND
FARM AND FRUIT LANDS.
In a mild and healthful climate. Thirty miles south of Philadelphia by Railroad, in New Jersey, on the same line of latitude as Baltimore, Md.
The soil is rich and *productive*, varying from a clay to a sandy loam, suitable for Wheat, Grass Corn, Tobacco, Fruits and Vegetables. This is a *great fruit country*. Five hundred Vineyards and Orchards have been planted in the United States, by fruit-growers. Grapes, Peaches, Pears, &c., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become the *resort of people of taste*. It has increased five thousand people within the past three years. Churches, Stores, Schools, Academies, Societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are constantly settling. Hundreds of new houses are being constructed. Price of Farm land, twenty acre lots and upward, $25 per acre. Five and ten acre and Village lots for sale.
Fruits and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Yards, Manufactories, Foundries, Stores and the like; and Steam Power, with room, can be rented.
For pecuniary and other advantages, beautiful climate, and a good soil, in a country beautifully improved, abounding in fruits, and possessing all other social privileges, in the heart of civilization, it is worthy of a visit.
Letters answered, and the Vineland Rural, a paper giving full information, and containing Reports of Solon Robinson, sent to applicants.
Address CHAS. K. LANDIS, Vineland P. O., Landis Township, Cumberland County, New Jersey.
From Report of Solon Robinson, Agricultural Editor of The Tribune: *It is one of the most extensive fertile tracts, for the most possible amiable condition for pleasant farming that we know of this side of the Western Prairies.* m—dawôm

Morning Chronicle.

Portsmouth, N. H.

THURSDAY, MARCH 22, 1866.

THE NEW ORLEANS MAYOR ELECT.—The President is said to have authorized a telegram to be sent to Gov. Wells, requesting the latter to withhold the credentials of election from John T. Monroe, and thus prevent his assumption of the office of Mayor. Mr. Monroe was the rebel mayor of New Orleans when that city was taken by our forces in April, 1862. He refused to submit to the Federal authority and was confined in a fort. He was afterward released, and has continued out-spoken in his disloyalty to the Government.—*Exchange.*

[Will some of the President's *new* friends, who profess to support his policy, please to contradict the above, or explain it? If he may veto a rebel mayor, or if Gov. Wells may,—they why may not Congress hold the rebel Representatives, and Senators, and States, at arms length, till they behave decently?]

IN THE U. S. SENATE, March 20, Mr. Morrill reported a joint resolution appropriating $25,000 for the relief of destitute negroes in the District, to be expended under the supervision of the Chief of the Freedmen's Bureau. It is chiefly a sanitary measure, as much for the health of whites as blacks. Mr. Saulsbury moved to amend, by appropriating a like amount for the destitute white people of the District, and made an anti-nigger speech; but his amendment was rejected, 34 to 3. The ayes were Saulsbury, Davis and Riddle.

Garrett Davis then brought out an amendment authorizing the Mayor of Washington to find suitable employment for all able-bodied black people found idle in the District, and appropriatiating five thousand dollars to defray the expenses.

Mr. Kirkwood moved to strike out the word black. He did not see why white people should not be made to work as well as black people. This provoked a roar of laughter, and Kirkwood's amendment was adopted, but then the Senate rejected the whole amendment.

After some fillibustering, Mr. Morrill's original resolution was adopted by a vote of 33 to 5.

The Naval Appropriation Bill was passed.

The House on Tuesday passed the Appropriation bill providing for the Legislative, Executive and Judicial expenses of the government during the coming fiscal year, and generally adopted the estimates as approved by the Committee. There was a decided disinclination manifested to increase salaries.

The debate of the day was on the proposed changes in the habeas corpus act, which will protect government officials from being prosecuted in State courts for their acts during the recent war. Among the advocates of the bill were Gen. Garfield of Ohio, and McKee and Smith of Kentucky, while Ross of Illinois and Rogers of New Jersey attempted to defeat it. The bill was passed by 112 yeas to 31 nays.

The Post Office Appropriation Bill passed in Committee of the Whole.

The Diplomatic and Consular Appropriation bill was also passed. An amendment by Mr. Banks to insert before Mexico the words "Republic of," was agreed to, and made a part of the bill.

CONNECTICUT ELECTION.—At Stamford, Ct., March 16, Senator Sherman of Ohio made a powerful speech to the Union men. He reviewed the differences alleged to exist between the President and Congress. He asserted that on reconstruction both demanded a loyal reorganization of the States with loyal Representatives who could take the test oath; that as to suffrage both Congress and the President were for leaving it to the States, but Congress demanded suffrage without distinction of color in the District, to which the President was opposed, unless a majority of the people, including the colored population, consented. He believed that the President would sign the Civil Rights bill, as he was already fully committed to equality of civil rights before the law, and he would protect the freedmen in such rights. He was satisfied the President intended to do what was right, although he had no authority from him to state what he had stated. Such, however, was his opinion.

A DISCLOSURE.—A Louisville, Ky., dispatch of March 20, says:

A man named King, arrested a few days ago for theft recently committed in Ohio, and awaiting in jail a requisition from the Governor of that State, has confessed to Harris, a recently confined Government detective, that he (King) and not Payne was the man who attempted to assassinate Secretary Seward. This confession being repeated to Jeff. C. Davis, who temporarily commands this Department, the latter telegraphed to Washington for the parties who were acquainted with the facts of the assassination conspiracy to come and investigate the affair. King is identified here as a rebel spy during the rebellion.

— Mrs. O'Brien, a soldier's widow at Montpelier, died in her house last week from cold and exhaustion. She was 22 years old and left a child, which was nearly dead when found.

Local.

☞ A Young American thinks that if the friends of the new City Hall had gone around and drummed up recruits to vote *for* it, as those who oppose it, did to vote against it, the ayes would have had it. And so do we. The "conservatives" got hold of the wrong man, though, when they applied to Mr. M., a Market street merchant, who although he is a pretty heavy tax-payer, told them, "yes, I will go and vote on City Hall, but I shall vote *for* it—for whatever improves the city, adds to the value of my property."

It is all very well (without doubt,) for old fogies who never did a day's work in their lives, and whose only interest in the city is the amount of "interest" they draw from property here which somebody else (who must have been smarter than they are) earned for them—we say it is all very well for such people to vote? "No"—even though they never come to the polls to vote for anything else; but to hear a young man, especially one whose prosperity depends on the growth and progress of the city, talk about waiting for this and that, before we have a decent hall, or indeed *any* hall where the people can congregate, would be lamentable if it wasn't ridiculous.

☞ Westward, like the star of Empire, the course of trade, and the building of nice dwellings, in this city, tends. Stores are creeping up Congress street, almost to the Academy; and we heard a gentlemen suggest, at that town meeting, that somewhere on the Square there, would be a fine place for a City Hall. Another suggests the splendid open lot in front of the Rundlett mansion, on Middle street. While we are not among those who think that all City Halls, or public halls in private hands, always pay great dividends; still there can be no question that stores and offices in such a building, rightly located and judiciously constructed, would pay well. But if we ever do get a Hall, probably the current fashion here would be followed—to above it is between other buildings somewhere, where there is not half room enough now.

Communication.

Editors Chronicle:—"A Friend of the Friendless" is evidently out of humor in relation to the Police Court Report of the 19th of March, so far as it relates to Professor (?) Andrew P. Clarke. I was present at the trial of the complaint of the above-named individual, and pronounce your reporter's statement correct in every particular; and he could have gone further, and stated that His Honor Judge Odell took occasion to state in open Court, that if persons forced their society into places where they had no legal right, and were ordered out and refused to go, that if they were put out without using any more force than was necessary, they had no redress. This was the evidence *exactly* in Clarke's case.

So far as Mr. Gilpatrick is concerned, he is not only a "quiet and inoffensive citizen," but of strictly good moral habits. He is not a rowdy, nor is he a drinking man; or, to use the select term of "Strict Justice," "full of fighting rum." He was arrested, but not imprisoned a moment ("Strict Justice says for twenty hours,); he at once gave bonds for his appearance. "Truth is mighty, and will prevail."

STRICT-ER JUSTICE.

Communication.

Editors Chronicle:—The following extract from a communication appeared in your issue of the 21st, over the signature "Strict Justice": "Mr. Clark has for the past four or five months been connected with Knight's Cornet Band; has had one of their instruments; has practiced with the Band in their hall; and considered himself a member. A few weeks since he was sent to Boston as agent to make an engagement for the Band to play on St. Patrick's Day." In behalf of the Band, I pronounce the above extract unqualifiedly untrue; and "Strict Justice" must have been misinformed, or he would never have penned such an article. Andrew P. Clark is in no way connected with the Band, and never has been; neither has he had any instrument belonging thereto, with which to practice,—nor was he sent to Boston as an agent for the Band. JOHN KNIGHT,

Leader "Knight's Cornet Band."

☞ Mr. Wyatt, on Hill Street, says he knows his Chronicle was stolen on Wednesday morning, but unfortunately he don't know by whom. There are plenty of just such cases—but though we have repeatedly offered ten dollars reward for the detection of one of these thieves, yet nobody is smart enough to catch one of the peaky rascals.—But after all, the thieves who steal the paper outright, are no meaner, though they are more actionable, than those who steal the reading of it—and the latter outnumber the direct and downright thieves a hundred to one. If all who read newspapers which they have no right to, had to pay for them, editors would make as much money as other folks who are no smarter and work no harder; instead of being, as they proverbially are, poor,—or, at any rate, as they actually are for the most part, half paid.

☞ Portsmouth was never better supplied with good music teachers, than at present. Not to mention the numerous lady players and teachers, or the occasional importations from the rural districts—the three leading professionals in music, are Messrs. Pearson, Day and Hallet, whom we name in order of their coming. Mr. Pearson has for nearly twelve years been a citizen of Portsmouth, and has proved his ability as a musician, both teacher and player. His advertisement announces that the business which has of late occupied part of his time in Boston being concluded, he will now devote himself exclusively to pupils in music. Mr. Pearson was also the original agent for the Steinway Pianos in Portsmouth, and still advertises the agency which he has retained for several years.

Of Messrs. Day and Hallett, we have more than once spoken in commendation. There should be plenty of business for all the trio named, and we presume they do have it. If they will all take hold and pull together, in musical matters, they can do much to benefit the public, and so themselves, through the cause of music.

☞ The Atlantic Monthly for April contains sixteen extra pages, and is an excellent number in every respect. Messrs. Shores and Foster have it.

NEW HAMPSHIRE ITEMS.

—— On Monday night the store of Whipple & Atwood in New Boston, caught fire from the chimney and was entirely consumed, together with the shed and barn attached. The goods were also burnt and all their books and papers. The store and goods were of $6600 value and insured for $3000.

—— A. L. Haines of Wentworth, about thirty years of age, has been arrested in Concord, charged with passing a counterfeit fifty dollar Treasury note at Wentworth, and for having counterfeit scrip in his pocket. On his person was found one hundred and ten spurious fifty cent pieces of fractional currency, all new. He was arraigned before Commissioner Asa Fowler and placed under four thousand dollars bonds to appear for examination on Thursday.

EAST TENNESSEE.—Brownlow's Whig says that the conduct of the rebels of West and Middle Tennessee is such that the East Tennesseeans are considering the subject of having that section recognized as a separate State. The loyal men of East Tennessee feel that they can never live in peace with the rebels, and that separation is necessary. They feel that Congress will be willing to set them apart, and that they ought to do so because of their loyalty.

☞ The Newburyport Herald tells a story of a venerable citizen of that city, who while walking in Salisbury a few days since, was seized violently by four strong and rough men, who ran him some distance, to his great fright and no little danger to his wind. When they stopped, the only apology was—"We know you; you're too good a man to be kilt." It seems that he was near where they were blasting rocks on the track of the Eastern Railroad, and without knowing it, was within a few feet of where a train was laid and an explosion was to take place. He would have been blown to pieces in less than two minutes but for the timely interference of the workmen.

— The Washington correspondent of the New York Times says there is no foundation for the statement that the friends of the President in Congress are urging upon him changes in the Cabinet. No movement of the kind has been made, nor is any such contemplated. The Cabinet so far as its actions or expressions of opinion are concerned, is, as Mr. Seward said in New York, a unit in support of the President

— At New Orleans, all the newly elected city officers have been duly installed in office, except Mayor Munroe and Alderman Wilson, whose functions have been temporarily suspended, as coming within the exceptions of the pardon made by the President's proclamation. M. J. Rossier has been installed as Mayor pro tem. by order of Gen. Canby.

— John Moran of Boston, the murderer of Miss Kearney of Roxbury, is in custody. It seems he has been a garroter, and with one Maloy caused the death of a man whom they robbed: it also seems that Miss K. had read a letter which disclosed the crime, and that Moran shot her to prevent exposure; but yet the crime comes to light.

— On Friday evening, as Mr. John Bigler, a grocer, was passing from his store to his residence in the village of North Attleboro', he was knocked down with a sandbag, robbed of $1182 and a gold watch, and thrown into the river, from which he was able to escape.

— It is stated that Mr. A. T. Stewart has dropped the libel suit against Mr. Richard T. Colburn, the latter having lost his position on the New York Tribune and as correspondent of the St. Louis Republican on account of the affair.

What length ought a lady's crinoline to be? A little above two feet.

GOLD, Wednesday, 128 1-2.

☞ The friends of music in Strafford County are to hold a Musical Festival at Dover, commencing on Monday Mch 26th, and to last through the week. Mr. Wm. A. Hodgdon of Concord will be conductor, and Mr. L. P. Whitney of Dover leader of orchestra. The hotel rates will be reduced. A. N. Johnson's U. S. Collection of Church Music will be used. Three Concerts will be given, on Wednesday, Thursday and Friday evenings.

— At last President Johnson has indorsed the payments of the rewards offered for the apprehension of Booth and his fellow-conspirators, as awarded by a commissioner appointed for the purpose.

— At Nashville, Tenn., Dr. Sam'l Wolffe was brutally assaulted Saturday night on the street. His wounds are serious, though it is thought not fatal. The assailant has not been identified.

— The Republicans of Rhode Island, by acclamation, have nominated Gen. Burnside for Governor, and his election is considered certain.

—Mr. Frost, a shoemaker in Brattleboro', Vermont, has collected seven hundred specimens of indigenous fungi, one hundred of which owe their discovery to himself.

MARRIAGE.—Marriage is one of the great blessings of the world; Herrick Allen's Gold Medal Saleratus is the other. One is the result of love, admiration and courtship; the other the result of perseverance, science and skill. Where matches have proven unsuitable, this article is well calculated to harmonize and make home happy and pleasant, by always giving you the nicest, whitest, lightest and best Bread, Biscuit, Cakes and Puddings that woman's hand can make—which purpose cannot be accomplished by the using of any other Saleratus or soda. Most Merchants sell it. 46

THE DIFFERENCE

Between a good and poor article of Gin is quite enough. If you want the best, buy a bottle of Dunster's old London Dock Gin. Sold by most country stores everywhere, and by the wholesale trade of A. RICHARDS, 99 Washington street, Boston. 26

Holloway's Pills and Ointment.—Asthma.—Though this disease has baffled the skill, and been pronounced by eminent medical men as irremediable, the numerous certificates daily received by Dr Holloway are a direct refutation to such ill-founded and fallacious conclusions. Coughs, colds and asthma in all its ramifications of bronchial affections, diseases of the chest, throat, &c., have been cured in their worst stages by these expectorant and laxative remedies. Sold by all Druggists. m16—1w

Cancer, Humor and Tumor Doctor,

Formerly of Boston, and now of New Bedford, has arrived in PORTSMOUTH, and taken Rooms at the CITY HOTEL, where he will remain till April 2d, or longer, if patients under treatment require it.

Dr. C. gives particular attention to the cure of CANCERS, which he cures without pain and without the use of the knife. Do not say you cannot get any relief until you have tried his medicines, which will remove all humors, such as Cancers, Scrofula, Humors, White Swelling, Affections, Erysipelas, Salt Rheum, Inflammatory, Chronic, Mercurial and Syphilitic Rheumatism; Fever Sores, old and stubborn Ulcers and Sores of all kinds cured, whatever may have been the cause that produced them.

Dr. C. will give examinations and advice free on all diseases. Invalids of both sexes are respectfully invited to call and consult the Doctor.

N. B.—Certificates of cures may be had of him from all parts of the country. m22—dawta2

Cleanse the Blood.

With corrupt, disordered or vitiated Blood, you are sick all over. It may burst out in Pimples, or Sores, or in some active disease, or it may merely keep you listless, depressed and good for nothing. But you cannot have good health while your blood is impure. AYER'S SARSAPARILLA purges out these impurities and stimulates the organs of life into vigorous action, restoring the health and expelling disease. Hence it rapidly cures a variety of complaints which are caused by impurity of the blood, such as Scrofula, or King's Evil, Tumors, Ulcers, Sores, Eruptions, Pimples, Blotches, Boils, St. Anthony's Fire, Rose or Erysipelas, Tetter or Salt Rheum, Scald Head, Ring Worm, Cancer or Cancerous Tumors, Sore Eyes, Female Diseases, such as Retention, Irregularity, Suppression, Whites, Sterility, also Syphilis or Venereal Diseases, Liver Complaints, and Heart Diseases. Try AYER'S SARSAPARILLA, and see for yourself the surprising activity with which it cleanses the blood and cures these disorders.

During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsaparilla, but often no curative properties whatever. Hence, bitter disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the name itself has become synonymous with imposition and cheat. Still we call this compound "Sarsaparilla," and intend to supply such a remedy as shall rescue the name from the load of obloquy which rests upon it.—We think we have ground for believing it has virtues which are irresistible by the ordinary class of diseases it is intended to cure. We can only assure the sick, that we offer them the best alterative which we know how to produce, and we have reason to believe it is by far the most effectual purifier of the blood yet discovered by any body.

AYER'S CHERRY PECTORAL is so universally known to surpass every other remedy for the cure of Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease, that it is useless here to recount the evidence of its virtues. The world know them.

Perry's Moth and Freckle Lotion.

☞ Chloasma, or Mothpatch, (also called Liverspot,) and Lentigo, or freckles, are often very annoying, particularly to ladies of light complexion, for the discolored spots show more plainly on the face of a blonde than of a brunette; but they greatly mar the beauty of either and any preparation that will effectually remove them, *without injuring the texture or color of the skin*, is certainly a desideratum. DR. B. C. PERRY, who has made diseases of the skin a specialty, has discovered a remedy for these discolorations, which is at once prompt, infallible and harmless.

Lyon's Periodical Drops!

THE GREAT FEMALE REMEDY FOR IRREGULARITIES.

These Drops are a scientifically compounded fluid preparation, and better than any Pills, Powders or Nostrums. Being liquid, their action is direct and positive, rendering them a reliable, speedy and certain specific for the cure of all obstructions and suppressions of nature. Their popularity is indicated by the fact that over 100,000 bottles are annually sold and consumed by the ladies of the United States, many one of whom speak in the strongest terms of praise of their great merits. They are rapidly taking the place of every other female Remedy, and are considered by all who know aught of them, as the surest, safest and most infallible preparation in the world, for the cure of all female complaints, the removal of all obstructions of nature, and the promotion of health, regularity and strength. Explicit directions stating when they may be used, and explaining when and why they should not, accompany each bottle. Being producing effects contrary to nature's chosen laws, will be found carefully folded around each bottle, with the written signature of JOHN L. LYON, without which none are genuine. **Price $1.00.**

Prepared by DR. JOHN L. LYON, 195 Chapel Street, New Haven, Conn. who can be consulted either personally, or by mail, (enclosing stamp,) concerning all private diseases and female weaknesses. **Price $1.50 per bottle.**

Local.

☞ The Portsmouth Philharmonic Society made a most agreeable excursion to Dover on Tuesday afternoon, and gave a Concert at the City Hall in the evening under the direction of Mr. W. K. Day,—to the good acceptance of a large and very appreciative audience, of Dover's best citizen's. There were also many present from the neighboring towns—among whom we noticed Br. Place of the "Courier," and C. S. Whitehouse, esq., of Rochester, with their ladies, and several others, making up quite a party for a ten-mile ride home in the dark, after the concert—and had it been thought of a little sooner, a special train would have been run down from Rochester for the occasion.

The Philharmonics, to the number of about 70 ladies and gentlemen, took cars to So. Berwick Junction; and by the courtesy of Superintendent Chase of the P. S. & P. Road, a car was switched off for Dover, by Conductor Tucker, so there need be no change of seats—and in charge of Conductor Frazer of the B. & M., all were landed in good shape at Dover depot. Thence to City Hall for the Concert—afterwards supper at the American, and home by special train at midnight, in charge of Conductors Frazer and Towle. Voted the best "time" of the season. The only similar musical excursion in this vicinity, to be compared to it in point of numbers, was the Concert at Hampton several years ago, when the Portsmouth Old Folks Choir, to the number of sixty or more, went out in sleighs, and took supper at Marm Hobbs's. It is a rare thing for concert troupes of such size to "travel" much. We understand the Philharmonics talk of going to Newburyport next, after their East Night Concert here at home.

The Concert in Dover was pronounced a complete success by the best judges there. The choruses throughout went off with promptness and spirit, and the select pieces were received with cordial applause. Miss Susie Foster, who was so well introduced to the public by this Society, and who has been received with so much favor by all who hear her,—won great praise on this occasion—as well she might, for we think we never heard her sing so charmingly. Mr. Morey's beautiful song, "The Flag of the Free," which was written for the Portsmouth Old Folks Choir, and first sung here so delightfully by Ben Davis—and has since been brought out at three concerts—always is well received, and on this occasion the audience insisted on an encore. Mr. Day deserves much praise for the enterprise and public spirit he has manifested in building up this Society; and he has certainly proved his ability to direct a large body of singers. Miss Emery played the accompaniments to good acceptance, as usual.

To the unremitting exertions of Rev. Mr. Eaton of Dover, and to Mr. Day's acquaintance, and the liberality of the Dover and Rochester editors,—is due much of the success of the excursion; and the landlord and clerks of the American House spared no pains to make all agreeable. And right well they succeeded—and the praise of the supper (as well as the viands themselves) was in everybody's mouth. We would never ask to sit down to a better. And one thing surprised us—to be assured that the American is and has for sometime been, a thorough Temperance house—and that actually there is not a drop of liquor to be had, up garret nor down cellar, nor in any den out back. Well, if mine host Smith, who is a thorough-going teetotaller, can do this thing in Dover, why can't other folks do it in Portsmouth and elsewhere? "At the close of the regular business of the evening," which seemed to be chiefly pleasure—the Society was called to order by the President, and on motion of one of the older members, who was formerly President of the Portsmouth Sacred Music Society, and still *more* "formerly" a member of the old Portsmouth Handel Society, it was voted to acknowledge the great obligations the Philharmonics were under to the parties named and other friends, and the Dover public generally, for the complete success and great enjoyment of the trip. And thus endeth the second lesson—but it will not soon be forgotten, we think, by the happy participants.

☞ One of our oldest and best traders tells us he has almost a mind to "post" those of his "patrons" who don't pay their bills. Well, the banks do this, in their own way; and why not other folks? We have tried publishing a black list several times, and found it to work well; and we have another in course of preparation, which we shall print shortly—mostly of out-of-town suckers, though. There is one fellow in the city, though—that Stars and Bars man, who still owes us four or five dollars' worth of printing ink, which our foreman lent him a year or two ago.

☞ It is a common idea that the rum business "pays" (pecuniarily) better than almost anything else; but a friend informs us that there have been no less than four failures of retailers of liquor in this city since last Fall.

THE LANDS OF THE COMPANY
consist of Twelve Hundred acres, at Reno, on the Alleghany River in Venango County, Pennsylvania—*the heart of the Oil District in that State.*

ONE THOUSAND WELLS
Can be sunk upon the Property without Interference.

Test wells have been sunk on the Estate, and Oil found in paying quantities in every instance. FIFTY WELLS are now being put down, to be tested by others as rapidly as possible to the extent necessary *to fully develope the property.* One hundred wells yielding only ten barrels a day each at six dollars a barrel, a price much below the average price at Reno, would give one million eight hundred thousand dollars a year of income, making a profit probably fifteen per cent over expenses and taxes of every kind; if large flowing wells are found, *a single acre of the territory may yield the entire capital within two years.*

☞ The Company owns the Town of Reno, together with Several Hundred Lots for Business and Dwelling Houses. There is an Extensive Demand for them, and the Revenue from their Sale will be very great.

The Stock is Guaranteed.

The Price of Stock has been fixed at ONE HUNDRED AND FIVE DOLLARS per share. Five Dollars go into the Treasury of the Company as a contribution to the Working Fund.—*The Par Value of the Stock, One Hundred Dollars, is paid to the Trustees, to be Deposited in the Treasury of the United States, or Invested in Government Securities,* **and may be Withdrawn by the Stockholder at any time.**

By the payment of Ten Dollars, persons that desire to avail the Result of the First Year's Development, can Secure the Right of obtaining A FULL PAID SHARE OF GUARANTEED STOCK for One Hundred Dollars Additional at any time before the First day of April, 1867.

Important.
DR. STEVENS, No. 5 Daniel Street, would give notice that he has REDUCED the price of Permanent Sets of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.
He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite alone, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the teeth. mh12

GEORGE F. WEED,
S-u-r-g-e-o-n D-e-n-t-i-s-t,
FIRST ASSISTANT in the Office of DR. STEVENS, No. 5 DANIEL STREET.
DR. WEED can be found at his place of business at all times of the day and night, for the performance of any of the operations that come within the call of his profession.

Dr. A. P. STEVENS, No. 5 Daniel St., makes the saving of UNGRATEFUL and painful front teeth, a speciality in his business. He also successfully restores to their natural shape broken or badly decayed teeth, by building up corners and sides with PURE GOLD. (In many cases teeth so restored are as strong as any of their brother teeth remain, and in all cases are rendered eminently useful for a long series of years.) DISEASED FEETH, in all stages, treated, and in a very large majority of cases entire success attained.
Charges for such operations necessarily high, but nothing in comparison to the value of the Teeth. mch14

DENTAL NOTICE!
No. 60 Congress Street.
Having adopted the C. O. D. system of doing business, **Dr. E. H. GOODALL** informs his patients and the public that he warrants whole sets of block teeth on VULCANITE BASE for $30.00 each (upper and lower,) and warrants them as good and as serviceable as sets on GOLD, which cost more than double the above.
He also keeps a fresh supply of PURE NITROUS OXYDE GAS to answer the numerous calls for this popular anæsthetic; and administers PURE ETHER, when desirable.
All other operations in Dentistry performed at reasonable remuneration. mch14

Morning Chronicle.

☞ The Washington special of the Boston Herald says:

Almost every day some telegram is sent from here that a new party is being formed by the prominent men of the conflicting elements, the germ of which purports to have originated in some hotel parlor or in a committee room at the Capitol. It will be found, however, that while many such schemes have been proposed no serious effort has been made to carry them out. Mr. Raymond, as Chairman of the National Republican Executive Committee, disavows the charge that the committee or any branch of it has made any movement towards disaffection from the party that named it, or has held any meeting for distributing documents in opposition to the Congressional Executive Committee, which is active in flooding the country with speeches sustaining Congress. It will thus appear that so far as any organized effort has been made, it is all on the side of Congress, for no distinctive feature—aside from the Democrats—of an opposition party has yet been evolved from the crude state in which the telegraphic sensationists profess to have discovered it. There is a studied silence in Congress regarding the President. No allusion has been made in his favor or against him, and it must be confessed that the extreme leaders do not seem inclined to widen the breach, though there may be a desire to heal up that already made.* The intention, thus early, to pave the way to nominate Gen. Grant for the Presidency by the Republicans, was recently alluded to. In the course of speeches made on the Republican side, last week, several members declared he would be nominated, and they should support him. They also intimate that Gen. Grant's views on restoration are in accordance with their own.

[*This, we think, is wise.]

☞ In the British House of Commons on the 7th, the annual bill for the abolition of church rates was debated. Messrs. Gladstone and Bright spoke in favor of the question being compromised some way or other. The bill was passed to a second reading by 285 to 252. The announcement of the vote was received with loud cheering. It is thought that the vote indicates an early solution of the question, although the present bill will doubtless be rejected by the House of Lords as usual.

The Old Established Hospital,

No. 3 Beaver Street, Albany, N. Y.

Over Twenty Thousand Patients Cured Annually!

DR. J. TELLER continues to be confidentially and successfully consulted on all forms of private diseases, at his old Established Hospital, No. 3 Beaver Street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and his facilities are such (being in correspondence with the most eminent Physicians of the Old World), of treating the saliest as well as the latest remedies for these diseases, offer inducements to the unfortunate of a quick and rapid cure, to be obtained at no other office in America.

In Syphilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and spermatic Cords, Bubo, Ulcerated Throat, Sore Nose, Tender shin Bones, Cutaneous Eruptions, Biles, Ulcers, Abscesses, and all other impurities of the system, are perfectly under the control of the Doctor's Medicines, and have been tested in more than 20,000 cases annually, with immense Success.

YOUNG MEN.

Young Men addicted to secret habits, who have impaired their healthy and destroyed the vigor of their mind, thus rendering themselves of the pleasure of the Married Life, are notified that in consulting Dr. J. Teller, they will find a friend to counsel and a Physician who has cured thousands in almost every part of the United States, who applied to Dr. T. broken down in health, now enjoying all that makes life desirable and man happy. The reader is of course aware that the delicacy of this subject will prevent a more minute description of this dreadful disease.

DR. TELLER'S GREAT WORK.

A book for everybody.—Startling disclosures. Dr. TELLER's great work for the Married or those contemplating marriage—200 pages—full of plates—price 25 cts. Sent to all parts, under seal, by mail, post paid. 50,000 copies sold the past year. The single Married and the Married Hog, pp. A lecture on Love, or how to choose a Partner—a complete work on Midwifery. It contains hundreds of secrets, never before published. Warranted to be worth three times the amount asked for it. 25 cents, in specie or postage stamps, inclosed, will secure a copy by return mail. Dr. TELLER has devoted a lifetime to the cure of those diseases upon which his books treat.

TO THE LADIES.

DR. TELLER still remains the only Agency in America, for the sale of Dr. Vichot's Italian Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unapproached, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in females.

CAUTION.—Married ladies in certain delicate situations should avoid their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent by mail or express, to any part of the world, secure from curiosity or damage.

Office hours from 8 A. M. to 8 P. M., and on Sundays from 2 to 5 P. M.

N. B.—Persons at a distance can be cured at home by addressing a letter to Dr. J. Teller, enclosing a remittance. Medicine securely packed. All cases warranted. No charge for advice.—N. B.—No students or boys employed. Notice this, address all letters to

SUFFERERS

From Dyspepsia

READ! REFLECT!! ACT!!!

TARRANT & CO

Gentlemen, I am a resident of Curacoa, and have often been disposed to write to you concerning the real value of your SELTZER APERIENT, which I find powerful and very dispepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.

For four or five years my wife has been sadly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Cabialis, of Venezuela, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY well.

I feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.

I trusting that you will give this publicity, and repeating my earnest gratitude and thanks,

I am very respectfully yours,
S. D. C. HENRIQUER,
Merchant, Curacoa, S. A.

DUTCHESS NURSERIES,

POUGHKEEPSIE, NEW YORK,

FERRIS & CAYWOOD, Proprietors.

We call the attention of our customers and the public to our stock of GRAPE VINES, which is larger than ever before. Having had over twenty years' experience in the management of Vineyards and the propagation of vines, our present stock having been grown from bearing wood only, with constant care during the season, we think they will compare favorably with any others that are offered for sale.

Our stock of MONTGOMERY VINES is very large. They variety not being generally known, we will give a brief description: White, a seedling of the White Chasselas, an unparalled grower and bearer, clusters often weighing two pounds, with a mild subacid flavor. It is classed with the hardy grapes, but we protect it in winter as we do all other varieties in this part of the State.

Our stock of the various kinds of EVERGREEN and DECIDUOUS TREES is very large, and is offered at moderate price; and at very low rates by the quantity, to those who are laying out and improving their places, cemeteries, or public grounds, and to nurserymen. We challenge competition.

Grape Vines.

S. Vance's Submerged Well PUMP.

This unexpensible invention, now being first introduced, will, it is believed, supercede all other Well Pumps now in use.

ITS ADVANTAGES.

FIRST, SIMPLICITY.—This Pump is composed of but three parts, and is so simple in its construction that any one can easily put it together.

SECOND, DURABILITY.—Its peculiar construction, and the fact that it is always submerged combine to make it the most durable of all Pumps yet invented.

THIRD, NEVER FREEZES.—The valves are so constructed that, when not in motion, they allow all the water above to pass down into the well, and thus prevent freezing.

FOURTH, POWER.—For the amount of power applied, this Pump excels any other Pump. It throws one third part more water than ordinary pumps, and works so easily that even a child can pump for a whole day without fatigue. It is the greatest labor-saving pump now offered to the public.

FIFTH, IT IS INVALUABLE.—For a well pump it is invaluable, as all the iron which is submerged consists of but three small pieces, and these galvanized. It can in no way corrode, consequently it brings up pure water at every stroke.

SIXTH, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to keep in use for years. No repairs at all are needed. It is very light, and thus the cost of transportation is very small.

☞ Manufactured by S. VANCE & CO., No. 31 Liberty Street, Newburyport, and for sale in Portsmouth by the Sole Agents for N. H.,

CHEROKEE PILLS,

Or Female Regulator,

Cure *Suppressed, Excessive and Painful Menstruation, Green Sickness, Nervous and Spinal Affections, Pains in the Back, Side, Headache, Giddiness,* and all diseases that spring from irregularity, by removing the cause and all the effects that arise from it. They are perfectly safe in all cases, *except when forbidden by directions,* and are easy to administer, as they are nicely *sugar coated.* They should be in the hands of every Maiden, Wife, and Mother in the land.

Ladies can address us in perfect confidence, and state their complaints in full, as we treat all Female Complaints, and prepare Medicines suitable for all diseases to which they are subject.—Thirty-two page pamphlet, in a sealed envelope, free.

The Cherokee Pills are sold by all druggists at $1 per box, or six boxes for $5; or they are sent by mail, free of postage, in an ordinary letter, free from curiosity, by addressing the sole proprietor,

Dr. W. R. MERWIN, 37 Walker St., N. Y.

N. B.—Cherokee Pills No. 2 are prepared for *special cases,* when milder medicines fail; these are sent by mail, free of postage, on receipt of $5, *the price of such box.*

DR. WRIGHT'S

REJUVENATING ELIXIR,

Or, Essence of Life,

Cures *General Debility, Weakness, Hysterics in Females, Palpitation of the Heart and all Nervous Diseases.* It restores new life and vigor to the aged, causing the hot blood of youth to course the veins, restoring the *Organs of Generation, removing Impotency and this Elixir rejuvenates the system and and full vigor,* thus proving a perfect *"Elixir of Love,"* removing *Sterility* and Barrenness in both sexes. To the young, middle-aged, and aged, there is no greater boon than this "Elixir of Life." It gives a new lease of life, causing the weak and debilitated to have renewed strength and vigor, and the entire system to thrill with joy and pleasure.

Price, one bottle $2; three bottles $5; sent by express to any address.

Our medicines are sold and recommended by all respectable druggists in every part of the civilized globe; some unprincipled dealers, however, try to deceive their customers by selling cheap and worthless compounds in order to make money. Be not deceived—ask for these medicines and take no others. If the druggist does not keep them, write to us, and we will send them by express, carefully packed, free from observation. We will be pleased to receive letters with full statements in regard to any disease with which ladies or gentlemen are afflicted. Address all letters for medicines, pamphlets, or advice, to the sole proprietor,

☞ Official advices have been received from South Carolina, to the effect that a band of outlaws, led by an ex-rebel major, has been committing depredations and murdering Union men and negroes. The information furnished is to the effect that the Edgefield district is one of the largest and most rebellious districts in that State, and is controlled by two organized bands of outlaws—one consisting of eight men, and the other of thirteen, led by an ex-rebel major, named Coleman, who has been raiding that district and committing with impunity the most fiendish outrages on Union men and freed people. They have already murdered a number of negroes and white men, without the slightest provocation; robbed and driven from their homes several Northern men who have property there. The leader of these guerillas is a desperate character, and exhibits as trophies of his prowess, eight ears cut from colored persons. The property owners regret that these outrages are allowed to occur, and in many instances have exerted themselves to protect the lives of Northern men who have incurred the displeasure of these villains.

THE CATTLE DISEASE IN EUROPE—REPORTED CURE. — The United States Consul at Amsterdam writes, under date of February 20, that the Rinderpest, or Cattle Plague, is spreading over Holland, and that none of the preventive measures adopted have proved of much value, and some of them the farmers are bitterly opposed to. Their opposition against the killing of infected or suspected cattle went in some instances so far that the military had to be required to enforce obedience to the laws. The consul says the following is recommended as nearly a certain cure: The skin of the infected animal is to be strongly rubbed and then covered with cloths dipped in cold water, over which dry ones are spread. Out of twenty-two head of cattle treated in this manner, only one was lost.

— A man by the name of Montgomery, living about five miles from Sweetwater, East Tennessee, was murdered in cold blood on Wednesday of last week, while on his way from his farm to Sweetwater. He had been shot through six times in the head and in the body.

HIGHLY IMPORTANT
—TO—
UNFORTUNATE FEMALES!
DR BRISCOE'S FEMALE PILLS are unsurpassed by virtue and efficacy in removing all complaints, of whatever nature, incident to females. He continues, with his usual success, to medically and surgically remove Obstructions, Engorgements, Leucorrhœa, Whites, General Debility, &c, and suppress any of all kinds; also all complaints of the Lungs, Liver, Kidneys, Spleen, Bladder, &c.
His medicines will be sent to any part of the country by express or mail; addressed by a communication stating particulars, will receive prompt attention.
Office, No. 23 Endicott street.
Persons at a distance can consult Dr. Briscoe, by letter, describing the case, and have the medicines securely put up, and forwarded to any part of the United States, with full directions for use. Office arranged with separate apartments, so that patients see none but the Doctor himself.
Address Dr. Briscoe, at No. 23 Endicott St., Boston, Mass., stating symptoms. All communications are confidential.
Patients furnished with rooms and board if desired, and secure objectivity for cure.
Office hours from 9 A. M. to 9 P. M.
Boston, July 16, 1865. ThSly

DR. M BRISCOE still continues his successful treatment of all Private Diseases and also Female Complaints, at his old established office, No 23 Endicott street.
N. B. The sick and afflicted will do well to give him a call. A short consultation will cost you nothing, but a word of friendly advice may save you years of suffering.
P. S.—Ladies who wish to stay in the city under my care a few days, can be furnished with kind nurses. Charges moderate.

Important to the Afflicted.
DR. DOW continues to be consulted at his office, Nos 7 and 9 EXCHANGE STREET, BOSTON, on all diseases of a PRIVATE OR DELICATE NATURE. By a long course of study and practical experience of unlimited extent, Dr. Dow has the gratification of presenting the unfortunate with remedies that have never, since he first introduced them, failed to cure the most alarming cases of GONORRHŒA AND SYPHILIS.
SEMINAL WEAKNESS—Dr. Dow devotes a great part of his time to the treatment of those cases caused by a secret and solitary habit, which ruins the body and mind, unfitting the unfortunate individual for business or society. Patients who wish to remain under Dr. Dow's treatment a few days or weeks, will be furnished with pleasant rooms, and charges for board moderate.—Medicines sent to all parts of the country, with full directions for use, on receiving descriptions of your cases. Dr. Dow has also for sale the French Capotes, warranted the best preventive. Order by mail. Three or $1 and a red stamp.
Highly Important to Females
IN DELICATE HEALTH.
Dr. DOW, Physician and Surgeon, No. 7 Endicott Street, Boston, is consulted daily for all diseases incident to the female system. Dr. Dow has no doubt had greater experience in the cure of diseases of women than any other physician in Boston. Boarding accommodations for patients who may wish to stay in Boston a few days under his treatment. Dr. Dow, since 1845, having confined his whole attention to an office practice for the cure of Private Diseases and Female Complaints, acknowledges no superior in the United States.
N. B.—All letters must contain one dollar, or they will not be answered. Office hours from 8 A. M. to 9 P. M.
CERTAIN CURE
in all cases, or No Charges Made.
Among the physicians in Boston, none stands higher in the profession than the celebrated DR DOW, No. 7 Endicott street. Those who need the service of an experienced physician and surgeon should give him a call.
P. S.—Dr. Dow imports and has for sale a new article, called the FRENCH SECRET. Order by mail. Two for $1 and a red stamp.

THE WORKING FARMER, Vol. 18, 1866, a Monthly, of 24 quarto pages, an earnest advocate of agricultural improvement, is offered at the low price of ONE DOLLAR a year, in advance. It will contain many interesting items, given by no other journal of its class, including Washington's Letters on Agriculture, with one in *fac simile* of his handwriting; "Farm Maps, and Accounts and Ploughing," by S. Edwards Todd, author of "The Young Farmer's Manual;" a handsomely illustrated treatise on the Pear, by T. Gaston, Supt of the celebrated farm of the late Prof. Mapes; an original and ingenious article on Flower Gardening, by Ignaz A. Pilat and A. Payne Lowe. As, however, actual examination is the only test on which judicious readers will rely, we will forward specimen copies on the receipt of postage. Address W. L. ALLISON & CO., 143 and 145 Nassau Street, New York.

J. O. JOYCE'S DOUBLE ACTION FORCE PUMP, for Wells, Cisterns, Railroad Stations, Factories and Vessels; has no equal for power, ease of workmanship and durability, has a powerful air chamber, will throw water sixty feet, after raising it out of a *sixty foot* well, and NEVER CAN FREEZE. It is the most successful deep well pump in the continent, *only* one that *will* do what it is advertised to do, and is fast growing into public favor. See well to your interests by investigating the merits of this pump, or you may have to say, as others have, "had I known of this Pump before I bought mine, I should certainly have had it." Call and see it, or send for Circular containing all particulars. No 30 Exchange St., corner of Dock Square, Boston, Mass. HENRY D. KITCH, Wholesale and Retail Agent for New England. Agents wanted.

VINELAND
FARM AND FRUIT LANDS.
In a mild and healthful climate. Thirty miles from City of Philadelphia by Railroad. In New Jersey, on the same line of latitude as Baltimore, Md.
The soil is rich and *productive*, varying from a clay to a sandy loam, suitable for Wheat, Grass, Corn, Tobacco, Fruits and Vegetables. This is a *great fruit country*. Five hundred Vineyards and Orchards have been planted out by experienced fruit-growers. Grapes, Peaches, Pears, &c., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste*. It has increased five thousand people within the past three years. Churches, Stores, Schools, Academies, societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are constantly setting. Hundreds of new houses are being constructed. Price of Farm land, twenty acre lots and upward, $25 per acre. Five and ten acre and Village lots for sale.
Fruits and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Yards, Manufactories, Foundries, Stores and the like; and Steam Power, which can be rented.
For persons who desire mild winters, a healthful climate, and a good soil, in a country beautifully improved, abounding in fruits, and possessing all other social privileges, in the heart of civilization, it is worthy of a visit.
Letters answered, and the Vineland Rural, a paper giving full information, and containing reports of Solon Robinson, sent to applicants.
Address CHAS. K. LANDIS, Vineland P. O., Landis Township, New Jersey.
From Report of Solon Robinson, Agriculture Editor of The Tribune: "It is one of the great *attractive fertile tracts, in an almost level position and suitable condition for pleasant farming that we know of this side of the Western Prairies.* m1—dawów

Morning Chronicle.

Portsmouth, N. H.

FRIDAY, MARCH 23, 1866.

NOT CONSISTENT.—Whatever else the participants in the late rebellion may be distinguished for, they certainly manifest very little shrewdness in accomplishing what they profess to desire. They wish for emigration of a class fitted to develop their peculiar resources. Neglected farms and plantations wait the renovating hand of enterprise and capital, and yet they seem to be driving from their midst some of the most industrious, peacable and thrifty of all citizens.

There arrived in Washington, on Wednesday, seventy members of the Society of Friends, from Randolph county, North Carolina, on their way to settle in Indiana. They were driven out by the persecutions of their neighbors, as a punishment for their constant and unflinching loyalty through the war. "There can never (remarks the Boston Journal) be a class of emigrants who will be likely to make their way South whose habits, principles and practices ought justly to be so little obectionable to the South, as the Friends. If they drive them out, we do not see what they can expect in the way of unobjectionable emigration. If the tide of population should ever set strongly southward, as it may in spite of obstacles which exist, the Southern people will be obliged to learn the fact, which even the result of the war does not seem to have taught them, that their ideas of society are widely at variance with those of the whole Christian and civilized world."

It is pertinent and seasonable to add, that such a fact as the driving out of these quakers, ought to open the eyes of Sec. Seward, the President, and all who adopt *his* policy, unless they are determined not to see! In this connexion we copy an item which we cut from a coppery paper on election morning:

Private letters from citizens of Southern States have been received in Washington and brought to the President's notice, exhibiting a very different state of things, in the cotton States particularly, from that which has been assumed to exist by the Committees on Reconstruction.

No doubt a bushel of just such letters might be had:—but a cartload of them would not weigh as much in any reasoning mind, as the *one fact*, that 70 quakers are banished from North Carolina, for their loyalty, by those reconstructed rebels, who "support the President's policy."

☞ Gen. Hawley, Union Republican candidate for Governor of Connecticut, and others from that State, have visited the President. Two of the committee telegraph as follows:

Our interviews with the President and others were entirely satisfactory. He (the President) expresses desire for success of the Union party, and says he stands firmly by its principles as declared by the last National Convention. He says positively that there has been no interference whatever with the canvass in Connecticut by any member of the administration, so far as he knows.

The amount of the visit is this: Pres. J. wishes his policy sustained, and yet does not see fit to trust the copperheads. Is it not too bad that he has less confidence in them than in the rebels?

IN WASHINGTON, the House Committee on Elections decided to report in favor of giving the seat now occupied by Mr. James Brooks to Mr. Dodge, who claims it.

Perley says Senator Dixon of Connecticut is very ill, and at one time Wednesday his friends feared that he would die before night.

There is much diversity of opinion as to whether the President will sign or veto the Civil Rights bill. There are good reasons for believing that he intended to sign it, but the Southerners there have done all in their power to dissuade him, and we may have another veto.

GOLD, Thursday, 128.

— Rev. Dr. Stone, from Boston, arrived at San Francisco, 6th March.

— Judge Cooper has been impeached by the legal profession in his District in Canada. The principal charge is intemperance.

— Widow Grant, a native of Inverness, Scotland, died recently at Coromodi, East River, Pictou, N. S., in her 104th year. She had lived there about 60 years.

— A Washington dispatch says Senators Dixon and Foote are growing more seriously ill. There is little hope of the recovery of the latter.

— It is stated that there is a general falling off of travel on all the railroad lines throughout the country, but more particularly between Washington and the North.

— The Rhode Island Convention of the Democratic party endorsed Pres. Johnson's policy,—but made no nomination for Governor.

NAPOLEON'S MESSAGE TO MAXIMILIAN. A city of Mexico correspondent of the N. Y. Times, under date of Feb. 28, professes to describe the manner in which the verbal dispatch of Napoleon to the Mexican Emperor was received by the latter:

Napoleon's dispatch was verbal, and consisted in these very few words: "The Emperor Napoleon, my master, wishes to come to some understanding for the withdrawal of his army." The answer was as short as unexpected: "Let the Emperor Napoleon withdraw his troops; the sooner the better." This was a power, and Mr. Saillard is likely to go back with a flea that he will transmit to the ear of his master. Strange as it may seem in the United States, Maximilian considers himself safe among the Mexican people. He is persuaded that the withdrawal of the French troops would not imply his return to Miramir. All this is not official, but it comes to us from people generally well posted.

The same writer says that foreign troops are constantly arriving, but that, when the French leave, the stamina of Maximilian's army will be gone, for the new comers are not at all reliable fighting men. Even the Mexicans look on them half with contempt. It is thought that Maximilian will throw himself entirely on Mexican support; but as it will require Napoleon's pluck, and Max not being what is called plucky, he may lean on a weak reed.

THE SEA ISLANDS.—The Charleston Courier reports that the relations between the freedmen and the former owners of plantations on the Sea Islands are improving every day. The former are entering into contracts, and the prospect is encouraging that everything will be shortly reduced to a harmonious and profitable system of labor and living.

EMIGRATION. A large meeting of negroes was held at Hampton, Va., on the 13th inst., and addressed by Maj. Gen. Miles, Brig. Gen. Armstrong and others, advocating an emigration of the overcrowded colored population of the Virginia Peninsula to Florida, but some champions of the freedmen opposed the scheme, and nothing was accomplished. The negroes were told that they could buy land in Florida for three dollars per acre, while the homestead bill guaranteed them 160 acres of land, but it was of no use; they preferred to cling to "Old Virginny."

— The New York World says "trichinosis" has appeared in the pork establishments of that city, and eight pork butchers have discontinued purchases and gone into the beef and mutton business.

— A train in charge of Mr. Majors, consisting of seven hundred yoke of oxen, has arrived from the States at South Boise, Idaho Territory. It was freighted chiefly with machinery for working the mines.

— At an auction sale at a convent near Paris, eight hundred pounds of hair shorn from the heads of young girls who have taken the veil since 1810, brought $6000.

— Pierre Soule's mansion on Esplanade street, New Orleans, for about two years occupied as a Freedmen's Orphan Asylum, has been restored to him by order of Gen. Howard.

— A sportsman near Monroeville, Ohio, was so intently watching for a muskrat to come out of his hole, while standing on the railroad track the other day, that he did not heed the whistle of an approaching train, and was run over. One of his legs had to be amputated.

— A meeting of the Molders' and of the Stovemounters' Union, Boston, was held on Saturday evening, at which, it is said, the present strike was denounced by a number present. About twenty-five of the members of the Stovemounters' Union have withdrawn from it. The molders talk of starting an immense foundry.

— There was a wedding in church at Shutesbury, Me., the other Sunday, a minister out of the State performing the ceremony. Before night he discovered that his non-residence disqualified him for legally marrying, and he went and returned the fee and bade the pair haste and call a resident clergyman.

— The dead body of Mrs. Mary P. Coggeshall, widow of the late Josiah Coggeshall of Bristol, R. I, was found on a farm at Bristol Neck on Saturday. The deceased left her home on the 6th inst. for the purpose of visiting her sister on Bristol Neck, and it is supposed lost her way and perished from cold. She had not been missed by her friends, as those at home supposed her to be with her sister, and the latter supposed her to be at home.

— The report from Montana that many men had been badly frosted and others frozen to death during the exodus to the Sun River mines is confirmed. The story that rich discoveries of gold had been found there proved to be a hoax, and not a few of its unfortunate victims paid for their credulity with their lives.

NEW HAMPSHIRE ITEMS.

—— John McCartney, a young man living in Laconia, in going down from a room in the hotel of that place on Monday night, accidentally walked off from the piazza on the second floor and was instantly killed.

—— Among the patents lately granted, we notice these. John Davis, 2d of Lake Village, for improvement in churns. E. C. Haserick of Lake Village, for improved mode of melting, and aggregating iron chips, parings, &c..

—— It is reported that the Supreme Court of New Hampshire has decided that the State law levying a tax of twenty-five per cent. upon incomes accruing from notes, bonds, or any other securities whatsoever not otherwise taxed under the laws of the State, is unconstitutional so far as it relates to all classes of government bonds.

—— A correspondent writing from West Rumney, encloses specimens of gold discovered on his premises in Wentworth. The specimens are of the kind known as scales, and may have been found in Baker's river, a stream which runs through the town. Wentworth is in a mountainous country and the surface is hilly. Limestone and iron ore are found there.

—— The Independent Democrat of March 22, contains returns from all the State, except 7 very small places, and the votes stand, for Smyth 35,018; for Sinclair 30,176; scat. 11. Smyth's maj. 4,881. If the missing places vote as last year, Smyth's majority is 4,633; and he has about 1000 votes more than he had last year: while his opponents increased their vote about 2000; the whole increased vote being about 3000.

—— The Wolfboro' News states that Mr. John W. Bickford, one of the most respected citizens of that town, aged about 45 years, committed suicide by hanging in his barn on Sunday the 18th. Mr. Bickford was a strictly temperate and honorable man, in good circumstances. The act was committed in a moment of temporary insanity, which was probably occasioned by a severe blow upon the head, received a few days since by a fall upon the frozen ground, which rendered him senseless for a time, but from which he had apparently recovered. Mr. Bickford leaves a wife and two children.

☞ A few experienced agents, male and female, are wanted to take orders for Frank Moore's great work, "Anecdotes, Poetry and Incidents of the War," North and South. Beautifully illustrated, with elegant cabinet-size steel portraits of Abraham Lincoln, Gens. Grant, Jackson, Logan, Sheridan, Stuart, Lee, Sedgwick, Johnston, Adm. Farragut, and others.

This volume contains, in 560 pages, thousands of well-told stories of adventure, humor, heroism, anecdotes of leading men and great generals, details of great battles, prison songs and prison incidents, jokes, facetiæ, and ballads, from the Southern as well as the Union side. The work affords an amusing and affecting, as well as an entertaining view of every phase in the great conflict, and "is the book for any leisure day, hour or moment." It is sold exclusively by subscription, and cannot be had except through duly authorized agents.—Those desiring a copy should subscribe when the opportunity is presented. It will never be for sale in bookstores.

This, "The Comic History of the War," is sold only by subscription. Exclusive territory given. For prospectus and terms, address James Porteus, General Agent, 45 Bible House, New York City.

IT IS A FACT, that more suffering, disease and distress is alleviated by Coe's Dyspepsia Cure than by any other one medicinal preparation extant. It is infallible in Dyspepsia, Costiveness, Debility, Lassitude, Weakness, no Appetite, Indigestion, and is an immediate cure for any disease of the stomach and bowels.

We would also say in this connection, that Coe's Cough Balsam, compounded by the same firm, is invaluable in all cases of Croup, Sore Throat, Whooping Cough, and all throat and lung complaints. mh19—1wcodaw

To the Honorable Judge of Probate for the County of Rockingham:

Respectfully represents SUSAN F. BOWLES, Administratrix of the estate of JAMES W. BOWLES, late of Portsmouth, in said County, deceased; that the personal estate of the said deceased is not sufficient to pay the demands against the same; that the said deceased died seized of the right of redeeming certain mortgaged real estate, situate in said Portsmouth, bounded and described as follows: North by Middle street, East by land of Lewis E. Smith, South by land of Seth W. Tripe and William Flagstead, and West by land of Albert Hays

Wherefore she prays she may be licensed to sell at public auction the right of redeeming said mortgaged estate, subject to any and all rights of Dower and of Homestead in the same. Also that she may have license to sell the reversion in said Dower and Home-tead.

Dated the 19th day of March, A. D. 1866.
SUSAN F. BOWLES.

ROCKINGHAM, SS. Probate Court at Portsmouth in said County, March 20th, A. D. 1866.

Upon the foregoing Petition it is *Ordered*, that a hearing be had thereon at a Court of Probate to be holden at Portsmouth in said County, on the second Tuesday of May next, at 10 o'clock A. M.; and that the Petitioner notify all persons concerned or interested therein to appear at said Court, and show cause if any they have, why the prayer of said petition should not be granted, by causing said petition and this order to be published three weeks successively in the DAILY MORNING CHRONICLE, a newspaper printed at Portsmouth in said County, the last publication thereof to be at least thirty days prior to said Court.

By order of the Judge.

Cleanse the Blood.
With corrupt, disordered or vitiated Blood, you are sick all over. It may burst out in Pimples, or Sores, or in some active disease, or it may merely keep you listless depressed and good for nothing. But you cannot have good health while your blood is impure. AYER'S SARSAPARILLA purges out these impurities and stimulates the organs of life into vigorous action, restoring the health and expelling disease. Hence it rapidly cures a variety of complaints which are caused by impurity of the blood, such as Scrofula, or King's Evil, Tumors, Ulcers, Sores, Eruptions, Pimples, Blotches, Boils, St. Anthony's Fire, Rose or Erysipelas, Tetter or Salt Rheum, Scald Head, Ring Worm, Cancer or Cancerous Tumors, Sore Eyes, Female Diseases, such as Retention, Irregularity, Suppression, Whites, Sterility, also Syphilis or Venereal Diseases, Liver Complaints, and Heart Diseases. Try AYER'S SARSAPARILLA, and see for yourself the surprising activity with which it cleanses the blood and cures these disorders.

During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsaparilla, but often no curative properties whatever. Hence, bitter disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the name itself has become synonymous with imposition and cheat. Still we call this compound "Sarsaparilla," and intend to supply such a remedy as shall rescue the name from the load of obloquy which rests upon it. We think we have ground for believing it has virtues which are irresistible by the ordinary run of the diseases it is intended to cure. We can only assure the sick, that we offer them the best alterative which we know how to produce, and we have reason to believe it is by far the most effectual purifier of the blood yet discovered by any body.

AYER'S CHERRY PECTORAL is so universally known to surpass every other remedy for the cure of Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease, that it is useless here to recount the evidence of its virtues. The world knows them.

Prepared by DR. J. C. AYER & CO., Lowell, Mass., and sold by all Druggists and Dealers in Medicine everywhere. mh9—2awsoom

MAGGIEL'S
Spring and Summer Remedies.
"*Great oaks from little acorns grow.*" The worst diseases known to the human race spring from causes so small as to almost defy detection. The volumes of scientific lore that fill the tables and shelves of the medical fraternity only go to prove and elaborate these facts. Then guard yourselves while you may. The smallest pimple on the skin is a tell tale and indicator of disease. It may fade and die away from the surface of the body, but it will reach the vitals, perhaps, at last, and death be the result and final close. MAGGIEL'S BILIOUS, DYSPEPTIC and DIARRHEA PILLS cure where all other fail. While for Burns, Scalds, Chilblains, Cuts, and all abrasions of the skin, MAGGIEL'S SALVE is infallible. Sold by J. MAGGIEL, 45 Fulton street, New York, PRESTON and THACHER in this city, and all Druggists, at 25 cents per box. decdeod& wly

An Electrician, who has great experience of their effects in *local rheumatism*, in *tic doloureaux*, and deep-seated nervous and other pains, and in affections of the kidneys, etc., etc., attributes all their sedative, stimulative, and pain relieving effects to their *electric* qualities. He asserts they restore the healthy electric condition (equilibrium) of the part, and *that* being restored, pain and morbid action cease.
LAME BACK.
Brandreth House, N. Y., Nov. 28, 1859.
T. ALLCOCK & CO.—Gentlemen: I lately suffered severely from a weakness in my back. Having heard your plasters much recommended in cases of this kind, I procured one, and the result was all that I could desire. A single Plaster cured me in a week.
Yours respectfully, J. G. BRIGGS.

CLOCK'S
Excelsior Hair Restorer
Is warranted to restore GRAY HAIR in all cases to its original color, whether black or brown. It will not stain the skin or the finest linen. It will instantly arrest the hair from falling off; cause hair to grow on BALD HEADS when fallen off by disease; and is a complete dressing for the hair, keeping it moist and glossy and perfumed longer than any other preparation in the market.
This article is warranted to do as represented, or the money will be refunded. It is positively the greatest discovery in hair preparations of the age.
For sale in Portsmouth by J. H. THACHER, Apothecary, opposite the Post Office, and at No. 12 Market Square.

Local.

☞ Dick Townsend, arrested for stealing, on Thursday made a desperate attempt to escape from the Station House. During an absence of only forty minutes of the officers, with no tool but a pocket-knife, he managed to remove one of the heavy joists from the front of the cell in which he was confined. Squeezing himself through the narrow opening, of not much more than six inches, thus made, he found an axe, and was in the act of demolishing the grating over one of the windows, when one of the officers returned from duty outside, and secured him.

☞ The annual School Meeting in District No. 3, was held at the Haven School House on Wednesday afternoon, 21st inst. The following officers were unanimously chosen: E. A. Stevens, Moderator; Richard Walden, Clerk. Wm. Moses and Oliver G. Fernald were elected members of the School Committee for three years.

Communication.

Messrs. Editors:—If the City does *not* choose to build a *City* Hall, I recommend that some *live* man get up a stock Company, with a capital of fifty thousand dollars, of five hundred shares of one hundred dollars each, and buy a suitable lot for several stores, and build a handsome block of stores, with a hall over them, that will *seat* twenty-five hundred persons, and invite the city to take from five thousand to ten thousand dollars of the stock. I have no doubt that *all* of our rich men and *women* will gladly take several shares each, to help the enterprise forward. In most large towns the rich men take pride in having elegant *public* buildings as well as private. I think every handsome public building ornaments every elegant private residence, *by* ornamenting the town. O. K.

Communication.

Messrs. Editors:—The article in your issue of the 22d, in reference to my connection with Knight's Cornet Band, signed by Mr. John Knight, is so devoid of truth that I deem it my duty to state the following facts in reference to the case, which will, I think, convince the public that I have been abused without any just cause. Five months since I applied to Mr. Knight to be a member of his Band. He complied with my request, and furnished me with an E flat alto horn, which had been in use by the Band since its formation. I immediately commenced practice, and met and played with the Band at their room two or three times a week—at least fifty times altogether. Although not appearing on parade, I considered myself a member. On the night of the 19th of February, a vote was passed in the Band Room that I should proceed to Charlestown to make an engagement for the Band to play in the Procession on St. Patrick's Day. I took cars for Boston on the morning of the 22d of February, called on my friend Father Hamilton, Catholic Priest of Charlestown, from whom I received a letter of introduction to Mr. Thos. Sullivan, who was a Committee on Music,—and with him I made an engagement for the Band to play on the 17th of March. On my return, Mr. Knight paid my car fare. The following contract, drawn up on the 22d of February, signed by myself and the Committee, Mr. Sullivan, is sufficient proof of my assertion. "Truth is mighty, and will prevail."

PROF. ANDREW P. CLARK, JR.,
Teacher of Music.

CHARLESTOWN, Feb. 22d, '66.
This is to certify that the St. Francis de Sales Association, of Charlestown, Mass., and a member of Knight's Cornet Band, of Portsmouth, N. H., have mutually agreed as follows: On the part of the Band, that they will furnish 18 pieces, and play for the St. Francis de Sales Association on the 17th day of March, in Boston and vicinity, from 9 A. M. till dismissed by the Marshal of the Association, for the sum of 84 20-100 dollars. And on the part of the Association, they agree to pay the Band 84 20-100 dollars when dismissed.
Prof. ANDREW P. CLARK, JR.
THOS. SULLIVAN.

ACCIDENT.—Mr. Wm. H. Lowd, house carpenter, of this city, had the misfortune to run a rusty nail in his foot some days since, thereby disabling him from doing any work. We are glad to learn that he had insured himself against accidents in the Travellers' Insurance Co. of Hartford, and is receiving ten dollars weekly compensation from the agent, Mr. John Sise, No. 5 Market Square. Mr. Henry A. Yeaton is canvasser for this city and vicinity.

☞ The Boston Journal of Wednesday has the following concerning a former resident of this city:

MISSING.—Mr. Warren L. Swett left Manchester, Mass., last Friday morning, 16th inst., by cars for Boston to pay some bills, and has not been seen or heard from since. He was dark complexion, black curly hair, 5 feet six inches high, and dressed in a black suit. Any information concerning him will be gladly received by Simeon T. Swett, Manchester, Mass.

IMPORTANT ARREST.—A man was arrested on Thursday by the police authorities, charged with larceny on several occasions lately. It is stated that other parties are implicated. The officers have been on the scent for several days. The person arrested yesterday broke out of his cell in the bridewell, but did not escape farther.

THE LANDS OF THE COMPANY
consist of Twelve Hundred acres, at Reno, on the Alleghany River in Venango County, Pennsylvania—*the heart of the Oil District in that State.*
ONE THOUSAND WELLS
Can be sunk upon the Property without Interference.
Test wells have been sunk on the Estate, and Oil found in paying quantities in every instance. FIFTY WELLS are now being put down, to be followed by others as rapidly as possible to the extent necessary *to fully develope the property.* One hundred wells yielding only ten barrels a day each at six dollars a barrel, a price much below the average price at Reno, would give one million eight hundred thousand dollars a year of income, making a profit of fifteen per cent after expenses and taxes of every kind. If large flowing wells are found, *a single acre of the territory may yield the entire capital within two years.*
☞ The Company owns the Town of Reno, together with Several Hundred Lots for Business and Dwelling Houses. There is an Extensive Demand for them, and the Revenue from their Sale will be very great.
The Stock is Guaranteed.
The Price of Stock has been fixed at ONE HUNDRED AND FIVE DOLLARS per share. Five Dollars go into the Treasury of the Company as a contribution to the Working Fund.—*The Par Value of the Stock, One Hundred Dollars, is paid to the Trustees, to be Deposited in the Treasury of the United States, or Invested in Government Securities, and may be Withdrawn by the Stockholder at any time.*
By the payment of Ten Dollars, persons that desire to await the Result of the First Year's Development, can Secure the Right of obtining A FULL PAID SHARE OF GUARANTEED STOCK for One Hundred Dollars Additional at any time before the First day of April, 1867.
☞ It is an Investment with the Chances of Large Profit, *and is always convertible into* **Cash** *at Par.* It might be called
A Legal Tender Oil Stock.
So large a Working Fund ($500 000) has never been provided or expended by any Company in the Oil Region. SUBSCRIPTIONS will be received by agents and by the principal Banks and Bankers throughout the country. Prospectuses and other information will be furnished by Agents, and by

Important.
DR. STEVENS, No 5 Daniel Street, would give notice that he has REDUCED the price of Permanent Sets of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.
He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite alone, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the Teeth. mh12

GEORGE F. WEED,

FIRST ASSISTANT in the Office of Dr. STEVENS, No. 5 DANIEL STREET.
DR. WEED can be found at his place of business at all hours of the day and night, for the performance of any of the operations that come within the call of his profession.

Dr. A. P. STEVENS, No. 5 Daniel St., makes the saving of ULCERATED and painful front teeth, a specialty in his business. He also success-fully restores to their natural shape broken or badly decayed teeth, by building out corners and sides with PURE GOLD. (In many cases teeth so restored are as strong as any of their brother members, and in all cases are rendered eminently useful for a long series of years.) DISEASED TEETH, in all stages, treated, and in a very large majority of cases entire success attained.
Charges for such operations necessarily high, but nothing in comparison to the value of the Teeth. mon14

DENTAL NOTICE!
No. 60 Congress Street.
Having adopted the C. O. D. system of doing business, **Dr. E. B. GOODALL** informs his patients and the public that he now inserts whole sets of block teeth on VULCANIZE BASE for $30.00 each (upper and lower,) and warrants them as good and as serviceable as sets on GOLD, which cost ten times as much. He also keeps a fresh supply of PURE NITROUS OXYDE GAS to answer the numerous calls for the popular anæsthetic; and administers PURE ETHER, when desirable.
All other operations in Dentistry performed at reasonable remuneration. mch14

TO THE BABY.

Funny thing a baby is,
Curious little creature;
Funny is its little phiz,
Comic every feature.

Helpless thing a baby is;
Tiny hands uplifting
O'er the troubled tide of life
Into which 'tis drifting.

Mystery a baby is—
Memories of heaven
Still must hover in the soul
Such a short time given.

Solemn thing a baby is,
Since it must inherit
All the loss and gain of life,
All the sin and merit.

Funny, helpless, mystic, sad.—
Let me tell you, Freddy,
Half the good and sweet of life
Is the getting ready.

Yours the sunshine—take it all
While you're weak and tiny;
By-and-by the days that come
May not be so shiny.

Examiner and Chronicle.

☞ Gen. Howard has issued an order requiring the freed people about Washington to clean their houses and whitewash them inside and outside, as a sanitary measure. He has also issued an order denying the reports that freedmen who made contracts to go South and work are enslaved again. He tells them very plainly that there is not work enough for them at Washington, and that they will not be furnished with government rations if they do not accept offers for work. He recommends them to take the advice of their friends and to seek for homes in the country. Good advice to white or black.

SOUTHERN CROP REPORTS.—News from North Alabama represent the coming crop as improving. The freed negroes have made contracts with the planters to a very satisfactory extent, and the white people have gone to work with a commendable purpose to better their condition.

The Liberty (Miss.) Herald says the cotton yield of that section will be very large this year, if the free-labor system continues to work as well as is done so far.

— Rev. Joseph Hicks, a few years since pastor of the Zion Church in New Bedford, was found dead in his bed in Richmond Va., on Thursday morning. It is rumored that he was poisoned.

THE LIGHT OF THE WORLD.

DR. MAGGIEL'S

PILLS AND SALVE

These Life-giving remedies are now, for the first time, given publicly to the world. For over a quarter of a century of private practice the ingredients in these

Life-giving Pills!

Have been used with the greatest success. Their mission is not only to prevent disease, but to cure. They search out the various maladies by which the patient is suffering, and re-invigorate the failing system. To the aged and infirm a few doses of these valuable PILLS will prove to be

A Very Fountain of Youth,

For in every case they add new life and vitality, and restore the waning energies to their pristine state. To the young and middle-aged, they will prove most invaluable, as a ready, specific, and sterling medicine. Here is a dream realized, that Ponce-de-Leon sought for three hundred years ago, and never found. He looked for a fountain that would restore the old to youth and make youth ever

AN ETERNAL SPRING!

It was left for this day and hour to realize the dream, and show, in one glorious fact, the magic that made it fair.

These Famous Remedies

Cannot stay the flight of years, but they can force back and hold aloof, diseases that might triumph over the aged and the young. Let none hesitate then, but seize the golden opportunity that offers. When taken as prescribed—

FOR BILIOUS DISORDERS

Nothing can be more productive of cure than these Pills. Their almost magic influence is felt at once; and the usual concomitants of this most flattering disease are removed. These remedies are made from the purest

VEGETABLE COMPOUNDS.

They will not harm the most delicate female, and can be given with good effect in prescribed doses to the youngest babe.

For Cutaneous Disorders

And all eruptions of the skin, the SALVE is most invaluable. It does not heal externally alone, but penetrates with the most searching effects to the very root of the evil.

DR. MAGGIEL'S PILLS

Invariably Cure the Following Diseases.

Asthma,
Bowel Complaints,
Coughs,
Colds,
Chest Diseases,

SUFFERERS
From Dyspepsia
READ! REFLECT!! ACT!!!

TARRANT & CO

Gentlemen, I am a resident of Curacoa, and have often been disposed to write to you concerning the real value of your SELTZER APERIENT as a remedy for indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.

For four or five years my wife has been sadly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Cabialis, of Venezuela, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.

For fear it be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.

Trusting that you will give this publicity, and repeating my earnest gratitude and thanks,

I am very respectfully yours,
S. D. C. HENRIQUEZ,
Merchant, Curacoa, S. A.

New York, June 28th, 1865.

WE ASK

The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of

Dyspepsia, Heartburn, Sour Stomach, Sick Headache, Dizziness, Indigestion, Piles, Costiveness, Bilious Attacks, Liver Complaints, Rheumatic Affections, &c.

Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your Physician.

DUTCHESS NURSERIES,
POUGHKEEPSIE, NEW YORK,
FERRIS & CAYWOOD, Proprietors.

We call the attention of our customers and the public to our stock of GRAPE VINES, which is larger than ever before. Having had over twenty years' experience in the management of Vineyards and the propagation of Vines, and our present stock having been grown from bearing wood only, with constant care during the season, we think they will compare favorably with any others that are offered to our patrons.

Our stock of MONTGOMERY VINES is very large. This variety not being generally known, we will give a brief description:—White, a seedling of the White Chasselas, an unparalled grower and bearer, clusters often weighing two pounds, with a mild nutmeg flavor. It is classed with the hardy grapes, but we protect it in winter as we do all other varieties in this part of the State.

Our stock of the various kinds of EVERGREEN and DEC COUS TREES is very large, and is offered at moderate price; and at very low rates by the quantity, to those who are laying out and improving their places, cemeteries, or public grounds, and to nurserymen. We challenge competition.

S. Vance's Submerged Well PUMP.

This unsurpassable invention, now being first introduced, will, it is believed, supersede all other Well Pumps now in use.

ITS ADVANTAGES.

FIRST, SIMPLICITY.—This Pump is composed of but three parts, and is so simple in its construction that any one can easily pump it together.

SECOND, DURABILITY.—Its peculiar construction, and the fact that it is always submerged combine to make it the most durable of all Pumps yet invented.

THIRD, NEVER FREEZES.—The valves are so constructed that, when not in motion, they allow all the water above to pass down into the well, and thus prevent freezing.

FOURTH, POWER.—For the amount of power applied, this Pump excels anything known. It throws one half part more water than any other pumps, and works so easily that even a child can pump without fatigue. It is in this way the greatest labor-saving pump now offered to the public.

FIFTH, IT IS INVALUABLE.—For a well pump it is invaluable, as all the iron which is submerged consists of but three small pieces, and these galvanized. It can in no way corrode, consequently it brings up pure water at every stroke.

SIXTH, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to keep in use for years. No repairs at all are needed. It is very light, and thus the cost of transportation is very small.

SHUT DOWN.—By direction of the agents of that "soulless corporation" which obtained its charter by *deceit*, and has hitherto maintained it against the interest of the whole central portions of the State, by misrepresentation and *fraud*, known as the Winnepiseogee Cotton and Woollen Manufacturing Company, on Friday last the gate at the outlet of Crooked Pond was shut down. The result is, all operations dependant upon water power at Mill Village, including the grist mill, are stopped. How long the interests of the people of this section, including most of Wolfeborough, a large portion of Tuftonborough, Alton, New Durham and Brookfield, are to be made the sport of the caprice and ill temper of the agent of an overgrown Massachusetts monopoly, we know not. We trust, however, that being compelled to go some ten to fifteen miles over roads almost impassable to get their corn and grain ground, will help to arouse the people to a just sense of the importance of preserving their rights from the greedy grasp of an unprincipled monied aristocracy who assume to control for mere purposes of speculation, the best water powers in the State.—*Wolfeboro' News.*

We have no personal knowledge of the above matters;—but if it be true, (as above stated, and as confirmed in the Concord Statesman,) that the Charter referred to was obtained by *deceit* and *fraud*, then there must be some power in the Legislature or the Courts, or in both together, either to *annul* the charter, or to abate the nuisance complained of.

☞ A correspondent of the Boston Journal at New Ipswich, sends the following items:

"There are now living in this town, and within a few rods of each other, two pensioners of the United States. They both enlisted at the age of eighteen years—the one in the war with Great Britain in 1814, the other in the war of the rebellion in 1864, fifty years after. The first was taken with spotted fever, which totally deprived him of his hearing, and he has remained deaf ever since. The second was taken by spotted fever in 1864, which utterly deprived him of his eye sight, and he will probably remain blind for life. The first draws a pension of eight dollars per month, the last receives twenty-five dollars per month.

The first soldier is the only one of fifteen who volunteered at the same time, now living; and the second is the only one of eighteen who had the spotted fever and recovered."

— An Augusta, Me., paper says that potatoes are selling in that market for 45 cents, hay at $10, butter from 40 to 45 cents, eggs 24 cents.

— There was wrecked during last January an Eastern schooner on Hatteras cove, and two men were frozen in the rigging. Although more than two months have elapsed since the disaster occurred, and although the vessel in question lies but a short distance from the shore, the bodies have never been removed.

AMERICAN AND FOREIGN PATENTS.

R. H. EDDY,
Solicitor of Patents,
Late Agent of the U.S. Patent Office, Washington, under the act of 1837,
78 State Street, opposite Kilby Street,
BOSTON.

After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds, Assignments, and all Papers for Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.

The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not incontestably superior to, any which can be offered them elsewhere. The Testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional services as moderate.

The unusual practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.

These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.

All necessary of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.

TESTIMONIALS.

"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.

"I have no hesitation in assuring inventors that they can not employ a person *more competent and trustworthy*, and more capable of putting their applications in form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents

Mr. R. H. Eddy has made for me THIRTEEN applications, on all but one of which patents have been granted, and that is *now pending*. Such unmistakable proof of great talent and ability on his part leads me to recommend all inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."
JOHN TAGGART

During eight months, the subscriber, in course of his large practice, made on *twice* rejected applications SIXTEEN APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents.
R. H. EDDY.

VINELAND
FARM AND FRUIT LANDS.
In a mild and healthful climate. Thirty miles *south* of Philadelphia by Railroad, in New Jersey, on the same line of latitude as Baltimore, Md.
The soil is rich and *productive*, varying from a clay to a sandy loam, suitable for Wheat, Grass Corn, Tobacco, Fruits and Vegetables. This is a *great fruit country*. Five Hundred Thousand Peach Orchards have been planted out by experienced fruit-growers. Grapes, Peaches, Pears, &c., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste*. It has increased five thousand people within the past three years. Churches, Stores, Schools, Academies, Societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are constantly settling. Hundreds of new houses are being constructed. Price of Farm land, twenty acre lots and upwards, $25 per acre. Five and ten acre and Village lots for sale.
Fruits and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Yards, Manufactories, Foundries, Machine and the like; and Steam Power, with room, can be rented.
For persons who desire mild winters, a health full climate, and a good soil, in a country beautifully improved, abounding in fruits, and possessing all other social privileges, in the heart of civilization, it is without a rival.
Letters answered, and the Vineland Rural, a paper giving full information, and containing Reports of actual Settlers, sent to applicants.
Address CHAS. K. LANDIS, Vineland P. O., Landis Township, New Jersey.

Morning Chronicle.

Portsmouth, N. H.

SATURDAY, MARCH 24, 1866.

☞ Gen. Howard has written to Major Stearns, asking him to cancel a statement in the newspaper called The Right Way, that it would be distributed through the agency of the Freedmen's Bureau. This letter was elicited by a statement that The Right Way is hostile to the President. So says Parley; and it is very certain that The Right Way has been criticizing President Johnson most severely, by copying his speeches made a year ago, and a few months ago, and then contrasting them with his present action and his late speeches! But we don't think there is much harm done; for we believe the No. of The Right Way for this week *was to be the last* of the gratuitous distribution, aside from this order. However this may be, the same amount of talent and truth may be infused into some other channel, through which they will meet the public eye. Such things cannot be smothered forever.

☞ Parley writes from Washington Thursday night, at midnight:

Those usually well informed concur in the belief that the President will veto the Civil Rights bill. There has been a *division* on the subject among the President's *friends*—*Seward* men urging him to sign the bill as a master stroke of policy—while the *Blair* faction urge a veto.

[Well, well, says Uncle Toby,—if *this* division has really taken place, good will come of it, veto or no veto.]

☞ It is reported at Washington that Sec. McCulloch is now satisfied that existing laws give him all needful power to contract the currency—as many members of Congress have all along maintained. Perhaps the whole Cabinet will find out, presently, that Congress and the people are as wise as themselves.

FROM NEW ORLEANS, March 22.—Planting is going on rapidly in Louisiana. Sugar and corn all planted.

Steamboat Butler, which was seized at Shreveport on account of the murder on board of a negro soldier, has been released by Gen. Canby, but 30 of the crew have been detained in custody.

All the ill feeling between the people and the negro troops on Red River is believed to have subsided.

The cholera quarantine will be removed from West India and Mexican shipping. The Florida and coastwise shipping has also been relieved.

There is no cholera in the Gulf or on the Spanish main.

Brig Ocean Wave, from the south coast of Cuba for New York, put into New Orleans leaking badly. The captain had committed suicide.

NEW HAMPSHIRE ITEMS.

—— A man called Dr. Boyce, of Londonderry, died suddenly at Manchester, March 21.

—— Rev. N. C. Mallory was installed pastor of the 1st Baptist Church in Manchester, March 21.

—— Rev. Henry E. Parker has been regularly dismissed by a Council, from the pastorship of the South Congregational Church in Concord.

—— Alanson L. Haines is in custody at Concord, for passing a counterfeit $50 greenback, and for having in his possession 110 pieces of counterfeit fifty-cent scrip. He is held to bail in $3000 for trial at Portsmouth May 8, and of course is in jail.

—— J. J. Brown, Esq., a native of New Hampshire, and a resident of Portland for more than thirty years, died suddenly in that city this week. He had been a Bank Cashier, and was more recently a Broker; a trustworthy man, highly respected.

—— Governor Smyth, in accordance with a resolution of the last Legislature, has appointed Levi W. Barton of Newport, Hon. D. D. Ranlett of Concord, State Auditor, and Ezra Stearns of Rindge, a Board of Commissioners to ascertain the war expenses of the various cities and towns in the State during the late rebellion.

—— A New Hampshire man has gone to England to represent the interests of twelve New Hampshire persons claiming to be heirs of the accumulated and accumulating interest on the estate of Robert Wilson, who died at London eighty years ago, leaving property worth $60,000,000. It consists of consols, an old homestead known as Stanly Abbey, fifteen miles from London, and a large amount of real estate at London. The twelve claimants are the children of two nieces of the wealthy man, who think themselves entitled to the interest by a recently discovered will.

— At Cincinnati, March 23, Pike's Opera House took fire from an explosion of gas at midnight. The whole building was in flames, and would be entirely destroyed. Loss about $500,000.

GOLD, in New York Friday, 128. In New Orleans Thursday, 126 1-2.

— A Spanish fleet has been repulsed by a Chilian fort.

Piscataqua Bridge, built 1794—Rev. Joseph Willard.

The Legislature granted a charter, incorporating a number of persons belonging to Portsmouth and their associates, for the purpose of building a bridge over Piscataqua river, by the name of the Proprietors of Piscataqua Bridge. Having made every necessary preparation, they commenced the work the beginning of April, 1794, and had it so far completed on the 25th of November, so as to be passable; when they began to take toll. The bridge connects the towns of Newington and Durham, just below the outlet of Little Bay. It is two thousand three hundred and sixty-two feet in length, and thirty feet in width. The river over which it passes is generally upwards of fifty feet deep at high water. From the Newington shore a stone abutment extends several feet into the river. The bridge is then supported by piles, five of which were strongly framed, and braced together, and driven into the bottom of the river. String pieces were laid from the cap of one set of piles to another, and on them the plank or flooring of the bridge was secured. This mode of constructing it, extends as far Rock Island, on which a strong stone abutment is built, and another on the shore of Goat Island; from one of these abutments to the other, an arch is thrown, the chord of which is two hundred and forty-four feet six inches. The arch is composed of three tiers of girders, the lower one is sixteen feet from the chord, and twenty feet from the water at high tide. The second tier supports the planking on which the road passes, which is on a larger circle to facilitate the travelling. The upper tier answers the purpose of railing. There are three sets of these girders, one on each side, and one in the middle of the bridge, which are so braced and framed together, as to make the whole strong and firm. This arch was constructed Mr. Timothy Palmer, of Newburyport,* on a model entirely new, and does him great credit for his skill in architecture. The remainder of the bridge from Goat Island to the Durham shore is built on piles, in which is a draw for vessels to pass through, as they go up and down the river.

In constructing this bridge, three thousand tons of oak timber, two thousand tons of pine timber, eighty thousand four-inch plank, twenty tons of iron, and eight thousand tons of stone have been used. The directors appointed Thomas Thompson and John Peirce, Esq's. agents, under whose direction and superintendence, the materials were provided, and the work performed. The whole cost of the bridge was sixty-two thousand dollars.

It is expected that this bridge will be of essential benefit to Portsmouth, as it will open a communication with the country, which could not previously be had without crossing the river, or some of its branches in boats.—*Adams.*

—*Mr. P. was afterwards for many years Surveyor of Highways in Newburyport.

The bridge was used about 60 years—but the P. S. & P. and the Portsmouth & Concord Railroads, took away most of the travel,—and the bridge not being kept in strong repair, was carried off by the combined force of wind, tide and ice, a few years ago.

The parish of St. John's Church, in the year 1794, requested Mr. Joseph Willard, a resident graduate of Harvard College, to officiate for them on probation. The parish, on the 29th of December, 1794, gave him an invitation to settle with them in the ministry, which he accepted. On the 22d of Feb. 1795 he received Deacon's order's, and on the 24th of the same month, was admitted to Priest's orders, by the Right Rev. Doctor Provost, Bishop of New York.

Mr. Willard continued at St. John's till 1806, when he resigned and left the place.

☞ An unquenchable fire raged for nine days at Petroleum Centre, Penn., March 22. Beginning at Ocean Well, it spread to the tanks of the Ocean Oil Co., the Arctic Well No. 20, Patterson Dickey No. 19, thence to five Wells in the Breeden and Tenniut leases, which were all burned.

Three refineries and some thirty odd buildings were also consumed, and soon connected with the Bonnebof Run, and the burning oil emptied itself into the Oil Creek, presenting a terrible mountain of smoke and flame nearly a mile in length.

The damage is estimated at $150,000. 20,000 barrels of oil were destroyed. 18 engine houses, derricks, engines and the whole paraphernalia for sinking wells were destroyed. One man was burned to death, three others fatally, and two slightly.

☞ A Washington dispatch says it is understood that orders have been issued for the immediate fitting out of a flying squadron for duty on the British North American coast. Various reasons are assigned for this movement. One is, the assembling of the British West India fleet at Halifax, another is the Fenian scare, still another is the termination of the reciprocity treaty and its effect on our fisheries. It will probably equal the English fleet in strength.

BUTTER.—The St. Albans (Vt.) Messenger says that butter was firm in the market there on Tuesday, at 45c per lb., wholesale.

— We have so frequently expressed the opinion that the J. Monroe Taylor Gold Medal Soap was the *Ne Plus Ultra* of all dirt, grease, paint and tar extractors, that it appears unnecessary to occupy space only to reaffirm that opinion. We sincerely hope that no housewife will fail to supply herself with such a valuable article of domestic economy; one washing day will convince all who have not before been fortunate enough to have tried it. Most of the grocers sell it. 62

Local.

☞ A singular case of suicidal intent occurred at Kittery Foreside Thursday night. A highly respectable young lady who, in the absence of the father, was sleeping with her mother, arose about midnight, she said to get some water. Her mother thinking from her actions that she could not find a match, arose and lighted one herself—when she was horror-struck to see a razor in her daughter's hand, and quickly discovered that she had cut her throat from ear to ear!

The girl coolly laid down the razor on a table, and her mother put her hand to her throat and conducted her to the bed. Dr. Smart of Fort Constitution was called, and the girl will probably recover, though she was terribly cut and bled most profusely.

The young woman is about 20 years old, in good health, of excellent character and happy disposition, and no cause whatever is known which could have induced her to make this horrible attempt on her life. It may have been some temporary pressure or excitement of the brain, though her getting that razor in the dark looks as if she might have premeditated and arranged for it.

CONTINUED.—Richard Townsend, charged with the larceny of rigging, anchors, cables, &c., &c., was arraigned yesterday before Judge Odell, and at the request of the City Marshal, his case was continued until next Monday, at 10 o'clock. His bail was fixed at $1000, which he failed to obtain, and is now in confinement.

☞ In reference to the absurd and wicked lies which are in circulation respecting certain parties in this city—a card from a responsible and highly respectable gentleman, which we print elsewhere, may be of interest to some readers.

☞ We have nothing later this morning concerning the case of Professor Andrew P. Clarke, junior, either rebutter or rejoinder.

Perry's Moth and Freckle Lotion.

☞ Chloasma, or Mothpatch, (also called Liverspot,) and Lentigo, or Freckles, are often very annoying, particularly to ladies of light complexion, for the discolored spots show more plainly on the face of a blonde than of a brunette; but they greatly mar the beauty of either and any preparation that will effectually remove them, *without injury to the texture or color of the skin,* is certainly a desideratum. Dr. B. C. PERRY, who has made diseases of the skin a speciality, has discovered a remedy for these discolorations, which is at once prompt, infallible and harmless.

Lyon's Periodical Drops!
THE GREAT FEMALE REMEDY FOR IRREGULARITIES.

These Drops are a scientifically compounded fluid preparation, and better than any Pills, Powders or Nostrums. Being liquid, their action is direct and positive, rendering them a reliable, speedy and certain specific for the cure of all obstructions and suppressions of nature. Their popularity is indicated by the fact that over 100,000 bottles are annually sold and consumed by the ladies of the United States, every one of whom speak in the strongest terms of praise of their great merits. They are rapidly taking the place of every other Female Remedy, and are considered by all who know aught of them, as the surest, safest and most infallible preparation in the world, for the cure of all female complaints, the removal of all obstructions of nature, and the promotion of health, regularity and strength. Explicit directions, stating what they may be used, and explaining when and why they should not, are could not be used without producing effects contrary to nature's chosen law, will be found carefully folded around each bottle, with the written signature of JOHN L. LYON, without which none are genuine. Price $1.50.

Prepared by Dr. JOHN L. LYON, 196 Chapel Street, New Haven, Conn., who can be consulted either personally, or by correspondence from her friends concerning all private diseases and female weaknesses. Price $1.50 per bottle.

Report of Com. on Claims on petition of B. F. Webster for compensation for fence injured by the Fire Department, was laid on the table.

Applications of J. B. Adams and Lewis E. Smith, for sidewalks on Middle street, was referred to Com. on Streets.

The following communication was received from the City Marshal:

CITY MARSHAL'S OFFICE,
Portsmouth, N. H March 20th, 1866.

To the Hon. the Mayor and Board of Aldermen.

Gentlemen:—On the 13th of the present month the captain and crew of a fishing schooner from the Isle of Shoals were arrested by the Night Police for being drunk, and were taken by them to the "lock-up" at the Station House. After remaining therein several hours they were discharged by me upon the order of His Honor the Mayor, upon payment of expenses of arrest. A person or persons inimical to me for reasons for which your honorable body are responsible, viz., appointing me to the office of City Marshal, have circulated a report relative to the release of these parties, very prejudicial to my character for probity and honesty as an officer of the city government. I very respectfully request that a committee from your Board may be appointed to investigate the matter and report thereon; it is but justice to me that such should be the case.

I have the honor to remain, gentlemen, very respectfully your obedient servant,

J. HORACE KENT.

On motion it was voted that Marshal Kent be allowed a hearing before the Board at the present time. The Marshal appeared before the Board and made a statement, that six persons claiming to belong to the Isle of Shoals, were arrested on the night of the 12th of this month; and that on the following morning they were anxious to be released in order to get back to the shoals on that tide. The Marshal consulted with the Mayor, and upon his order released the men upon payment of expenses of arrest—$5 each. His books were examined and found to correspond with the statement, the money having been duly credited to the City. It was accordingly

Voted, unanimously, that the action of the City Marshal in discharging men from arrest on the 13th inst., is approved by the Aldermen, the same having been done by the Mayor's orders.

A notice was received from the County Commissioners stating that they would meet for the purpose of commencing the hearing on petition of Nathan Jones and others, for new highway from Myrtle street westerly to Newington, at the Common Council room in Portsmouth, on Wednesday April 4th at 10 o'clock in the forenoon.

Voted, that the Mayor be authorized to take all means in his power to oppose the laying out of the proposed road.

The subject of repairs of Bridewell at the City Farm was referred to Com. on House of Correction, to report plans and estimates.

A bill entitled "An Ordinance in relation to the salary of the City Solicitor," which had passed the Common Council, was received, read once, and referred to Com. on Bills on 2d reading. Also, "An Ordinance regulating the pay and duties of the Night Watch."

In Common Council, the "joint resolution for the appointment of a Deputy Collector" was taken from the table and passed.

Mr. E. G. Pierce, jr., presented a bill entitled "An Ordinance relating to the closing of Taverns, Billiard Rooms and Saloons," which provides that they shall be closed at 10 1-2 o'clock P. M. The bill was read and referred to Com. on second reading. The rules were suspended so as to allow the Committee to sit during the present session of the Council.

Mr. E. A. Joy presented the following resolution, which was read and referred to the Com. on Finance:

Resolved, that the Finance Committee be and hereby are instructed to report in the annual appropriation bill, an appropriation of two hundred dollars, for the purpose of defraying the cost of a series of evening concerts on Market Square by the Portsmouth Cornet Band during the coming summer.

The Committee on 2d readings, reported back "An Ordinance in regard to the salary of the City Solicitor," with an amendment which was adopted, and the bill passed. The same Committee reported back the bill entitled "An ordinance regulating the pay and duties of Night Watch," and recommended its passage. The bill passed. By its provisions the Night Watchmen were made Constables and Police Officers at a salary of $650 per year, some of the number to be on duty from 7 P. M. to 4 A. M. and the remainder from 10 P. M. to 7 A. M.

The Com. on bills on 2d reading reported back "An Ordinance relating to the closing of Taverns, &c," with an amendment changing the time of closing to eleven o'clock, P. M. The amendment proposed by the Committee was adopted.

On a motion that the bill be indefinitely postponed, the yeas and nays were demanded by Mr. Kimball. The bill was indefinitely postponed; yeas 9, nays 6. Yeas—Trafton, Emery, Vaughan, Locke of Ward 1, Currier, Pindar, Martin, Dunyon, Woodsum. Nays—Joy, Kimball, Pierce, French, Gardiner, Locke of Ward 3.

A message was received from the Board of Aldermen, announcing the passage of a bill amending Ordinance No. 106, relating to Steam Fire Engines, &c. The bill was read and referred to Com. on 2d reading.

☞ It will be seen that Mr. Uriah Blaisdell has received his usual Spring supply of Farming Tools, Grass Seeds, Poudrette, &c.; and is as ready as ever to serve customers in this line, in his well-known prompt and satisfactory manner.

☞ Rev. Mr. Patterson will (Providence permitting) deliver his Lecture which has been so long deferred, at the Universalist Church to-morrow (Sunday) evening, at 7 o'clock.

☞ Rev. Moses How, of New Bedford, will preach in the Court Street Christian Chapel to-morrow (Sunday) morning and afternoon, at the usual hours of service.

☞ Sale of Furniture and varieties at Wendell's Auction Room this morning.

consist of Twelve Hundred acres, at Reno, on the Alleghany River in Venango County, Pennsylvania—*the heart of the Oil District in that State.*

ONE THOUSAND WELLS

Can be sunk upon the Property without Interference.

☞ Wells have been sunk on the Estate, and Oil found in paying quantities in every instance. FIFTY WELLS are now being put down, to be followed by others as rapidly as possible to the extent necessary *to fully develope the property.* One hundred wells yielding only ten barrels a day each at six dollars a barrel, a price much below the average price at Reno, would give one million eight hundred thousand dollars a year of income, making a profit probably fifteen per cent. over expenses and taxes of every kind. If large flowing wells are found, *a single acre of the territory may yield the entire capital within two years.*

☞ The Company owns the Town of Reno, together with Several Hundred Lots for Business and Dwelling Houses. There is an Extensive Demand for them, and the Revenue from their Sale will be very great.

DR. STEVENS, No 5 Daniel Street, would give notice that he has REDUCED the price of Permanent Sets of ARTIFICIAL TEETH on the Vulcanite Base, to thus charged for them before the war.

He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite alone, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the teeth. mh12

FIRST ASSISTANT in the Office of DR. STEVENS, No. 5 DANIEL STREET.

DR. WEED can be found at his place of business at all hours of the day and night, for the performance of any of the operations that come within the call of his profession.

Dr. A. P. STEVENS, No. 5 Daniel St., makes the saving of ULCERATED and painful front teeth, a specialty in his business. He also successfully restores to their natural shape broken or badly decayed teeth, by building out corners and sides with PURE GOLD. (In many cases teeth so restored are as strong as any of their brother members, and in all cases are rendered eminently useful for a long series of years.) DISEASED TEETH, in all stages, treated, and in a very large majority of cases entire success attained.

Charges for such operations necessarily high, but nothing in comparison to the value of the teeth. mcn14

DENTAL NOTICE!

No. 60 Congress Street.

Having adopted the C. O. D. system of doing business, **Dr. G. S. He also keeps a fresh supply of PURE NITROUS OXYDE GAS to answer the numerous calls for this popular anæsthetic; and administers PURE AIR when desirable.

All other operations in Dentistry performed at reasonable remuneration. mch14

Formerly of Boston, and now of New Bedford, has arrived in PORTSMOUTH, and taken Rooms at the CITY HOTEL, where he will remain till April 2d, or longer, if patients under treatment require it.

Dr. C. gives particular attention to the cure of CANCERS, which he cures without pain and without the use of the knife.—Do not say you cannot get any relief until you have tried his medicines, which will remove all humors, such as Cancers, Scrofula, Abscesses, White Swelling Affections, Erysipelas, Salt Rheum, Inflammatory, Chronic, Mercurial and Syphilitic Rheumatism; Fever Sores, old and stubborn Ulcers and Sores of all kinds cured, whatever may have been the cause that produced them.

Dr. C. will give examinations and advice free in all diseases. Invalids of both sexes are respectfully invited to call and consult the Doctor.

N. B.—Certificates of cures may be had of him from all parts of the country. m22—dawtu2

Morning Chronicle.

A STRAW.—The Washington correspondent of the Cincinnati Gazette puts together several curious circumstances to support the theory that Mr. Seward is to be candidate for the next Presidency, and is to be supported by the South. He says that in November last a prominent rebel officer and Southern politician, in conversation with a Union officer from the West, declared that it was the matured policy of the South to carry the next Presidential election, to which end either Pennsylvania or New York must be secured. The latter was fixed upon as the more desirable. The man who could carry the State had been selected, and it was confessed that he was Mr. Seward.

There is more of the same sort, and it reads like "moonshine." But whatever it may mean, a ticket with Gen. Grant for President, and Gen. Terry, Howard or Burnside Vice President, would send Mr. Seward, rebels, copperheads and blockheads, all to their own place together.

A MINISTER ON FIRE.—Burleigh writes the following piece of Gossip from New York, to the Boston Journal:

In one of our Presbyterian churches the other Sunday morning a minister was officiating with all the ceremonies and solemnity. All at once he began to cut up queer antics and shortly disappeared from public view, to the no small astonishment of his auditors. The pulpit being a close one, boxed up on all sides and the door shut, the people could not tell what was going on. Smoke arising from the pulpit gave assurance that there was fire somewhere, and the stench filling the house, setting every one sneezing and coughing, indicated that there was more brimstone about the pulpit than was necessary to conduct an ordinary service. The excited congregation learned after a while that the minister was on fire. It seems that he carried in his pocket a lot of loose lucifer matches, and they ignited and set him on fire. Assistance came and the minister was put out. The whole thing was ludicrous in the extreme, and though the service was continued, the solemnity of the audience was not as marked as on some other occasions.

— He is a great simpleton who imagines that that the chief power of wealth is to supply wants. In ninety-nine cases out of a hundred, it creates more wants than it supplies.

— Professor Hitchcock explains the exceeding richness of Vermont soil by the lime in the rocks, so combined as to be dissolved gradually, thus adding continually to the richness of the soil.

— The Empress of France has reformed and will dress hereafter less expensively. She recently told a Lyons manufacturer who solicited an audience to display some highly expensive silks, that the ladies' husbands who visited her, and her husband also, were not rich enough to buy them.

SUFFERERS
From Dyspepsia
READ! REFLECT!! ACT!!!

TARRANT & CO.

Gentlemen, I am a resident of Curacoa, and have often been disposed to write to you concerning the real value of your SELTZER APERIENT as a remedy for indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.

For four or five years my wife has been sadly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Cabialis, of Venezuela, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.

I feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.

I request that you will give this publicly, and repeating my earnest gratitude and thanks,

I am very respectfully yours,
S. D. C. HENRIQUES,
Merchant, Curacoa, S. A;

New York, June 28th, 1865.

WE ASK

The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of

Dyspepsia, Heartburn, Sour Stomach, Sick Headache, Dizziness, Indigestion, Piles, Costiveness, Bilious Attacks, Liver Complaints, Rhematic Affections, &c.

Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your Physician.

DUTCHESS NURSERIES,
POUGHKEEPSIE, NEW YORK,
FERRIS & CAYWOOD, Proprietors.

We call the attention of our customers and the public to our stock of GRAPE VINES, which is larger than ever before. Having had over twenty years' experience in the management of Vineyards and the propagation of Vines, and our present stock having been grown from bearing wood only, with constant care during the season, we think they will compare favorably with any others that are offered for sale.

Our stock of MONTGOMERY VINES is very large. This variety not being generally known, we will give a brief description: Whilst a seedling of the White Chasselas, an unparalled grower and bearer, clusters often weighing two pounds, with a mild subacid flavor. It is classed with the hardy grapes, but we protect it in winter as we do all other varieties in this part of the State.

Our stock of the various kinds of EVERGREEN and DECIDUOUS TREES is very large, and is offered at moderate price; and at very low rates by the quantity; to those who are laying out and improving their places, cemeteries, or public grounds, and to nurserymen. We challenge competition.

ITS ADVANTAGES.

FIRST, SIMPLICITY.—This Pump is composed of but three parts, and is so simple in its construction that any one can easily put it together.

SECOND, DURABILITY.—Its peculiar construction, and the fact that it is always submerged combine to make it the most durable of all Pumps yet invented.

THIRD, NEVER FREEZES.—The valves are so constructed that, when not in motion, they allow all the water above to pass down into the well, and thus prevent freezing.

FOURTH, POWER.—For the amount of power applied, this Pump excels anything known. It lifts one third part more water than other pumps, and works so easily that even a child can pump without fatigue. It is in this way the greatest labor-saving pump now offered to the public.

FIFTH, IT IS INVALUABLE.—For a well pump it is invaluable, as all the iron which is submerged consists of but three small pieces, and these galvanized. It can in no way corrode; consequently it brings up pure water at every stroke.

SIXTH, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to keep in use for years. No repairs at all are needed. It is very light, and thus the cost of transportation is very small.

LONDON PAPERS of March 8, and a few days previous, contain reports of the evidence before the Jamaica Commission in full. No testimony has yet been shown to prove that Mr. Gordon was guilty of any conspiracy. The most that Governor Eyre could adduce was the prevalent belief, and the fact that he had posted up a placard calling a meeting of the poor people of St. Annes, and that soon after the Custos and Mr. Herschell, whose measures were condemned in that placard, were murdered.

Some of the evidence discloses barbarity which is a disgrace to any nation. A woman received one hundred lashes on the bare back with a "cat," in which wire was twisted. A man was flogged at Morant Bay, and afterwards hanged; others were beaten, flogged and threatened with instant shooting unless they would testify to the guilt of Gordon, which they steadily refused to do. Two women were flogged in the most indecent manner because they refused to tell where Paul Bogle was; and the only palliation offered was that in the cats used for the whipping of women, wire was not twisted, and even this miserable plea was found to be false.

Indeed the whole mass of testimony is one sickening detail of cruelty, which may well make the English nation blush for the honor of its colonial government.

☞ Harper's Magazine for April is received from A. Williams & Co., Boston. The leading illustrated articles are "Birds at Home," "The Navy in the North Carolina Sounds," and "The Last Months of the Taeping War." As usual, the whole number is good. For sale by J. H. Foster and J. F. Shores, Jr.

☞ The National Temperance Advocate, published monthly in New York city, is an able and useful paper; and the Youth's Temperance Banner, issued from the same office, is a very beautiful and attractive sheet. Two engravings, The Family Cat in the February number, and The Family Dog, in March, are worth a year's subscription. All the engravings are fine.

THE LIGHT OF THE WORLD.
DR. MAGGIEL'S
PILLS AND SALVE
These Life-giving remedies are now, for the first time, given publicly to the world. For over a quarter of a century of private practice the ingredients in these
Life-giving Pills!
Have been used with the greatest success. Their mission is not only to prevent disease, but to cure. They search out the various maladies by which the patient is suffering, and re-invigorate the failing system. To the aged and infirm a few doses of these valuable PILLS will prove to be
A Very Fountain of Youth,
For in every case they add new life and vitality, and restore the waning energies to their pristine state. To the young and middle aged, they will prove most invaluable, as a ready, specific, and sterling medicine. Here is a dream realized, that Ponce-de-Leon sought for three hundred years ago, and never found. He looked for a fountain that would restore the old to youth and make youth ever
AN ETERNAL SPRING!
It was left for this day and hour to realize the dream, and show, in one glorious fact, the magic that made it fair.
These Famous Remedies
Cannot stay the flight of years, but they can force back and hold at bay, diseases that might triumph over the aged and the young. Let none hesitate then, but seize the favorable opportunity that offers. When taken as prescribed—
FOR BILIOUS DISORDERS
Nothing can be more productive of cure than these Pills. Their almost magic influence is felt at once; and the usual concomitants of this most distressing disease are removed. These remedies are made from the purest
VEGETABLE COMPOUNDS.
They will not harm the most delicate female, and can be given with good effect in prescribed doses to the youngest babe
For Cutaneous Disorders
And all eruptions of the skin, the SALVE is most invaluable. It does not heal externally alone, but penetrates with the most searching effects to the very root of the evil.

FARM AND FRUIT LANDS,
In a mild and healthful climate. Thirty miles *south* of Philadelphia by Railroad, in New Jersey, on the same line of latitude as Baltimore, Md.
The soil is rich and *productive*, varying from a clay to a sandy loam, suitable for Wheat, Grass Corn, Tobacco, Fruits and Vegetables. This is a *great fruit country*. Five hundred Vineyards and Orchards have been planted out by experienced fruit-growers. Peaches, Pears, Grapes, &c., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste*. It has increased five thousand people within the past three years. Churches, Stores, Schools, Academies, Societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are constantly settling. Hundreds of new houses are being constructed. Price of farm land, twenty acre lots and upward, $25 per acre. Five and ten acre and Village lots for sale.
Fruit and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Yards, Manufactories, Foundries, Stores and the like; and Steam Power, with room, can be rented.
For persons who desire mild winters, a healthful climate, and a good soil, in a country beautifully improved, abounding in fruits, and possessing all other social privileges, in the heart of civilization, it is worthy of a visit.
Letters answered, and the Vineland Rural, a paper giving full information, and containing Reports of solon Robinson, Horace Greeley, &c., sent free. Address CHAS. K. LANDIS, Vineland P. O., Landis Township, New Jersey.
From Report of solon Robinson, Agricultural Editor of The Tribune: *It is one of the most extensive fruit tracts, in an almost level position and suitable condition for pleasant farming that we know of this side of the Western Prairies.* m1—dawGm

MONDAY, MARCH 26, 1866.

NO PLAN PROPOSED.—With all their howling and growling at President Johnson for his policy of Restoration which he has so far carried out to a remarkable success, the Radicals have as yet offered nothing of their own. Why oppose the President's, which is working well, unless another and a better is proposed?—*Democratic Exchange.*

Mr. Secretary Seward says the plan is his; that he proposed it, President Lincoln adopted it, and President Johnson is carrying it out. We remember well, that Congress did pass, just at the close of a session, a Reconstruction Bill, and that President Lincoln did not sign it, but put it in his pocket, saying he did not exactly approve it but yet might use it.

If Sec. Seward really made *the plan*, there can be no doubt his advice induced President Lincoln to pocket the bill.

THE WAR BETWEEN CHILI AND SPAIN. The Spanish account of the late naval fight at Ancud, where their fleet was repulsed by the Chilian batteries, says:

The action was continued incessantly for hours, the two Spanish ships expending about 700 shot and shell, when the commanding officer finding it impossible to silence the shore battery and not caring to venture with his heavy ships into a narrow and dangerous channel way, hauled off out of range, after his vessels had been struck seventeen times in the hulls, the Blanca receiving one shot below the water line, which was immediately plugged up. They report no casualties. The Spaniards report that when the fight ended the Covadonga was entirely dismasted, the America using but one gun out of her broadside of eight, and the Apurimac on fire; besides all suffered very severely aloft, having spars and rigging shot away.

A Panama letter says the Spanish ironclad Munancia was to be dispatched to Ancud, to attempt to run the battery and destroy the allied fleet.

The Italian barque Salvador Vidue, which had carried coal and stores to the Spanish frigate off Coquimbo, was subsequently captured in the night, when in the Bolivian port of Cobija, by eight Chilians, and taken to Callao. This was before Bolivia joined joined the alliance against Spain. The Italian Minister to Peru demanded the release of the vessel and return to her owners on the ground that she was a neutral vessel captured in neutral waters. The demand was complied with, but the same night she was destroyed by fire in the harbor of Callao.

J. H. RANDLETT'S CARRIAGE MANUFACTORY.—Among the many establishments in Dover, pointed at with pride, and to which strangers are always taken with profit, as well as pleasure, no one is more deserving of special notice than the one above mentioned. Dover stands second to none in the manufacture of sleighs and carriages of all kinds, and during the last two years, no work for style, neatness and beauty, has stood better in Boston market, than that which bore the mark, "Randlett, Dover, N. H." In the Boston Commercial of the middle of February, its business reporter in summing up an account of an extensive sale at Riddle's Bazaar, gave the Randlett sleigh the credit of being the best and lightest article in the market, bringing $160. This workshop, possessing unusual facilities and advantages over most manufactories of the kind in the employment of first class workmen, embracing one of the best body makers in the country, painters, trimmers and blacksmiths, will open the coming season by putting into the market the finest lot of top buggies, "sunshades" and wagons that have ever been seen in this vicinity. They are the latest style, and for taste and durability can but command ready sale and good prices. It gives us pleasure to congratulate the enterprising proprietor on the good reputation which his work enjoys, both at home and abroad, in standing A, No. 1 in the market, and every one who takes an interest in the welfare of old Dover, will rejoice over the fact that she sustains such a good record in the extensive carriage marts of New England.—*Dover Enquirer.*

☞ A Washington dispatch says the President has declined to accept the resignation of Postmaster Cleveland of Hartford, returning his letter of resignation with this indorsement: "Your political action in upholding my measures and policy is approved. Your resignation is therefore not accepted, but is herewith returned."

ANOTHER DECLINE IN COAL.—At the great auction sale of Scranton coal in New York on Thursday, the prices declined from 50 cents to $1.85 per ton, as compared with the previous sale on the 28th of February—stove coal bringing $6.52 1-2 to $6.85 and egg $5.90 to $6. This shows a fall in seven weeks of $3 on stove and $2.66 on egg.

GOLD, Saturday, 125 to 125 1-8.

☞ "Every Saturday" for this week is out in good season, filled with the cream of foreign current literature.

— The military authorities in Salisbury, N. C., have suppressed the sale of pictures of Generals Lee, Jackson, and other Confederate generals.

— A party residing in New York has commenced a suit against Gen. Terry in the U. S. Court for that District, claiming damages for loss and injury caused by the General as commander of the Department of Virginia.

Correspondence of the Chronicle.

NEW ORLEANS, March 14, 1866.

Editors Chronicle:—We are enjoying the most delightful spring weather, and our Garden District looks like one vast parterre of flowers. It has become quite a fashionable promenade for our "fair women and brave men," and one is well repaid for a stroll through its cool and shady avenues.

The 4th of this month was another of our city's gala days. It was the twenty-ninth anniversary of our Fire Department. The "boys" were out in large numbers, and made quite an imposing display. The day was all that could be wished for, and the Department had a jolly time of it altogether.

The firemen were out in full force again on the 11th, to follow to their last resting-place the remains of J. Fred. Gruber, who was murdered on the night of the 9th, in Sam's Saloon, on St. Charles street, by a party of our *very efficient* detective force. We were to have an election for city officers on the 12th,—and a condemnation of the course of the ruling police force in ostracizing those of its members who would not agree to support a certain ticket, caused Fred.'s death. Gruber had been an active and enthusiastic fireman for the past twenty years, and had held all positions in the Department up to Chief Engineer. He was much loved by the firemen, and respected by all classes of citizens, as was evidenced by his having one of the largest funeral processions that have occurred in our city. Poor Fred! he was a noble, whole-souled man, with a hand as open as the day to melting charity. He will be sadly missed in our community.

The mechanics and workingmen of this city are now on a strike for the eight-hour system, in which, I hope and think they will be successful. The different associations were out in procession through the principal streets on Saturday last, and in the evening held a mass meeting in Lafayette Square, at which several speeches were made in favor of their policy. Some of the bosses have already agreed to the eight hours, and all of them have expressed a willingness to do so if the system should become general in the North.

The architects, builders and employers held a meeting yesterday, and resolved that ten hours should constitute a day's work here until some lesser number became general throughout the United States; and that they would employ no man who would not work those hours. In the meantime the mechanics have formed associations among themselves, and advertise that they will take contracts for work twenty per cent. lower than their former bosses.

Our city election came off yesterday, and resulted in the partial success of what was called the *National* Democratic ticket, in opposition to that known as the *Union* Democratic ticket. Both tickets were of nearly the same complexion, so far as the dogmas of Unionism and secession are concerned. It was merely a contest as to which set of men should have the offices. I am glad to say that the most objectionable on both tickets were left off, and the least objectionable selected in their places. You will recollect that John T. Monroe, the Mayor elect, was the incumbent of the office at the time of the surrender of the city in 1862. That circumstance was one of the greatest incentives for his selection at the present time. The newly elected city government assume the reins of office on the 19th.

Our amusements are still flourishing, and the theatres, concert rooms and circus are crowded nightly. Mrs. Charles Howard Watkins, an old New Orleans favorite, has opened a little bijou of a theatre on St. Charles street, and, I am glad to say, is doing very well with it.

Business is still pretty brisk, though it has received a pretty heavy damper within the last few days, in the promulgation of an order quarantining all vessels from South American and Gulf ports for ten days. This order will have the effect of winding up our season's business some two months earlier than was expected. We were just beginning to open a trade with those ports, which will now have to be put off until next Fall. Strict sanitary regulations have also been issued by the city fathers, so that if we should unfortunately have a sickly season, the fault will not lie at their doors.

Mrs. Jefferson Davis, accompanied by Burton N. Harrison, formerly private Secretary to Mr. Davis, arrived here yesterday. She is on her way to Canada, to visit her children. H.

DARTMOUTH COLLEGE.—The senior class at Dartmouth has made choice of the following officers for class day: Marshal, Henry S. Mansfield, Mansfield, Ohio; Orator, Benjamin V. True, Meriden, N. H.; Poet, Waldemer Otis, Cleveland, Ohio; Prophet, Lewis H. Wood, Calais, Vt.; Chronicler, Henry A. Kendall, East Concord, N. H.; Address to the President, Adino B. Chase, Hanover Centre, N. H.; Odist, Edward A. Kelley, Newburyport, Mass.; Farewell Address at the Tree, Horace E. Andrews, Sutton, N. H.

PREMIUMS FOR LEFT HAND WRITING. Some time ago, premiums were offered by a number of gentlemen, among whom was Rev. Dr. Bellows of New York, for good specimens of hand writing by the *left hand* of soldiers who had lost their right hand.

Gen. Howard, of Maine, declined to be a competitor, in the following beautiful letter to Dr. B., dated Feb. 27.

I am grateful to you for the kind letter just received from you, and hasten to reply. I was invited to write for the prize, but for two reasons I abstained. First, I was too deeply engrossed in my present peculiar work, and, secondly, I was conscious of an inability to write a fair hand. However, my penmanship is quite as good as that formerly with the right hand.

I heard a lady in the cars lately detailing the sufferings, mortification and repinings of a young man who had lost his right arm in the service. He said at first everybody received him kindly, showed him sympathy, and gave him aid, but now it had come to be an old story, and he received no special attention and found it difficult to find a position where he could gain a livelihood.

I will say to you, my dear sir, that there are times when the deformity and inconvenience come across the mind, and disturb the equanimity of those who are full of ambition to make the best of whatever befalls. I do not believe that even the plaudits of a grateful people, or the conscious pride arising from the glorious rewards bestowed upon patriotic efforts, will be enough to sustain the one-armed man so as to make him cheerful, hopeful, and happy at all times, so as to enable him to forget all the nervous pains and sensitive feelings that constantly assail him. My only prescription is a complete surrender of the heart to Christ.

Among the awards, we notice:

Phineas P. Whitehouse, Corporal, Co. C, 6th N. H. Inf., South Hampton, N. H. who had an additional premium of $25 for literary merit.

Among the contributors of specimens, were:

Charles W. Harrington, Sergeant, Co. F, 15th Regt. U. S. Inf.; wounded at Utoy Creek, August 7th, 1864; shot in hand and arm. Dayton, Ohio. (In consequence of an accident, which injured his left hand, wrote a letter with his mouth.)

TAXING U. S. BONDS.—The Manchester Mirror states Gov. Smyth required of the Judges of the Supreme Court their opinion as to the constitutionality of the act passed at the last session of the Legislature, taxing the income of U. S. Bonds. He will send a copy of it to the Selectmen of each town in the State, before the first of April. Governor Smyth is never behind time.

— Brig. Gen. Grierson has been promoted to Major General.

— All the hands in our office propose the Inventor of the Gold Medal Soap for President. Don't they know in this country the ladies don't vote, and true merit is not appreciated by the men? No, no, the ladies don't want him to give up the manufacturing of so valuable and indispensable an article to the household for the sake of being President. Maids and matrons alike would feel the loss of so indispensable an article on a washing day. 63

Cleanse the Blood.

With corrupt, disordered or vitiated Blood, you are sick all over. It may burst out in Pimples, or Sores, or in some active disease, or it may merely keep you listless depressed and good for nothing. But you cannot have good health while your blood is impure. AYER'S SARSAPARILLA purges out these impurities and stimulates the organs of life into vigorous action, restoring the health and expelling disease. Hence it rapidly cures a variety of complaints which are caused by impurity of the blood, such as Scrofula, or King's Evil, Tumors, Ulcers, Sores, Eruptions, Pimples, Blotches, Boils, St. Anthony's Fire, Rose or Erysipelas, Tetter or Salt Rheum, Scald Head, Ring Worm, Cancer or Cancerous Tumors, Sore Eyes, Female Diseases, such as Retention, Irregularity, Suppression, Whites, Sterility, also Syphilis or Venereal Diseases, Liver Complaints, and Heart Diseases. Try AYER'S SARSAPARILLA, and see for yourself the surprising activity with which it cleanses the blood and cures these disorders.

During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsaparilla, but often no curative properties whatever. Hence, better disappointment has arisen than ought the use of the various extracts of Sarsaparilla which flood the market, until the name itself has become synonymous with imposition and cheat. Let no one call this compound "Sarsaparilla," and intend to supply such a remedy as shall rescue the name from the load of obloquy which rests upon it.—We think we have ground for believing it has virtues which are irresistible by the ordinary run of the diseases it is intended to cure. We can only assure the sick, that we offer them the best alterative which we know how to produce, and we have reason to believe it is by far the most effectual purifier of the blood yet discovered by any body.

AYER'S CHERRY PECTORAL is so universally known to surpass every other remedy for the cure of Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease, that it is useless here to recount the evidence of its virtues. The world knows them.

MAGGIEL'S

Spring and Summer Remedies.

"Great oaks from little acorns grow." The worst diseases known to the human race spring from causes so small as to almost defy detection. The volumes of scientific lore that fill the tables and shelves of the medical fraternity only go to prove and elaborate these facts. Then guard yourselves while you may. The smallest pimple on the skin is a tell tale and indicator of disease. It may fade and die away from the surface of the body, but it will reach the vital principle, at last, and death be the result and final close. MAGGIEL'S BILIOUS, DYSPEPTIC and DIARRHEA PILLS cure where all others fail. While for Burns, Scalds, Chilblains, Cuts, and all abrasions of the skin, MAGGIEL'S SALVE is infallible. Sold by J. MAGGIEL, 48 Felton street, New York, PRESTON and THACHER in this city, and all Druggists, at 25 cents per box. decsoed&wly

Local.

☞ Why can't we have a City Hall? Well, say the men who have got all their money in U. S. bonds—the taxes are too high just now—wait a few years. But what say the men who have got *no* bonds? Why, hear them—all the rich men have got untaxable property; just wait till their bonds run out. But all the live men—whether they have got bonds or not—say, give us a Hall now, while we are alive to enjoy it. And if business is going to be dull, and work scarce, some folks would say this would be just the very time to make public improvements. And really, to hear the opposers talk, one would think they *alone* would have to pay taxes for it—whether you take men called "rich," who say their taxes are too high, or men not so rich, who also say their taxes are too high, but that those very rich men are not taxed half enough. Pshaw! "there's a lion without," isn't there? or a bugbear.

P. P. S.—We think Mr. Day may well feel satisfied with the reception of the Concert given by the Portsmouth Philharmonic Society, in Dover, last week, as enthusiastically described elsewhere by the editor of the Gazette of that city, where Mr. D. is so well known; and may also congratulate himself, on the great success of the new Society generally. We say Mr. Day in particular, for although there are many others who have contributed materially to this result, yet the idea of forming the organization was originally his, and he has labored assiduously to promote its welfare.

The Philharmonics have announced to give another Concert in Portsmouth on Fast Night, and will no doubt do as well as ever for themselves, the public, and the cause of music, for which they labor.

POLICE COURT, March 24.—Horace Taylor, of Eliot, committed a nuisance, and was guilty of rude and indecent conduct on Market street, on Friday, in the presence of many citizens. Taylor had no defence, other than that he had only been guilty of a little perfunctoriness, (wonder how he come to occupy that word?) hence the Judge mulcted him in the amount of $9.68. Taylor is going to help Mr. Philbrick plow, this Spring.

☞ One of the prettiest and cosiest little rooms in the city, is Mr. John Sise's new Insurance Office, or counting room, which he has just had built in his store on Market Square. Mr. Sise is Agent for several of the best Insurance Companies in the country, as per his advertisement—and the enormous figures of the old "Etna" are especially noticeable; while it is unnecessary to add, that Mr. Sise is prompt and honorable in all his dealings. Mr. Joseph C. Walker, one of the most careful and courteous of men, is his clerk in this department.

☞ We call attention to the advertisement of the Concord Commercial College—and have no hesitation in saying that we consider this New Hampshire institution fully equal to any similar place of business education in the country.

From the Dover Gazette, March 24.

GRAND CONCERT.—The Concert last Tuesday evening, given by the Philharmonic Society of Portsmouth, under direction of Prof. W. K. Day, formerly of this city, was really a musical treat. The City Hall was well filled with the *elite* of the city, and among them we noticed many of our best musical critics; and judging by the deep interest with which they listened, and the apparent pleasure they received, the performances met their highest expectations, as well as received their hearty applause. It may be deemed invidious to particularize, where all were deserving praise; but we will refer to the "Baby" song by Miss Foster, as worthy of especial mention. Its pure melody and touching pathos reached the heart; and the artistic skill with which it was rendered, completely enchained the audience, and hushed them into silence, which enabled the softest and finest passages to be distinctly heard. We trust our Portsmouth friends will visit us again. If so, we can confidently assure them of a crowded house.

One thing has been clearly demonstrated by this concert,—that our sister city is in the possession of a high order of musical talent, both in imparting and receiving instruction. How is it in our own city? Are we destitute in this particular? We think not; but might as well be, as have "our talent folded in a napkin and laid away." It is certain that our city is not making, and has not for years made, any progress in the science of Music. Our social circles, our public occasions, and our Sabbath worship, painfully demonstrate this condition of things. Will not our lovers of music awake to a sense of its importance, and take courage from the example set them by their Portsmouth friends? We have the talent. It is only slumbering and neglected. To arouse it, requires energy; and to succeed, perseverance and a little self sacrifice.

To be delving night and day for the "almighty cent," will dwarf and demoralize any people. An evening spent, as was last Tuesday's, will do more to elevate and purify society, and to enhance its happiness, than hours spent in gloating over the rusty coppers, wrung from overtasked muscle and brain. The successful maintenance of such a Society, as the Philharmonic of Portsmouth, will redound more to the credit and honor of that city, than a long array of names upon its Income list, with "thousands" attached as "earnings," wrung from honest industry and patient toil.

☞ The old Gen. Stark house, at Manchester, located near the N. H. State Reform School, and which belonged to that institution—was fired by an incendiary, and burned to the ground, on Friday night. Since the burning of the Reform building proper, this house and another near, which was rented for the purpose, have been used for the School House, and the 60 boys had rather sung quarters at that. Repairs on the main building are just being commenced, and will occupy several months. The Stark House, besides its value and the need of it, was of historic interest, as the place where Gen. Stark lived and died, and is a loss to the State and city. We are indebted to Hon. H. D. Walker for this above information.

☞ A dispatch from Cincinnati says the storm Tuesday night was very damaging to property in the neighborhood of Connessville, Indiana. Several buildings were eblown down and one of the piers of the Cincinnati and Indianapolis Junction Railroad bridge destroyed. A freight train ran into the chasm, and the engineer and fireman were severely injured. The storm was felt at Indianapolis, Louisville, Evansville and other points West. At Hyde Park and Evanston, Illinois, there were hailstones of immense size, breaking glass and destroying the contents of green-houses.

Complimentary.
The following complimentary acknowledgement from the Secretary of the Treasury was received by J. LOEWENTHAL:
TREASURY DEPARTMENT,
Washington, D. C., Nov. 23, 1865.
Sir:—This Department desires to express its acknowledgements to you for your agency in the prevention of a great fraud upon the Treasury. But for your prompt exposure to the Second Comptroller of the proposals made you by RABE and his associates, a vast sum might have been lost to the Government, or to individuals having claims on the Government; and the obligations due in the case to your intelligence and integrity are recognized and appreciated.
I am, very respectfully,
Your obedient servant,
E. B. McCULLOCH,
Secretary of the Treasury.
The subscriber gives notice that he is the duly **Authorized Agent** for Messrs. LOEWENTHAL & CO., and any business relating to the procuring of **Bounty and Pensions** left with me, will be forwarded to them at Washington, to be laid before the proper Department.

Important.
DR. STEVENS, No 5 Daniel Street, would give notice that he has a SUPERIOR article of Permanent Sets of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.
He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite alone, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the Teeth. mh12

GEORGE F. WEED,
S-u-r-g-e-o-n D-e-n-t-i-s-t.
FIRST ASSISTANT in the Office of DR. STEVENS, No. 5 DANIEL STREET.
DR. WEED can be found at his place of business at all hours of the day and night, for the performance of any of the operations that come within the call of his profession.

Dr. A. P. STEVENS, No. 5 Daniel St., makes the saving of DECAYED and painful front teeth, a speciality in his business. He also successfully restores to their natural shape broken or badly decayed teeth, by building out corners and sides with PURE GOLD. (In many cases teeth so restored are as strong as any of their brother members, and in all cases are rendered eminently useful for a long series of years.) DISEASED TEETH, in all stages, treated, and in a very large majority of cases entire success attained.
Charges for such operations necessarily high, but nothing in comparison to the value of the Teeth. mch14

DENTAL NOTICE!
No. 60 Congress Street.
Having adopted the C. O. D. system of doing business, **Dr. C. H. GOODALL** informs his patients and the public that he now inserts whole sets of block teeth on VULCANITE BASE for $30.00 each (upper and lower,) and warrants them as good and as serviceable as sets on GOLD, which cost more than double the above.
He also keeps a fresh supply of PURE NITROUS OXYDE GAS to answer the numerous calls for this popular anæsthetic; and administers PURE ETHER, when desirable.
All other operations in Dentistry performed at reasonable remuneration. mch14

Valuable Real Estate
AT AUCTION.
(By virtue of a license from the Hon. Judge of Probate for the County of Rockingham.)
On TUESDAY, April 17, at 12 o'clk M.,
on the premises.
The Real Estate of the late CHARLES W. WALKER, of Portsmouth, deceased. Said property will be sold in three separate lots or parcels, viz:
The First Lot to consist of the well known MARKET STREET HOUSE, situated on the corner of Market and Green streets, with land connected therewith, bounded 69½ feet more or less on Market street, 103 feet more or less on Green street, 106 feet more or less by Lot No. 2, 107 feet more or less by land formerly of James Pickering, land of James Junkins and others; the lot containing 5928 feet, more or less.
The Second Lot consists of land on Green street bounded 38 feet more or less on Green street, 110 feet more or less by land of Estate of George Chesley, 35 feet more or less by land formerly of James Pickering and others, and 106 feet more or less by lot No. 1; the whole lot containing 3926 feet, more or less.
The Third Lot is to consist of the Stable lot, so called, on Green street, with the stable and Office-building thereon. The lot is bounded southerly about 25 feet on land of Green street, easterly about 72 feet on land of E. S. Wendell, northerly about 50 feet on Railroad land, and westerly by Railroad land and adjoining cemetery; containing about 2710 feet. The Stable is 38 by 36 feet, and the Office-building 19 by 19 feet.
The above offers a rare chance for capitalists or others. The property is prominently situated on one of the main avenues of the city. The "MARKET STREET HOUSE" is large and well calculated, conveniently situated for a Hotel or large Boarding House, and has been occupied as such for many years. It contains 19 rooms and attic, and also a Store. The Stable has been used, and is a good location for a Livery Stable.
If desirable, a portion of the purchase money can remain on a mortgage of the premises.
For further particulars inquire of J. M. EDMONDS, Portsmouth; C. W. STIMSON, Kittery, Me., Guardian of the minor heirs, or of the subscriber. JOSEPH P. MORSE.

Dr. C. gives particular attention to the cure of CANCERS, which he cures without pain and without the use of the knife.—Do not say you cannot get any relief until you have tried his medicines, which will remove all tumors, such as Cancers, Scrofula, Abscesses, White Swelling Affections, Erysipelas, Salt Rheum, Inflammatory, Chronic, Mercurial and Syphilitic Rheumatism, Fever Sores, old and stubborn Ulcers and Sores of all kinds cured, whatever may have been the cause that produced them.
Dr. C. will give examinations and advice free on all diseases. Invalids of both sexes are respectfully invited to call and consult the Doctor.
N. B.—Certificates of cures may be had of him from all parts of the country. m22—dawtf

Morning Chronicle.

Gov. Smyth.—The majority by which Governor *Smyth* has been re-elected is larger, we believe, than that which has been given at the second election of any of his predecessors since the Republican party first carried the State, with one or two exceptions, when the Democracy made no effort to contest the election. Much of this is due to the judicious and acceptable manner in which he has discharged the duties of his office during the past year. Without compromising one iota of his republican principles, or going a hair's breadth out of his line of duty to conciliate political opponents, he has nevertheless sailed the Ship of State on a keel so even and direct, that, while meeting all the requirements of his political friends, he has given the party opposed to him no reasonable cause for complaint. Partisan malice has found no hole in the shield of honor and integrity which has guarded him in his course, through which it could assail him, and has therefore perforce been compelled to let him alone. It is fortunate for any party at any time to have such a candidate to support; doubly fortunate when, as at our recent election, questions far more important than mere State matters were dependent on the result. *Dover Inquirer.*

☞ The friends of music in Strafford County are to hold a Musical Festival at Dover, commencing on Monday Mch 26th, and to last through the week. Mr. Wm. A. Hodgdon of Concord will be conductor, and Mr. L. P. Whitney of Dover leader of orchestra. The hotel rates will be reduced. A. N. Johnson's U. S. Collection of Church Music will be used. HIGHLY IMPORTANT TO UNFORTUNATE FEMALES!

DR. BRISCOE'S FEMALE DROPS are unsurpassed by virtue and efficacy in removing all complaints, of whatever nature, incident to females. He continues, with his usual success, to medically and surgically remove Obstructions, Engorgements, Leucorrhœa, Whites, General Debility, &c., and suppress all such kinds; also all complaints of the Lungs, Liver, Kidneys, Spleen, Bladder, &c.

His medicines will be sent to any part of the country by express or mail; addressed by a communication stating particulars, will receive prompt attention.

Office, No. 23 Endicott street.

Persons at a distance can consult Dr. Briscoe, by letter, describing the case, and have the medicines securely put up, and forwarded to any part of the United States, with full directions for use. Office arranged with separate apartments, so that patients see none but the Doctor himself.

Address Dr. Briscoe, at No. 23 Endicott St., Boston, Mass., stating symptoms. All communications are confidential.

Patients furnished with rooms and board if desired, and secrecy observed in every case.

Office hours from 9 A. M. to 9 P. M.

Boston, July 16, 1855. ThSly

DR. M. BRISCOE still continues his successful treatment of all Private Diseases and also Female Complaints, at his old established office, No. 23 Endicott street.

N. B.—The sick and afflicted will do well to give him a call. A short consultation will cost you nothing, but a word of friendly advice may save you years of suffering.

P. S.—Ladies who wish to stay in the city under my care a few days, can be furnished with kind nurses. Charges moderate.

Important to the Afflicted.

DR. DOW continues to be consulted at his office, No. 7 and 9 ENDICOTT STREET, BOSTON, on all diseases of a PRIVATE OR DELICATE NATURE. By a long course of study and practical experience, he has unlimited extent. Dr. D. has now the gratification of presenting the unfortunate with remedies that have never, since he first introduced them, failed to cure the most alarming cases of GONORRHŒA AND SYPHILIS.

SEMINAL WEAKNESS.—Dr. Dow devotes a great part of his time to the treatment of those cases caused by a secret and solitary habit, which ruins the body and mind, unfitting the unfortunate individual for business or society. Patients who wish to remain under Dr. Dow's treatment a few days or weeks, will be furnished with pleasant rooms, and charges for board moderate.—Medicines sent to all parts of the country, with full directions for use, on receiving descriptions of your cases. Dr. Dow has also for sale the French Capotes, warranted the best preventive. Order by mail. Three or $1 and a red stamp.

Highly Important to Females

IN DELICATE HEALTH.

Dr. DOW, Physician and Surgeon, No. 7 Endicott Street, Boston, is consulted daily for all diseases incident to the female system. Dr. Dow has no doubt had greater experience in the cure of diseases of women than any other physician in Boston. Boarding accommodations for patients who may wish to stay in Boston a few days under his treatment. Dr. Dow, since 1845, having confined his whole attention to an office practice for the cure of Private Diseases and Female Complaints, acknowledges no superior in the United States.

N. B.—All letters must contain one dollar, or they will not be answered. Office hours from 8 A. M. to 9 P. M. eod&wl

CERTAIN CURE

In all cases, or No Charges Made.

Among the physicians in Boston, none stands higher in the profession than the celebrated DR. DOW, No. 7 Endicott street. Those who need the service of an experienced physician and surgeon should give him a call.

P. S.—Dr. Dow imports and has for sale a new article, called the FRENCH SECRET. Order by mail. Two for $1 and a red stamp.

SUFFERERS

From Dyspepsia

READ! REFLECT!! ACT!!!

FARRANT & CO

Gentlemen, I am a resident of Curacoa, and have often been disposed to write to you concerning the real value of your SELTZER APERIENT as a remedy for indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.

For four or five years my wife has been sadly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Cabinis, of Venezuela, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.

I feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.

Trusting that you will give this publicity, and repeating my earnest gratitude and thanks,

I am very respectfully yours,

S. D. C. HENRIQUER,
Merchant, Curacoa, S. A,

New York, June 28th, 1855.

WE ASK

The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of

Dyspepsia, Heartburn, Sour Stomach, Sick Headache, Dizziness, Indigestion, Piles, Costiveness, Bilious Attacks, Liver Complaints, Rheumatic Affections, &c.

Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your Physician.

DUTCHESS NURSERIES,

POUGHKEEPSIE, NEW YORK,

FERRIS & CATWOOD, Proprietors.

We call the attention of our customers and the public to our stock of GRAPE VINES, which is larger than ever before. Having had over twenty years' experience in the management of Vineyards and the propagation of Vines, and our present stock having been grown from bearing wood only, with constant care during the season, we think they will compare favorably with any others that are offered for sale.

Our stock of MONTGOMERY VINES is very large. This variety not being generally known, we will give a brief description: White, a seedling of the Winchester, is unparalleled grower and bearer, clusters often weighing two pounds, with a mild subacid flavor. It is classed with the parsly grapes, but we protect it in winter as we do all other varieties in this part of the State.

Our stock of the various kinds of EVERGREEN and DECIDUOUS TREES is very large, and is offered at moderate price; and at very low rates by the quantity, to those who are laying out and improving their places, cemeteries, or public grounds, and to nurserymen. We challenge competition.

Grape Vines.

S. Vance's Submerged Well PUMP.

This unsurpassable invention, now being first introduced, will, it is believed, supersede all other Well Pumps now in use.

ITS ADVANTAGES.

First, SIMPLICITY.—This Pump is composed of but three parts, and is so simple in its construction that any one can easily put it together.

Second, DURABILITY.—Its peculiar construction and the fact that it is always submerged combine to make it the most durable of all Pumps yet invented.

Third, NEVER BREEZES.—The valves are so constructed that, when not in motion, they allow all the water above to pass down into the well, and thus prevent freezing

Fourth, POWER.—For the amount of power applied, this Pump exceds anything known it throws one third part more water than ordinary pumps, and works so easily that even a child can pump without fatigue. It is in this way the greatest labor-saving pump now offered to the public.

Fifth, IT IS INVALUABLE.—For a well pump it is invaluable, as all the iron which is submerged consists of but three small pieces, and these galvanized. It can be very cheap, consequently it brings up pure water at every stroke.

Sixth, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to last in use for years. No repairs at all are needed. It is very light, and thus the cost of transportation is very small.

☞ Manufactured by S. VANCE & CO., No. 31 Liberty Street, Newburyport, and for sale in Portsmouth by the Sole Agents for N. H.,

DR. WRIGHT'S REJUVENATING ELIXIR,

Or, Essence of Life,

Cures *General Debility, Weakness, Lassitude in Females, Palpitation of the Heart and all Nervous Diseases.* It removes now like vigor to the aged, causing the hot blood of youth to course the veins, restoring the *Organs of Generation, removing Impotency and this Elixir rejuvenes Debility, restoring Manliness to the system and full vigor, thus proving a perfect "Elixir of Love," removing Sterility* and Barrenness in both sexes. To the young, middle-aged, and aged, there has never been than this "Elixir of Life." It gives a new lease of life, causing the weak and debilitated to have renewed strength and vigor, and the entire system to thrill with joy and pleasure.

"As the Phenix rises from the ashes of its fire, animated with new life"—so does this Elixir rejuvenate the system and cure disease.

Price, one bottle $2; three bottles $5; sent by express to any address.

Our medicines are sold and recommended by all respectable druggists in every part of the civilized globe; some unprincipled traders, however, try to deceive their customers by selling cheap and worthless compounds in order to make money. Be not deceived—ask for these medicines and take no others. If the druggist does not keep them, write to us, and we will send them by express, carefully packed, free from observation. We will be pleased to receive letters with full statements in regard to any disease with which ladies or gentlemen are afflicted. Address all letters for medicines, pamphlets, or advice, to the sole proprietor,

RUM'S WORK.—The "Battle Axe," a paper published by the Sons of Temperance in Rockland, tells the following story of a convict just sent to the State Prison:

"This young man enlisted in the Union army in one of the New Hampshire regiments, as a private. By his good behaviour and bravery, he was promoted to the office of Captain, and at the close of the war was honorably discharged. Receiving quite a large sum of money as bounty and back pay, he had the misfortune to fall into bad company, got on a spree, hired a horse, sold him for one hundred and fifty dollars—not knowing what he was about—was arrested, tried, convicted and sentenced to prison for two years."

ROW AMONG THE DOCTORS.—At the January meeting of the New Jersey Medical Society, Dr. S. Wickes of Orange submitted a report in which he was particularly severe upon all female practitioners, asserting that they were "nearly all of them of the class known as spiritualists, progressive Bloomer kind, and infidels." Amongst the adherents to the different forms of "quackery" were mentioned forty-three practicing homeopathic physicians. As there is in the doctor's own town a female who graduated in a regular allopathic school in Pennsylvania, though now a thorough homeopath, with the best practice in the place, a good deal of excitement has been created in Orange, where a public meeting is to be held and the doctors are to discuss the matter.

— An intoxicated man applied for lodgings at a house on the road leading from East Medway to Medway village on Saturday night, and was refused admittance in consequence of his condition. In the morning he was found frozen to death a few feet from the door, with an empty bottle in his pocket.

— A dispatch from Charleston, S. C., says that the steamer General Hooker, while on her way from Charleston to Georgetown, when off Sullivan's Island, last Wednesday morning, took fire in her woodroom. She was run ashore, but was entirely destroyed. Three men and two ladies were drowned, including Miss Bush, who had just come from school at the North.

VINELAND
FARM AND FRUIT LANDS,
In a mild and healthful climate. Thirty miles *south* of Philadelphia by Railroad, in New Jersey, in the same line of latitude as Baltimore, Md.
The soil is rich and *productive*, varying from a clay to a sandy loam, suitable for Wheat, Grass Corn, Tobacco, Fruit and Vegetables. This is a *great fruit country*. Five hundred Vineyards and Orchards have been planted out by experienced fruit-growers. Grapes, Peaches, &c., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, covering of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste*. It has increased five thousand people within the past three years. Churches, Stores, Schools, Academies, Societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are constantly settling. Hundreds of new houses are being constructed. Price of Farm land, twenty acre lots and upward, $25 per acre. Five and ten acre and Village lots for sale.
Fruits and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Yards, Manufactories, Foundries, Stores and the like; and Steam Power, with room, can be rented.
For persons who desire solid comfort, a healthful climate, and a good soil, in a country beautifully improved, abounding in fruits, and possessing all other social privileges, in the heart of civilization, it is worthy of a visit.
Letters answered, and the Vineland Rural, a paper giving full information, and containing Reports of Solon Robinson, sent to applicants.
Address CHAS. K. LANDIS, Vineland P. O., Landis Township, *New Jersey*.
From Report of Solon Robinson, Agriculture-Editor of The Tribune: *It is one of the most extensive fertile tracts, in an almost level position and suitable condition, for planting that we know of this side of the Western Prairies.*

LEGAL DECISION.—A Concord dispatch says:—

In a suit recently brought by the Concord Railroad against James P. Eaton of Manchester, a late conductor on that line, the defendant was summoned by the plaintiff to give his deposition—but declining to answer interrogatories designed to elicit information as to the amount of his property when he entered the service of the road, and when he left it, an attachment was issued against him for contempt. Upon an application to the Supreme Court, at a law term held in this city the past week, it was decided that said conductor was bound to answer those questions which he had refused to reply to—could not excuse himself upon the ground that it would disclose the names of his witnesses or the manner in which he proposed to prove his own case. It was further decided that the defendant was justified in declining to answer questions as to fares received by him, and alleged to be unaccounted for, upon the ground that the answers would tend to criminate himself. This decision is one of great importance, as it was a test question involved in the approaching trial of the discharged conductors of the Concord Railroad.

GOV. ANDREW TO SENATOR STUART. Ex-Gov. Andrew has written a letter to Senator Stuart, declaring his hearty sympathy with the general design and plan of the Senator's resolutions, and calling his attention to the Governor's valedictory address, in which similar views to those embraced in the resolutions are expressed. In closing, the Governor says:

It seems plain to me that the colored men must be invested with the rights, both political and civil, which pertain to citizenship, according to laws which shall impart political powers according to capacity and desert, and not according to descent or the accidents of birth, or else they must be exterminated. I think that the former rebels must be reinstated in their political rights, or they must be exterminated. I think, also, that the same body of voters in each State who carried it out into rebellion must bring it back again into loyalty. Any other "reconstruction" is dangerous and delusive.

☞ The Massachusetts Liquor Laws are sustained by the U. S. Courts. A Washington dispatch of Monday says: "The Supreme Court has decided the Massachusetts liquor cases. The Court holds that the licenses granted by the United States, under the Internal Revenue laws, for the sale by wholesale of liquors held by citizens of Massachusetts, do not protect men in the sale or keeping for sale of liquors within said State, in view of the prohibitory laws of the State of Massachusetts. The Supreme Court affirms the decision of the Court below.

On Wednesday Mr. Richardson of Boston is to make an argument before the Committee on Ways and Means, in favor of making licenses a protection for the sales of spiritous liquors, instead of permission as just decided by the Supreme Court of the United States."

THE INCOME TAX.—It is reported that the Ways and Means Committee have agreed to continue the exemption of tax on income at six hundred dollars, adding fifty dollars to the exemption for every child in a family, up to fifteen years of age.

— At a great dinner given on St. Patrick's Day at Charleston, S. C., a Mr. Thomas Ryan offered for a toast—"The memory of Preston Brooks."

That's right! We keep his memory, as the half-drunken champion of a miserably drunken and debauched uncle, and of a wretched and ruinous institution. The champion was eminently worthy of the cause; and the memory of both will in a few years rot.

THE CONCORD BANK ROBBER.—The Waltham Sentinel says: "We learn that but a few days since Moore was married to a lady in Cochituate, or near by, and is now 'spreading himself' with his span of nice horses."

GOLD, Monday, 125 3-8.

—Hiram Powers, the sculptor, is a Swedenborgian, and proposes to execute a statue of Swedenborg. In a recently published letter he says: "I am a 'New Churchman,' a Swedenborgian' — a 'New Jerusalemite,' without any reservation whatever; and I wish it to be known."

— The Mississippi has cut a channel through Terrapin Neck, in the vicinity of Vicksburg, thus shortening the river about fifteen miles. This is damaging to the plantations below, but agreeable to steamboatmen.

— In New York, on Friday, a robbery of bonds took place. A thief entered the residence of John P. Moore, No. 110 Madison avenue, and stole a box containing bonds of the value of $100,000.

— A widow out West married a man to whom she refused her daughter, because, she said, her first husband was an ugly "critter," and she had learned how to manage such cattle. Kind mother.

Correspondence of the Chronicle

Extra Town Meeting—Financial Affairs, &c.

RYE, March 26.

Mr. Editor;—Two questions are now agitating the public mind in this vicinity, viz: the disposal of the Town Farm, and the building of a new Town Hall. At the recent annual election the Selectmen were instructed by an almost unanimous vote to call another Town meeting for the legal consideration of the above subjects. The Selectmen have accordingly posted up their warrant and called the meeting for next Saturday. It will be holden at Squire Parsons' Store, the reason for which eccentric proceeding being a difference of opinion between the town and Orthodox Society as to the value of that nasty old coop called the Vestry. Heretofore the town authorities have annually paid the society $15 for the use of the Vestry two-half days for the purpose of holding town meetings therein, and for the extra privilege of holding a Caucus an evening or two before election.

This was generally believed to be a sufficient compensation for a few hours' occupation of a cellar so dirty and mean that even the rats were ashamed of it. This year however, funds are low; the society was hungry, and like Oliver Twist they wanted more, so they modestly concluded to advance the cellar rent 66 2-3 per cent., and handed in a bill of $25, which the town voted unanimously not to pay, and also authorized the Selectmen to call the pending meeting at some other place, unless, previous to the call the society should vote to accept the usual $15. We presume that everybody is willing to pay a fair price for the room, bad as it is, until we can get a better—but $25 will appear a trifle "steep" to any one who is familiar with the locality. All the Town meetings ever held in it never damaged it any more (nor made half the noise) than did the great Snatch and Grabbage Society's religious carousal two evenings the past winter.

In a local point of view the coming meeting is one of the most important ever held in town; and the questions are such as ought not to be disposed of without proper discussion. The Town farm was purchased with the town's share of the surplus U. S. Revenue divided among the States many years ago, and is located in the eastern portion of the town on the road leading from Rye Centre to Portsmouth by the way of Sagamore Bridge. For the past few years the farm has been a heavy bill of expense to the town. In former years it was nearly self-supporting, when there were a considerable number of paupers, but recently the paupers have steadily diminished and the expenses have as steadily increased; and people begin to regard it as an intolerable nuisance that ought to be severely remedied or wholly suppressed. There *appears* to be a majority in favor of selling the farm, but the meeting *may* develope an unexpected array of the advocates of old fogy principles. Should the town vote to sell the farm, it will probably be sold at auction, and the proceeds applied for the liquidation of the town debt—or the building or purchase of a Town Hall. In this connection it is rumored that the Methodist Society are willing to sell their meeting-house. If such is the case, and the building is offered at a fair rate, the town would do well to purchase it. The town debt at present is a little more than $13,000. We cannot give the exact figures, as the Selectmen's accounts for the financial year ending March 2, 1866, are not yet printed—owing to the neglect of the people to provide for the same the year previous. This year money was appropriated to print the accounts of the past year and also of the year to come. The delinquent documents will probably make their appearance in a few days. Last year the amount of money raised was $13,000, which paid all the ordinary town expenses, and reduced the town debt some $7000 or $8000. That sum was double the amount ever raised before, and the taxes in some quarters were extremely burdensome. This year the amount raised is only $5000, which is insufficient to cover expenses, and will result in an increase of the town's indebtedness. The advocates of light taxes and increasing debt, for the present year, base their reasons for their action upon the supposition that sometime or other in the indefinite future, the Government Bonds may become taxable, and the tax accruing therefrom may help liquidate the outstanding debt. Very good. *When* will they become taxable? If we had any precise means of knowing, we might base our calculations with some degree of accuracy. Personally the writer of this article is in favor of such taxation, for there is no justice in the poor man's paying the millionaires' taxes, but we regard it as a poor specimen of financiering to pay seven per cent. interest with the questionable possibility of obtaining, nobody knows when, one or two per cent. tax on somebody's Bonds. In a town like ours we suppose that it is all right to hoot down anybody who makes a civil inquiry concerning our town indebtedness; but all the noise made don't wipe out one little fact that the majority of the Government Bonds are held in democratic hands, or that nearly every monied democrat has a part or whole of his surplus "spelter" invested in Government paper. People sometimes in crowding their opponents unwillingly tread upon the toes of their friends.

The story that has gone the rounds of the press, about Commodore Vanderbilt's building stables at Rye Beach the coming season, may be regarded as a little premature. Perhaps he may come here, but it is not so understood by the proprietor of the house where he was to take up his abode.

The prospect for business was never better than it is now. Yours truly, BUGGINS.

NEW HAMPSHIRE ITEMS.

—— The house of John M. Griffin, in Epsom, was destroyed by fire Thursday noon. Insured for $1200.

—— Harvey Rice, of Concord, has been appointed Superintendent of the Ogdensburg Railroad, vice George V. Hoyle, resigned.

—— The dry goods and grocery store of Messrs. Whipple & Atwood, New Boston, was destroyed by fire on the night of the 19th. Loss $6600; insured for $3000.

—— The Concord Statesman is gratified to be able to announce that ex-Gov. Colby, who a few weeks since sustained such bodily injury as to make necessary the amputation of the lower portion of one of his legs, is thought to be out of danger.

—— Kendall C. Scott, Esq., for a number of years editor and proprietor of the Peterborough Transcript, has disposed of his interest in that paper to Messrs. Farnum & Scott. Peterborough (sensible in this) sees the importance of supporting a local newspaper.

—— The Claremont Eagle learns that on Tuesday last an agent of the Vermont Central Railroad took out a search warrant, and placing it in the hands of Sheriff Bradley of Claremont, proceeded to inspect the contents of a dwelling-house on the River-road in Cornish, where was exhumed some $700 or $800 worth of goods, supposed to have been stolen from the cars or depots of said road.

—— Mrs. Abigail Sanborn, wife of Capt. John Sanborn, died in East Kingston Feb. 6th, aged 87 years. She was the mother of twelve children, all, with one exception, living to adult age. The nine surviving children, with her partner, in his 90th year, attended the funeral. There were living at the time of her decease 41 grandchildren and 27 great-grandchildren. This aged couple resided in the same house 67 and a half years.

—— The Nashua Telegraph learns that Hon. Leonard Chase of Milford, and Larkin D. Mason, Esq., of Tamworth, have gone to Winchester, Va., to superintend the erection of a monument commemorative of the men of the 14th Regiment, who were killed and mortally wounded in the battle of Winchester. It is to be erected on the spot where the lamented Col. Gardner fell, mortally wounded. It is a granite shaft, and contains the names of those who fell, some fifty in number.

PUBLISHERS AND PAPER.—It is reported that Messrs. Harper & Bros. have ordered a whole shipload of white paper from Belgium. Ticknor & Fields, of Boston, have ordered 5000 reams in London.—It has been estimated that at present prices good book and news paper can be delivered in New York, all duties and expenses included, at three-quarters the price of American paper of the same grade. Another estimate makes the difference in favor of "foreign paper ten per cent. instead of twenty-five per cent." It is certainly demonstrated that paper can be imported at cheaper rates than our paper-makers are demanding. Mr. Bennett, of the "New York Herald," told us that he was importing good news-paper at fifteen cents per pound, whereas the American paper makers were charging twenty cents for the same quality.—*Publishers' Circular.*

— A Washington dispatch says that Lieut. Gen. Grant will shortly sail for Europe, and the Navy Department is now looking up a vessel for his accommodation. Capt. Ammen, an old school-master of the General's, and now of the iron-clad Miantonoma, is to be transferred to the man-of-war that conveys the military chieftain across the ocean.

— In New York, on the 23d, in the U. S. District Court, Judge Betts pronounced an elaborate judgment, in which he declared the application of the owners of the Meteor steamship for bonding of that vessel should be refused. The Meteor was seized as an alleged intended Chilian privateer.

— The Memphis Argus says there are not less than 12,000 "Confederate" dead on the battle-fields of Corinth and Shiloh, whose bones for the most lie bleaching above ground, not having been properly interred. The Federal dead are not exposed, and there are head-boards for each soldier.

SYMPATHY.—Sympathy is a lovely and beautiful thing, for it exhibits the angelic part of human nature. We deeply sympathize with those who cannot obtain Herrick Allen's Gold Medal Saleratus, for they are deprived of one of the greatest luxuries the world affords. But we have no sympathy with any family who will use any other Saleratus or soda, if this article can be purchased. We see most of our Merchants have it. One trial will convince any one. Their depot is 112 Liberty street, New York. 63

WHICH IS THE

Leading Life Insurance Comp'y

IN THE UNITED STATES?

Which is the Safest and the Cheapest?

The following figures are from the later Reports of the New York Insurance Commissioner, showing the "amount of business" of the

MUTUAL BENEFIT

LIFE INSURANCE COMPANY,

to be the *largest*, the "expenses of management" the *smallest*, the "ratio of Assets to Liabilities," or the *security* furnished to its members, the *largest* of any like institution in the country.

Premiums received in 1864.....$3,089,072
" " " 1865.....3,629,987
Ratio of expenses to premiums rec'd in '64..12.96
" " " " " '65..12.16
Ratio of assets to liabilities, Jan. 1, 1865....151.85

The inevitable conclusion from these official facts, is that the

MUTUAL BENEFIT LIFE

Insurance Company

IS THE BEST AND THE CHEAPEST.

Because its NET ASSETS are proportionably LARGER than those of any other Life Insurance Company in the United States.

Because its "Managing Expenses" are LESS, and it has a LARGER SURPLUS to divide among its members than any Company in the United States.

QUERY. Will some one inform the public of that mysterious process by which a Company with a surplus proportionably *much less*, and expenses *very much larger* than another, can yet divide *more* to its members, and insure them at *less cost?* How is it done? Where does the money come from?

Every intelligent man will see at once that it *cannot be done*. Yet we have Agents among us that make this their boast.

Any one disposed or intending to insure can be furnished with the requisite information by applying to

Cleanse the Blood.

With corrupt, disordered or vitiated Blood, you are sick all over. It may burst out in Pimples, or Sores, or in some active disease, or it may merely keep you listless, depressed and good for nothing. But you cannot have good health while your blood is impure. AYER'S SARSAPARILLA purges out these impurities and stimulates the organs of life into vigorous action, restoring the health and expelling disease. Hence it rapidly cures a variety of complaints which are caused by impurity of the blood, such as Scrofula, or King's Evil, Tumors, Ulcers, Sores, Eruptions, Pimples, Biotches, Boils, St. Anthony's Fire, Rose or Erysipelas, Tetter or Salt Rheum, Scald Head, Ring Worm, Cancer or Cancerous Tumors, Sore Eyes, Female Diseases, such as Retention, Irregularity, Suppression, Whites, Sterility, also Syphilis or Venereal Diseases, Liver Complaints, and Heart Diseases. Try AYER'S SARSAPARILLA, and see for yourself the surprising activity with which it cleanses the blood and cures these disorders.

During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsaparilla, but often no curative properties whatever. Hence, disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the name itself has become synonomous with impositions and cheat. Still we call this compound "Sarsaparilla," and intend to supply such a remedy as shall rescue the name from the load of obloquy which rests upon it.—We think we have ground for believing it has virtues which are irresistible by the ordinary run of the disease it is intended to cure. We can only assure the sick, that we offer them the best alterative which we know how to produce, and we have reason to believe it is by far the most effectual purifier of the blood yet discovered by any body.

AYER'S CHERRY PECTORAL is so universally known to surpass every other remedy for the cure of Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease, that it is useless here to recount the evidence of its virtues. The world knows them.

Perry's Moth and Freckle Lotion.

☞ Chloasma, or Mothpatch, (also called Liverspot,) and Lentigo, or Freckles, are often very annoying, particularly to ladies of light complexion, for the discolored spots show more plainly on the face of a blonde than of a brunette; but they impair neither the beauty of either sex, nor the preparation that will effectually remove them, *without injuring the texture or color of the skin*, is certainly a desideratum. DR. B. C. PERRY, who has made diseases of the skin a specialty, has discovered a remedy for these discolorations, which is at once prompt, infallible and harmless.

Prepared by B. C. PERRY, Dermatologist, No. 49 Bond Street, New York, and for sale by all druggists; price 82 per bottle. Call for PERRY'S MOTH & FRECKLE LOTION. Sold by all Druggists in Portsmouth and elsewhere. lysnday—oct19

Local.

POLICE COURT, March 26.—The Court Room was pretty well filled with spectators, in anticipation of the trial of Dick Townsend, the hero of Noble's Island notoriety. J. S. H. Frink, Esq., attorney for the complainant in this trial, moved for a continuance until next Thursday, the 29th; the defense making no objection, the continuance was granted.

Mrs. Almira Robinson, better known as "Aunty Robinson," was next called, on a complaint for keeping a disorderly house on a wharf in the *purlieus* of Water street. At the request of the defendant, her case was continued until Thursday at 10 o'clock.

Wm. H. Hardy next "stood up," and plead guilty to having been found in Hunking street on Saturday night, loaded with liquid delirium. Hardy went on the principle that if evil cannot wholly be eradicated, it ought to be confined to particular objects, and he made himself a particular object. Judge Odell prescribed "House of Correction taken every day for thirty days," as an eradicative. The Judge's medicine extirpates bad habits, vices and abuses. Office at City Marshal's.

☞ The Life Insurance Companies, through their various Agents in this city, are urging their respective claims to patronage, in our columns, in various ways, of late. All the agents have good "reasons to offer for the faith which is in them," each in his own Company—Harvey & Son for the Charter Oak, and Henry A. Yeaton for the Mutual Benefit, now, and Mr. Bartlett recently spoke loudly for the Mutual Life, and Mr. Loomis had his say for the new Continental. We have for several years had policies and other business with the Charter Oak, and regard it staunch as its namesake—though of course it is not the *only* good Co.

☞ Gloucester is to have a new fifty-thousand dollar ($50,000) Town Hall. Yes, everybody can afford a new Hall, except Portsmouth. How came we so much poorer, or so much more in debt, than all other places? We don't believe it is so.

☞ Rehearsal of the Philharmonic Society on Wednesday evening at half-past 7, for their Fast Night Concert; and the prompt attendance of every member is desired.

NAVAL.—Lieut. Comr. Thomas C. Harris has been detached from the command of the Yantic, and ordered North.

☞ Good sleighing in Portsmouth and vicinity, Monday, March 26.

Communication.

One way to make ourselves happy on a gloomy, dull morning, after a snow storm, at this season of the year, is this: Many of our little feathered songsters come from the South while we are yet visited with cold storms, and gather about our dwellings in anticipation of finding food. On Sunday I strewed a handful of Indian meal down by the door and windows in my back yard, and next morning I had the yard literally alive with little birds; and after they had satisfied the cravings of nature, they would sport and play about the yard for hours together. Although they seemed something like the Children of Israel for the present, and gave us no songs; yet they will, in the proper time, pay us a hundred fold with their sweet music—in a few weeks at farthest.

It is utterly impossible for one to be gloomy or dull in their sweet company—and besides, they will be sure to remember us when the warm, pleasant weather comes; and then you will be sure to have them about your house, early in the morning, seeming to vie with each other as to which can sound the highest note. Feed the birds. R.

CHARTER OAK LIFE INSURANCE COMPANY.—We see by the last annual report of the Massachusetts Commissioner, that this old and well-known institution still maintains its position as one of the most prosperous and reliable in the country. The *ratio of expenditures* (including death-claims,) to receipts *is less than any other company.* This is a subject of importance to our people, for applications for over one quarter of a million dollars of insurance, have been sent from this city the past winter to this Company, and we doubt if any will have occasion to regret the investment.

The Charter Oak, we are told, is the only Life Insurance Company that guarantees and pays a consecutive annual dividend. Their excellent class of risks, and judicious management, coupled with their low rates of mortality, and equitable system of paying dividends, renders a policy in this company, (so it claims,) cheaper and preferable to any other. Before insuring, call on John S. Harvey & Son for books and rates. daw 1t

— The Memphis Argus states that there are not less than 12,000 "Confederate" dead on the battlefields of Corinth and Shiloh, whose bones for the most part lie bleaching above ground, not having been properly interred. The Federal dead are not exposed, and there are head-boards for each soldier.

From the Rochester Courier.

THE CONCERT of the Portsmouth Philharmonic Society at Dover, on Tuesday evening, drew out one of the largest and most intelligent audiences we have seen gathered for a long while. Prof. W. K. Day acted as musical director. The programme furnished was a good one, and the various pieces were most creditably rendered,—especially was that the case of the glee "Daughter of Error," with the obligato solo by Miss Miller, the trio and chorus from "The Creation," the quartette "Agnus Dei," the glee "Now Tramp o'er Moss and Fell," and several of the choruses. Miss Susie Foster was the principal solo, and she sang beautifully.

One of the pieces was most barbarously marred by the abrupt appearance of the hall janitor, who seemed to take particular pains in parading himself about the aisles in a new pair of boots just at that juncture, with evident clamorous designs upon all the windows and blinds in the building.

The party numbered upwards of seventy-five, embracing many of the first ladies and gentlemen of Portsmouth. After the concert they partook of a supper at the American House. They came by special train, and returned after the supper, no doubt being greatly pleased with the excursion.

Important.

DR. STEVENS, No 5 Daniel Street, would give notice that he has REDUCED the price of Performance of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.
He would also give notice that he is doing a new style of work on Under-cut of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite base, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the Teeth. mh12

FIRST ASSISTANT in the Office of DR. STEVENS, No. 5 DANIEL STREET.
DR. WEED can be found at his place of business at all hours of the day and night, for the performance of any of the operations that come within the call of his profession.

Dr. A. P. STEVENS, No. 5 Daniel St., makes the saving of ULCERATED and painful front teeth, a specialty in his business. He also successfully restores to their natural shape broken or badly decayed teeth, by building out corners and sides with PURE GOLD. (In many cases teeth so restored are as strong as any of their brother members, and in all cases are rendered eminently useful for a long series of years.) DISEASED TEETH, in all stages, treated, and in a very large majority of cases entire success attained.
Charges for such operations necessarily high, but nothing in comparison to the value of the Teeth. mch14

DENTAL NOTICE!

No. 60 Congress Street.

Having adopted the C. O. D. system of doing business, **Dr. C. H. He also keeps a fresh supply of PURE NITROUS OXYDE GAS to answer the numerous calls for this popular anæsthetic; and administers it with PERFECT SAFETY, when desirable.
All other operations in Dentistry performed at reasonable remuneration. mch14

Valuable Real Estate
AT AUCTION.
(By virtue of a license from the Hon. Judge of Probate for the County of Rockingham.)
On TUESDAY, April 17, at 12 o'clk M.,
on the premises.
The Real Estate of the late CHARLES W. WALKER, of Portsmouth, deceased. Said property will be sold in three separate lots or parcels, viz:
The First Lot to consist of the well known MARKET STREET HOUSE, situated on the corner of Market and Green streets, with land connected therewith, bounded 60½ feet more or less on Market street, 108 feet more or less on Green street, 106 feet more or less by Lot No. 2, 107 feet more or less by land formerly of James Pickering, land of James Junkins and others; the lot containing 6823 feet, more or less.
The Second Lot consists of land on Green street bounded 38 feet more or less on Green street, 110 feet more or less by land of Estate of George Chesley, 36 feet more or less by land formerly of James Pickering and others, and 106 feet more or less by lot No. 1; the whole lot containing 3926 feet, more or less.
The Third Lot to consist of the Stable lot, so called, on Green street, with the stable and Office building thereon. The lot is bounded southerly about 25 feet on said Green street, easterly about 72 feet on land of E. S. Wendell, northerly about 50 feet on Railroad land, and westerly by Railroad land and adjoining cemetery; containing about 2710 feet. The Stable is 38 by 56 feet, and the Office-building 10 by 10 feet.
The above offers a rare chance for capitalists or others. The property is prominently situated on one of the main avenues of the city. The "MARKET STREET HOUSE" is large and well calculated, conveniently situated for a Hotel or large Boarding House, and has been occupied as such for many years. It contains 50 rooms and attic, and also a Store. The Stable has been used, and is a good location for a Livery Stable.
If desirable, a portion of the purchase money can remain on a mortgage of the premises.
For further particulars inquire of J. M. EDMONDS, Portsmouth; C. W. SYMMON, Kittery, Me., Guardian of the minor heirs, or of the subscriber. JOSEPH P. MORSE.

DR. J. W. CHANNING,
—THE GREAT—
Cancer, Humor and Tumor Doctor,

Formerly of Boston, and now of New Bedford, has arrived in PORTSMOUTH, and taken Rooms at the CITY HOTEL, where he will remain till April 2d, or longer, if patients under treatment require it.
Dr. C. gives particular attention to the cure of CANCERS, which he cures without pain and without the use of the knife.—Do not say you cannot get any relief until you have tried his medicines, which will remove all humors, such as Cancers, Scrofula, Abscesses, White Swelling Affections, Erysipelas, Salt Rheum, Inflammatory, Chronic, Mercurial and Syphilitic Rheumatism; Fever Sores, old and stubborn Ulcers and Sores of all kinds cured, whatever may have been the cause that produced them.
Dr. C. will give examinations and advice free on all diseases. Invalids of both sexes are respectfully invited to call and consult the Doctor.
N. B.—Certificates of cures may be had of him from all parts of the country. m22—dawtu3

Morning Chronicle.

GEN. GRANT'S POSITION.—The Galena (Ill.) Gazette, published at the home of Gen. Grant, says of him, at the close of a carefully written article:

"We know all his hopes and sympathies are with the great and patriotic Union party of this country. In feeling and sentiment he is thoroughly identified with the millions of loyal people who in the long years of war, carnage and blood, gave their hearts, their blood and their treasures to their country. He has neither sympathy nor toleration for any party, nor any set of men, who were against the country in its terrible time of trial and peril, through which it has safely passed.

WOMEN'S WAGES.—The Richmond Republic is exceedingly indignant that the ladies of that city, after parting with jewelry, clothing, &c., in order to buy bread, should now be forced to labor fifteen hours a day to earn thirty or forty cents. It adds: "If the ladies will furnish us with the names of these ghouls, and a list of the prices they pay, we promise to so brand them with their infamy that they shall be known and despised throughout this land."

[Is it not a dreadful thing, that "ladies" should have to work at all?]

GOOD NEWS FOR COAL CONSUMERS.—The Pennsylvania Legislature has chartered the Merchants' and Consumers' Anthracite Railroad Company, a rival to the Reading Railroad. The charter forbids a greater charge for transportation than two and a half cents per mile, and this reduction will insure to every consumer coal at prices much more acceptable than those they are now compelled to pay. It is said that no difficulty will be experienced in selling the stock and building the road.

— The death of a German veteran who served under the great Frederick in the seven years' war, is announced. He died at the respectable age of one hundred and twenty, at the hamlet of Slaude, in Upper Silesia. His name was Laurence Halacz.

AMERICAN AND FOREIGN PATENTS.

R. H. EDDY,

Solicitor of Patents,

Late Agent of the U. S. Patent Office, Washington, under the Act of 1857,

78 State Street, opposite Kilby Street, BOSTON.

After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Reissues, Extensions, Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.

The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions, unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The Testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.

The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.

These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.

All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.

TESTIMONIALS.

"I regard Mr. Eddy as one of the *most capable* and *successful* practitioners with whom I have had official intercourse."

CHARLES MASON,
Commissioner of Patents.

"I have no hesitation in assuring inventors that they cannot employ a person *more competent* and *trustworthy*, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office."

EDMUND BURKE,
Late Commissioner of Patents

Mr. R. H. Eddy has made for me FIFTEEN applications, on all but ONE of which patents have been granted, and that is *now pending*. Such unmistakeble proof of great talent and ability on his part leads me to recommend *all* inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."

JOHN TAGGART

During eight months, the subscriber, in course of his large practice, made on twice rejected applications SIXTEEN APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents.

SUFFERERS

From Dyspepsia

READ! REFLECT!! ACT!!!

TARRANT & CO

Gentlemen. I am a resident of Curacoa, and have often been disposed to write to you concerning the real value of your SELTZER APERIENT. My indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.

For four or five years my wife has been sadly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Cabialis, of Venezuela, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.

I feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.

Trusting that you will give this publicity, and repeating my earnest gratitude and thanks,

I am very respectfully yours,
S. D. C. HENRIQUER,
Merchant, Curacoa, S. A.

New York, June 28th, 1865.

WE ASK

The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of

Dyspepsia, Heartburn, Sour Stomach, Sick Headache, Dizziness, Indigestion, Piles, Costiveness, Bilious Attacks, Liver Complaints, Rhematic Affections, &c.

Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your Physician.

FERRIS & CAYWOOD, Proprietors.

We call the attention of our customers and the public to our stock of GRAPE VINES, which is larger than ever before. Having had over twenty years' experience in the management of Vineyards and the propagation of Vines, and our present stock having been grown from bearing wood with constant care during the season, we think they will compare favorably with any others that are offered for sale.

Our stock of MONTGOMERY VINES is very large. This variety not being generally known, we will give a brief description: While, a seedling of the White Chasselas, an unparalled grower and bearer, clusters often weighing two pounds, with a mild subacid flavor. It is classed with the hardy grapes, but we protect it in winter as we do all other varieties in this part of the State.

—DEALERS IN—

S. Vance's Submerged Well PUMP.

This unsurpassable invention, now being first introduced, will, it is believed, supercede all other Well Pumps now in use.

ITS ADVANTAGES.

FIRST, SIMPLICITY.—This Pump is composed of but three parts, and is so simple in its construction that any one can easily put it together.

SECOND, DURABILITY.—Its peculiar construction, and the fact that it is always submerged combines to make it the most durable of all Pumps yet invented.

THIRD, NEVER FREEZES.—The valves are so constructed that when not in motion, they allow all the water above to pass down into the well, and thus prevent freezing

FOURTH, POWER.—For the amount of power applied, this Pump excels anything else. It throws one third part more water than ordinary pumps, and works so easily that even a child can pump without fatigue It is in this way the greatest labor-saving pump now offered to the public.

FIFTH, IT IS INVALUABLE.—For a well pump it is invaluable, as it works well when is submerged consists of but three small pieces, and these galvanized. It can in no way corrode, consequently it brings up pure water at every stroke.

SIXTH, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to keep in use for years. No repairs at all are needed. It is very light, and thus the cost of transportation is very small.

NEW ENGLAND SOLDIERS' RELIEF ASSOCIATION OF NEW YORK.—The Superintendent, Frank E. Howe, Esq., has issued the final report of the operations of the New England Soldiers' Relief Association, established in New York in April, 1862, by sons of New England resident there, for the purpose of relieving the wants of soldiers going to and returning from war, whether in sickness or health. The report shows that the association accomplished a vast amount of good in caring for the brave defenders of the Union. The soldiers of every State in Union were the recipients of its bounty and benevolence. From the records it appears that from April 9, 1862, to Sept. 1, 1865, the Association received, registered, lodged, fed, aided and clothed sick, wounded and disabled soldiers to the number of 86,073, of whom 50,618 were from New England. There were cared for in ospitals 91,609 soldiers, of whom 24,146 were from New England. The number of soldiers and regiments received and cared for in their passage to the war was 278,496, all from Massachusetts, New Hampshire, Vermont and Maine. The number of returning soldiers entertained was 34,383. This shows a total of 490,661, or nearly half a million of men who were benefited by this noble organization. The amount of money expended in their behalf was $69,518.

THE MORMONS.—The Salt Lake Vedette says:

We have information from good authority that Brigham Young recently announced, in grand council, his unalterable determination to stand or fall by polygamy. It was ordered that all church officials should forthwith be instructed to promulgate this fact, and urge by every means the entrance in plurality at once of all persons who desired to hold good standing in the church. Immediate compliance was to be required, and those who failed or refused were to be informed that the church disowned them—all must become polygamists or be no longer recognized as among the faithful; they must do this for the sake of Brigham or they were not with him.

— A supposed corpse while being shaved in the Norwalk, Conn., revived, got up and dressed itself, and ordered the postponement of his funeral.

THE LIGHT OF THE WORLD.

DR. MAGGIEL'S
PILLS AND SALVE

These Life-giving remedies are now, for the first time, given publicly to the world. For over a quarter of a century of private practice the ingredients in these

Life-giving Pills!

Have been used with the greatest success. Their mission is not only to prevent disease, but to cure. They search out the various maladies by which the patient is suffering, and re-invigorate the failing system. To the aged and infirm a few doses of these valuable PILLS will prove to be

A Very Fountain of Youth,

For in every case they add new life and vitality, and restore the wasting energies to their pristine state. To the young and middle aged, they will prove most invaluable, as a ready, specific, and sterling medicine. Here is a dream realized, that Ponce-de-Leon sought for three hundred years ago, and never found. He looked for a fountain that would restore the old to youth and make youth ever

AN ETERNAL SPRING!

It was left for this day and hour to realize the dream, and show, in one glorious fact, the magic that made it fair.

These Famous Remedies

Cannot stay the flight of years, but they can force back and hold aloof, diseases that might triumph over the aged and the young. Let none hesitate then, but seize the favorable opportunity that offers. When taken as prescribed—

FOR BILIOUS DISORDERS

Nothing can be more productive of cure than these Pills. Their almost magic influence is felt at once; and the usual concomitants of this most distressing disease are removed. These remedies are made from the purest

VEGETABLE COMPOUNDS.

They will not harm the most delicate female, and can be given with good effect in prescribed doses to the youngest babe.

For Cutaneous Disorders

And all eruptions of the skin, the SALVE is most invaluable. It does not heal externally alone, but penetrates with the most searching effects to the very root of the evil.

VINELAND
FARM AND FRUIT LANDS,
In a mild and healthful climate. Thirty miles *south* of Philadelphia by Railroad. In New Jersey, on the same line of latitude as Baltimore, Md.
The soil is rich and *productive*, varying from a clay to a sandy loam, suitable for Wheat, Grass, Corn, Tobacco, Fruits and Vegetables. This is a *great fruit country*. Five hundred Vineyards and Orchards have been planted out by experienced fruit-growers. Grapes, Peaches, Pears, &c., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste*. It has increased five thousand people within the past three years. Churches, Stores, Schools, Academies, Societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are constantly setting. Hundreds of new houses are being constructed. Price of Farm land, twenty acre lots and upward, $25 per acre. Five and ten acre and Village lots for sale.
Fruits and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Yards, Manufactories, Foundries, Stores and the like; see Chas. K. Landis's Vineland Rural.
For persons who desire mild winters, a healthful climate, and a good soil, in a country beautifully improved, abounding in fruits, and possessing all other social privileges, in the heart of civilization, it is worthy of a visit.
Letters answered, and the Vineland Rural, a paper giving full information, and containing Reports of Solon Robinson, sent to applicants.
Address CHAS. K. LANDIS, Vineland P. O., Landis Township, New Jersey.
From Report of Solon Robinson, Agriculturalist of The Tribune: *It is one of the most extensive fertile tracts, in an almost level position and suitable condition for pleasant farming that we know of this side of the Western Prairies.* nl—dawtm

WEDNESDAY, MARCH 28, 1866.

IMPORTANT DECISION.—We have received from the State Department, the "Opinion of the Justices of the Supreme Court of New Hampshire," relative to the Tax on Incomes, having special reference to the Incomes from U. S. Bonds. This opinion is signed by all the six Judges, and *is* conclusive, that such income cannot be taxed. We have seen in one paper an intimation that nothing better could be expected from a Republican source;—and this is *very true*; for similar decisions have been made in the U. S. Supreme Court, three times at least;—once in 1829, under Judge Marshall, as follows:

In Weston v. *the City Council of Charleston*, decided in 1829, and reported 2 Peters 448, it was decided that "a tax on stock of the United States, held by an individual citizen of a State, is a tax on the power to borrow money on the credit of the United States, and cannot be levied by or under the authority of a State consistently with the Constitution"—and the decision was put "on the broad ground that stock of the United States is not taxable in any shape or manner whatever."

The same question was considered again in the Supreme Court of the United States, in the recent case of the Bank of Commerce v. New York city, decided in March, 1863, and reported 2 Black 620. In that case it was decided "That stock of the United States is not subject to taxation under the laws of a State."

"That a State law for that purpose is unconstitutional, whether it imposes the tax on the United States stock *eo nomine*, or includes it in the aggregate of the tax-payer's property, to be valued like the rest at its worth."

"That a tax on the loans of the Federal Government is a restriction upon the constitutional power of the United States to borrow money; and if the States had such a right, being in its nature unlimited, it might be so used as to defeat the federal power altogether."

In this case, Nelson, Justice, delivered the unanimous opinion of the court, which then consisted of Taney Chief Justice, and Wayne, Catron, Nelson, Grier, Clifford, Swayne, Davis and Miller, Justices.

We have not room for the reasons for this decision,—but they are conclusive. A similar decision has been made since Judge Chase came upon the bench.

Our Judges close their opinion as follows:

The question whether a tax of twenty-five per cent. on income derived from notes, bonds, or other securities for loans to the United States, can be legally assessed under the Act of July 1, 1865, we find to be clearly decided by the Supreme Court of the United States, in the cases to which we have referred. We are bound and concluded by the authority of those decisions; and are not at liberty, if we were so disposed, to question their correctness.

We therefore certify our opinion to be, that the Act of July 1, 1865, entitled "An act for the Taxation of Incomes," in so far as it was the intention of the Legislature to impose a tax on income derived from bonds, or other securities given for loans of money to the United States, duly authorized by Congress, is in conflict with the Constitution of the United States, and void.

There are at the present time more black than white troops in the volunteer service of the United States. Of negro soldiers (privates), we have no less than 63,373, while the white volunteers now left number but 55,326 men. Orders have been issued for discharging 23,000 of the colored troops, which will leave us, after the reduction is effected, over 40,000 still in the service. Orders have been issued for discharging nearly 12,000 white soldiers of the volunteer service—leaving still 36,600 in service; but it is the latter we add the white troops of the regular army, we have a total white army remaining of 62,000 men, or 22,000 more whites than blacks. The great majority of our negro troops are in the States bordering on the Mississippi River, and some are in Texas. The Government never saw fit to concede the requests of those States for their removal, and there is less fault found with them now than formerly.—*Boston Herald.*

The last statement shows, that if "the government had acted as wisely in other respects, much trouble would have been spared. But we suppose our national guilt and folly have been so great and persistent, that the Judge of All the Earth does right in suffering "the Princes of Zoan to become fools." U. T.

☞ The total loss by the burning of Pike's Opera House, at Cincinnati, is $1,751,000. Of this amount there was some $297,000 insurance—$208,000 of which was in home offices and the balance in northern offices. The loss will therefore be $1,489,000. The three persons hurt are in a fair way of recovery, and it is satisfactorily ascertained that no one was killed. There is little doubt that the fire originated from an explosion of gas within the Opera House. A strong smell of gas was felt all over the auditorium during the performance immediately preceding the fire, which fact goes to fortify this assumption. It was understood that the building was fire-proof, but the contrary has been very conclusively established. From the very commencement of the fire there was not the least hope of saving the building, and efforts were consequently especially directed toward the prevention of a spreading of the flames. It is said that Mr. Pike will not rebuild the house.

Business—Railroads—Liquor Cases—Personal.

PORTLAND, ME., March 26.

Friend Miller:—Portland is connected somewhat in business relations with your city, and also socially. Many of your best and oldest families are related to the best and oldest here, and so a mutual interest exists to learn the doings of each city. Having become a resident of this beautiful and worthy municipality, we would ask now and then a brief space in your wide-awake, loyal and spicy paper, for the disclosure of such news of the day hereabouts which we may gather, as will be of special interest to old Strawberry Bank and vicinity. Thus much prefatory.

Since the return of peace, a large number of new enterprises have been started here, such as will increase the commerce and trade of the city, and give employment to large numbers of hands. A new Sugar House, owned by Lynch, Barker & Co. (senior member, the present M. C. for this District,), a new Sugar Refinery, new Shoe Factory, Portland Rolling Mills, &c., are among the prominent undertakings. All these give labor to a great many working-men, and create a necessity for houses. The latter are as scarce as blackberries at this season. Rents are high, and will yet be higher, thereby driving out of the city those whose labor is desirable, but who are too poor to own their own homes.

John J. Brown, Esq., a well known and esteemed citizen of this city, died suddenly of apoplexy on Wednesday morning, 21st inst, being out and apparently well the day before. He sat up reading till 11 P. M. Tuesday night, but soon complained of illness, and at 3 A. M. he was dead. We learn that Mr. B. was a native or formerly lived at Portsmouth. He was in years past Cashier of the old Exchange Bank, but of late has been a broker. He was 67 years of age, and was highly respected, and will be mourned by a large circle of friends.

The liquor question is a bone of contention here, as well as in New Hampshire and Massachusetts. The case of Solomon Elder came up before Judge Tapley a day or two since, and the demand of U. S. Marshal Clark for the said Elder, after serving notice on the Clerk of the Court and the jailor, (Elder being now in jail) was refused by the Sheriff, and afterwards the Sheriff was sustained by Judge T., who declared that the proceedings outside the Supreme Judicial Court of the State were not in order—thereby in substance agreeing with your Judge Doe of N. H. Undoubtedly, as Attorney General Speed declared, the United States does not intend to increase the revenue at the expense of morality; and the State has rights, though not of the "Southern kind."

Railroading is all the rage here. The Portland & Rochester R. R. is now being pushed ahead; and the managers expect a big investment of $200,000 or $300,000 from the city of Portland. Steamers for Boston are about to be put on at Bath, to connect with the Maine Central and Portland & Kennebec roads, and the stock of the Portland & Boston line has been increased. Great works in this direction are intended. Competition is the spice of business, and creates activity. Notwithstanding all this, the Portland, Saco & Portsmouth Road, under the excellent management of Francis Chase, Esq., Supt., will yet come square with the new movements; first, by the putting on of the Evening Express train to Boston, leaving here at 5 P. M., to connect with the trains for New York in said Boston. This is a grand idea, and also accommodates local travel of the larger places between Portland and New Hampshire.

By the way, we must say a word of the P. S. & P. conductors. No road has better. Our friend Payson Tucker, whose countenance is a beam of good nature and *bon homme*, and whose friends are legion, is a valuable attache of the road. Mr. Oliver L. Towle, of Portsmouth, every one knows as faithful, experienced and courteous. As for Joseph F. Mitchell, we are not so well acquainted with him as the others; but he is undoubtedly worthy, gentlemanly and deserving. We have been over the P. S. & P. "many times and times many," and we have to say, if any other road has better conductors, "let's see 'em." SANCHO.

FROM THE RIO GRANDE.—A Brownsville (Texas) letter of March 10 states that the dissensions among the Liberal chiefs in Mexico continued, and one of the disputes led to a fight between Cortinas and Canales, in which Cortinas was defeated and several of his men killed and captured.

The officers of the Emperor's army on the Rio Grande freely express the opinion that the French troops will not be withdrawn by Napoleon until Maximilian's empire is a fixed fact.

The regiments comprising the first separate brigade of white troops, so called, which has been on this frontier since its occupancy in June last, are to be mustered out of service. They are the 28th Illinois, 77th Ohio, 35th Wisconsin, and the 7th Vermont. It is expected that they will start for the North about the 20th. With their departure the border will be garrisoned by colored troops entirely, save the few regular batteries.

Local.

Communication.

LIFE ASSURANCE.—This great subject is beginning to be regarded everywhere as a matter of transcendent importance to the community, and well it may, involving as it does countless millions of investments and liabilities. Thousands who once thought it almost an immorality to secure to their families a sum of money payable at their death, are now acting on the principle that it is absolutely wrong not to do so. Yet more, it is beginning to be understood by the people—and to be managed with diminished cost and much greater safety by the institutions themselves.

The advertising colums of all our papers contain evidence of the great prosperity of several of the leading companies of the country, and first among them all stands the "Mutual Benefit Life Insurance Co." This Company now shows a much larger "ratio of assets to liabilities" than any other—and the only true method of obtaining the comparative standing of companies is by the ratios of assets to liabilities and expenses to income. The "Mutual Benefit" stands first in both these important points; its dividends are declared annually to its policy holders, and are as large as those of any company in the country.

Henry A. Yeaton, Esq. has recently been appointed Agent for this important company, and I notice by your columns that he is a believer in advertising. His many friends wish him success, the unfortunate accident at the Navy Yard which deprived him of a limb—precluding him from working at his trade. Our citizens will do well to patronize such a worthy young man, whose statements are more reliable than those made by travelling agents, unknown to our citizens. Patronize your own and be satisfied.

A FRIEND TO THE DESERVING.

☞ Among our old and honorable men, who, having done their share of hard work for many years, have laid it aside and lived on for serveral years more in cheerful and pleasant leisure, we name Mr. George Tetherly, now aged 88. Before the great fire of 1813, and low long before we know not, he was an assistant in the soap and candle manufactory of Mr. Frothingham. Some time after that event, which made great changes in business here, Mr. T. took a place of business himself, near the old stage stable in Washington street, where he carried on his work for about forty years we think, and until the weight of age admonished him to retire, when he passed his business over into the hands of Mr. Adams. In all these years Mr. T. was known and esteemed for his industry, honesty and integrity; and might indeed be proposed as a model in these qualities, to be safely copied by all young men beginning life, and going into active business.

☞ The attention of gossipers is called to a "Notice" in another column.

☞ Mr. Wendell sells a large variety of household goods at auction to-day.

— Our lady folks say, Oh, what a splendid soap that J Monroe Gold Medal is; it is a family casket, sparkling with useful lessons every time washing day comes it saves more than half the labor; it only takes about one-third in quantity and only costs about the same as other soaps, besides leaving the clothes in a much better condition than where other soap is used. Surely no lady should undertake to housekeep without it. 64

COMMERCIAL NURSERIES.

(ESTABLISHED 1830.)

A Card.

Having sold all my interest in the Real Estate and Nursery Stock known as the "ROCHESTER COMMERCIAL NURSERIES," to my late partner, WILLIAM S. LITTLE, Esq., I take this method of expressing the hope that the good will and patronage, which the public have so long shown towards these Nurseries, may now be extended to them under their present proprietor.

With ample resources, undiminished by the war, and unimpaired by losses, he is prepared to fill large orders, and to fill them well.

His extensive grounds, conveniently located, and consisting of varied and excellent soils, adapted to the growth of all varieties of Nursery Stock; his numerous bearing specimen trees, and his improved propagating houses, will be found well worth a visit from those wishing to purchase.

I hope and believe that the honorable position which these Nurseries have held in the public estimation, will be long maintained in the hands of the present owner. M. E. HOOKER.

Rochester, N. Y., Jan. 16, 1866.

Advertisement.

Referring to the Card of my late partner, Mr. HOOKER, I would respectfully ask our old friends and customers, and the public at large for their encouragement and continuance of their patronage, feeling confident that, with energy and a strict and faithful attention to the business, I can maintain the reputation of the "COMMERCIAL NURSERIES" in its former integrity.

I invite attention to my advertisements of Nursery Stock, and inspection of my catalogue, including the New Circular of Wholesale Prices for the Spring Trade. WILLIAM S. LITTLE.

COMMERCIAL NURSERIES,
Rochester, N. Y., March 1st, 1866.

Notwithstanding the unprecedented demand last fall for trees and plants of every description, I have still on hand a very large and full assortment of nursery stock.

I advertise the following as *specialties* this spring, viz:

Lyon's Periodical Drops!

THE GREAT FEMALE REMEDY FOR IRREGULARITIES.

These Drops are a scientifically compounded fluid preparation, and better than any Pills, Powders or Nostrums. Being liquid, their action is direct and positive, rendering them a reliable, speedy and certain specific for the cure of all obstructions and suppressions of nature. Their popularity is indicated by the fact that over thirty, 000 bottles are annually sold and consumed by the ladies of the United States, every one of whom speaks in the strongest terms of praise of their great merits. They are rapidly taxing the place of every other female Remedy, and are considered by the ladies of every nation, the surest, safest and most infallible preparation in the world, for the cure of all female complaints, arising from obstructions of nature, and for the promotion of health, regularity and strength. Explicit directions stating when they may be used, and explaining when and why they should not, nor could not be used without producing effects contrary to nature's chosen laws, will be found carefully folded around each bottle, with the written signature of JOHN L. LYON, without which none are genuine. **Price $1.50.**

Prepared by Dr. JOHN L. LYON, 193 Chapel Street, New Haven, Conn, who can be consulted either personally, or by mail, (enclosing stamp,) concerning all private diseases and female weaknesses. **Price $1.50 per bottle.**

Sold by Druggists everywhere.

Perry's Moth and Freckle Lotion.

☞ Chloasma, or Mothpatch, (also called Liver-spot,) and Lentigo, or Freckles, are often very annoying, particularly to ladies of light complexion, for the discolored spots show more plainly on the face of a blonde than of a brunette; but they greatly mar the beauty of either and any preparation that will effectually remove them, *without injuring the texture or color of the skin*, is certainly a desideratum. Dr. B. C. PERRY, who has made diseases of the skin a specialty, has discovered a remedy for these discolorations, which is at once prompt, infallible and harmless.

Prepared by B. C. PERRY, Dermatologist, No. 49 Bond Street, New York, and for sale by all druggists; price $3 per bottle. Call for PERRY'S MOTH & FRECKLE LOTION.

MAGGIEL'S

Spring and Summer Remedies.

"Great oaks from little acorns grow." The worst diseases known to the human race spring from causes so small as to almost defy detection. The venomous or scientific love that fill the tables and shelves of the medical fraternity only go to prove and elaborate these facts. Then guard yourselves while you may. The smallest pimple on the skin is a tell-tale and indicator of disease. It may fade and die away from the surface of the body, but it will reach the vitals, perhaps, at last, and death be the result and final close. MAGGIEL'S BILIOUS, DYSPEPTIC AND DIARRHEA PILLS cure where all others fail. While for Burns, Scalds, Chilblains, Cuts, and all abrasions of the skin, MAGGIEL'S SALVE is infallible. Sold by J. MAGGIEL, 63 Fulton street, New York, FARNTON AND THACHER in this city, and all Druggists, at 25 cents per box. decfeod&wly

Local.

☞ Mr. Nathan Jones and others have petitioned for a new Road to be opened, from some point on Creek Road, to meet (at Sherburne's Road) the new Road recently opened through farms of Messrs. Lane and Pickering, running to Piscataqua Bridge Road, at said Jones' farm. There are two routes talked of at this end—one to come out on Boyd's Road, at the Woodbury estate; the other at Myrtle Street near the City Farm. The Boyd's Road route would be less road to make, but the present road is through low land, and is a narrow and poor roadway; while the Myrtle street route runs through better and of course much more costly land and valuable farms. The petitioners tried last year to get the Aldermen to lay out this road; and failing in that, they now ask the County Commissioners to do it.

This City has requested the authorities to oppose it, as is usual with all towns and cities in such cases; and a counter petition has been circulated to this effect,—which we were requested to sign. But we never opposed a new Road anywhere yet, or any other such public improvement, and we don't believe we ever shall.

We think this Road ought to be made, one way or the other; and ought to be continued right through Mr. Jones' farm, down to the Bayside, too. It would open up a good deal of land to improvement and enhanced value; and if for no other object, the accommodation of our numerous citizens who engage in the Smelt fishery at Great Bay, is worthy of much consideration. The new route would be the most beautiful drive in this vicinity; and we hope the Commissioners, at their hearing, April 4th, will order it built; and we presume they will—for while *all* new roads are always opposed by somebody, they are seldom or never stopped, and ought not to be.

☞ We learn that the owners of the Congress Block lot are the following seven gentlemen: B. F. Webster, A. R. Hatch, J. Parry, Frank Jones, W. Freeman, J. R. Holbrook and Chas. G. Pickering. The number of proposed associates at first was ten, but three desired only to buy the lot and "let it lay," (like the City Hall) instead of putting the building right up, as should and will be done—so the trio of slows or "wait-a-whiles" withdrew.

☞ Among the nice meats to be found at Stokell's Provision store, we were surprised to see beef from Illinois and mutton from Kentucky. New Hampshire people prefer to keep dogs rather than sheep, and so have to have to pay more for their mutton—at any rate, a butcher here has always told us that was one reason for the fact of high prices.

☞ Rehearsal of the Philharmonic Society on Wednesday evening at half-past 7, for their Fast Night Concert; and the prompt attendance of every member is desired.

CONNECTICUT ELECTION, for Governor, &c., takes place next Monday. It is stated that the Union party has carefully calculated its reliable strength, and that there will be an assured majority for the Hawley ticket. But this result cannot be reached without effort. As to the President's influence, we have already published his answer to a post-master who has turned Copperhead, and who wrote to him. But on the other hand, Hon. J. F. Babcock, Collector of New Haven, has stated in a recent speech that he went to Washington to hand in his resignation, in case the reports should prove true that President Johnson was in favor of the election of the Democratic Gubernatorial candidate. His interview with the President, he said, was entirely satisfactory to him as a Republican, and he did not tender his resignation. The conclusion seems to be, then, that Connecticut officeholders may vote as they please, provided they claim to support the President, who evidently supposes himself to be a very popular man, and imagines the people will re-elect him, somewhat as they did President Monroe. Gen. Hawley, the Union Republican candidate for Governor, says—"Our State officers are to be chosen *here*, and not in Washington." It is quite amusing to see the State Sovereignty Copperheads looking this way and that, to catch a few crumbs of aid and comfort, as they may be shaken from the table-cloth at the White House.

☞ Senator Foote was supposed to be in a dying condition, Tuesday noon, at Washington.

— Overcrowded omnibuses are not allowed in France. As soon as the seats are all occupied the conductor sticks out a little flag, and as long as the flag remains out no one is allowed to get on. It is a fineable offense for a conductor to carry more passengers than he can seat.

— Among the late arrivals at Havana of ex-rebels from this country is Robert Toombs of Georgia, who has been negotiating for the purchase of a sugar estate; but it is said he could not raise the necessary amount of funds. Toombs is reported as intending to settle in Mexico as soon as he is convinced that Maximilian's throne is on a firm basis.

Complimentary.
The following complimentary acknowledgement from the Secretary of the Treasury was received by J. LOEWENTHAL:
TREASURY DEPARTMENT,
Washington, D. C., Nov. 30, 1865.
Sir:—This Department desires to express its acknowledgements to you for your agency in the prevention of a great fraud upon the Treasury. But for your prompt exposure to the Second Comptroller of the proposals made you by RAHLER and his associates, it would have been lost to the Government, or to individuals having claims on the Government; and the obligations due in the case to your intelligence and integrity are recognized and appreciated.
I am, very respectfully,
Your obedient servant,
H. McCULLOCH,
Secretary of the Treasury.
The subscriber gives notice that he is the duly **Authorized Agent** for Messrs. LOEWENTHAL & CO, and any business relating to the procuring of **Bounties** or **Pensions** left with me, will be forwarded to them at Washington, to be laid before the proper Department.
BENJ. M. PARKER,
U. S. Claim Agent.
Office at Mechanics' Reading Room.
Portsmouth, March 26, 1866.

Soldiers!
Congress is about to pass a law granting you ADDITIONAL BOUNTY! Those of you, therefore, who have not received Bounty, and those who have received but $100 or less, will find it to their advantage to bring in their papers, that they may be immediately sent to LOEWENTHAL & CO., to be by them presented before the proper officers at Washington.
Three Months', Six Months', Nine Months' Men, and all others, come, and your cases will be attended to by
BENJ. M. PARKER,
U. S. CLAIM AGENT,
m26 Office at Mechanics' Reading Room.

DENTAL NOTICE!
No. 60 Congress Street.
Having adopted the C. O. D. system of doing business, **Dr. E. H. GOODALL** informs his patients and the public that he now inserts whole sets of block teeth on VULCANITE BASE for $30.00 each (upper and lower,) and warrants them as good and as serviceable as sets on GOLD, which cost more than double the above.
He also keeps a fresh supply of PURE NITROUS OXYDE GAS to answer the numerous calls for this popular anæsthetic; and administers ETHER EITHER, when desirable.
All other operations in Dentistry performed at reasonable remuneration. mch14

Important.
DR. STEVENS, No 5 Daniel Street, would give notice that he has REDUCED the price of Permanent Sets of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.
He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite alone, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the Teeth. mh12

GEORGE F. WEED,
S-u-r-g-e-o-n D-e-n-t-i-s-t,
FIRST ASSISTANT in the Office of Dr. STEVENS, No. 5 DANIEL STREET.
DR. WEED can be found at his place of business at all hours of the day and night, for the performance of any of the operations that come within the call of his profession.

Dr. A. P. STEVENS, No. 5 Daniel St., makes the saving of DECAYED and painful teeth, a specialty in his business. He also successfully restores to their natural shape broken or badly decayed teeth, by building out corners and sides with pure gold. (In many cases teeth so restored are as strong as any of their brother members, and in all cases are rendered eminently useful for a long series of years.) DR EASED TEETH, in all stages, treated, and in a very large majority of cases entire success attained.
Charges for such operations moderately high, but nothing in comparison to the value of the teeth. mch14

WHICH IS THE
Leading Life Insurance Comp'y
IN THE UNITED STATES?
Which is the Safest and the Cheapest?
The following figures are from the later Reports of the New York Insurance Commissioner, showing the "amount of business" of the
MUTUAL BENEFIT
LIFE INSURANCE COMPANY,
to be the *largest*, the "expenses of management" the *smallest*, the "ratio of Assets to Liabilities," or the *security* furnished to its members, the *largest* of any like institution in the country.

Premiums received in 1864.....	$2,089,072
" " " " 1865.....	3,029,087
Ratio of expenses to premiums rec'd in '64..	12.26
" " " " " " '65..	12.16
Ratio of assets to liabilities, Jan. 1, 1865....	151.85

The inevitable conclusion from these official facts, is that the
MUTUAL BENEFIT LIFE
Insurance Company
IS THE BEST AND THE CHEAPEST.
Because its NET ASSETS are proportionably LARGER than those of any other Life Insurance Company in the United States.
Because its "Managing Expenses" are LESS, and it has a LARGER SURPLUS to divide among its members than any Company in the United States.
QUERY. Will some one inform the public of that mysterious process by which a Company with a surplus proportionably *much less*, and expenses *very much* larger than another, can yet divide *more* to its members, and insure them at *less cost?* How is it done? Where does the money come from?
Every intelligent man will see at once that it *cannot be done*. Yet we have Agents among us that make this their boast.
Any one disposed or intending to insure can be furnished with the requisite information by applying to
HENRY A. YEATON, Agent.

Morning Chronicle.

THE "WHITE SWALLOW" MUTINY.—A letter from San Francisco gives an account of the trial of one of the crew of the ship *White Swallow*, at that port from New York, for mutiny, five others being under arrest and subject to the decision to be made in the case. The Boston Journal says the evidence showed that when the White Swallow got out of port, the crew began to be roughly treated by the officers of the ship. Men were knocked down by belaying pins; some of them were placed over the side of the ship to scrape the sides while the sea was running very high; one man was lost while doing this sort of work. The men were otherwise most horribly treated, and at last rose on their oppressors. The captain and mates were placed in irons and kept so for several days, until they agreed to treat the men as human beings; after which they were released, and the ship proceeded to San Francisco without any further trouble. The men were obedient and faithful, but no more cruelties were practiced on them. The trial lasted about a week, and the jury brought in a verdict of acquittal. A *nolle prosequi* was entered in the cases of the other five.

Important to the Afflicted.

DR. DOW continues to be consulted at his office, No. 7 and 8 ENDICOTT STREET, BOSTON, on all diseases of a PRIVATE OR DELICATE NATURE. By a long course of study and practical experience to a great extent, Dr. D. has now the gratification of presenting the unfortunate with remedies that have never, since he first introduced them, failed to cure the most alarming cases of GONORRHŒA AND SYPHILIS.

SEMINAL WEAKNESS.—Dr. Dow devotes a great part of his time to the treatment of those cases caused by a secret and solitary habit, which ruins the body and mind, unfitting the unfortunate victim for the enjoyment of life. Patients who wish to remain under Dr. Dow's treatment a few days or weeks, will be furnished with pleasant rooms, and charged for board moderate.—Medicines sent to all parts of the country, with full directions for use, on receiving descriptions of your cases. Dr. Dow has also for sale the French Capotes, warranted the best preventive. Order by mail. Three or $1 and a red stamp.

Highly Important to Females
IN DELICATE HEALTH.

Dr. DOW, Physician and Surgeon, No. 7 Endicott Street, Boston, is consulted daily for all diseases incident to the female system. Dr. Dow has no doubt had greater experience in the cure of diseases of women than any other physician in Boston. Boarding accommodations for patients who may wish to stay in Boston a few days under his treatment. Dr. Dow, since 1845, having confined his whole attention to an office practice for the cure of Private Diseases and Female Complaints, acknowledges no superior in the United States.

N. B.—All letters must contain one dollar, or they will not be answered. Office hours from 8 A. M. to 9 P. M.

CERTAIN CURE
in all cases, or No Charges Made.

Among the physicians in Boston, none stands higher in the profession than the celebrated DR. DOW, No. 7 Endicott street. Those need not the service of an experienced physician and surgeon should give him a call.

P. S.—Dr. Dow imports and has for sale a new article, called the FRENCH SECRET. Order by mail. Two for $1 and a red stamp.
Boston, April 7, 1865 eod&wl

HIGHLY IMPORTANT

UNFORTUNATE FEMALES!

DR. BRISCOE'S FEMALE DROPS are unsurpassed by virtue and efficacy in removing all complaints of whatever nature, incidental to females. He continues, with his usual success, to medically and surgically remove Obstructions, Engorgements, Leucorrhœa, Whites, General Debility, &c., and Suppressions of all kinds; also all complaints of the Lungs, Liver, Kidneys, Spleen, Bladder, &c.

His medicines will be sent to any part of the country by express or mail; addressed by a communication stating particulars, will receive prompt attention.

Office, No. 23 Endicott street.

Persons at a distance can consult Dr. Briscoe, by letter, describing the case, and have the medicines securely put up, and forwarded to any part of the United States, with full directions for use. Office arranged with separate apartments, so that patients see none but the Doctor himself.

Address Dr. Briscoe, at No. 23 Endicott St., Boston, Mass., stating symptoms. All communications are confidential.

Patients furnished with rooms and board if desired, and secrecy observed in every case.

Office hours from 9 A. M. to 9 P. M.
Boston, July 15, 1862. 17tsly

DR. M. BRISCOE still continues his successful treatment of all Private Diseases and also Female Complaints, at his old established office, No. 23 Endicott street.

N. B.—The sick and afflicted will do well to give him a call. A short consultation will cost you nothing, but a word of friendly advice may save you years of suffering.

P. S.—Ladies who wish to stay in the city under my care a few days, can be furnished with kind nurses. Charges moderate.

FARRANT & CO——

Gentlemen, I am a resident of Curacoa, and have often been disposed to write to you concerning the real value of your SELTZER APERIENT as a remedy for indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.

For four or five years my wife has been sadly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Dahlalis, of Venezuela, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.

I feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.

Trusting that you will give this publicity, and repeating my earnest gratitude and thanks,

I am very respectfully yours,
S. D. C. HENRIQUEZ,
Merchant, Curacoa, S. A.
New York, June 28th, 1865.

WE ASK

The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of

Dyspepsia, Heartburn, Sour Stomach, Sick Headache, Dizziness, Indigestion, Piles, Costiveness, Bilious Attacks, Liver Complaints, Rheumatic Affections, &c.

Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your Physician.

DUTCHESS NURSERIES
POUGHKEEPSIE, NEW YORK,
FERRIS & CAYWOOD, Proprietors.

We call the attention of our customers and the public to our stock of GRAPE VINES, which is larger than ever before. Having had over twenty years' experience in the management of Vineyards and the propagation of Vines, and our present stock having been grown from bearing wood only, with constant care during the season, we think they will compare favorably with any others that are offered for sale.

Our stock of MONTGOMERY VINES is very large. This variety not being generally known, we will give a brief description: White, a seedling of the White Chasselas, an unparalled grower and bearer, clusters often weighing two pounds, with a mild subacid flavor. It is classed with the hardy grapes, but we protect it in winter as we do all other varieties in this part of the State.

Our stock of the various kinds of EVERGREEN and DECIDOUS TREES is very large, and is offered at moderate price; and at very low rates by the quantity, to those who are laying out and improving their places, cemeteries, or public grounds, and to nurserymen. We challenge competition.

Grape Vines.

No. 39 Congress St., Portsmouth, N. H.,
—DEALERS IN—
S. Vance's Submerged Well PUMP.

This unsurpassable invention, now being first introduced, will, it is believed, supersede all other Well Pumps now in use.

ITS ADVANTAGES.

FIRST, SIMPLICITY.—This Pump is composed of but three parts, and so simple in its construction that any one can easily put it together.

SECOND, DURABILITY.—Its peculiar construction, and the fact that it is always submerged in water, make it the most durable of all Pumps yet invented.

THIRD, NEVER FREEZES.—The valves are so constructed that, when not in motion, they allow all the water above to pass down into the well, and thus prevent freezing.

FOURTH, POWER.—For the amount of power applied, this Pump exceeds anything known. It throws one-third part more water than ordinary pumps, and works so easily that even a child can pump without fatigue. It is in this way the greatest labor-saving pump now offered to the public.

FIFTH, IT IS INVALUABLE.—For a well pump it is invaluable, as all the water which is submerged consists of but three small pieces, and these galvanized. It can in no way corrode, consequently it brings up pure water at every stroke.

SIXTH, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to keep in use for years. No repairs at all are needed. It is very light, and thus the cost of transportation is very small.

☞ Manufactured by S. VANCE & CO., No. 31 Liberty Street, Newburyport, and for sale in Portsmouth by the Sole Agents for N. H.,

The Chronicle.

THE SOUTHERN COAST.—A Savannah correspondent of the New York Post communicates some interesting facts concerning the condition of the freedmen on the South Carolina and Georgia seaboard. He says "the negroes are getting to understand their rights and privileges and the nature of the bargains they make. The great mass do not understand the details of the contracts they make, but they know just as well as the employer that they are working for wages, and that they are free; that no one has the right to cuff and whip them, nor use rough language. The planters generally do not dare to ill treat the negro, by whose labor only they can raise crops.

Gen. Tillson, who is perhaps the ablest agent in the service of the Freedmen's Bureau, tells me that the cry which comes to him from all parts of his district is, "Give us help; we want laborers." And during the ten minutes' interview which I had with him the other day, there were applications from planters, and others asking for hands. One wanted sixty men, and was paying thirty dollars per month with rations.

General Hall, who has recently been appointed to the command of the district of Savannah, showed me a book recording a large number of applications which could not be filled.

Do these negroes fulfill their contracts when employed? Are they willing to go to work? Within the last ten days I have visited some twenty plantations in the vicinity of Savannah, Charleston and at Port Royal. The owners and employers in these places are unanimous in their testimony as to the negroes' willingness to work.

The love of freedmen for their old homes was illustrated in the Freedmen's Bureau office at Hilton Head, where a party of negroes, with wives and children, made application for transportation to St. Simon's Island, when the following colloquy occurred:

"'Why do you wish to go to St. Simon's; don't you know that the planters have all left there; there are no houses on the island, and you will get no employment.?'

'Dat's jes what we wants; we'se seen nuff houses; we wants to go right out into de woods, away from houses and white men. We's born and raised in St. Simon's and we's gwine right back whar we'se born, and die dar.'

It was useless for the Major to reason with them, and they were given transportation to St. Simons."

Now, says Uncle Toby, will not some old conservative friends tell us, (as they did for twenty years and more,) "if you free the negroes, they will all rush to the North!"

The writer in the N. Y. Post expresses the opinion that not one in a hundred of the freedmen is qualified to exercise the right of ballot.

Well then: fix a *standard of qualification*, —and let all, of all colors, stand or fall by it.

THE WORKING FARMER, Vol. 18, 1866, a Monthly, of 24 quarto pages, an earnest advocate of agricultural improvement, is offered at the low price of ONE DOLLAR a year, in advance. It will contain many interesting items, given by no other journal of its class, including Washington's Letters on Agriculture, with one in *facsimile* of his handwriting; "Farm Maps, and Accounts and Ploughing," by S. Edwards Todd, author of "The Young Farmer's Manual;" a finely illustrated treatise on the Pear, by F. R. Quinn, Supt of the celebrated farm of the late Prof. Mapes; an original and ingenious article on Flower Gardening, by Ignaz A. Pilat and I. Payne Lowe. As, however, actual examination is the only test on which judicious readers will rely, we will forward specimen copies on the receipt of postage. Address W. L. ALLISON & Co., 124 and 126 Nassau Street, New York.

WANTED TO GIVE a $56 WHEELER & WILSON MACHINE, which sews all kinds of fabrics, for procuring SIXTY paying subscribers to HALL'S JOURNAL OF HEALTH, for 1866. $1.50 a year. No. 2 West Forty-third St., New York, near Fifth Avenue. Specimen numbers, 10 cents.

Patent Offices.
INVENTORS who wish to take out Letters Patent are advised to communicate with Messrs. MUNN & CO., editors of the Scientific American, who have prosecuted claims before the Patent Office for nearly Twenty Years. J. O. JOYCE'S DOUBLE ACTION FORCE PUMP, for Wells, Cisterns, Railroad Stations, Factories and Vessels; has no equal for power, ease of workmanship and durability, has a powerful air chamber, will throw water SIXTY FEET, AFTER RAISING it out of a *sixty foot well*, and NEVER CAN FREEZE. It is the most successful deep well pump on this continent, *only* one that *will do* what it is advertised to do, and is fast growing into public favor. See well to your interests by investigating the merits of this pump, or you may have to say, as others have, "Had I known of this Pump before I bought mine, I should certainly have had it." Call and see it, or send for Circular containing all particulars, No. 20 Exchange St., corner of Dock Square, Boston, Mass. HENRY D. RICE, Wholesale and Retail Agent for New England. Agents wanted.

That Noble Animal, The Horse.
Will be better every way if fed occasionally a spoonful of
ALDEN'S CONDITION POWDERS.
They will cure most of the diseases to which horses and cattle are liable, increase the appetite and spirits, and, with respectable grooming, give a bright, glossy appearance to the hair. They are the result of actual and long continued experiments, are prepared with the utmost care, from the very best material, and guaranteed vastly superior to anything known. Many Vermont gentlemen, owners of fine horses, buy them by the dozen, and give them freely. As a consequence, their horses are always in good condition and spirits, and remarkable for their smooth, shining coats. For sale by merchants everywhere. **L. L. Dutcher & Son,** St. Albans, Vt., proprietors; Demas, Barnes & Co., New York, John F. Henry & Co., Waterbury, Vt., Wholesale Agents.

MAKE YOUR OWN SOAP WITH B. T. BABBITT'S PURE CONCENTRATED POTASH, and READY SOAP MAKER. Double the strength of common Potash, and superior to any saponifier or lye in the market. VINELAND
FARM AND FRUIT LANDS.
In a mild and healthful climate. Thirty miles *south* of Philadelphia by Railroad, in New Jersey, on the same line of latitude as Baltimore, Md.
The soil is rich and *productive*, varying from a clay to sandy loam, suitable for Wheat, Grass, Corn, Tobacco, Fruits and Vegetables. This is a *great fruit country*. Five hundred Vineyards and Orchards have been planted out by experienced fruit-growers. Grapes, Peaches, Pears, &c., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste*. It has increased five thousand people within the past three years. Churches, Stores, Schools, Academies, Societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are constantly settling. Hundreds of new houses are being constructed. Good Farm land, twenty acre lots and upward, $25 per acre. Five and ten acre and Village lots for sale.
Fruits and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Yards, Manufactories, Foundries, Stores and the like; and Steam Power, with room, can be rented.
For persons who desire mild winters, a healthful climate, and a good soil, in a country beautifully improved, abounding in fruits, and possessing all other social privileges, in the heart of civilization, it is worthy of a visit.
Letters answered, and the Vineland Rural, a paper giving full information, and containing Reports of Solon Robinson, sent to applicants.
Address CHAS. K. LANDIS, Vineland P. O., Landis Township, New Jersey.
From Report of Solon Robinson, Agricultural Editor of The Tribune: *It is one of the most extensive fertile tracts, in an almost level position and suitable condition for pleasant farming that I know of this side of the Western Prairies.* n1—dawôm

Morning Chronicle.

Portsmouth, N. H.

THURSDAY, MARCH 29, 1866.

THE NEWS FROM WASHINGTON is quite important. President Johnson, as was expected, has vetoed the Civil Rights Bill; and the Senate has unseated Senator Stockton of New Jersey, who did not receive a majority of votes in the N. J. Legislature. Both these events took place in the Senate on Tuesday, March 27.

At one o'clock the Stockton case was taken up, and the Senator's friends worked hard for an hour to procure a postponement until Thursday, on the ground that Mr. Wright of New Jersey would then be present to vote. Failing in this, Mr. Stockton began to read his elaborate memorial.

During the proceedings, the private Secretary of the President appeared in the Senate Chamber and announced that the Executive had returned the Civil Rights Bill with his objections. This created quite a flutter in the Chamber, and seemed to hasten the decision of the contest over the New Jersey Senatorship.

Everything must come to an end, and at last Mr. Stockton finished reading. Garrett Davis then introduced a long amendment, but Mr. Anthony declared that, for one, although he had no doubts as to the correctness of his position on the question, he would not aid in factious opposition, so he voted No, and the vote stood 15 yeas to 27 nays.

Senator McDougall proposed a postponement, but the Senate voted this down by 15 yeas to 28 nays.

The amendment declaring that Mr. Stockton was not entitled to his seat was then adopted by a vote of 22 yeas to 21 nays, and then came the vote of the amended resolution as follows:

Yeas—Messrs. Brown, Chandler, Clarke, Conness, Cragin, Cresswell, Fessenden, Grimes, Howard, Howe, Kirkwood, Lane of Indiana, Nye, Pomeroy, Ramsey, Sherman, Sprague, Sumner, Wade, Williams, Wilson and Yates—22.

Nays — Messrs. Anthony, Buckalew, Cowan, Davis, Doolittle, Guthrie, Harris, Henderson, Hendricks, Johnson, Lane of Kansas, McDougall, Morgan, Nesmith, Norton, Poland, Riddle, Saulsbury, Trumbull, Van Winkle and Willey—21.

Not Voting—Messrs. Dixon, Wright and Foot, who were sick; Foster, (paired with Morrill, who is in Connecticut,) and Stewart (who did not vote)—6.

Just before the vote was declared, Mr. Riddle changed his vote to move a reconsideration, but Mr. Clarke headed him off, and the Senate refused to reconsider—so Mr. Stockton had to leave the Senate to make way for a Republican.

"The veto message was then read, and was listened to with marked attention. It is regarded (says Perley) as a very able and a very dangerous document, which attacks Republican principles from the Constitutional standpoint of those who have just plunged the country in civil war, and betrays the old spirit of caste." It is supposed to have been contrived by copperhead lawyers.

Upon the question of postponing its further consideration, the vote stood 14 yeas to 28 nays, and it would come up of course on Wednesday.

☞ Hon. N. D. Sperry, of New Haven, is Chairman of the Connecticut State Committee of the Republican Union party. Somebody said, in a coppery sheet in New York, that Sperry was reconstructed, and would vote for English, the coppery candidate for Governor. But a dispatch from Sperry himself says he will vote for Hawley; and a New Haven paper says Sperry is a warm friend of President Johnson, and such a warm supporter of his policy that he can't trust English and his party to carry it out!!!

STIMULANTS IN SICKNESS.—It is a very prevalent custom among physicians to administer stimulants to their patients, but the experience of the London Hospital in this respect goes strongly to show that the general result is just the reverse of what is expected to be accomplished. From 1854 to 1858 each physician in attendance at the hospital prescribed 12,000 ounces, annually, of wines and spirits; the deaths being 11.88 per cent. From 1860 to 1865 he prescribed 28,156 ounces, the deaths being 12.65 per cent. During the years 1854 to 1858, each surgeon employed, annually, 38,016 ounces of wine, the deaths being 4.48 per cent. During 1860 to 1864 he employed, annually, 142,591 ounces, the deaths being 6.66 per cent. In 1862 the general mortality of the hospital was 7.4 per cent., the consumption of stimulants being 1281 gallons of wine, 162 of brandy, and 38 of gin. In 1864 the mortality was 10.5 per cent., the quantity of stimulants consumed being 6558 gallons of wine, 359 of brandy, and 12 of gin.

IN OREGON, the Republicans had called a meeting at Portland to endorse President Johnson; when Governor Gibbs, who was present, arose and denounced the meeting as one of Copperheads. He, with others, then left the meeting.

Correspondence of the Chronicle.

NEW YORK, March 27.

And sometimes he whirls her all madly and wild,
And sometimes grown weary, he yields to the child.
Who skipping so lightly, leaves flowers at her feet
And grass by the snowbanks—fresh, tenderly sweet.
Her gentle touch warming his stiff fingers old—
His breath flutters wildly for bright hair of gold.
So through this wierd month,—sunny spring, winter grey—
With March winds for music ye dance and ye play,
And I laugh, as I sit by the fire to write,
To hear your mad revels, this merry March night!

As I looked out at the light fall of snow, (bleached goods ought to fall) which was like "throwing cold water" in a solid form, on the bright illusions of Spring which the warm sunny days of the past week had builded up, I was reminded of these very pretty lines, in the last number of the neat little Boston Magazine, the "Student & Schoolmate," a monthly of entertaining reading matter for the "young folks," and containing many things enjoyable by older persons, provided they haven't grow so old as to be sophisticated, exacting, and unhappy. It is published by I. H. Allen, Boston, $1.50 per year.

Most everybody with a love for the things beautiful and ideal, has read Whittier's "Snow Bound;" and we think all must agree upon it, as the most perfect of all efforts of modern poetic literature, from its vignette of firm, frank, honest New England features, and life like winter frontispiece, through all its beautiful picturings,—"pictures of old days"—with a fragrance

—"Like the odors blown
From unmown meadows newly mown,
Or lilies floating in some pond
Woodfringed,—the wayside gaze beyond."

Where there are so many perfect passages, it is difficult to choose—and we have had some discussion as to the choicest. We think we give preference to one which has in addition to its beauty, and pathos, much originality,—that of "the elder sister" in the lines,—

"Oh heart sore tired! thou has the best
That Heaven could give thee,—rest,—
Rest from all bitter thoughts and things!
How many a poor one's blessing went
With thee beneath the low green tent,
Whose curtain never outward swings!"

Other passages have a completeness which makes them perfectly and beautifully picturesque.

"The white drift piled the window frame,
And through the glass the clothes line posts
Looked like tall ships of snow
* * * * * *
The bridle post an old man sat,
With snow flake for coat, and high cocked hat;
The well curb had a Chinese roof,
And even the long sweep, high aloof,
In its slant splendor, seemed to tell
Of Pisa's leaning miracle.
* * * * * *
With mittened hands and caps drawn low,
To guard our necks and ears from snow,
We cut the solid whiteness through;
And, where the drift was deepest, made
A tunnel walled and overlaid
With dazzling crystal."

The lines of local allusion to some places familiar to us, if less poetic, are finely descriptive.

"The river at her father's door
Its rippled moanings whispered o'er;
We heard the hawks at twilight play,
The boat horn on Piscataqua,—
We shared the fishing off Boar's Head,
And round the rock Isles of Shoals
The hake-broil on the driftwood coals;
The chowder on the sand-beach made,
Dipped by the hungry, steaming hot,
With pewter spoons and clam-shell from the pot."

In the passage upon "Our youngest and our dearest," who sat,

"Upon the motley braided mat,
Lifting her large, sweet, asking eyes,"

there is at the close, a richness of pathos rarely equalled:

"And while in life's late afternoon,
Where cool and long the shadows grow,
I walk to meet the night that soon
Shall shape and shadow overflow,
I cannot feel that thou art far,
Since near at need the angels are;
And when the sunset gates unbar,
Shall I not see thee waiting stand,
And white against the evening star,
The welcome of thy beckoning hand?"

But to transfer all the beautiful passages, would be to reprint the volume. After days and nights the storm is over, and,

"At last the floundering carrier bore
The village paper to our door.
Welcome to us its week-old news,
Its corner for the rustic Muse,
Its monthly gauge of snow and rain,
Its record, missing in a breath
The wedding knell, and dirge of death;
Jest, anecdote, and love lorn tale,
The latest culprit sent to jail;
Its hue and cry of stolen and lost,
Its vendue sales and goods at cost,
And traffic calling loud for gain.
We felt the stir of hall and street,
The pulse of life that round us beat;
The chill embargo of the snow,
Was melted in the genial glow;
Wide swung again our ice-locked door,
And all the world was ours once more!"

Such a perfect home atmosphere pervades every page of the book, that it will be ever welcome, and repeatedly appreciated at every fireside. The query suggests itself, whether from associations with the text word, a line on page 49, would not read better, as wedding bell, instead of "wedding knell." Old bachelors will of course prefer the text! N.

NORTH CAROLINA.—Mr. S. S. Ashley, Superintendent of Schools for the National Freedmen's Relief Association, writes to the Secretary of that Society from Wilmington, N. C.:

In Samson county six hundred "children," some of them twenty-one years of age, were bound out by the county court, and then by an armed and mounted police force were torn from their homes and carried to a forced and unnecessary apprenticeship. Some of them were not only able to take care of themselves, but were actually doing so.

THE COAL TRADE.—The quantity of coal sent to market from the Schuylkill region last week was 78,528 tons, against 68,196 tons for the corresponding week last year. The Philadelphia Ledger says the trade continues dull, and prices rule low—too low to remunerate those engaged in the business.

WHY C. C. CLAY JR. IS DETAINED.—It appears that Clement C. Clay, Jr., who is now imprisoned at Fortress Monroe with Jeff. Davis, is detained in custody on account of his complicity with the St. Albans raid. His guilt is established by a letter found on a rebel messenger from Canada to Richmond, captured in Washington in the early part of 1865, while endeavoring to make his way through our lines. The letter is addressed to J. P. Benjamin, the rebel Secretary of War, and although not signed, has been fully identified as the production of Mr. Clay, who wrote from St. Catherines, C. W. After some general remarks about Young, the St. Albans raider, the necessity of his doings being endorsed by the Confederate government to prevent his extradition, and referring to other enterprises planned by Young, Mr. Clay says:

"Finally, disappointed in his original purpose, and in all the subsequent enterprises protected, he proposed to return to the Confederate States via Halifax, but passing through the New England States and burning some towns and robbing them of whatever he could convert to the use of the Confederate government. This I approved as justifiable retaliation. He attempted to burn the town of St. Albans, Vermont, and would have succeeded but for the failure of the chemical preparations with which he was armed. Believing the town was already fired in several places and must be destroyed, he then robbed the banks of all the funds he could find, amounting to more than $200,000. * * * * My instructions to him, oft repeated, were 'to destroy whatever was valuable—not to stop or rob; but if, after firing a town, he could seize and carry off money, or treasury or bank notes, he had a right to do so, upon condition that they were delivered to the proper authorities of the Confederate States.'"

MOBILE.—A letter from Mobile states that a church for colored people was burnt in that city Feb. 27, being the third church of that sort burnt there since the U. S. troops have occupied the port: all incendiary fires. The same letter says:

We have just received by mail the gratifying news of the result of the New Hampshire election. The Mobile papers evidently do not consider this "straw" as a very heavy indorsement of President Johnson's reconstruction policy, as they have not yet seen fit to lay the intelligence before their readers.

ATTEMPTED HIGHWAY ROBBERM—On Saturday afternoon as Charles Purrington was returning from New Bedford to Fall River in a wagon, he was stopped at a lonely place in the town of Westport by two disguised foot-pads, one of whom presented a pistol, and ordered him to get out of his wagon and give up his money. He got out, when they gave the horse a kick, and he started off. Mr. Purrington had taken the precaution to hide his wallet containing $100 in the straw in his wagon, so that in searching him the robbers got only a few articles of trifling value, after which they let him go, and he overtook his team and reached home in safety.

COAL IN RUSSIA.—It has been discovered that in the district of which Moscow is the centre, there is an immense basin of coal, including an area of 120,000 square miles—nearly as large as the bituminous coal area of the United States. There are also 18,000 square miles in the district of the Don—larger than the anthracite region of Pennsylvania, as large as the whole bituminous coal area of British America, and more than half as large again as all the coal fields in Great Britain. There are a number of other places in Russia where coal has been discovered in great quantities.

NEW HAMPSHIRE ITEMS.

—— A dam is to be built across the Winnipisoogee River at Union Bridge, Sanbornton, at a cost of $25,000.

—— John Sanborn and others, volunteers from Freedom, who served in the Heavy Artillery, Fort Constitution, Portsmouth, have sued the town for their bounties, which the town authorities declined to pay, for the reason that the town had voted not to allow any bounty to volunteers who did not serve outside of the State one year.

—— Col. Walter Harriman, Secretary of State, in response to an invitation from the Union Central Committee of Connecticut, has gone to participate in the present political campaign in that State. Col. Harriman has proved himself a brave soldier, while as a popular speaker, he is recognized as one of the most gifted. The Union men of Connecticut will give him a cordial reception.

THE WHIPPLE FILE COMPANY.—Much consternation has been occasioned by the report that the private property of the stockholders in the Whipple File Company, through neglect of the officers to comply with the law, is held for the debts of the corporation. The number of persons thrown out of employment by the suspension of this Company, is about 500. Over 100 of them have levied attachments of $100 to $300 each on the real estate of the Co.

Herrick Allen's Gold Medal Saleratus is manufactured entirely different from any other. Its chemical purity renders it as harmless as the purest flour, and its use helps weak stomachs and cures dyspeptic persons. Use it with cream tarter instead of soda. It is much better. Try it. Grocers and Druggists sell it. 66

Lodi Manufacturing Company's
POUDRETTE.
AGENT FOR NEW HAMPSHIRE,
J. F. SHORES, Jr.,
No. 38 Market Street (Up Stairs.)

The advantages of Poudrette as a manure may be stated as follows:

First, its ECONOMY. The *cost* of the manure compared with its *effects* is less than that of *any other fertilizer* in market. It can be bought and applied for the same money which it would cost only to apply farm-yard manure. It is portable, contains great strength in a small compass, and needs no *extra cars in its application*; the closer its contact with the seed the better and quicker it works. $4.50 worth at our retail price (or two barrels) will manure an acre of corn in the hill, and from one-quarter to one-third to the product, and will *mature* the crop from two to three weeks earlier. *No worms* will stay in the hill where the Poudrette is placed. *No seeds of weeds will germinate*, and crows are very shy of plucking it out of the hill. On Corn, Tobacco and Garden Vegetables it has no equal. While the leaf and growth of the Tobacco plant is large, it has not the coarseness of fibre which is produced by Peruvian Guano, and it has taken the lead for this crop in Connecticut, and has begun to be appreciated in Maryland.

It is famous for producing larger and finer potatoes than anything else, and the stories told about Onions, their large growth, &c., are almost beyond credence. Flowers and plants are much improved by an application of Poudrette.

Another great consideration is the season of the year when the corn is planted. It is a time when every spring crop must be put in, and the corn not only planted, but up and grown sufficiently for the last hoeing and planting, before the commencement of grass and hay harvest.—The celerity and dispatch with which a large crop of corn is put in and poudretted, the rapid growth and consequently the early opportunity of working among it—the small chance for weeds, owing to the shade it affords, and the fact that the *Poudrette, unlike other manures, contains no seed that can germinate*, and consequently less trouble required to clean it—are all important advantages. The corn will ripen two weeks earlier, and the yield will be much heavier.

The same remarks apply to Sorghum and Broom Corn

For grass, where it is about to be laid down to lawn, or for several years a top dressing of Poudrette will be found invaluable.

We wish to remark in this place, that Poudrette is not like some quack medicines, warranted to cure all kinds of diseases. It must be used with discretion, and a reasonable quantity will produce a reasonable effect.

Poudrette will answer no better than other manures on wet, sour, undrained land, or in seasons of drought. In other words, Poudrette is an invaluable substitute for barn-yard manure, and can be used with great profit and advantage upon most spring crops, but it will neither work miracles, drain the land it is put upon, nor cause rain to fall in time of drought.

Price per Barrel $2.25—delivered at any part of the city, or at any depot or wharf.

Important Notice!—When Poudrette is spoken of, we mean "LODI POUDRETTE," which has now stood the test of twenty-six years' trial; and when buying, *be sure and get that kind!*

A descriptive pamphlet may be had on application. mh29

ALLCOCK'S POROUS PLASTERS
CURE LUMBAGO, PAINS OF THE SIDE, VARICOSE VEINS, SORE CHEST, &c.

An Electrician, who has great experience of their effects in *local rheumatism*, in *rle stolorosaz*, and deep-seated nervous and other pains, and in affections of the kidneys, etc., etc., attributes all their sedative, stimulative, and pain relieving effects to their *electric* qualities. He asserts they restore the healthy electric condition (equilibrium) of the part, and *that* being restored, pain and morbid action cease.

LAME BACK.

Brandreth House, N. Y., Nov. 22, 1859.
T. ALLCOCK & CO.—Gentlemen: I lately suffered severely from a weakness in my back. Having heard your plasters much recommended in cases of this kind, I procured one, and the result was all that I could desire. A single Plaster cured me in a week.

Yours respectfully, J. G. BRIGGS.

CLOCK'S
Excelsior Hair Restorer
Is warranted to restore GRAY HAIRS, in all cases to its original color, whether black or brown.

It will not stain the skin or the finest linen.

It will instantly arrest the hair from falling off; causes hair to grow on BALD HEADS when fallen off by disease; and is a complete dressing for the hair, keeping it moist and glossy and perfumed longer than any other preparation in the market.

The article is warranted to do as represented, or the money will be refunded. It is positively the greatest discovery in hair preparations of the age.

For sale in Portsmouth by J. H. THACHER, Apothecary, opposite the Post Office, and at No. 17 Market Square.

Also by WILLIAM R. PRESTON, Apothecary, 2 Congress Block.

Local.

☞ There has been an unusually large number of sudden deaths in this city of late. In addition to several already chronicled, we have two more to record this morning. Miss Marsh, whose death is referred to in our obituary notices, was sitting in her chair, conversing with friends, when she faltered, her head fell, and in less than an hour life was extinct. Her age was 67.

On Tuesday, Miss Lizzie Haven, aged about 25 years, daughter of Alfred W. Haven, Esq., retired, as well as usual; and not appearing in the morning, her room was visited, and she was found dead in her bed.

POLICE COURT, March 27.—Patrick Adams, otherwise known as "Yankee" Adams, for drunkenness, was sent to the House of Correction for 60 days.

March 28.—Wentworth Manson, charged with larceny of sails, &c., from a schooner at Staples's Island, was bound over in the sum of $500.

☞ *Ship* building, proper, on the Piscataqua River, is not very brisk at present; though there are a few small craft on the stocks. Mr. Marcy is building a barque, at the South End; Mr. Fernald a schooner, at the Raynes Yard; Mr. John Neal and Mr. Stephenson, each a schooner, on the Kittery side of the river.

SENTENCED.—Edward Fenton of Kittery, who was convicted some weeks ago of counseling, aiding and abetting Daniel Sanborn in stealing a lot of copper from the Navy Yard, was sentenced on Tuesday to ten months' imprisonment in the Alfred (Me.) Jail, and to pay a fine of $5.

Daniel Sanborn, for the larceny of copper as above, fifteen days' imprisonment in the jail at Portland, and $1 fine.

As GOOD AS NEW.—Mr. Edward Anderson, the gentlemanly Porter of the Navy Yard, has again resumed his duties—having recovered from the injury received some six weeks since, by breaking his arm.

GOLD, Wednesday, 127 3-8.

— The snow-storm in Canada last Wednesday was the most severe for years.

— Maine raises more peas and beans than all the other New England States together.

— Two children in Chicago have been poisoned by putting a card photograph in their mouths. One has died, the other is very low.

— Hon. Solomon Foot, Senator from Vermont, died in Washington city, Wednesday morning, March 28, in the 64th year of his age.

— The hotel proprietors of New York are to hold a meeting this week to consider the expediency of reducing the price of board. The restaurants also are thinking of something of the same kind.

— It is said in New York that the robber who stole $1,500,000 from Mr. Lord, has been taken, and that the bonds may be recovered.—Also that the Brevoort Fire Insurance Co. has lost heavily, and the Directors are consulting whether it is best to go on or stop.

— Mrs. Eunice W. Forbes died at Ashfield, Mass., on the 9th, aged 108 years. She was a native of Upton, and removed to Ashfield when she was 26 years old. Her father died when he was 90, and her mother when she was 100, and ten of their eleven children were 90 and upward when they died.

— A smart southern darkey persuaded two of his colored brethren in Providence to buy an iron trunk, which he represented to be filled with valuables stolen by the captain of a vessel lying in Boston, and the purchasers paid him $800, all the money they could raise. The trunk was delivered in Boston and opened in Providence, when it was found crammed full with precious paving stones.

Hedge Plants.
The proprietors offer a heavy stock of HONEY LOCUST for Hedging—two years old, fine, strong, well-branched plants. This species is perfectly hardy, free from insects, of strong and rapid growth, and very defensive.

DENTAL NOTICE!
No. 60 Congress Street.
Having adopted the C. O. D. system of doing business, **Dr. E. B. GOODALL** informs his patients and the public that he now inserts whole sets of block teeth on VULCANITE BASIS for $30.00 each (upper and lower,) and warrants them as good and as serviceable as sets on GOLD, which cost more than double the above.

He also keeps a fresh supply of PURE NITROUS OXYDE GAS to answer the numerous calls for this popular anæsthetic; and administers PURE ETHER, when desirable.

All other operations in Dentistry performed at reasonable remuneration. mch14

Important.
DR. STEVENS, No. 5 Daniel Street, would give notice that he has reduced the price of Permanent Sets of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.

He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite alone, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the Teeth. mh12

GEORGE F. WEED,
S-u-r-g-e-o-n D-e-n-t-i-s-t,
FIRST ASSISTANT in the Office of DR. STEVENS, NO. 5 DANIEL STREET.

DR. WEED can be found at his place of business at all hours of the day and night, for the performance of any of the operations that come within the call of his profession.

Dr. A. P. STEVENS, No. 5 Daniel St, makes a saving of TEETH and painful front teeth, a speciality in his business. He also successfully restores to their natural shape broken or badly decayed teeth, by building out corners and sides with PURE GOLD. (In many cases teeth so restored are as strong as any of their brother members, and in all cases are rendered eminently useful for a long series of years.) DISEASED TEETH, in all stages, treated, and in a very large majority of cases entire success attained.

Charges for such operations necessarily high, but nothing in comparison to the value of the Teeth. mch14

ABSTRACT OF THE
21st ANNUAL STATEMENT
—OF THE—
Mutual Benefit Life Insurance Co.,
January 1st, 1866.

Balance per statement Jan. 1, 1865	$6,774,867.60
Am't premiums rec'd in 1865	$3,020,087.21
" interest rec'd and accrued	679,378.30
Total income in 1865	3,708,365.51
Total disbursements, including claims by death and dividends to policy-holders	1,423,653.51

WHICH IS THE
Leading Life Insurance Comp'y
IN THE UNITED STATES?
Which is the Safest and the Cheapest?

The following figures are from the later Reports of the New York Insurance Commissioner, showing the "amount of business" of the

MUTUAL BENEFIT
LIFE INSURANCE COMPANY,

to be the *largest*, the "expenses of management" the *smallest*, the "ratio of Assets to Liabilities," or the *security* furnished to its members, the *largest* of any like institution in the country.

Premiums received in 1864	$3,089,072
" " " 1865	3,020,087
Ratio of expenses to premiums rec'd in '64	12.96
" " " " " " '65	12.16
Ratio of assets to liabilities, Jan. 1, 1865	111.56

The inevitable conclusion from these official facts, is that the

MUTUAL BENEFIT LIFE
Insurance Company
IS THE BEST AND THE CHEAPEST.

Because its NET ASSETS are proportionably LARGER than those of any other Life Insurance Company in the United States.

Because its "Managing Expenses" are LESS, and it has a LARGER SURPLUS to divide among its members than any Company in the United States.

QUERY. Will some one inform the public of that mysterious process by which a Company with a surplus proportionably *much less*, and expenses *very much larger* than another, can yet divide *more* to its members, and insure them at *less cost?* How is it done? Where does the money come from?

Every intelligent man will see at once that it *cannot be done*. Yet we have Agents among us that make this their boast.

Any one disposed or intending to insure can be furnished with the requisite information by applying to

HENRY A. YEATON, Agent.

Valuable Real Estate
AT AUCTION.
(By virtue of a license from the Hon. Judge of Probate for the County of Rockingham.)

On TUESDAY, April 17, at 12 o'clk M., on the premises.

The Real Estate of the late CHARLES W. WALKER, of Portsmouth, deceased. Said property will be sold in three separate lots or parcels, viz:

The First Lot to consist of the well known MARKET STREET HOUSE, situated on the corner of Market and Green streets, with land connected therewith, bounded 69½ feet more or less on Market street, 102 feet more or less on Green street, 106 feet more or less by Lot No. 2, 107 feet more or less by land formerly of James Pickering, land of James Junkins and others; the lot containing 8929 feet, more or less.

The Second Lot consists of land on Green street bounded 38 feet more or less on Green street, 110 feet more or less by land of Estate of George Chesley, 35 feet more or less by land formerly of James Pickering and others, and 106 feet more or less by lot No. 1; the whole lot containing 3926 feet, more or less.

The Third Lot to consist of the Stable lot, so called, on Green street, with the stable and Office building thereon. The lot is bounded southerly about 45 feet on said Green street, easterly about 72 feet on land of E. S. Wendell, northerly about 50 feet on railroad land, and westerly by Railroad land and adjoining cemetery; containing about 2710 feet. The Stable is 38 by 36 feet, and the Office-building 19 by 10 feet.

The above offers a rare chance for capitalists or others. The property is prominently situated on one of the main avenues of the city. The "MARKET STREET HOUSE" is large and well calculated, conveniently situated for a Hotel or large Boarding House, and has been occupied such for many years. It contains 19 rooms and attic, and also a Store. The Stable has been used, and is a good location for a Livery Stable.

If desirable, a portion of the purchase money can remain on a mortgage of the premises.

For further particulars inquire of J. M. EDMONDS, Portsmouth; C. W. STINSON, Kittery, Me., Guardian of the minor heirs, or of the subscriber.

JOSEPH P. MORSE.

MARCH WINDS.

Listen, Kitty, my darling!
Here by the fireside bright—
Do you know what the winds are saying,
Abroad in the gusty night,
Moaning under the windows,
Like the voice of a child that grieves—
Making the maples shiver,
And creak at the cottage eaves?

Listen, Kitty, my darling!
The winds are singing a song,
Of the Spring that is softly stealing
From sunnier lands along.
The sky-drops smile as they hear it,
A smile for the Spring's sweet sake;
And the sly little violets whisper:
"We hear; we are broad awake!"

No matter, Kitty, my darling!
Though the March winds drearily blow,
I am sure that the daisies are stirring
Down under the chattering snow.
In spite of the blustering weather
The crocus is budding again;
And the daffodils whisper together,
And wait for the April rain.

CORRECTION.—In the copy of the Loan bill, as it passed the House on Friday, furnished by the Associated Press on Saturday morning, the following clause ought to have been omitted:

"And provided that the bonds which may be disposed of elsewhere than in the United States may be made payable, both principal and interest, in the coin or currency of the country in which they are made payable, but shall not bear a rate of interest exceeding 5 per centum per annum."

SUFFERERS
From Dyspepsia
READ! REFLECT!! ACT!!!
TARRANT & CO
Gentlemen, I am a resident of Curacoa, and have often disposed to write to you concerning the real value of your SELTZER APERIENT as a remedy for indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.
For four or five years my wife has been sadly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Cabialis, of Curacoa, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.
I feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.
Trusting that you will give this publicity, and repeating my earnest gratitude and thanks,
I am very respectfully yours,
S. D. C. HENRIQUEZ,
Merchant, Curacoa, S. A,
New York, June 28th, 1865.
WE ASK
The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of
Dyspepsia, Heartburn, Sour Stomach, Sick Headache, Dizziness, Indigestion, Piles, Costiveness, Bilious Attacks, Liver Complaints, Rhematic Affections, &c.
Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your physician.

DUTCHESS NURSERIES
POUGHKEEPSIE, NEW YORK,
FERRIS & CAYWOOD, Proprietors.
We call the attention of our customers and the public to our stock of GRAPE VINES, which is larger than ever before. Having had over twenty years' experience in the management of Vineyards and the propagation of Vines, we have made this branch a specialty, and have been growing from bearing wood only, with constant care during the season, we think they will compare favorably with any others that are offered for sale.
Our stock of MONTGOMERY VINES is very large. This variety not being generally known, we will give a brief description: White, a seedling of the White Chasselas, an unparalled grower and bearer, clusters often weighing two pounds, with a mild subacid flavor. It is classed with the hardy grapes, but we protect it in winter as we do all other varieties in this part of the State.
Our stock of the various kinds of EVERGREENS and DECIDUOUS TREES is very large, and is offered at moderate price; and at very low rates by the quantity, to those who are laying out and improving their places, cemeteries, or public grounds, and to nurserymen. We challenge competition.

—DEALERS IN—
S. Vance's Submerged Well PUMP.
This unsurpassable invention, now being first introduced, will, it is believed, supersede all other Well Pumps now in use.
ITS ADVANTAGES.
FIRST, SIMPLICITY.—This Pump is composed of but three parts, and is so simple in its construction that any one can easily put it together.
SECOND, DURABILITY.—Its peculiar construction and the fact that it is always submerged combine to make it the most durable of all Pumps yet invented.
THIRD, NEVER FREEZES.—The valves are so constructed that when not in motion, they allow all the water above to pass down into the well, and thus prevent freezing.
FOURTH, POWER.—For the amount of power applied, this Pump excels anything known. It throws one-third part more water than ordinary pumps, and works so easily that even a child can pump without fatigue. In this way the greatest labor-saving pump now offered to the public.
FIFTH, IT IS INVALUABLE.—For a well pump it is invaluable, as all the water which is submerged consists of but three small pieces, and these galvanized. It can in no way corrode, consequently it brings up pure water at every stroke.
SIXTH, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to keep in use for years. No repairs at all are required. It is very light, and thus the cost of transportation is very small.
☞ Manufactured by S. VANCE & CO., No. 31 Liberty Street, Newburyport, and for sale in Portsmouth by the Sole Agents for N. H.,
ISRAEL MARDEN & CO.,

☞ We are permitted to refer to Mr. MONROE HOLMES and to Mr. FRANK W. MILLER of the Daily Chronicle, who have these new Pumps in use on their premises,—for testimonyj to their excellence.

" Injection, " " $2, " " $5.
The Cherokee "*Cure*," "*Remedy*," and "*Injection*," are to be found in all well regulated drug stores, and are recommended by physicians and druggists all over the world, for their intrinsic worth and merit. Some unprincipled dealers, however, try to deceive their customers, by selling cheap and worthless compounds,—in order to make money—in place of the genuine article. If the druggists will not buy them for you, write to us, and we will send them to you by express, securely packed and free from observation. We treat all diseases to which the human system is subject, and will be pleased to receive full and explicit statements from those who have failed to receive relief heretofore. Ladies or gentlemen can address us in *perfect confidence*. We desire to send our thirty-two page pamphlet free to every lady and gentleman in the land. Address all letters for pamphlets, medicines, or advice, to the sole proprietor,

DIVISION OF TEXAS.—A San Antonio correspondent of the New York Post, writing about the Texas State Convention, says the idea of dividing the State has many supporters, and perhaps the entering wedge has already been driven between Eastern and Western Texas. The basis of representation is now under discussion in the Convention, some of the members desiring it to embrace the whole population, others the white men only. It will evidently be to the interest of the eastern and southeastern counties to have the negroes counted; but the western and northeastern counties will probably oppose it, as their interest is only to count the whites. The argument will be—why should the vote of a white man who lives in a county where there are a large number of negroes, count for more than that of one who lives where there are but few? It is the same argument which Northern men advance against counting negroes in the federal representation.

MORTALITY AMONG LIQUOR SELLERS. The National Provident Institution, an English life insurance company, has discontinued issuing policies to publicans, owing to the high rate of mortality among that class of citizens. The statistics of its own actuary led to this action, which is still further justified by the annual report of the Manchester and Salford Licensed Victuallers Association. This body numbers 481 members, and the loss by death last year was 39, being a death-rate of about 80 in 1000, while the death-rate for the whole population of the country is 18, and for trades considered unhealthy, such as shoemakers, tailors, &c., only 15 in 1000. These figures speak for themselves, and show that the liquor traffic, like Saturn, swallows its own children. This state of things has been noticed before. The evidence before a parliamentary committee in 1853, brought out the great mortality of liquor sellers, and upward of ten years ago one of the Registrar General's annual reports contained statistical data showing that at every decennial period, reckoning from 25 years, the mortality among drink sellers was half as much again as the average of all classes collectively of men above 20 years of age.

THE LIGHT OF THE WORLD.
DR. MAGGIEL'S
PILLS AND SALVE

These Life-giving remedies are now, for the first time, given publicly to the world. For over a quarter of a century of private practice the ingredients in these

Life-giving Pills!

Have been used with the greatest success. Their mission is not only to prevent disease, but to cure. They search out the various maladies by which the patient is suffering, and re-invigorate the failing system. To the aged and infirm a few doses of these valuable PILLS will prove to be

A Very Fountain of Youth,

For in every case they add new life and vitality, and restore the wanting energies to their pristine state. To the young and middle-aged, they will prove most invaluable, as a ready, specific, and sterling medicine. Here is a dream realized, that Ponce-de-Leon sought for three hundred years ago, and never found. He looked for a fountain that would restore the old to youth and make youth ever

AN ETERNAL SPRING!

It was left for this day and hour to realize the dream, and show, in one glorious fact, the magic that made it fair.

These Famous Remedies

Cannot stay the flight of years, but they can force back, and hold aloof, diseases that might triumph over the aged and the young. Let none hesitate then, but seize the favorable opportunity that offers. When taken as prescribed—

FOR BILIOUS DISORDERS

Nothing can be more productive of cure than these Pills. Their almost magic influence is felt at once; and the usual concomitants of this most distressing disease are removed. These remedies are made from the purest

VEGETABLE COMPOUNDS.

They will not harm the most delicate female, and can be given with good effect in prescribed doses to the youngest babe.

For Cutaneous Disorders

And all eruptions of the skin, the SALVE is most invaluable. It does not heal externally alone, but penetrates with the most searching effects to the very root of the evil.

DR. MAGGIEL'S PILLS

Invariably Cure the Following Diseases.

VINELAND
FARM AND FRUIT LANDS,
In a mild and healthful climate. Thirty miles south of Philadelphia by Railroad, in New Jersey, on the same line of latitude as Baltimore, Md.
The soil is rich and *productive*, varying from a clay to a sandy loam, suitable for Wheat, Grass Corn, Tobacco, Fruits and Vegetables. This is a *great fruit country*. Five hundred Vineyards and Orchards have been planted out by experienced fruit-growers. Grapes, Peaches, Pears, etc., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste*. It has increased the most of any place within the past three years. Churches, Stores, Schools, Academies, Societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are constantly setting. Hundreds of new houses are being constructed. Price of Farm land twenty acre lots and upward, $25 per acre. Five and ten acre and Village lots for sale.
Fruit and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Yards, Manufactories, Foundries, Stores and the like; and Steam Power, with room, can be rented. For persons who desire mild, healthful climate, and a good soil, in a country beautifully improved, abounding in fruits, and possessing all other social privileges, in the heart of civilization, it is worthy of a visit.
Letters answered, and the Vineland Rural, a paper giving full information, and containing Reports of Solon Robinson, sent to applicants.
Address CHAS. K. LANDIS, Vineland P. O., Landis township, New Jersey.
From Report of Solon Robinson, Agricultural Editor of The Tribune: *It is one of the most extensive fruit growing establishments in the country, and a remarkable condition far pleasant farming that we know of this side of the Western Prairies.* m1—dawtu

FRIDAY, MARCH 30, 1866.

☞ We notice that another New York Insurance Company has succumbed. We believe the Company was not among the fifty or sixty companies doing business here. Cheap rates and insuring of large amounts have been followed by heavy losses, and weak institutions of course have had to suspend. A meeting of Insurance officers in New York was recently held, and it was voted, with very slight opposition, that rates of insurance must be advanced. The day of cheap insurance and unhealthy competition for business seems to be about over, and a few more failures will lead policy-holders to effect insurance only with sound companies, paying them a fair remuneration for the risk incurred. Too many persons are content with a good-looking policy, with a revenue stamp affixed, the office located far enough off not to be known by any one here; and paying the premium, place it away in a fancied security of safe insurance. Such policies are generally good till a fire happens, or perhaps the company fails, when the victim regrets that he had not paid a quarter per cent. more, and effected insurance with some standard Company, whose record would justify the premium charged by their agents.

In Congress, on Wednesday, the Senate only passed the resolution of adjournment on account of Senator Foote's death. On Thursday Mr. Poland would formally announce the death, the Senate would adjourn,—and thus the action on the President's Veto and the Rights Bill will probably go over to Monday.

The House, by a vote of 59 to 72, refused to pass the Bankrupt Bill; but as this is a small vote, it may be reversed.

Perley says: The Senate will not transact any business until Monday, and meanwhile Senators Nye, Wilson, Stewart and Morrill have left for Connecticut, to aid in the political campaign there.

☞ A New Jersey C. C. (Conservative Copper) delegation waited on President Johnson on Wednesday. In his reply to their address, he said:

"My line of policy is, I think, unmistakable, and I have advanced too far in life to make *any retrograde* movement. I can take no step backward, and I hope you will find that the generous confidence you have given me has not been misplaced. I can say no more, but thank you, gentlemen."

Is he in his dotage? He is hardly old enough for that. But is he insane? Perhaps so, on some subjects. It would be charitable to think so. By his own statement, he is *too old to learn* anything.

Gold, Thursday, 127 3-4.

— Gen. Canby has issued an order recognizing George Clark, *President* of the Baard of Aldermen, as Mayor *pro tempore* of New Orleans.

— Gen. Clem Evans of the rebel army, who commanded Gordon's old division when Lee surrendered, has turned his attention to religious preaching in Cass county, Georgia.

— A negro in Paris, Ky., who had outraged a white child ten years old, and afterwards murdered her, was on Wednesday evening taken by the citizens from the jail and hung.

— A Toronto dispatch says "orders have been issued to muster out the surplus volunteers over 10,000, which number will be kept as a standing army of observation on the frontier.

— About 7 o'clock on Wednesday evening a terrible tornado swept over the southern part of Montgomery county, near Ladoga, Ind., destroying a number of houses, etc. Four persons were killed, and twenty or more crushed and bruised.

— The steam tugboat Phenix, which was being towed by the steamer Seagull to New York, sank in a gale on the 25th inst. off Cape May. The officers were taken on board the Seagull. No loss of any account resulted.

— The New York Herald's Paris letter has the text of the secret convention between Napoleon and Maximilian, at the City of Mexico, on the 29th of September last, fixing the pay and position of French agents in Mexico—the number of whom is large—for five years from the above date.

— In New York, on Wednesday evening, a fire broke out in the premises occupied by Dr. Van Fisenberg, the oculist, No. 816 Broadway, resulting in the almost total destruction of the second and third floors, causing a damage of nearly $60,000 to the furniture and building. All covered by insurance in city companies.

— The Provincetown fishermen are hesitating about refitting for the next season. They held their last season's catch of codfish over the winter, and have now $100,000 worth of fish in store. With the repeal of the reciprocity treaty, and the probable loss of the bounty, they find their business seriously crippled.

American Baronets.—Josiah Pierce, Jr., of Portland, has been appointed to the order of St. Anne of Russia, of which country he is now a resident. The only other American who has received the badge of that order was Admiral Tate, son of Capt. George Tate of Westbrook, Me.,—born in London in 1744, but came to Portland with his father when about seven years old. He entered the Russian Naval Service before the revolution, and was promoted to the rank of Lieutenant by Catherine II. in 1770. He rose rapidly through various grades until 1783 he was promoted by the same sovereign to the office of Rear Admiral, afterwards to Vice Admiral, and received at different times not only the order of St. Anne, but of St. Waldemar, St. Alexander Newski and St. John, all for distinguished merit.

The first English order of Knighthood bestowed upon an American, was granted to Sir George Downing, who was Knighted by Charles II. and in 1663 made a baronet. He was son of Emmanuel Downing of Salem, Mass., a graduate in the first class that issued from Harvard College, in 1642; went to England, became a chaplain in one of Cromwell's regiments, was appointed his ambassador to Holland, and was an able statesman. On the restoration, he made himself useful to Charles, was sent by him ambassador to Holland, received from him the distinctions above noticed and died in 1684, highly honored.

There were two other persons, graduates of Harvard College, Sir John Davie and Sir John Stuart, the first graduated in 1681 the other in 1734, who received the order of Knighthood. I do not know the place of their birth, but as there were several persons of the name of Davie in Boston prior to that time, it is presumed that the baronet of that name was a native of Boston.

The next title of the kind granted to an American, was to Sir Wm. Phipps, by James II. in 1687, for his successful enterprise in recovering and carrying to England £600,000 St. in plate, jewels, &c., from the wreck of a Spanish ship on the coast of Hispaniola. He was son of a ship-carpenter and brought up to the same business, born at Woolwich, Me., in 1651, and died Governor of Massachusetts in 1694; he left no children to inherit the title.

The next in order of American Knights was Sir Wm. Pepperrell, created a baronet in 1745, for his services in the capture of Louisburg. He was born in Kittery, Me., in 1696. Son of an enterprising fisherman, and himself a merchant and partner with his father, he rose to be Chief Justice of the Common Pleas Court in Maine, Commander of the expedition to Cape Breton, a baronet, a member of the Council for 32 years and Lt-General; he died in 1759, the wealthiest man in Maine, without a son to inherit his title; but it was subsequently conferred upon Wm. Sparhawk, the son of his daughter, who took the name of Pepperrell, and became a loyalist in the early days of the Revolution.

Another and more singular case than either of the others, was that of Sir John Bernard, son of Gov. Bernard of Massachusetts, the successor of Gov. Pownal in 1760. He was a Whig while all the other members of his family were loyalists, and remained in America during the revolution. His father had large estates in Maine, among them Mt. Desert and Moose Head Island, now Eastport, which were confiscated in 1778. John had an agency over these lands, and during the revolution he resided at Bath, Machias and at Pleasant Point near Eastport, where he attempted to make a farm. He became quite poor, and after the war, Massachusetts restored to him a part of Mt. Desert. He succeeded to his father's title on his death in 1779, the father having been created a baronet in 1767. John dying childless in 1806, was succeeded by his brother Thomas, a graduate of Harvard College in 1767.

I will notice the remaining persons in this country, who have received the honor of knighthood. These were Sir John Wentworth, son of Mark Hunking Wentworth, of Portsmouth, N. H., where he was born in 1736. He graduated at Harvard College in 1755. In 1767, he was appointed Governor of N. H., and retained the office until he abandoned the country in 1775. In 1792 he was appointed Lt.-Gov. of Nova Scotia and in 1795 created a baronet. He died in office at Halifax in 1820.

Another was Sir Samuel Auchmuty, son of Rev. Samuel Auchmuty, Rector of Trinity Church, New York; where he was born in 1758. On the breaking out of the revolution he joined Sir William Howe's army, became by various promotions Lt.-General, and was made Grand Cross of the Order of the Bath. He died in 1822.

Sir William Johnson, though born in Ireland, early became a citizen of New York, and in the war of 1755 led successfully the colonial army during the French war. For his valuable services he received large grants of land and a baronetcy. He died in 1774, and his title is borne in Canada by his grandson Sir Adam Gordon Johnson.

And last is that noble descendant of old Tristram Coffin, head of an extensive race in America, Sir Isaac Coffin, a native of Boston. He entered the British Navy before the revolution, became Admiral of the Blue, was created a baronet in 1804, Vice Admiral, and was a member of Parliament. He died without issue and did not forget the humble spot of his ancestors; he gave to Nantucket $10,000 for her public schools.

Thus it will be seen that New England has contributed more names to this distinguished honor than any other portion of our country, and that Maine rises predominant over every other in contributing from her native element Phipps, Pepperrell and Pierce—and from her adopted sons, Tate and Bernard. And it is remarkable that not one of these deceased persons of Maine left a son to inherit his title. We trust that the living member, who bears the order of St. Anne, our fellow citizen, will transmit his title and his merits to a remote posterity.

It may be proper to define the distinction between the titles referred to in the above article. A Baronet is of a higher degree than a Knight and ranks next after the Peerage, the lower order of which is a Baron, and he is entitled to prefix Sir to his name and add to it Bart., or Baronet, as Sir Wm. Pepperrell, Bart. and may become a Knight at his option. Sir Nicholas Bacon was created the first Baronet by James I, in 1611. A Knight is next in the order of precedence to a Baronet and is entitled to prefix the Sir to his name, but without any addition, except in cases of the high order of Knights—the Garter, Thistle, &c., when the letters K. G., K. T., &c., are always added when their title is given, and persons receiving these honors rank above a Baronet. But in the case of the Russian orders as of St. Alexander, Newski, St. Anne &c., their possessors are not entitled to prefix the Sir to ther names; they are not Knights properly so-called, that rank not existing in Russia. Those honors are granted by the Sovereign to mark his favor and to confer a certain distinction upon the recipients, so that neither Admiral Tate nor Mr. Pierce were or are entitled to be addressed as Sir. Sir Wm. Pepperrell, Sir John Wentworth and Sir Isaac Coffin were Baronets; Sir Wm. Phipps simply a Knight.—*Portland Press.* "W".

☞ Schooner Lady Franklin, at Gloucester, picked up at sea schooner Maggie McLane, of St. Johns, lumber-laden and deserted; and put a crew of four men aboard and took her in tow. During the night a violent snow storm set in, and orders were given to shorten sail on board both vessels. About half an hour afterwards it was found that the bawser had been cast off from the wreck, and the Lady Franklin was hove to until morning, when they ran down to the wreck and found her boat gone, and no vestige of the men they had put on board, and they were obliged to come in without them. Why the men should leave the wreck is a mystery. The vessel could not capsize or sink, and it was not more unpleasant to be on board of her than to be exposed in a boat on the open sea during a driving snow-storm. One of the missing men (who may have made port elsewhere, or been picked up by some other vessel,) is Andrew Perkins of York.

☞ Some nine years ago a young man named William Todd, of Raymond, left his home for California, going overland across the plains, leaving behind a widowed mother and two brothers. Nothing was ever heard of him after he started across the plains, and it was supposed that he lost his life on the journey. A few weeks ago, however, he entered his native town, only to find his mother and brothers in their graves, the homestead in strange hands and himself unrecognized. He had settled in Upper California, but all the letters he had written failed to reach their destination, and he knew nothing of the changes that had occurred in his birth-place till his arrival. After remaining a few days, he started on his return to California.—*Mirror.*

☞ A Fortress Monroe dispatch says Calvin Pepper has been ordered by Gen. Terry to refund and turn over the money collected by him from the freedmen of that district, to a commissioned officer authorized to receive the same. Pepper has been permitted to return to Norfolk, but is prohibited from visiting the Peninsula, or engaging in any colonization scheme.

— In Quebec they are so afraid of the Fenians, that the gates of the lower town are regularly closed every night at a certain hour, and after that, no person can enter. Any one in the suburbs requiring a physician can only get him by sending a message to the gates, where other messengers are stationed to be in readiness to attend to demands of this kind.

— He is the happiest who does the most to make others happy. The inventor of Herrick Allen's Gold Medal Saleratus must be the happiest man in existence, for we hazard nothing in saying, that the use of the Gold Medal Saleratus cannot fail to make a happy household. Our better-half says she does not fear of our ever frowning, as long as she can get the genuine Herrick Allen's. We say success to the inventor, and if everybody knew how good it is, no other would be used. A good many of our Merchants have it.—Their depot is 112 Liberty Street, New York. 66

Lodi Manufacturing Company's POUDRETTE.

AGENT FOR NEW HAMPSHIRE,

J. F. SHORES, Jr.,

No. 38 Market Street (Up Stairs.)

The advantages of Poudrette as a manure may be stated as follows:

First, its Economy. The *cost* of the manure compared with its *effects* is less than that of *any other fertilizer*. It can be bought and applied for the same money which it would cost only to apply firm-yard manure. It is portable, contains great strength in a small compass, and needs *no extra care in its application*; the closer its contact with the seed the better and quicker it works. $4.50 worth at our retail price (or two barrels) will manure an acre of corn in the hill, add from one-quarter to one-third to the product, and will *mature* the crop from two to three weeks earlier. *No worms* will attack the hill where the Poudrette is placed. *No seeds of weeds will germinate*, and crows are very shy of plucking it out of the hill. On Corn, Tobacco and Garden Vegetables it has no equal. While the leaf and growth of the Tobacco plant is large, it has not the coarseness of fibre which is produced by Peruvian Guano, and it has taken the lead for this crop in Connecticut, and has begun to be appreciated in Maryland.

It is famous for producing larger and finer potatoes than anything else, and the stories told about Onions, their large growth, &c., are almost beyond credence. Flowers and plants are much improved by an application of Poudrette.

Another great consideration is the season of the year when the corn is planted. It is a time when every spring crop must be put in, and the corn not only planted, but up and grown sufficiently for the last hoeing and planting, before the commencement of grain and hay harvest.—The celerity and dispatch with which a large crop of corn is put in and poudretted, and the rapid growth and consequently the early opportunity of working among it—the small chance for weeds, owing to the shade it affords, and the fact that the *Poudrette, unlike other manures, contains no seed that can germinate*, and consequently less trouble required to attend it—are all important advantages. The corn will ripen two weeks earlier, and the yield will be much heavier.

The same remarks apply to Sorghum and Broom Corn.

For grass, where it is about to be laid down to lawn, or for several years' a top dressing of Poudrette will be found invaluable.

We wish to remark in this place, that Poudrette is not like some quack medicines, supposed to cure all kinds of diseases. It must be used with discretion, and a reasonable quantity will produce a reasonable effect.

Poudrette will answer no better than other manures on wet, sour, undrained land, or in seasons of drought. In other words, Poudrette is an invaluable substitute for barn-yard manure, and can be used with great profit and advantage upon most spring crops, but it will neither work miracles, drain the land it is put upon, nor cause rain to fall in time of drought.

Price per Barrel $2.25—delivered at any part of the city, or at any depot or wharf.

Important Notice!—When Poudrette is spoken of, we mean "LODI POUDRETTE," which has now stood the test of twenty-six years' trial; and when buying, *be sure and get that kind!*

A descriptive pamphlet may be had on application. mh29

To the Honorable Judge of Probate for the County of Rockingham:

Respectfully represents SUSAN F. BOWLES, Administratrix of the estate of JAMES W. BOWLES, late of Portsmouth, in said County, deceased; that the personal estate of the said deceased is not sufficient to pay the demands against the same; that the said deceased died seized of the right of redeeming certain mortgaged real estate, situate in said Portsmouth, bounded and described as follows: North by Middle street, East by land of Lewis E. Smith, South by land of Seth W. Tripp and William Halsted, and West by land of Albert Hays

Wherefore she prays she may be licensed to sell at public auction the right of redeeming said mortgaged estate, subject to any and all rights of Dower and of Homestead in the same. Also that she may have license to sell the reversion in said Dower and Homestead.

Dated the 19th day of March, A. D. 1866.

SUSAN F. BOWLES.

ROCKINGHAM, SS. Probate Court at Portsmouth in said County, March 20th, A. D. 1866.

Upon the foregoing Petition it is *Ordered*, that a hearing be had thereon at a Court of Probate to be holden at Portsmouth in said County, on the second Tuesday of May next, at ten o'clock A. M.; and that the Petitioner notify all persons concerned or interested therein to appear at said time and place, and show cause if any they have, why the prayer of said petition should not be granted, by causing said petition and this order to be published three weeks successively in the Daily Morning Chronicle, a newspaper printed at Portsmouth in said County, the last publication whereof to be at least thirty days prior to said Court.

By order of the Judge.

Applied externally, cures felons, boils and old sores, severe burns and scalds, cuts, bruises and sprains, swelled joints, ringworm and tetter, broken breasts, frosted feet and chilblains, toothache, pain in the face, neuralgia and rheumatism. It is a sure Relief for Ague and Chills and Fever. M1 dawlm

Perry's Moth and Freckle Lotion.

☞ Chloasma, or Mothpatch, (also called Liver-spot,) and Lentigo, or freckles, are often very annoying, particularly to ladies of light complexion, for the discolored spots show more plainly on the face of a blonde than of a brunette; but they greatly mar the beauty of either and any preparation that will effectually remove them, *without injuring the texture or color of the skin*, is certainly a desideratum. Dr. B. C. Perry, who has made diseases of the skin a speciality, has discovered a remedy for these discolorations, which is at once prompt, infallible and harmless.

Prepared by B. C. PERRY, Dermatologist, No. 49 Bond Street, New York, and for sale by all druggists; price $2 per bottle. Call for PERRY'S MOTH & FRECKLE LOTION.

Lyon's Periodical Drops!

THE GREAT FEMALE REMEDY FOR IRREGULARITIES.

These Drops are a scientifically compounded fluid preparation, and better than any Pills, Powders or Nostrums. Being liquid, their action is direct and positive, rendering them a reliable, speedy and certain specific for the cure of all obstructions and suppression of nature. Their popularity is indicated by the fact that over 100,000 bottles are annually sold and consumed by the ladies of the United States, every one of whom speak in the strongest terms of praise of their great merits. They are rapidly taking the place of every other female Remedy, and are considered by all who know aught of them, as the surest, safest and most infallible preparation in the world, for the cure of all female complaints, the removal of all obstructions of nature, and the promotion of health, regularity and strength. Explicit directions attending when they may be used, and explaining when and why they should not, nor could not be used without producing effects contrary to nature's chosen law, will be found carefully folded around each bottle, with the written signature of John L. Lyon, without which none are genuine. Price $1.50.

Prepared by Dr. JOHN L. LYON, 195 Chapel Street, New Haven, Conn., who can be consulted either personally, or by letter (enclosing stamp,) concerning all private diseases and female weaknesses. **Price $1.50 per bottle.**

Local.

☞ At the Annual Meeting of School District No. 1, on Wednesday evening, John H. Bailey was chosen Moderator; Wm. C. Hatch, Clerk; and Horace Webster and Mercer M. Goodrich members of the District Committee for the next three years.

☞ At the Annual Meeting of School District No. 2, on Wednesday, Rev. James DeNormandie was elected Chairman; and Jonathan Dearborn and Samuel W. Moses members of the Committee for three years.

POLICE COURT, March 29th.—The session of the Court was held in the County Court room and the attendance was very large, in anticipation of the trial of Moses Noble, Wentworth Manson and Richard Townsend for the larceny of rigging, anchors, sails, &c., from different vessels in the harbor, and at different times.

The first case was that of Almira Robinson for keeping a disorderly house, in which a *nol pros* was entered.

Asa Wentworth was next tried for the same offence. Several of the Police testified that Wentworth kept a saloon at the corner of Daniel and Penhallow streets, where liquor was sold, and that the house was kept open until late hours of the night for visitors of a bad character,—that the throwing of dice and playing of dominoes for the drinks was of common occurrence there, &c., &c. There was no testimony for the defense. Wentworth was bound over in the sum of $100 for his appearance at the S. J. Court at Exeter on the 10th of next month.

The case of Moses Noble was next called, and his attorney, Albert R. Hatch, Esq., moved for a continuance until Saturday at 10 o'clock, inasmuch as his client was not prepared for immediate trial. John S. H. Frink, for the prosecution, stated that he was ready for trial and had several witnesses in court. Judge Odell did not see any impropriety in the continuance, and it was granted. The cases of Manson and Townsend were also continued to the same time, in the County Court Room.

ALWAYS IN TROUBLE.—Edwin H. Goodwin, a soldier at the Fort and resident of this city, known to the police as the "Goodwin boy," was on Friday arrested at the Fort by U. S. Deputy Marshal Morse on a complaint made by City Marshal Kent before U. S. Commissioner Hackett, for the crime of burglary and larceny.—The sutler's store at the Fort was entered a few nights since and robbed. Goodwin was suspected, and has not only confessed but restored most of the property. He had an examination before the Commissioner on Friday, and was sent to jail until the next term of the U. S. Court in May. He is the same person who attempted to garrote a man on Portsmouth Bridge some four months since.

☞ The many friends of Capt. Geo. A. Gerrish, formerly of the 1st N. H. Battery, will regret to hear that he is seriously ill at the residence of his father-in-law, Dr. David Kimball, in this city. Capt. Gerrish was a popular and gallant officer, and was severely wounded, captured, and for a short time confined in Libby Prison—and his perhaps fatal illness is attributed to the excitements and exposures of war.

☞ The Philharmonic Concert on Fast Night will be the best entertainment yet given by this Society. Besides a good selection of sublime choruses and sprightly glees, there will be songs, duets, quartets (two for male voices), &c., making up an agreeable variety.

Members are notified of a special Rehearsal on Monday evening; also Wednesday evening.

PISTOL SHOOTING.—Much inquiry was made yesterday about the report of some pistol shots, heard about twelve o'clock on Wednesday night. The daily record at the Marshal's office will explain it. "Officer Burns was attacked at midnight by a ferocious dog. Burns discharged his pistol at him ineffectually."

THE ROBBERY OF A. F. CRAIG.—It will be recollected that on the night of the 23d of last August, the above named gentleman was knocked down and robbed of $45, on the Portsmouth Bridge. Yesterday City Marshal Kent and Officer Johnson arrested Edwin H. Goodwin, John S. Banks, and George A. Merrill, suspecting that they were the guilty parties. The officers think they have the persons who committed the robbery.

☞ We see by the Boston papers that 25 shares of the capital stock of the American Peat Company were sold last Saturday at auction for $47.25 per share. This stock was sold last September in this city for $25 per share. Comment is unnecessary.

☞ New Orleans dates to the 28th of March state that Government cotton agents on the Red river are clearing out cotton and it is beginning to come in again from plantations. The Provost Marshal's office is to be abolished. Crevasses are feared throughout the State.

NEW HAMPSHIRE ITEMS.

—— One of the New Hampshire railroads is about to adopt the following ticket system, with a view of insuring a correct return of all fares taken on board the trains. Hereafter a charge of twenty cents extra will be made upon all fares paid in the cars, and the passengers so paying will receive a check from the conductor entitling him to a return of that amount upon its presentation at any ticket office named upon the ticket.

—— The N. H. Historical Society has received, through ex-President Pierce, the "Records in the Court of Sessions" in the Province of New Hampshire, from 1692 to 1704.

☞ There will be a total eclipse of the moon this evening, March 30. It begins at fifty-three minutes past 9 o'clock, is at its total at fifty-nine minutes past ten, and begins to disappear at thirty-nine minutes past twelve. It is visible throughout the United States.

— H. L. Richardson, Esq., of the firm of Messrs. Page, Richardson & Co., of Boston, died suddenly of congestion of the lungs in New York city on Wednesday afternoon. Mr. Richardson was a widely known and highly esteemed merchant, and his decease will be deeply regretted by the mercantile community. He was a native of Bath, Me., and a graduate of Bowdoin College. His age was 46 years.

— An adultery and divorce case now before the Chicago courts has a very humorous feature about it. Mr. Willis, the defendant, is one of twin brothers, partners in business, and the resemblance they bear to each other is so striking that the lady who is complicated in the crime finds herself unable to identify the real Dromio.

— Washington specials say Secretary McCulloch has stated that the May interest due on Five-Twenties would be paid early in April. The amount of gold required is $22,000,000.

— If half a loaf be better than no bread, does it follow that a whole Loafer is any better bred?

— A Physician, in company with others of the profession, thus boasted: "I was the first to discover the Asiatic cholera, and communicate it to the public."

DENTAL NOTICE!
No. 60 Congress Street.
Having adopted the C. O. D. system of doing business, **Dr. C. H. GODALL**, informs his patients and the public that he now inserts whole sets of block teeth on VULCANITE BASE for $20.00 each (upper and lower,) and warrants them as good and serviceable as sets on GOLD, which cost more than double the above.
He also keeps a fresh supply of PURE NITROUS OXYDE GAS to answer the numerous calls for this popular anæsthetic; and administers PURE ETHER, when desirable.
All other operations in Dentistry performed at reasonable remuneration. mch14

Important.
DR. STEVENS, No 5 Daniel Street, would give notice that he has REDUCED the price of Performing Operations of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.
He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite alone, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the teeth. mh12

GEORGE F. WEED,
S-u-r-g-e-o-n D-e-n-t-i-s-t,
FIRST ASSISTANT in the Office of DR. STEVENS, No. 5 DANIEL STREET.
DR. WEED can be found at his place of business at all hours of the day and night, for the performance of any of the operations that come within the call of his profession.

Dr. A. P. STEVENS, No. 5 Daniel St., makes the saving of DISCARDED and painful front teeth, a specialty in his business. He also successfully restores to their natural shape broken or badly decayed teeth, by building out corners and sides with PURE GOLD. (In many cases teeth so restored are as strong as any of their brother members, and in all cases are rendered eminently useful for a long series of years.) Diseased Gums, in all stages, treated, and in a very large majority of cases entire success attained.
Charges for such operations necessarily high, but nothing in comparison to the value of the Teeth. mch14

WHICH IS THE
Leading Life Insurance Comp'y
IN THE UNITED STATES?
Which is the Safest and the Cheapest?
The following figures are from the latest Reports of the New York Insurance Commissioner, showing the "amount of business" of the
MUTUAL BENEFIT
LIFE INSURANCE COMPANY,
to be the *largest*, the "expenses of management" the *smallest*, the "ratio of Assets to Liabilities," or the *security* furnished to its members, the *largest* of any life institution in the country.

Premiums received in 1864.....	$2,689,072
" " " " 1865.....	3,029,087
Ratio of expenses to premiums rec'd in '64..	12.94
" " " " " " '65..	12.16
Ratio of assets to liabilities, Jan. 1, 1865....	151.85

The inevitable conclusion from these official facts, is that the
MUTUAL BENEFIT LIFE
Insurance Company
IS THE BEST AND THE CHEAPEST.
Because its NET ASSETS are proportionably LARGER than those of any other Life Insurance Company in the United States.
Because its "Managing Expenses" are LESS, and it has a LARGER SURPLUS to divide among its members than any Company in the United States.
QERRY. Will some one inform the public of that mysterious process by which a Company with a surplus proportionably *much less*, and expenses *very much* larger than another, can yet divide *more* to its members, and insure them at *less cost?* How is it done? Where does the money come from?
Every intelligent man will see at once that it *cannot be done.* Yet we have Agents among us that make this their boast.
Any one disposed or intending to insure can be furnished with the requisite information by applying to
HENRY A. YEATON, Agent.

Valuable Real Estate
AT AUCTION.
(By virtue of a license from the Hon. Judge of Probate for the County of Rockingham)
On TUESDAY, April 17, at 12 o'clk M.,
on the premises.
The Real Estate of the late CHARLES W. WALKER, of Portsmouth, deceased. Said property will be sold in three separate lots or parcels, viz:
The First Lot to consist of the well known MARKET STREET HOUSE, situated on the corner of Market and Green streets, with land connected therewith, bounded 60½ feet more or less on Market street, 103 feet more or less on Green street, 105 feet more or less by Lot No. 2, 107 feet more or less by land formerly of James Pickering, land of James Junkins and others; the lot containing 8929 feet, more or less.
The Second Lot consists of land on Green street bounded 38 feet more or less on Green street, 110 feet more or less by land of Estate of George Chesley, 35 feet more or less by land formerly of James Pickering and others, and 105 feet more or less by lot No. 1; the whole lot containing 3926 feet, more or less.
The Third Lot to consist of the Stable lot, so called, on Green street, with the stable and Office-building thereon. The lot is bounded southerly about 45 feet on said Green street, easterly about 72 feet on land of E. S. Wendell, northerly about 50 feet on Railroad land, and westerly by Railroad land and adjoining cemetery; containing about 2710 feet. The Stable is 38 by 55 feet, and the Office-building 10 by 10 feet.
The above offers a rare chance for capitalists or others. The property is prominently situated on one of the main avenues of the city. The "MARKET STREET HOUSE" is large and well calculated, conveniently situated for a Hotel or large Boarding House, and has been occupied as such for many years. It contains 19 rooms and attic, and also a Store. The Stable has been used, and is a good location for a Livery Stable.
If desirable, a portion of the purchase money can remain on a mortgage of the premises.
For further particulars inquire of J. M. EDMONDS, Portsmouth; C. W. SPINSON, Kittery, Me., Guardian of the minor heirs, or of the subscriber.
Portsmouth, March 23, 1866. Auctioneer.

Morning Chronicle.

ACCIDENTS.—A French statistician has recently made some curious researches into the frequency and nature of accidents, in Europe and the United States. The proportion of fatal accidents to the population is given as follows: England 682 to the million, Norway 679, United States 575, Russia 201, Spain 202, Denmark 232. In England, violent contusions and such like injuries cause the majority of deaths. In the United States, as might have been expected from our frequent boiler and other explosions, burns and scalds are most frequently fatal. In most other countries, drowning is the cause of more fatal accidents than any other. Next come falls from some hight, and then burns, crushings and asphyxia.

In Russia and Sweden, the number of deaths resulting from drunkenness is greater than in any other country. Many more women are burned to death than men, a significant warning that the nature of a woman's dress requires particular care to guard against this liability. The statistics go to prove that accidental deaths increase everywhere more rapidly in proportion than does the population. Children constitute a large number of those thus destroyed, and the summer is a much more fatal period than winter. It also appears, singularly enough, that the ratio of accidents in Europe is greater in the country districts than in towns.

WESTERN FREIGHTS.—The popular agitation at the West in regard to railroad freights has had the effect to materially reduce the rates on some of the lines. The LaCrosse and Milwaukee road has reduced its rail and river freights from St. Paul to Milwaukee to 19 cents for grain, against 35 cents last spring and 28 cents last fall; and pound freights in proportion.

Important to the Afflicted.
DR. DOW continues to be consulted at his office, Nos. 7 and 9 ENDICOTT STREET, BOSTON, on all diseases of a PRIVATE OR DELICATE NATURE. By a long course of study and practical experience of unlimited extent, Dr. D. has now the gratification of presenting the unfortunate with remedies that have never, since he first introduced them, failed to cure the most alarming cases of GONORRHŒA AND SYPHILIS.
SEMINAL WEAKNESS.—Dr. Dow devotes a great part of his time to the treatment of those cases caused by a secret and solitary habit, which ruins the body and mind, unfitting the unfortunate individual for business or society. Patients who wish to remain under Dr. Dow's treatment a few days or weeks, will be furnished with pleasant rooms, and charges for board moderate.—Medicines sent to all parts of the country, with full directions for use, on receiving descriptions of your cases. Dr. Dow has also for sale the French Capotins, warranted the best preventive. Order by mail. Three or $1 and a red stamp.

Highly Important to Females
IN DELICATE HEALTH.
Dr. DOW, Physician and Surgeon, No. 7 Endicott Street, Boston, is consulted daily for all diseases incident to the female system. Dr. Dow has no doubt had greater experience in the cure of diseases of women than any other physician in Boston. Boarding accommodations for patients who may wish to remain a few days under his treatment. Dr. Dow, since 1845, having confined his whole attention to an office practice for the cure of Private Diseases and Female Complaints, acknowledges no superior in the United States.
N. B.—All letters must contain one dollar, or they will not be answered. Office hours from 8 A. M. to 9 P. M.

CERTAIN CURE
in all cases, or No Charges Made.
Among the physicians in Boston, none stands higher in the profession than the celebrated DR. DOW, No. 7 Endicott street. Those who need the service of an experienced physician and surgeon should give him a call.
P. S.—Dr. Dow imports and has for sale a new article, called the FRENCH SECRET. Order by mail. Two for $1 and a red stamp.
Boston, April 7, 1865. eod&w1

DR. J. W. CHANNING,
—THE GREAT—
Cancer, Humor and Tumor Doctor,

Formerly of Boston, and now of New Bedford, has arrived in PORTSMOUTH, and taken Rooms at the CITY HOTEL, where he will remain till April 24, or longer, if patients under treatment require it.
Dr. C. gives particular attention to the cure of CANCERS, which he removes without pain and without the use of the knife.—Do not say you cannot get any relief until you have tried his medicines, which will remove all humors, such as Cancers, Scrofula, Abscesses, White Swelling, Affections, Erysipelas, Salt Rheum, Inflammatory, Chronic, Mercurial and Syphilitic Rheumatism; Fever Sores, old and stubborn Ulcers and Sores of all kinds cured, whatever may have been the cause that produced them.
Dr. C. will give examinations and advice free on all diseases. Invalids of both sexes are respectfully invited to call and consult the Doctor.
N. B.—Certificates of cures may be had of him from all parts of the country. m22—dawtu2

SUFFERERS
From Dyspepsia
READ! REFLECT!! ACT!!!
TARRANT & CO
Gentlemen, I am a resident of Curacoa, and have often been disposed to write to you concerning the real value of your SELTZER APERIENT as a remedy for indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.
For four or five years my wife has been sadly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Cabialis, of Venezuela, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.
I feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.
Trusting that you will give this publicity, and repeating my earnest gratitude and thanks,
I am very respectfully yours,
S. D. C. HENRIQUER,
Merchant, Curacoa, S. A,
New York, June 28th, 1865.

WE ASK
The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of
Dyspepsia, Heartburn, Sour Stomach, Sick Headache, Dizziness, Indigestion, Piles, Costiveness, Bilious Attacks, Liver Complaints, Rheumatic Affections, &c.
Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your Physician.

DUTCHESS NURSERIES
POUGHKEEPSIE, NEW YORK,
FERRIS & CAYWOOD, Proprietors.
We call the attention of our customers and the public to our stock of GRAPE VINES, which is larger than ever before. Having had over twenty years' experience in the management of Vine Classes, we flatter ourselves that our present stock having been grown from bearing wood only, with constant care during the season, we think they will compare favorably with any others that are offered for sale.
Our stock of MONTGOMERY VINES is very large. This variety not being generally known, we will give a brief description: White, a seedling of the Vine Chasselas, very popular with grower and bearer, clusters often weighing two pounds, with a mild subacid flavor. It is classed with the hardy grapes, but we protect it in winter as we do all other varieties in this part of the State.
Our stock of the various kinds of EVERGREEN and DECIDUOUS TREES is very large, and is offered at moderate price; and at very low rates by the dozen to those who are laying out and improving their places, cemeteries, or public grounds, and to nurserymen. We challenge competition.

—DEALERS IN—
S. Vance's Submerged Well PUMP.
This unsurpassable invention, now being first introduced, will, it is believed, supersede all other Well Pumps now in use.
ITS ADVANTAGES.
FIRST, SIMPLICITY.—This Pump is composed of but three parts, and is so simple in its construction that any one can easily put it together.
SECOND, DURABILITY.—Its peculiar construction, and the fact that it is always submerged combine to make it the most durable of all pumps yet invented.
THIRD, NEVER FREEZES.—The valves are so constructed that, when not in motion, they allow all the water above to pass down into the well, and thus prevent freezing.
FOURTH, POWER.—For the amount of power applied, this Pump excels anything known. It throws more water than any other hand pump, and works so easily that even a child can pump without fatigue. It is in this way the greatest labor-saving pump now offered to the public.
FIFTH, IT IS INVALUABLE.—For a well pump it is invaluable, as all the iron which is submerged consists of but three small pieces, and these galvanized. It can in no way corrode, consequently it brings up pure water at every stroke.
SIXTH, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to keep in use for years. No repairs at all are needed. It is very light, and thus the cost of transportation is very small.
☞ Manufactured by S. VANCE & CO., No. 31 Liberty Street, Newburyport, and for sale in Portsmouth by the Sole Agents for N. H.,
ISRAEL MARDEN & CO.,
39 Congress Street.
☞ We are permitted to refer to Mr. MONROE HOLMES and to Mr. FRANK W. MILLER of the Daily Chronicle, who have these new Pumps in use on their premises,—for testimony to their excellence.

CHEROKEE CURE,
THE GREAT
INDIAN MEDICINE,
Cures all diseases caused by self-abuse, viz:—*Spermatorrhœa, Seminal Weakness, Night-Emissions, Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Pale Countenance, Insanity, Consumption*, and all diseases that follow as a sequence of youthful indiscretions.
This Cherokee Cure will restore health and vigor, stop the emissions, and effect a permanent cure after all other medicines have failed. Thirty-two page pamphlet sent in a sealed envelope, free to any address.
Price $2 per bottle, or three bottles for $5. Sold by all druggists, or will be sent, on receipt of price, by the sole proprietor,
Dr. W. R. MEEWIN, 37 Walker St., N. Y.

Cherokee Remedy,
Cures all Urinary Complaints, viz: *Gravel, Inflammation of the Bladder and Kidneys, Retention of Urine, Strictures of the Urethra, Dropsical Swellings, Brick Dust Deposits*, and all diseases that require a diuretic, and when used in conjunction with the
CHEROKEE INJECTION,
does not fail to cure *Gonorrhea, Gleet and all Mucous Discharges* in Male or Female, curing *recent cases in from one to three days*, and is especially recommended in those cases of *Fluor Albus or Whites in Females*. The two medicines used in conjunction will not fail to remove this disagreeable complaint, and in those cases where other medicines have been used without success.
Price, Remedy, One Bottle, $2, Three Bottles, $5.
" Injection, " " $3, " " $5.
The Cherokee "*Cure*," "*Remedy*," and "*Injection*" are to be found in all well regulated drug stores, and are recommended by physicians and druggists all over the world, for their intrinsic worth and merit. Some unprincipled dealers, however, try to deceive their customers, by selling them a worthless compound,—in order to make money—in place of these. *Be not deceived.* If the druggists will not buy them for you, write to us, and we will send them to you by express, securely packed and free from observation. We treat all diseases to which the human system is subject, and will be pleased to receive full and explicit statements from those who have failed to receive relief heretofore. Ladies or gentlemen can address us in *perfect confidence*. We desire to send our thirty-two page pamphlet free to every lady and gentleman in the land. Address all letters for pamphlets, medicines, or advice, to the sole proprietor,

Daily Morning Chronicle

VOL. XXVII. PORTSMOUTH, N. H. SATURDAY, MARCH 31, 1866. No. 77.

The Chronicle.

A GOOD HOAX.—The National Intelligencer contains a letter of President Johnson indorsing and praising the written refusal of a clerk in the Paymaster-General's office to pay his share of the expenses of the New Hampshire election. The clerk's letter is in reply to what purports to be a printed circular, franked by Mr. Rollins, a member of the House from New Hampshire.

It turns out that no such circular has been issued by the New Hampshire clerks at this election, and the one sent to the clerk was an old circular issued in 1864 to collect funds to help to elect Andrew Johnson Vice-President on the ticket with Abraham Lincoln. So the President in his haste to approve the obsequious refusal of a subordinate to help to elect a Union ticket in New Hampshire, rebukes the men who actually worked and voted and got in debt for himself.—*Philadelphia Press.*

— Mr. David Page of New Portland, Maine, aged about 60, fell dead on Tuesday morning, 20th inst. He was troubled with heart disease, and had been to Gardiner to consult a physician, and was on his way home.

— A contemporary remarks that—"Only two of our American poets have sung in praise of the month of March. They are two too many." Another sage remarks that, considering the winds that blow during this month, people are quite right in saying "mad as March 'ares."

— The work of raising the sunken vessels in the harbor of Sebastopol was continued during the past year. There have been already recovered thirty-six tons of copper, ninety tons of iron, 1200 cannon, 4000 balls, 12,000 cast-iron ballast pigs, one hundred chain cables, and a vast quantity of miscellaneous stores.

— The Tauton Gazette of Tuesday says: "Mr. George B. Whitters of this city is fortunate in the possession of a double-headed calf, born on Saturday, March 24. It lives and moves and has its being, or did yesterday, and being capable of playing double on its feed, should be in good condition."

AMERICAN AND FOREIGN PATENTS.
R. H. EDDY,
Solicitor of Patents,
Late Agent of the U. S. Patent Office, Washington, under the Act of 1857,
78 State Street, opposite Kilby Street,
BOSTON.
After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other Foreign countries. Caveats, Specifications, Bonds, Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of Patents or Inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.
The Agency is not only the largest in New England, but through it inventors have more facilities for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. Testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.
The immense practice of the subscriber during twenty years past, has enabled him to construct a vast collection of specifications and official decisions relative to patents.
These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.
All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.
TESTIMONIALS.
"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.
"I have no hesitation in assuring inventors that they cannot employ a person *more competent and trustworthy*, and more capable of putting their application in form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents.
Mr. R. H. Eddy has made for me THIRTEEN applications, on all but ONE of which patents have been granted, and that is now pending. Such unmistakable proof of great talent and ability on his part leads me to recommend *all* inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges." JOHN TAGGART
During eight months, the subscriber, in course of his large practice, made on *inter* rejected applications SIXTEEN APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents. **R. H. EDDY.**

SATURDAY, MARCH 31, 1866.

IMPORTANT LETTER FROM GOVERNOR BROWNLOW.—In a late letter to a member of Congress, after speaking of the rebel revival in Tennessee, he says:

Matters are growing worse—the reconstructed traitors openly cursing loyal men, and threatening them with shooting or hanging—boasting that they have the President on their side, while we feel that the President's policy is ruinous to us.

When I put the President in nomination at Baltimore for the Vice Presidency, I felt that he had so thoroughly committed himself to the Union cause, and had so thoroughly committed himself to the Union cause, and had been so badly treated by the rebels, it was impossible for him ever to get around to them again; but I give him up as lost to the Union party, and the man who is to head the rebels and Democrats. Every rebel in all this country, every McClellan man, and every ex-guerrilla chief, are loud and enthusiastic in praise of the President. The men who, but a few months since, were cursing him for an abolitionist and traitor, and wishing him executed, are now for executing all who dare oppose his policy or even doubt its success.

There is twice the amount of bitterness and intolerance in the South to-day toward the Union and everything Northern, that there was at the time of Lee's surrender. Abuse of Union men, of the radical majority in Congress, and self-assumed superiority of the Southern chivalry, have arisen to such a height that loyal men cannot travel on a steamboat or in a railroad car without being insulted. As it was during the war, so it is now—all concessions from the North, or from the majority in Congress, are regarded as evidences of fear. All the old presses of 1861 and many new ones, are in full blast, threatening Congress and the North with ultimate vengeance, and boasting of Southern prowess.

The most popular men in the largest portion of Tennessee to-day are the men most distinguished for their hostility to the North, and what they are pleased to term the radical Congress, and they are the class of men selected to fill offices, as the late county elections show. The same is true of the entire South, only to a greater extent.

Why, sir, many of them are expecting the President to disperse Congress with the bayonet, as Cromwell dispersed the Long Parliament. The Southern breast is being rapidly fired to deeds of valor; and all this, and more, as I believe, has been caused by the mistake of the President. His plan of trusting rebels with their State governments has ruined the prospects of the Union men, and they feel that there is no safety for them unless Congress shall choose to protect them. Even three days ago Gen. Thomas had to send troops into Marshall county, some sixty miles distant, to protect loyal men and freedmen who were fleeing for safety and coming to the city.

CONDITION OF SEAMEN.—A communication from the Secretary of the Treasury to Senator Grimes, Chairman of the Committee on Naval Affairs, suggests the necessity of legislation for the amelioration of the condition of seamen, which he deems more deplorable than that of any class, and addresses itself to the considerate, humane and patriotic. The man of-war's man, with a remarkable degree of patience, endurance, skill and obedience, has defects attributable to the neglect of the Government, which holds out to enlisted men so few inducements to excite his ambition, leaving him without mental or religious instruction, expectation of promotion or provisions for old age, or support of wife and children, to die at last in the hospital or Naval Asylum.

The Secretary recommends the establishment of a Home for disabled seamen, or an allowance of retired pay for twenty years' service, and the fitting up of school ships at the principal seaports, where they may be taught the rudiments of an English education and the duties of a sailor. Of these about sixty should each year be transferred to the Naval Academy. Those next in proficiency can become warrant officers, and the third grade can be made petty officers, and the remainder sailors.

This would open to apprentices the highest honors of the naval service and secure a better class of men. He says that but one-fifth under the present system are successful, and the remainder leave the service. He credits the failure of the law of 1837 to the anomaly of educating boys for the naval service without any promise of promotion. He expresses the belief that this prejudice is passing away, and that upon the legislation proposed depends our prosperity and welfare. These recommendations deserve attention; and the substance of them should be adopted.

☞ The funeral ceremonies of Senator Foot, in the Senate Chamber on Thursday, were of an imposing character, and the Hall was densely thronged. All the public Departments were closed at noon, by order of the President, as a token of respect to the memory of the deceased. On Friday morning his remains left Washington, in a special car, for Rutland, Vt.

—We have found the J. Monroe Taylor Gold Medal Soap so far superior to any other in the market, that we have long since ceased to wonder at its great popularity, in all that comprises superiority for the matron or the maid. No one soap in the market begins to possess one-half the washing qualities this soap has; the ladies all say it is the best they ever saw. Call on your grocer and get a few pounds and try it; it stands without a successful rival. 65

NEW HAMPSHIRE ITEMS.

—The Profile House is to be enlarged by the addition of a building 84 by 50, the whole lower floor to be occupied as a grand parlor.

—The Nashua City Council have voted to refund money raised by subscription and paid out by citizens about two years ago to fill the draft in the various wards in that city. The whole amount subscribed will probably exceed $20,000.

—Mrs. Jane Cilley, aged 94 years, died at the residence of her son, Col. Joseph Cilley, at Nottingham Square, on the 26th inst. She was the mother of Jonathan Cilley, who fell in a duel with Graves of Kentucky, in 1838.

—A large and enthusiastic meeting of persons interested in the extension of the Concord & Claremont Railroad from Bradford to the Connecticut river was held at Newport Thursday afternoon. The weather was stormy, but the Town Hall was filled to overflowing with the citizens of Newport and surrounding towns. The proceedings of the day will exert an influence which can hardly be estimated, in favor of the great enterprise proposed.

☞ The arrest of the principal of the great robbery of a million and a half dollars in bonds, from a broker's office in New York, was announced some days since. We condense the following from particulars furnished the press:

The regular detectives had progressed so far, that it was ascertained by whom the robbery had been committed, and communication had been established with the perpetrators. It is stated that an agreement had been entered into that the robbers should visit Boston, and when there, upon the payment of a certain amount of money, they were to deliver up the bonds. At this period, Marshal Westcott of Newburyport visited New York, and called upon Marshal Murray of that city, with information which has ultimately led to the arrest of one of the robbers. A week ago last Monday Marshal Westcott, accompanied by Detectives Poor and Donshea, of the United States Marshal's office of New York, stepped aboard the train for Boston, and when about twelve miles from that city, they arrested on board of the cars a man who gives his name as Horace Brown, who has been only a year out of the Charlestown State Prison. In his baggage was found about $215,000 of the stolen bonds. The arrest was kept quiet, and Brown was then conveyed to Newburyport, where he remains in custody.

Brown, whose real name was not obtained, states that the robbery was not perpetrated in the night time, but in broad daylight. How he first obtained information of Mr. Lord's very careless manner of conducting his business, it is impossible to state, but under pretence of leasing a room in his building, he made frequent calls on Mr. Lord, and ascertained the exact condition of affairs. On the day the robbery was committed, he was accompanied by six accomplices, who were partners in the job, and were allotted different duties. He entered the office, and found Mr. Lord seated at his table with his back to the door, and also with his back to the safe, which was open. He engaged Mr. Lord in conversation, and two accomplices then entered and took the bonds from the safe and went out, Mr. Lord being unaware of the presence of any other parties, owing, probably, to a slight deafness and the engaging conversation of Brown. In fact, Mr. Lord did not discover the loss until the next day.

It is said the amount was equally divided among the seven, and, as has been intimated, it was proposed by the robbers to deliver up the whole amount for a consideration, when the arrest of Brown was made, which broke up the arrangement.

Thus, according to the information which we have obtained, the question turns upon the propriety of releasing Brown and securing the bonds less the reward, or to bring Brown to justice and lose the balance of the funds.

The name of the person who is arrested at Newburyport is Horace Annis. He is from Manchester, N. H., and is well known to our police.

ENDURANCE OF THE HORSE.—How long a horse can live without food is decided by experiments recently made in France. It was ascertained, by cruel means, that a horse will live for twenty-five days without solid food, merely drinking water. He may live seventeen days without eating food or drinking. He can only live five days when consuming solid food without drinking. After taking solid aliment for the space of ten days, but with an insufficient quantity of drink, the stomach is worn out. The above facts show the importance of water in the sustenance of the horse. A horse which had been deprived of water for three days, drank eleven gallons in the space of three minutes.

—A correspondent of the Petersburg (Va.) Express says that "whisperings of a financial crash in Richmond greet the ear. These hard times have been foretold. High rents, extraordinary living, big shows, etc. have done it all. Richmond is full of goods of all kinds. Something must be done or a crash is inevitable."

—In the South of France, a harvest of two and a half millions of pounds' weight of flower leaves is gathered every year and sold for about a quarter of a million pounds sterling. It consists of leaves of the orange blossom, rose leaves, jasmine blooms, violets, acacia buds, tube roses, and jonquil flowers.

—The Erie Dispatch says that a well in that city has come so near to striking oil as to send up two codfish tails, a dead rat and a very bad smell, and that a further yield is highly probable.

Local.

☞ The County Commissioners have ordered a hearing on the new Newington Road case, to be had at the City Council Room in Portsmouth, April 4th. Now we understand the City is preparing to oppose the laying out of the same, by every argument in their power. But we think that is a mistaken policy, which opposes this and every other public improvement which anybody suggests. We believe the true way to do, is for the city to ask for the extension of the same down to the shores of Great Bay. The citizens of Newington also should ask for this; there is now, for miles, no way of reaching Great Bay, in summer or winter—for business or pleasure, except by permission of some abutter, or encroaching on private premises. This surely ought not to be—and we understand that Mr. Jones, who heads the Road petition, is not opposed to the extension of the highway down to his shore; and he certainly ought not to be.

As to the public need for the road—we think those acquainted with the adjacent country, will agree that the interest of any community cannot suffer by opening up a highway in a section of fine lands, four to five miles in extent, for improvement and increased value, making new farms, &c.

One of the opponents says that if opened, "it would only be a back road;" well we wonder if all new roads are not back roads, till settlement and business makes them prominent avenues. Our private and general opinion is, that the road may be laid out; and that this City will gain more by asking for the extension suggested, than by kicking against the pricks of progress.

BURGLAR ARRESTED.—A few days since there was a burglary in the house of Mr. Wyman, in Ashby. The burglar was traced to Troy, N. H., where he was arrested, and proved to be one James W. Laten, who worked for Mr. Wyman last year under the name of James Watson. A gold watch and all but about $50 of $300 in cash which he stole at the time of committing the burglary, was found on his person. The burglar enlisted in the army by his right name, but deserted and subsequently assumed the name of Watson. He is now in jail at Concord, N. H.

Lodi Manufacturing Company's

POUDRETTE.

AGENT FOR NEW HAMPSHIRE,

J. F. SHORES, Jr.,

No. 38 Market Street (Up Stairs.)

The advantages of Poudrette as a manure may be stated as follows:

First, its ECONOMY. The *cost* of the manure compared with its *effects* is less than that of *any other fertilizer* in market. It can be bought and applied for the same money which it would cost only to apply farm-yard manure. It is portable, contains great strength in a small compass, and needs *no extra care in its application*; the closer its contact with the seed the better and quicker it works. $4.50 worth at our retail price (or two barrels) will manure an acre of corn in the hill, and from one-quarter to one-third to the product, and will *mature* the crop from two to three weeks earlier. *No worms* will stay in the hill where the Poudrette is placed. *No seeds of weeds* come from it, and crops are very shy of plucking it out of the hill. On Corn, Tobacco and Garden Vegetables it has no equal. While the leaf and growth of the Tobacco plant is large, it has not the coarseness of fibre which is produced by Peruvian Guano, and it has taken the lead for this crop in Connecticut, and has begun to be appreciated in Maryland.

It is famous for producing larger and finer potatoes than anything else, and the stories told about Onions, their large growth, &c., are almost beyond credence. Flowers and plants are much improved by an application of Poudrette.

Another great consideration is the season of the year when the corn is planted. It is a time when every spring crop must be put in, and the corn not only planted, but up and grown sufficiently for the last hoeing and planting, before the commencement of grain and hay harvest.—The celerity and ease with which a large crop of corn is put in and poudretted, the rapid growth and consequently the early opportunity of working among it—the small chance for weeds, owing to the shade it affords, and the fact that the *Poudrette, unlike other manures, contains no seed that can germinate*, and consequently less trouble required to clean it—are all important advantages. The corn will ripen two weeks earlier, and the yield will be much greater.

The same remarks apply to Sorghum and Broom Corn.

For grass, where it is about to be laid down to lawn, or for several years, a top dressing of Poudrette will be found invaluable.

We wish to remark in this place, that Poudrette is not like some quack medicines, warranted to cure all kinds of diseases. It must be used with discretion, and a reasonable quantity will produce a reasonable effect.

Poudrette will answer no better than other manures on wet, sour, undrained land, or in seasons of drought. In other words, Poudrette is an invaluable substitute for barn-yard manure, and can be used with great profit and advantage upon most spring crops, but it will neither work miracles, drain the land it is put upon, nor cause rain to fall in time of drought.

Price per Barrel $2.25—delivered at any part of the city, or at any depot or wharf.

Important Notice!—When Poudrette is spoken of, we mean "LODI POUDRETTE," which has now stood the test of twenty-six years' trial; and when buying, *be sure and get that kind!*

A descriptive pamphlet may be had on application. mh29

MAGGIEL'S

Spring and Summer Remedies,

"*Great oaks from little acorns grow.*" The worst diseases known to the human race spring from causes so small as to almost defy detection. The volumes of scientific lore that fill the tables and shelves of the medical fraternity only go to prove and elaborate these facts. Then guard yourselves while you may. The smallest pimple on the skin is a tell tale and indicator of disease. It may fade and die away from the surface of the body, but it will reach the vitals, perhaps, at last, and death be the result and final close. MAGGIEL'S BILIOUS, DYSPEPTIC and DIARRHEA PILLS cure where all others fail. While for Burns, Scalds, Chilblains, Cuts, and all abrasions of the skin, MAGGIEL'S SALVE is infallible. Sold by J. BRANDRETH'S PILLS. COSTIVENESS, DIARRHEA.—They are taken up by the absorbents, and carried into the circulation, through which medium they are conveyed to every part of the body.

If the pain affects the joints, a single dose produces remarkable benefit. And the same rule applies to costiveness, diarrhea and dysentery; though with the last named they may be required night and morning for some days before decided relief is obtained. In affections of the lungs, throat, head and pleurisy, the relief is certain; the excretory organs throw off with ease the phlegm, and the breathing becomes freer. Spasmodic asthma is often cured by a single dose. mch28dawlm

Local.

IN BOARD OF ALDERMEN, Thursday evening, March 29, John W. Fernald, Wilbur F. Lamb and William A. Vaughan, were appointed to collect statistics of births, deaths and marriages in Wards 1, 2 and 3, respectively, the past year.

Petition of Spalding & Parrott for sidewalk in Market street, was granted.

The Committee on Bills on 2d Reading reported back the bill entitled "An Ordinance regulating the pay and duties of the Night Watch" with an amendment striking out in Section 1 the words "qualified as" and inserting the words "also appointed." The amendment was adopted and the bill passed.

The same Committee reported back the bill entitled "An Ordinance in regard to the salary of the City Solicitor" without amendment. The bill was read a second time and passed—increasing the fees of the office.

A communication was received from Wm. D. Fernald asking for repairs of damages done by a city team; referred to Com. on City Lands and Buildings with power to act.

Estimate of School Committee of Dist. No. 1, was referred to Finance Committee.

A communication from School Dist. No. 2, in regard to the urgent need of extensive repairs at the State Street schoolhouse, was referred to Common Council.

A communication from C. A. Shannon relative to the accounts of the late Collector was accepted, and a resolution passed authorizing the Mayor to offer the bondsmen of the late Robert Lefavour an entire release from all claims of the city upon them, in consideration of the payment to the city of $750,—or to release them from all claims except of taxes proved to have been paid to the late Collector and not credited by him, in consideration of $250.

A message was received from the Common Council that they had concurred in the amendment to ordinance relating to City Watch.

A bill entitled "An ordinance relating to Hotels, Taverns, Billiard Rooms, &c.," which had passed the Common Council, was read twice and referred to Com. on Bills on 2d Reading.

The following resolutions were passed:

Resolved, that the City Marshal be and hereby is requested to cause all places in the immediate vicinity of a fire, where intoxicating liquors are sold, to be closed and kept closed during the time the Fire Department are on duty.

Resolved, that the Marshal be and hereby is ordered to enforce Ordinance No. 31, for the suppression of billiard tables, and is hereby directed to give twenty-four hours notice to all keepers of such tables to take out city license therefor. After such notice the Marshal is hereby ordered to prosecute the keepers of such tables for each and every day such tables are kept in use without said license. The Marshal's attention is respectfully called to Sections 4 and 5 of said Ordinance, and is requested to see that the same is enforced, and torequire his officers to report to him every violation of said sections.

A communication from the Chairman of Board of Health, giving list of places where swine are kept within forty feet of any dwelling house, was received and accepted.

Resolutions were passed requesting each member of the Fire Department to have his certificate of membership countersigned by the Mayor, agreeable to Ordinance 21, Sec. 2; and the Board of Engineers to remove any individual member of the Fire Department who may be found intoxicated while in discharge of his duty as fireman.

The special Commitee on Fire Police were authorized to furnish the requisite number of lanterns for the use of that body. Adjourned to Friday evening April 6.

In Common Council, last week, a bill was introduced and indefinitely postponed, closing all liquor shops, refreshment saloons, &c., &c., from eleven o'clock in the evening to five o'clock in the morning. On Thursday evening last the indefinite postponement was reconsidered (on motion of Mr. J. H. Locke), and the bill passed, 12 voting in the affirmative and 1 (Mr. J. H. Chever) in the negative, and it was sent up for concurrence.

POLICE COURT, March 30th.—John S. Banks was arraigned on a charge of highway robbery. He pleaded not guilty, and his case, on motion of Albert R. Hatch, Esq., was continued until to-day. His bonds were placed at $1000, which he failed to procure.

—A silver wedding that will be worth witnessing will be observed on the 28th of April, at St. Petersburg. It is that of Czar Alexander and the Czarine. They were married on the 28th of April, 1841.

— The Bangor (Me.) Whig says that Hon. Samuel E. Spring of Portland has been prominently named as the next Union candidate for Governor of that State.

— The Herald says it is now quite certain that James Stephens, the Irish Fenian Head Centre, is not in New York, but is on his way, and may arrive at any time.

— The number of banks and banking houses damaged by the failure of Culver, Penn & Co., is thirteen.

Important.

DR. STEVENS, No 5 Daniel Street, would give notice that he has REDUCED the price of Permanent Sets of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.

He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite alone, but the strength, ease of bearing, and beauty of finish obtained by it, more than double the value of the teeth. mh12

WHICH IS THE

Leading Life Insurance Comp'y

IN THE UNITED STATES?

Which is the Safest and the Cheapest?

The following figures are from the later Reports of the New York Insurance Commissioner, showing the "amount of business" of the

MUTUAL BENEFIT

LIFE INSURANCE COMPANY,

to be the *largest*, the "expenses of management" the *smallest*, the "ratio of assets to liabilities," or the *security* furnished to its members, the *largest* of any like institution in the country.

Premiums received in 1864.....	$2,989,072
" " " 1865.....	3,029,087
Ratio of expenses to premiums rec'd in '64..	19.96
" " " " " " " '65..	19.16
Ratio of assets to liabilities, Jan. 1, 1865....	131.83

The inevitable conclusion from these official facts, is that the

MUTUAL BENEFIT LIFE Insurance Company

IS THE BEST AND THE CHEAPEST.

Because its NET ASSETS are proportionably LARGER than those of any other Life Insurance Company in the United States.

Because its "Managing Expenses" are LESS, and it has a LARGER SURPLUS to divide among its members than any Company in the United States.

QUERY.—Will some one inform the public of that mysterious process by which a Company with a surplus proportionably *much less*, and expenses *very much* larger than another, can yet divide *more* to its members, and insure them at *less cost?* How is it done? Where does the money come from?

Every intelligent man will see at once that it *cannot be done.* Yet we have Agents among us that make this their boast.

Any one disposed or intending to insure can be furnished with the requisite information by applying to

Complimentary.

The following complimentary acknowledgement from the Secretary of the Treasury was received by J. LOEWENTHAL:

TREASURY DEPARTMENT,
Washington, D. C., Nov. 23, 1865.

Sir:—This Department desires to express its acknowledgements to you for your agency in the prevention of a great fraud upon the Treasury, but for your prompt exposure to the Second Comptroller of the proposals made you by CARE and his associates, a vast sum might have been lost to the Government, or to individuals having claims on the Government; and the obligations due in the case to your intelligence and integrity are recognized and appreciated.

I am, very respectfully,
Your obedient servant,
H. MCCULLOCH,
Secretary of the Treasury.

The subscriber gives notice that he is the duly **Authorized Agent** for Messrs. LOEWENTHAL & CO., and any business relating to the procuring of **Bounties** or **Pensions** left with me, will be forwarded to them at Washington, to be laid before the proper Department.

BENJ. M. PARKER,
U. S. Claim Agent.
Office at Mechanics' Reading Room.
Portsmouth, March 26, 1866.

Soldiers!

Congress is about to pass a law granting you ADDITIONAL BOUNTY! Those of you, therefore, who have not received Bounty, and those who have received but $100 or less, will find it to their advantage to bring in their Papers, that they may be immediately sent to LOEWENTHAL & CO., to be by them presented before the proper officers at Washington.

Three Months', Six Months', Nine Months' Men, and all others, come, and your cases will be attended to by

BENJ. M. PARKER,
U. S. CLAIM AGENT,

Morning Chronicle.

☞ An Alabama paper states that the rebel Gen. W. J. Hardee has, at the request of Gens. Grant and Sherman, received from President Johnson an assurance that he may continue in the pursuits of civil life, without fear of molestation by the U. S. authorities.

Milledgeville papers say more than one thousand negroes have within two weeks passed over the Georgia railroads, from Putnam and adjacent counties, for the West. They have been induced to leave their employers on the promise of higher wages.

IRELAND AND ENGLAND.—About March 15th, the Cork Examiner said it had excellent reasons for knowing that the report current for the last few days that Stephens has really left Ireland for America is correct, and that Stephens, prior to his departure, enjoined on the members of the Brotherhood in Ireland the advisability of paying more attention for the present to their peaceful pursuits than they have been doing for some time. The Examiner adds that Stephens' wife was in Cork, intending to sail for America on the 15th in the steamship City of Baltimore.

Satterthwaite's Circular of the evening of the 14th reports a very firm market for American Securities, with a strong tendency upward. Five-Twenties have been freely bought for continental account, and closed at an improvement of one per cent. on the week.

SYRIA.—A Constantinople paper says that two antiquaries, in making excavations in Syria, have discovered a Jewish habitation entire, the construction of which dates two centuries previous to the Christian era. Its rooms are furnished after the Egyptian style, and these gentlemen found in them the five books of Moses, the Psalms of David, and another book containing Hebrew poetry, completely unknown.

The Old Established Hospital.

No. 5 Beaver Street, Albany, N. Y.
QUICK CURES! LOW PRICES!
Over Twenty Thousand Patients Cured Annually!

DR. J. TELLER continues to be confidentially and successfully consulted on all forms of private disease, at his old Established Hospital, No. 5 Beaver Street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and his facilities are such (being in correspondence with the most eminent Physicians of the Old World,) of obtaining the medicines as well as the latest remedies for these diseases, offer inducements to the unfortunate of a quick and rapid cure, to be obtained at no other office in America.

In Syphilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cord, Bubo, Ulcerated Throat, Sore Nose, Tender Shin Bones, Cutaneous Eruptions, Biles, Ulcers, Abscesses, and all other disagreeable diseases, cures are perfectly under the control of the Doctor's Medicines, and have been tested in more than 20,000 cases annually, with immense Success.

YOUNG MEN.

Young Men addicted to secret habits, who have impaired their health and destroyed the vigor of their minds, thus depriving themselves of the pleasure of the Married Life, are notified that in consulting Dr. J. Teller they will obtain a friend to counsel and a Physician who has cured thousands, in almost every part of the United States, who applied to Dr. J. broken down in health, now rejoice in all that makes life desirable and has been happy. The reader is of course aware that the delicacy of this subject will prevent a more minute description of this terrible disease.

DR. TELLER'S GREAT WORK.

A book for everybody.—Startling disclosures. DR. TELLER'S great work for the Married or those contemplating marriage—300 pages—full of plates—price 25 cts. Sent to all parts, under seal, by mail, post paid. 50,000 copies sold the past year. The single Married and the Married Biography. A lecture on Love, or how to choose a Partner—a complete work on Midwifery. It contains hundreds of secrets, never before published. Warranted to be worth three times the amount asked for it. 25 cents, in specie or postage stamps, inclosed, will secure a copy by return mail. DR TELLER has devoted a lifetime to the care of those diseases upon which his book treats!

TO THE LADIES.

DR. TELLER still remains the only Agency in America, for the sale of Dr. Vichot's Italian Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unapproached, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in female.

CAUTION.—Married ladies in certain delicate situations should avoid their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent, by mail or express, to any part of the world, secure from curiosity or damage.

Office hours from 8 A. M. to 8 P. M., and on Sundays from 9 to 5 P. M.

N. B.—Persons at a distance can be cured at home by addressing a letter to Dr. J. Teller, enclosing a remittance. Medicines securely packed from observation, sent to any part of the world. All cases warranted. No charge for advice.—N. B.—No students or boys employed. Notice this, address all letters to

THE FROZEN WELL OF BRANDON, VT. The Freeman thus speaks of this remarkable well:

This well has existed seven winters and six summers. Its depth is 41 feet. The water is from two and a half to three feet in depth. A coat of ice is formed on the wall of the well the whole depth of the water. The ice becomes so thick in winter as to render it difficult to dip up water with a common bucket. The surface of the water also freezes over every night during the winter. Ice has thus formed four inches in thickness in one night, the present winter. The owner is obliged to descend into the well and cut open the ice every morning in winter, in order to draw water. As spring advances, the surface of the water ceases to freeze, but the ice remains on the wall around the water, diminishing in quantity as summer advances, but does not entirely disappear, some remaining until the next winter's freezing commences. The well yields an abundant supply of water.

AN UNPROFITABLE REMEDY.—The French government says it sent its army to Mexico to collect a debt which it was not able to get settled in any other way. Figures recently published show how the project has worked. The sum due the French was originally less than $3,000,000; while the French operations in Mexico have already cost more than $150,000,000—that is, every dollar of the debt has dragged after it fifty dollars more. Going to war to collect dues is even worse than going to law, which even the most unfortunate business men never found to be worse than this experiment of Louis Napoleon's. We must add to his misfortunes, however, his utter failure to advance the glory of the Latin race on the American continent, and his serious loss of prestige and popularity among his own subjects.

— An exchange paper thinks the easiest way to get rich is to rob a bank, and compound with the officers, refunding half the spoils on being allowed to go free.

THE LIGHT OF THE WORLD.
DR. MAGGIEL'S
PILLS AND SALVE

These Life-giving remedies are now, for the first time, given publicly to the world. For over a quarter of a century of private practice the ingredients in these

Life-giving Pills!

Have been used with the greatest success. Their mission is not only to prevent disease, but to cure. They search out the various maladies by which the patient is suffering, and re-invigorate the failing system. To the aged and infirm a few doses of these valuable PILLS will prove to be

A Very Fountain of Youth,

For in every case they add new life and vitality, and restore the wasting energies to their pristine state. To the young and middle aged, they will prove most invaluable, as a ready, specific, and sterling medicine. Here is a dream realized, that Ponce-de-Leon sought for three hundred years ago, and never found. He looked for a fountain that would restore the old to youth and make youth ever

AN ETERNAL SPRING!

It was left for this day and hour to realize the dream, and show, in one glorious fact, the magic that made it flow.

These Famous Remedies

Cannot stay the flight of years, but they can force back and hold aloof, diseases that might triumph over the aged and impoverished system. Let none hesitate then, but seize the favorable opportunity that offers. When taken as prescribed—

FOR BILIOUS DISORDERS

Nothing can be more productive of cure than these Pills. Their almost magic influence is felt at once; and the usual concomitants of the most distressing ill ease are removed. These remedies are made from the purest

VEGETABLE COMPOUNDS.

They will not harm the most delicate female, and can be given with good effect in prescribed doses to the youngest babe

For Cutaneous Disorders

And all eruptions of the skin, the SALVE is most invaluable. It does not heal externally alone, but penetrates with the most searching effects to the very root of the evil.

Will be better every way if fed occasionally a spoonful of
ALDEN'S CONDITION POWDERS.
They will cure most of the diseases to which horses and cattle are liable, increase the appetite and spirits, and, with respectable grooming, give a bright, glossy appearance to the hair. They are the result of actual and long continued experiment, are prepared with the utmost care, from the very best material, and guaranteed vastly superior to anything known. Many Vermont gentlemen, owners of fine horses, buy them by the dozen, and give them freely. As a consequence, their horses are always in good condition and spirits, and remarkable for their smooth, shining coats. For sale by merchants everywhere. **L. Dutcher & Son,** St. Albans, Vt., proprietors; Demas Barnes & Co., New York, John F. Henry & Co., Waterbury, Vt., Wholesale Agents.

VINELAND
FARM AND FRUIT LANDS,
In a mild and healthful climate. Thirty miles south of Philadelphia by Railroad, in New Jersey, on the same line of latitude as Baltimore, Md.
The soil is rich and *productive*, varying from a clay to a sandy loam, suitable for Wheat, Grass Corn, Tobacco, Fruits and Vegetables. This is a *great fruit country.* Five hundred Vineyards and Orchards have been planted out by experienced fruit-growers. Grapes, Peaches, Pears, &c., produce immense profits. Vineland is already one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provisions for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste.* It has increased five thousand people within the past three years. Churches, Stores, Schools, Academies, societies of Art and Learning, and other elements of refinement and culture have been introduced. Hundreds of people are constantly settling. Hundreds of new houses are constructed. Price of Farm land, twenty acre lots and upward, $25 per acre. Five and ten acre and Village lots for sale.
Fruits and Vegetables ripen earlier in this district than in any other locality north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber Yards, Manufactories, Foundries, Stores and the like; and Steam Power, with room, can be rented.
For persons who desire mild winters, a healthful climate, and a good soil, in a country beautifully improved, abounding in fruits, and possessing all the social advantages in the heart of civilization, it is worthy of a visit.
Letters answered, and the Vineland Rural, a paper giving full information, and containing Reports of Solon Robinson, sent to applicants.
Address CHAS. K. LANDIS, Vineland P. O., Landis township, *New Jersey.*
From Report of Solon Robinson, Agricultural Editor of The Tribune: *It is one of the most extensive fruit farms, in an almost level position, and suitable condition for pleasant farming that we know of this side of the Western Prairies.* at—dawtu

Morning Chronicle.

Portsmouth, N. H.

MONDAY, APRIL 2, 1866.

THE PARAGUAYAN WAR.—By the arrival of the steamship North America from Rio Janeiro March 3d, we have important news. On the 31st of January a Paraguayan force, 3000 strong, crossed to the southern bank of the Parana at Pass De La Patria, and attacked the Argentine forces forming the vanguard of the allied armies. After a severe fight the Paraguayans recrossed the river in good order to their headquarters. The loss of the Argentines is estimated at 200 killed, that of the Paraguayans is not estimated. A large quantity of timber, accumulated by the Argentines for the purpose of making rafts on which to cross the troops, and material for the long projected advance of the Allies, was captured by the Paraguayans and thrown into the river.

Deserters from the Paraguayan army report that Gen. Robles, together with sixty other officials, had been shot by order of the Dictator Lopez in the presence of the entire army draw up in a hollow square.

From all appearances the defensive preparations made by Lopez would effectually prevent a direct advance of the allies upon Humaita. Their only chance of capturing that place lying in a rapid flank movement either by crossing the Parana at Itapua, to which point Gen. Parto Alegre was marching with 14,000 men, or by the left bank of the Paraguay, through the Gran Chao.

It appears that the Argentine army did not show a very bold front when attacked by the Paraguayans who crossed the Parana river and attacked them on the 31st of January, as letters from surgeons in the Brazilian army declare that they found almost all the Argentines they attended wounded in the rear; that the Argentines have been tremendously whipped—although two to one of the Paraguayans—and the moral advantage gained by the latter is immense.

☞ The Portland Advertiser tells the following of Walter H. Stuart, aged 16 years, born in Brownfield, Me., of poor parents, but for a few days sojourning in that city:

It appears that this singular freak of nature arose simply from an arrest of development in the arms below the elbow joints (each of them being perfect) and of the left leg below the knee. The right leg has no knee joint, but has an imperfect foot attached to the stump about six inches from the body. This is the only appearance of feet or hands about him, and this is merely attached by a fleshy substance, there being no cords by which to move them. But singular to say, notwithstanding all these deformities, he can feed himself without assistance, thread a needle, tie a knot in the thread, and sew on a button with considerable dexterity; and one cannot help looking on with amazement when witnessing his movements. He gets on or off his chair, hobbles round the room and up a flight of stairs, nearly as quickly as though he was full limbed. Although never inside of a school room, his education appears not to have been forgotten, and he writes a bold and legible hand that would put to blush many who have the use of full developed hands.

☞ A. L. Bailey, Esq., of Amesbury, has given the Congregational Society of Salisbury Point and Amesbury Ferry, a deed of the fine large house, purchased by him of the heirs of the late Azor O. Webster, Esq. The house is one of the best in that village, and is valued at $2500, and is already occupied as a parsonage house. A few years since Mr. Bailey built and furnished at his own expense a vestry for the use of the Society.

☞ In Boston, a smart foreigner, who keeps at the South End, was sometime since complained of for selling liquor on Sunday, but was acquitted, it having been shown that the store was closed on the day previous—the Jewish Sunday. A lynx-eyed officer recently noticed that the house of the store-keeper, which was just over the store, had many callers on Saturday, and by a close scrutiny he discovered that the keeper mixed his drinks below and passed them up through a hole in the floor to the imbibers above. He was complained of and fined.

— Orders have been issued to muster out every colored soldier in the service by May 1st.

— In the second week of March the ship Truelove sailed from Hull, England, for the Davis Straits whale fishery. She was built in Philadelphia in 1764, and has ever since been employed in the fishery and in the wine trade.

— During the last year of the war the Post Office earned a net profit of over $860,000 from mail service in the loyal States. The first three months the mail service was resumed at the South there was a loss in the whole country of over $20,000.

— The Auburn (N. Y.) Advertiser says that a son of Brigham Young, formerly a resident of that village, was in town last week, looking up sundry debts of his father's, which he was anxious to liquidate, with the interest which had accrued during thirty-five years.

NEW HAMPSHIRE ITEMS.

—— Moses Rowe, of Candia, died very suddenly of heart disease, March 25, aged 73.

—— The Northern Railroad has declared a dividend of $3 per share from the earnings and $4 per share from the assets, payble May 1 to holders of stock March 31.

—— The officers of the State Agricultural Society have voted to hold a State Fair about the 30th of September, provided liberal arrangements can be made with the several railroads in the State.

—— In the list of patents issued for week ending March 27, we find these for this State: Martin Ames of New Ipswich, stopper for ink bottles. Warren S. Hill of Manchester, assignor to C. S. Baker of the same place, for improvement in invalid bedsteads.

—— It occurs to me that there is something singular in some other names, which we all consider as Indian words. I refer particularly to the names of rivers. I will speak now only of the *Piscataqua*, in New Hampshire, and the *Piscataquis*, in Maine. I believe the Indians assert that both mean *the rivers of fish*—and yet, if there were no Indian claims to these names, no one would doubt that they were both derived from the two Latin words—*pisces*'—fishes; and *aqua*—water. Did the Indians know Latin? Was the schoolmaster abroad with them before the English came? And what was the Indian word for fish, and what for water? Is it certain that these names of the two rivers are Indian in their origin? Who can tell?—*Cor. of Statesman.*

☞ The Statesman understand that S. H. Dumas, Esq., of Concord, the long-time landlord of the Phenix Hotel, has purchased the famous old summer resort at Hampton known as the Boar's Head House, and will proceed thoroughly to refit it in season for travel the coming season. The Hampton beaches have long been the resort of invalids and parties of pleasure, and are little if at all inferior to the famous ones at Nahant. The hotel itself is situated on an eminence which commands a romantic view of the ocean, Isles of Shoals, and the coast from Cape Ann to Portsmouth. It is seven miles from Exeter, thirteen from Portsmouth, and fifty from Concord. Under the new management we presume it will prove to be one of the most popular watering-places along the coast.

— Adolph Kramer, a German merchant in Chicago, was suffocated by gas on Saturday night, the stop-cock in a gas pipe in his chamber having been left partially open.

— The Jackson (Miss.) Standard learns that all the troops in Mississippi have been ordered to rendezvous at Jackson, it presumes to be disbanded.

— At a recent great steeple chase, near Liverpool, thirty horses started, all the favorites were beaten, and the winner was a gaunt outsider, whose owner quietly pocketed $135,000 by the race.

— A vessel will sail for Repulse Bay, in the Arctic regions, about the middle of April, and by this means Capt. C. F. Hall will receive the first news he has had from home the present year.

— Thaddeus Scott of Illinois, while eating beefsteak at Taylor's saloon, New York, on Friday, was choked to death by it. Tender steak, that, for a first-class restaurant.

—A verdict of $5000 damages has been rendered against the Long Island Railroad in favor of Eugene B. Overton, one of the sufferers by the disaster on said road last summer.

— The vicinity of Sullivan, Moultney county, Ill., was visited by a terrible tornado March 20th, causing great destruction of property; twenty houses were entirely demolished and several persons injured.

— Mr. George R. Leonard of Norton says he never saw a man yet that he could "look up to." His height is 6 feet 8 inches, is 56 years old, weighs 325 pounds, and is strong in proportion to his size.

— As a result of the capture of the bank robber, Jones, the whole property will be delivered up to Mr. Lord on Monday. Marshal Wescott has achieved a splendid success, and is rightly entitled to the amount he has received for working up the matter.

— Congress has done a commendable deed. It has lessened the number of the public documents, and saved some $150,000 on Patent Office reports. It is said Government has been the purchaser of a thirteenth part of all the printing paper used in the United States.

— A Washington dispatch states that the agents of Maximilian recently made an offer to prominent American politicians to give them a contract for collecting Imperial revenues in Mexico for five years, on condition that they will prevent any action by our Government favorable to President Juarez or inimical to the empire.

— It is stated that the Legislative Committee on the subject of a license law for the sale of intoxicating liquors have voted by a large majority to report a bill for that purpose. There will be a minority report in favor of adhering to the present inefficient impracticable "Maine Law." We hope the Legislature will have the good sense to adopt the license system, and in that regulate and curtail the traffic in intoxicating liquors.—*Boston Journal.*

PRACTICAL JOKERS FOOLED.—A St. Louis paper describes a curious case of imaginary poisoning that recently occurred in that city at the "Western House," on Broadway. Four mischievous young men, boarders at the house, took it into their heads to make a clandestine examination of the contents of a pack belonging to a peddler of Israelitish proclivities, for the purpose of ascertaining what sort of goods he dealt in. In the pack they found a paper containing a white powder, and they were anxious to ascertain what it was. One of them took a pinch of the powder, and after tasting of it pronounced it saleratus. Another swallowed a small quantity, and declared it was alum. The third tried it, and thought it was soda. The fourth gulped down a spoonful, and said it was starch. Being unable to agree, they made a close examination of the paper, and found written upon it the fearful word "poison!" They all now felt a terrible griping in the stomach, and started on a full run for the nearest drug store. The store was closed, and in an agony of despair the four young men rolled over on the pavement and concluded to give up the ghost. The poison, however, was slow in its operation, and neither of them died. They found a druggist, and, getting him to examine the powder, discovered that it was starch! They immediately recovered, and declared that they would not attempt any more practi jokes upon the peddler.

☞ The report of the Revenue Commission on the subject of excessive importations is published. It gives statistics showing that five times as many packages of goods were imported into New York in the first six weeks of 1866 as in the same period of 1865. The imports of January and February were over thirty-two and a half millions. To prevent a panic the Commis and the passage by Congress of a resolution increasing the duties on imports 50 per cent. for ninety days, with the single exception of printing paper unsized, used for books and newspapers exclusively.

☞ Among other interesting articles, the U. S. Service Magazine for April contains the conclusion of the "Sixth Army Corps," by Gen. McMahon, giving its history "from Gettysburg to the end." C. B. Richardson, publisher, New York.

☞ With the past week, The Portland Transcript began a new volume. As a weekly literary family paper, the Transcript is one of the best, cheapest, and most popular journals. We wish the publishers every success.

☞ The Illustrated Phrenological Journal for April is received. Only 20 cents, or $2 a year. Address Fowler & Wells, 389 Broadway, New York.

Holloway's Pills and Ointment.—Facts for the Million.—By a recent enactment of the French government, these medicines are admitted free of duty into all ports of France. They are extensively employed in all the public and military hospitals throughout the Empire. The Emperor has signified his appreciation of their virtues in an autograph letter to Dr. Holloway. During the late campaign in Italy, large quantities were used for the wounded at Brescoia and Montechiaro. Sold by all Druggists.

☞ The Philharmonic Concert on Fast Night will be the best entertainment yet given by this Society. Besides a good selection of sublime choruses and sprightly glees, there will be songs, duets, quartets (two for male voices), &c., making up an agreeable variety.

Members are notified of a special Rehearsal on Monday evening; also Wednesday evening.

Portsmouth, April 2, 1866.

— The story that Gen. Grant is about to make a voyage to Europe in a naval vessel is denied.

— The proprietors of the burning well, near Franklin, Pa., have succeeded in extinguishing the fire, and are now preparing to develop its value for oil purposes.

— It is announced that President Johnson has refused to accept the resignation of Mr. Starkweather, Postmaster at Norwich, Conn. He is an earnest supporter of Gen. Hawley, whose friends set this case over against that of Cleveland, the Hartford Postmaster.

— It is stated that the American schooner Alma was attacked and captured in the China sea by three piratical junks. The captain, mate and part of the crew saved themselves by taking to the boats, after gallantly defending the vessel as long as possible.

—Workmen have been busily engaged since the fire in removing the ruins of Pike's Opera House. About $50,000 worth of the front walls will be saved. Seven fire-proof safes, belonging to Adams Express Company, were recovered from the ruins, with their contents uninjured.

— Some of the newspapers persist in calling the Mr. Stockton recently ejected from the Senate "Commodore." He is the son of Commodore Stockton, who was a Senator. His grandfather was also a Senator, and his great grandfather was one of the signers of the Declaration of Independence.

— The editor who said that his mouth never uttered a lie, probably spoke through his nose. But the woman who said that Herrick Allen's Gold Medal Saleratus is the best in the world, and makes better Bread, Biscuit, Cakes or Puddings, out of the same sack of flour, than can be made with any other saleratus or soda, spoke it with her eyes and mouth wide open, and does not fear contradiction. Dyspeptic persons can use it with impunity, and be all the better for so doing. Most all the Grocers sell it. Depot 112 Liberty Street, New York. 68

Cleanse the Blood.

With corrupt, disordered or vitiated Blood, you are sick all over. It may burst out in Pimples, or Sores, or in some active disease, or it may merely keep you listless, depressed and good for nothing. But you cannot have good health while your blood is impure. AYER'S SARSAPARILLA purges out these impurities and stimulates organs of life into vigorous action, restoring the health and expelling disease. Hence it rapidly cures a variety of complaints which are caused by impurity of the blood, such as Scrofula, or King's Evil, Tumors, Ulcers, Sores, Eruptions, Pimples, Blotches, Boils, St. Anthony's Fire, Rose or Erysipelas, Tetter or Salt Rheum, Scald Head, Ringworm, Cancer or Cancerous Tumors, Sore Eyes, Female Diseases, such as Retention, Irregularity, Suppression, Whites, Sterility, also Syphilis or Venereal Disease, Liver Complaints, and Heart Diseases. Try AYER'S SARSAPARILLA and see for yourself the surprising quality with which it cleanses the blood and cures these disorders.

During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been found upon the sick, for they not only contain little, if any, Sarsaparilla, but often no curative properties whatever. Hence bitter disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the name of Sarsaparilla has become synonymous with imposition and cheat. Still we call this compound "Sarsaparilla," and intend to supply such a remedy as shall redeem the name from the load of obloquy which rests upon it.—We think we have ground for believing it has virtues which are irresistible by the ordinary run of the diseases it is intended to cure. We can only assure the sick, that we offer them the best alterative which we know how to produce, and we have reason to believe it is by far the most effectual purifier of the blood yet discovered by any body.

AYER'S CHERRY PECTORAL is so universally known to surpass every other remedy for the virtues of Coughs, Colds, Consumption, Bronchitis, Croup, Bronchitis, the great Consumption and for the relief of Consumptive Patients in advanced stages of the disease, that it is useless here to record the evidence of its virtues. The world knows them.

Prepared by DR. J. C. AYER & CO., Lowell, Mass., and sold by all Druggists and Dealers in Medicine everywhere. mh9—2aw4w2m

IMPORTANCE OF HAVING DAVIS' PAIN KILLER ALWAYS ON HAND.

Wonderful Cure of the Rev. D. L Brayton, Missionary in India, who was stung by a Scorpion.

Extract from his letter, published in the Baptist Missionary Magazine:

"For the first time since I have been in India, I have been stung by a scorpion. I went out this morning to my exercises, as usual, at early dawn, and having occasion to use an old box, on taking off the cover I put my hand on a scorpion, which immediately resented the insult by thrusting its sting into the palm of my hand. The instantaneous and severe pain which darted through the system is quite incredible; what an awfully virulent poison their sting must contain! I FLEW TO MY BOTTLE OF DAVIS' PAIN KILLER, and found it to differ not a little, after a moment's relief, I saturated a small piece of sponge, bound it on my hand and went about my exercises, feeling no more particular inconvenience. apl—sawim

Perry's Moth and Freckle Lotion.

☞ Chloasma, or Mothpatch, (also called Liver-spot,) and Lentigo, or Freckles, are often very annoying, particularly to ladies of light complexion, for the discolored spots show more plainly on the face of a blonde than of a brunette; but they greatly mar the beauty of either and any preparation that will effectually remove them, *beautify the complexion or leave no ill-effects* on the skin, is certainly a desideratum. DR. B. C. PERRY, who has made diseases of the skin a specialty, has discovered a remedy for the above disorders, which is at once prompt, infallible and harmless.

BRANDRETH'S PILLS. COSTIVENESS, DIARRHEA.—They are taken up by the absorbents, and carried into the circulation, through which medium they are conveyed to every part of the body.

If the pain affects the joints, a single dose produces remarkable benefit. And the same rule applies to costiveness, diarrhea and dysentery; though with the last named they may be required night and morning for some days before decided relief is obtained. In affections of the lungs, throat, head and pleurisy, the relief is certain; the excretory organs throw off with ease the phlegm, and the breathing becomes freer. Local.

POLICE COURT, March 31st.—The session Saturday was held in the County Court Room, and Judge Odell was honored with the largest attendance which has been there since the "Sheehan" trial. Court opened at 10 o'clock in the forenoon and held until half-past 5 P. M., with the exception of a recess at noon. The morning was occupied in the trial of Moses Noble and Richard Townsend, for the larceny of rigging from steamer Pioneer about the first of March. Several witnesses were examined, and the case was argued by Messrs. Frink for the prosecution and Hatch and Goodall for the defence. Noble was held in the sum of $1000 for his appearance at the S. J. Court to be holden at Exeter on the 10th of April. Townsend, in default of $500 bail, was sent to jail to await trial at the same place.

Afternoon Session.—John S. Banks was brought up charged with highway robbery, viz: knocking down and robbing A. F. Craig on the night of the 23d of August last on Portsmouth Bridge. S. H. Goodall, City Solicitor, appeared for the prosecution, and J. S. H. Frink for the defence. A number of witnesses appeared for the prosecution, and there were several in the Court Room for the defence, but for some unexplained reason they did not testify.—Mr. Frink ingeniously cross-examined the prosecuting witnesses and made an eloquent appeal for Banks, but notwithstanding this the "Governor" was bound over to appear at the next term of the S. J. Court in the sum of $1000, John Grimshaw and —— Douglas becoming his sureties.—Edwin H. Goodwin, an accomplice, having acknowledged his complicity in the crime, was committed to jail, to appear at the same tribunal. George A. Merrill was also committed to jail as a witness in the case.

Wentworth Munson, arrested on a warrant for larceny connected with the "Noble's Island" affair, was discharged.

Addison C. Brown of Kittery, for committing a nuisance on Pleasant street, near the North Church, was fined $7 80 Three of these cases have occurred within a month, the violators being respectively from Kittery, Eliot and York, Me.

THE NOBLE CASE — We understand that J. S. H. Frink, Esq., has been employed to commence civil actions against Moses Noble, for damages growing out of matters of like character to those investigated by the Court last Saturday—and, further, that Hon. Daniel M. Christie, of Dover, has been consulted and retained in the cases.

☞ The City Accounts for the year ending Dec. 31, 1865, are published. On page 58, in the Mayor's Inaugural Address, we find a typographical error which has been a great bugbear to some persons, and which has been the strongest argument yet adduced against building a City Hall. The amount of the city debt, including all bonds maturing during the next eighteen years, is given at $334,400. From this, present assets to the amount of $115,420 must be deducted. In doing this the types, with an utter disregard of all common modes of arithmetical computation, have made the balance of indebtedness $518,980—just $300,000 too much. "Middling Interest" may be willing to build a new hall with some portion of the large amount thus saved.

UGLY DOG.—A large dog, belonging to some person from the country, bit a man in the band on Pleasant street, Saturday forenoon. He also flew at two ladies, but was soon dispatched by the "billy" of Officer Sides, and his remains taken in charge by "Bob" Shillaber. Over his grave is the following line, by Pope—

"I have been pursued, *dogged* and waylaid."

☞ The U. S. storeship Supply sailed from New York for the East Indies. Lieut Chas. C. Rucker of the city, and Paymaster C. J. Emery, recently detached from the Navy Yard, were on board.

☞ The time of service of "Long John Abbott" in the Charlestown prison has expired, and he is now at liberty.

GOLD, Saturday, 128 1-4.

— Military definition for a kiss—report at headquarters

— The London papers complain that there is not a properly lighted street in that city.

— The monitor Miantonomah has been ordered to the fishing banks to protect the interests of American citizens, in view of possible difficulties.

— A remarkable tree was brought to New York in the month of January, 1866 from a Western State. It was a black walnut, 70 feet long, measuring 4500 feet, board measure; but when cut into veneers, it would be 30 times that, making 135 000 feet, which at 20 cents would be worth $27,000.

— Time is said to be money—certainly, not a few use it freely in paying their debts!

— "Is anybody waiting upon you?" said a polite dry goods clerk to a girl from the country. "Yes sir," said the blushing damsel; "that's my fellow outside. He wouldn't come in."

WHICH IS THE

Leading Life Insurance Comp'y

IN THE UNITED STATES!

Which is the safest and the Cheapest?

The following figures are from the later Reports of the New York Insurance Commissioner, showing the "amount of business" of the

MUTUAL BENEFIT

LIFE INSURANCE COMPANY,

to be the *largest*, the "expenses of management" the *smallest*, the "ratio of assets to liabilities," or the *security* furnished to its members, the *largest* of any the tests within the country.

Premiums received in 1864.....$2,989,072
" " " " 1865.....3,079,087
Ratio of expenses to premiums rec'd in '64, 12.99
" " " " " '65, 12.15
Ratio of assets to liabilities, Jan. 1, 1865....121.85

The inevitable conclusion from these official facts, is that the

MUTUAL BENEFIT LIFE

Insurance Company

IS THE BEST AND THE CHEAPEST.

Because its NET ASSETS are proportionably LARGER than those of any other Life Insurance Company in the United States.

Because its "Managing Expenses" are LESS, and it has a LARGER SURPLUS to divide among its members than any Company in the United States.

QUERY. Will some one inform the public of that mysterious process by which a Company with a surplus proportionably *much less*, and expenses *very much larger* than another, yet divides *more* to its members, and insures them at *less cost?* How is it done? Where does the money come from?

Every intelligent man will see at once that it *cannot be done*—let we have Agents among us that make this their boast.

Any one disposed or intending to insure can be furnished with the requisite information by applying to

Important.

DR. STEVENS, No. 5 Daniel Street, would give notice that he has REDUCED the price of Permanent Sets of ARTIFICIAL TEETH on the Vulcanite Base, to that charged for them before the war.

He would also give notice that he is doing a new style of work for Under Sets of Teeth, called the COMBINATION BASE (Gold and Vulcanite) which produces by far the finest work offered to the public. The price is something in advance of that charged for the Vulcanite alone, but the strength, durability, ease of bearing, and beauty of finish obtained by it, more than double the value of the teeth. mh12

He also succeeds fully restores to their natural shape broken or badly decayed teeth, by building out corners and sides with PURE GOLD. The most bare teeth so restored are as strong as any of their other molars, and in all cases are rendered eminently useful for a long series of years. INSERTING TEETH, in all stages, treated, and in a very large majority of cases entire success attained

Charges for such operations necessarily high, but nothing in comparison to the value of the teeth. mo14

Valuable Real Estate

AT AUCTION.

(By virtue of a decree from the Hon. Judge of Probate for the County of Rockingham.)

On TUESDAY, April 17, at 12 o'clk M., on the premises.

The Real Estate of the late CHARLES W. WALKER, of Portsmouth, deceased. Said property will be sold in three separate lots or parcels, viz:

The First Lot to consist of the well known MARKET STREET HOUSE, situated on the corner of Market and Green streets, with land connected therewith, bounded 69½ feet more or less on Market street, 105 feet more or less on Green street, 106 feet more or less by Lot No 2, 10½ feet more or less by land formerly of James Pickering, land of James Jucklin and others; the lot containing 8928 feet, more or less

The Second Lot consists of land on Green street bounded 38 feet more or less on Green street, 110 feet more or less by land of Estate of George Chesley, 35 feet more or less by land formerly of James Pickering and others, and 106 feet more or less by lot No 1; the whole lot containing 3926 feet, more or less.

The third Lot to consist of the Stable lot, so called, on Green street, with the stable and Office building thereon. The lot is bounded southerly about 45 feet on said Green street, easterly about 75 feet on land of E. S. Wendell, northerly about 50 feet on Railroad land, and westerly by Railroad land and adjoining cemetery; containing about 2710 feet. The stable is 38 by 88 feet, and the office-building 10 by 10 feet.

The above offers a rare chance for capitalists or others. The property is prominently situated on one of the main avenues of the city. The "MARKET STREET HOUSE" is large and well situated, conveniently situated for a Hotel or large Boarding House, and has been occupied as such for many years. It contains 19 rooms and one, and also a store. The stable has been used, and is a good location for a Livery Stable.

If desirable, a portion of the purchase money can remain on a mortgage of the premises.

For further particulars inquire of J. M. EDMUNDS, Portsmouth; C. W. STINSON, Kittery, Me., Guardian of the minor heirs, or of the subscriber. JOSEPH F. MORSE.

From the Portsmouth Journal

GYMNASTICS.

While the late Rebellion was in progress, many of those who were disposed to count the good points to be gained by the country from the war, thought they beheld the foreshadowing of better days for the coming generations of "Young America" in the probable change in habits and disposition which the rigor of camp life would induce. In place of the cultivation of effeminacy, and a general disgust of hard work, they looked forward with pleasure for the outgrowth of that disposition which would tend to promote vigorous physical life, and induce that enjoyment which nature intended when she imparted to man his animal nature. We were fast becoming a people whose sad condition is prefigured by Goldsmith,—

"Ill fares the land, to hastening ills a prey,
Where wealth accumulates, but men decay."

But, alas! with the return of peace, back flies America to his old temper. The war was only an incident, a temporary job to be attended to, and that completed and over, it seems as though we only work the harder to make up lost time. We grasp as eagerly as ever for the dollars, and as stupidly as ever ignore the cultivation of all that is truly essential to the full moral, intellectual, and physical enjoyment of life. Nay, we are even worse than ever, from the fact that many who once used to pursue the even tenor of their ways, have made fortunes from the war, and in consequence of being lifted above the necessity for labor, have withdrawn from the arena of earnest, active effort.

These things ought not to be. While we should cease to confine ourselves so closely to the treadmill of business within doors, cramping our vital powers, narrowing our conceptions of life, and crowding out all sources of the enjoyment, we should devote some portion of our daily life to hard exercise, which alone will develop our strength to the extent which the healthful enjoyment of our faculties demands. No where can this exercise be more surely and economically obtained than in the Gymnasium. A man may swing a hammer or an axe, saw wood, or shovel, dig or mow all day long. Each of these efforts have their benefits, but their effect is only partial. The gymnasium operates upon every muscle in the body,—each in turn. Properly used, it does not fatigue, but, starting the warm life blood it sends it thrilling through the arteries, warming the whole system to an exhilarating glow, giving elasticity of movement, strength of limb, body, a clear head, and a generous soul. The institution of this kind at No. 88 Market street, in this city, has not been forsaken, notwithstanding we have spoken faithfully of Young America. It has quite a number of regular, enthusiastic attendants, who would sooner lose their dinner than their practice at the swings and bars, especially at this season of the year. They know it is panacea for spring and summer complaints, and likewise for fall and winter ailments, inasmuch as it is an almost sure preventive for most of the "ills that flesh is heir to." The ladies now have their hours for practice assigned them, wherein they are not disturbed by boisterous rudeness, and we understand a number have undertaken daily exercise.

The location of the Portsmouth Gymnasium is not surpassed for pleasantness by that of any Gymnasium in the country. It overlooks the broad Piscataqua, and catches all the water breezes in the summer time; and with the window thrown open, it is at once finely ventilated, and is always well open to the light. It has almost every kind of apparatus common to the gymnasium, surely quite enough. Reference to the advertisement will give all needed particulars.

Among a number of Portsmouth boys abroad who look upon this institution as one of the prominent features of home, is Mr. William A. Rand, who has just been successfully active in establishing one at Biddeford, where he now resides. He substantiates his most hearty assertions of personal benefit from exercise, by a vigorous, muscular body, built up by practice in the Gymnasiums of Portsmouth and Boston.

Grand Concert.—Next Thursday (Fast Day) evening, the Portsmouth Philharmonic Society is to give another concert similar to that of Christmas evening, which met with much favor from the public. The programme is new, with one or two exceptions, embracing choruses, quartetts, &c. Since its last public appearance in Portsmouth, the Society has had regular weekly rehearsals at which it has been faithfully drilled in new and difficult choruses by Prof. W. K. Day, several of which will be given at the concert. As the society has already a good name in Portsmouth, we expect to see the Temple crowded. The Dover and Rochester presses are very eulogistic of the Concert given at the former place last week.

Juvenile Singing School.—It will be seen by his advertisement that Mr. Joy commences a new term of his Singing School next week. His past success warrants him in expecting a full attendance. He has taught seven successive terms, averaging 100 scholars each term, which is conclusive evidence that his efforts are appreciated. As this is the only juvenile class in Portsmouth, we take pleasure in commending it to the notice of parents.

A Notable "Institution."—*Messrs. Editors:* Happening into the Agricultural Warehouse of Goodwin, Sweetser & Co. the other day, I was surprised to find in our little city so extensive and well selected a stock of plows, cultivators, mowing machines, corn shellers, hay cutters, cheese presses, grindstones and fixtures; wheelbarrows, ox yokes, farming implements of all kinds, garden, grafting, pruning tools, wooden ware, baskets, brooms, &c. The proprietors manifest very commendable enterprise in keeping a complete assortment of the choicest seeds for the field, garden and greenhouse, which they put up themselves. They have many kinds of seeds which were never before kept on sale here, obliging those who might want such to send to Boston therefor. A great variety of fruit trees, shrubs, plants and vines will be kept on hand in their proper season. This firm also make specialities of wheel stock and fertilizers, and receiving their merchandise direct from first hands are enabled to sell, by wholesale or retail, at less than Boston prices. Messrs. Goodwin, Sweetser and Co. are capable, experienced young men, honorable in all their dealings, and merit the favor of all in want of goods in that line. Those farmers who consult their own best interests will assuredly patronize this, admirably appointed establishment; and that Agriculturists generally understand this and act accordingly, is evinced by the fact that the business of this house is steadily increasing. N.

Gov. Smyth's father is reported to have voted for Governor 59 consecutive years—lastly for his son." There is a man in Cheshire County who has voted for Governor sixty-six years in succession—one year only excepted, when he went to Gen. Harrison's inauguration, and could not get back in season. He has voted for every President since the Elder Adams in 1796. That man is Hon. John Prentiss.

SUFFERERS

From Dyspepsia

READ! REFLECT!! ACT!!!

FARRANT & CO

Gentlemen, I am a resident of Curacoa, and have often been disposed to write to you concerning the real value of your SELTZER APERIENT as a remedy for indigestion and dyspepsia. I desire to express to you my sincere gratitude for the great benefit the SELTZER has done my wife.

For four or five years my wife has been sadly afflicted with Dyspepsia, and after being under the treatment of several Doctors for two or three years, she was finally induced to seek the advice of a learned Physician, Doctor Cabbalis, of Venezuela, who immediately treated her with your EFFERVESCENT SELTZER APERIENT. She began to improve at once and is now PERFECTLY WELL.

I feel it to be my duty for the good of humanity to make this statement, feeling that a medicine so valuable should be widely known.

I trusting that you will give this publicity, and repeating my earnest gratitude and thanks,

I am very respectfully yours,
S. D. C. HENRIQUER,
Merchant, Curacoa, S. A.

New York, June 28th, 1865.

WE ASK

The suffering millions in our land to give this remedy a trial, convinced that by its timely use many may be relieved, many cured of

Dyspepsia, Heartburn, Sour Stomach, Sick Headache, Dizziness, Indigestion, Piles, Costiveness, Bilious Attacks, Liver Complaints, Rheumatic Affections, &c.

Read the Pamphlet of Testimonials with each bottle, and do not use the medicine against the advice of your Physician.

DUTCHESS NURSERIES

POUGHKEEPSIE, NEW YORK,

FERRIS & CAYWOOD, Proprietors.

We call the attention of our customers and the public to our stock of GRAPE VINES, which is larger than ever before. Having had over twenty years' experience in the management of Vineyards and the propagation of Vines, and our present stock having been grown from bearing wood only, with constant care during the season, we think they will compare favorably with any others that are offered for sale.

Our stock of MONTGOMERY VINES is very large. This variety not being generally known, we will give a brief description: White, a seedling of the White Chasselas, an unparalled grower and bearer, clusters often weighing two pounds, adhesiveness perfect, it is planted with the hardy grapes, but we protect it in winter as we do all other varieties in this part of the State.

Our stock of the various kinds of EVERGREEN and DECIDOUS TREES is very large, and is offered at moderate price; and at very low rates by the quantity, to those who are laying out and improving their places, cemeteries, or public grounds, and to nurserymen. We challenge competition.

Grape Vines.

—DEALERS IN—

S. Vance's Submerged Well PUMP.

This unsurpassable invention, now being first introduced, will, it is believed, supersede all other Well Pumps now in use.

ITS ADVANTAGES.

First, SIMPLICITY—and this Pump is composed of but three parts, and is so simple in its construction that any one can easily put it together.

Second, DURABILITY.—Its peculiar construction, and the fact that it is always submerged combine to make it the most durable of all Pumps yet invented.

Third, NEVER FREEZES.—The valves are so constructed that, when not in operation, they allow all the water above to pass down into the well, and thus prevent freezing.

Fourth, POWER.—Or the amount of power applied, this Pump excels anything known. It throws one-third part more water than ordinary pumps, and works so easily that even a child can pump without fatigue. It is in this way the greatest labor-saving pump now offered to the public.

Fifth, IT IS INVALUABLE.—For a well pump it is invaluable, as all the iron which is submerged consists of but three small pieces, and these galvanized. It can in no way corrode, consequently it brings up pure water at every stroke.

Sixth, CHEAPNESS.—This Pump is so made that it costs but a trifle, and is warranted to keep in use for years. No repairs at all are needed. It is very light, and thus the cost of transportation is very small.

☞ Manufactured by S. VANCE & CO., No. 31 Liberty Street, Newburyport, and for sale in Portsmouth by the Sole Agents for N. H.,

ISRAEL MARDEN & CO.,

☞ We are permitted to refer to Mr. MONROE HOLMES and to Mr. FRANK W. MILLE; of the Daily Chronicle, who have been using a pump in use on their premises,—for testimony to their excellence.

COOL.—The following conversation was given us by a gentleman of the city as having actually occurred a few days ago. Desiring to engage freedmen on his farm for the present year, he addressed among others a stout looking fellow with—

"Boy, do you want to hire next year?"

Freedman—"What sort of work is it, sir?"

Citizen—"I want hands on my farm; can I get you for one?"

Freedman (with pompous air)—"Well, no; I don't care about hiring next year. What will you take for your place?"

Citizen (somewhat surprised)—"Twenty dollars per acre."

Freedman—"How much would it all come to at that?"

Citizen (making a mental calculation)—"Six thousand two hundred dollars."

Freedman—"Yes; what are your terms?"

Citizen—"One-third cash; the balance in one and two years, with eight per cent. interest."

Freedman—"Wouldn't you make some deduction if I was to pay the whole in cash and gold?"

Citizen—"Certainly; eight per cent."

Freedman—"Make it ten?"

Citizen (decidedly astonished)—"Very well."

Freedman—"*I'll take it!*"

The gentleman was then informed that he should have the money the next day without fail!

Look out, ye Legislative Hotspurs! the freedmen will have all your funds in a dozen years!—*Columbus (Miss.) Index.*

BOSTON STREETS.—The Boston correspondent of the Hartford Press thus discourses upon some of the peculiarities of Boston streets:

"The freaks and twists of the streets have long ceased to be wonders, and it seems a simple enough thing now that Pleasant street should lead direct from the Providence depot to the centre of Washington street; that up Park street and so on in a straight line should be 'across lots' to the Eastern depot, and that Court street should run parallel to itself, and on one side of itself be itself, and on the other be Tremont Row. Some of the nicer details, however, of Court street, I have not yet puzzled out, such as the boundary line between it and Sudbury street, where of two stores, side by side, doors facing the same way, one is in Sudbury and the other in Court. It is a theory of mine, not a five years' opinion, that this Court street has its head waters at the Court House, and that its various courses thence were planned out by a conclave of lawyers, that they might never be out of subjects for litigation. Think of the intricacies which might spring from a suit concerning a house situated on Court street, or a man swears that he was garoted in in front of No. 7 Sudbury street, on such a night, by S. and S. But S. and S.'s skillful lawyer proves an alibi, for on such a night at said time, said S. S. was seen on Court street in front of No. 119."

— A minister in Scotland recently, when his deacons hinted that he might preach three sermons on the Sabbath, and:—"Preach three sermons! Never! That is an invention of Beelzebub for destroying the effect of two good ones, and killing the minister."

AMERICAN AND FOREIGN PATENTS.
R. H. EDDY,
Solicitor of Patents,
Late Agent of the U. S. Patent Office, Washington, under the Act of 1837.
78 State Street, opposite Kilby Street,
BOSTON.
After an extensive practice of upwards of twenty years, continues to secure Patents in the United States, also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds, Assignments and all papers relating to Patents, executed on liberal terms, and with dispatch. Research made into American or Foreign Patents, to determine the validity or utility of patents or inventions—and copies of other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished for one dollar. Assignments recorded at Washington.
The Agency is not only the largest in New England, but through it inventors have advantages for securing patents, or ascertaining the patentability of inventions not possessed by those who are located elsewhere, in any which can be offered than elsewhere. The testimonials below given prove that those who have made use of the LIBERAL PATRONAGE OF THIS OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, no more need be, and he has abundant reason to believe, and can prove, that at no other office of the kind are the services for professional service so meritorious.
The immense number of patents he has secured during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.
These, besides his extensive library of legal and mechanical works, and full access to all patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.
All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.
TESTIMONIALS
"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.
"I have no hesitation in assuring inventors that they can of employing a more *competent and trustworthy* and more capable one of putting their applications in form to secure for them an early and favorable consideration at the Patent office."
EDMUND BURKE,
Late Commissioner of Patents.
Mr. R. H. Eddy has made for me THIRTEEN applications, on all of which Letters Patent have been granted, and that is *now pending*. Such unmistakable proof of great talent and ability on his part leads me to recommend *all inventors* to apply to him to procure their patents, as they may be sure of having the most intelligent attention bestowed on their cases, and at very reasonable charges."
JOHN TAGGART
During eight months, the subscriber, in connection with large practice, made on *twenty-rejected* applications on APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents.
R. H. EDDY.

VINELAND
FARM AND FRUIT LANDS.
In a mild and healthful climate. Thirty miles south of Philadelphia by Railroad, in New Jersey, on the same line of latitude as Baltimore, Md. The soil is rich and productive, varying from a clay to sandy loam, suitable for Wheat, Grass, Corn, Tobacco, Fruits and Vegetables. This is a *great fruit country*. Five hundred Vineyards and Orchards have been planted out by experienced fruit-growers. Grapes, Peaches, Pears, &c., produce large crops. Vineland is one of the most beautiful places in the United States. The entire territory, consisting of fifty square miles of land, is laid out upon a general system of improvements. The land is only sold to actual settlers with provision for public adornment. The place, on account of its great beauty, as well as other advantages, has become *the resort of people of taste*. It has increased five thousand people within the past three years. Churches, Colleges, Schools, academies, societies of Art and Learning, and other elements of refinement and culture have flourished. Hundreds of people are constantly settling. Hundreds of new houses are being constructed. Price of farm land, twenty acre lots and upwards, $25 per acre. Five and ten acre and Village lots for sale.
Fruits and Vegetables ripen earlier in this district than any other district north of Norfolk, Va. Improved places for sale.
Opening for all kinds of business. Lumber yards, Blacksmiths, Carpenters, Masons and the like; and Steam Power, with room, can be rented.
For persons who desire mild winters, a health ful climate, and a good market, Vineland should truly improves, abounding in fruits, and possessing all other social privileges, in the heart of civilization, it is worthy of a visit.
Letters answered, and the Vineland Rural, a paper giving full information, and containing Reports of Resident Farmers, sent free.
Address CHAS. K. LANDIS, Vineland P. O., Landis township, New Jersey.
From report of Prof. Robinson, Agricultural editor of Tribune:—*It is one of the most eminently practical, and in almost every position and suitable condition for immediate farming that we know of in the state of the Middle States.*

TUESDAY, APRIL 3, 1866.

☞ The New York Tribune publishes two further dispatches from Mr. Seward to Mr. Adams, of March 1, 1863. In the first the Secretary of State refers to anticipation on the part of European governments of retaliatory measures. He again reviews the grievances of the United States against Great Britain as well calculated to produce expectation of retaliatory measures, but deprecates any intention on the part of the United States to go war on account of these grievances.

The other, communicating to Mr. Adams a copy of a dispatch in cypher from a rebel emissary in Canada to Jefferson Davis, gives an account of endeavors of rebel agents in London and Paris, to find out on what terms assistance or recognition could be obtained. It seems that these agents were instructed that an armistice might be concluded between the two belligerents in North America for the purpose of undertaking conjointly a foreign war, for instance, the expulsion of the French from Mexico. The hint was treated in England "in the usual unsatisfactory non-committal manner;" but in France it at once met with the declaration that no such alliance could be permitted; that the Emperor would punish any attempt to enforce the Monroe doctrine, and if it could be made sure that the Federal Government was pursuing such a course, France would promptly recognize Southern independence.

BURLEIGH'S SCRAPS FROM NEW YORK. The attempt on the part of Southern Presbyterians to supply the religious destitution of New Yook was commenced on Sunday. The preacher was a gentleman who fled from the South and took refuge in Canada. He became the pastor of Sanders, Beverly Tucker and Co. His service in New York was conducted in the house occupied by negro minstrels. Either there are few Southern sympathizers in New York, or they are not very pious. The audience was very sparse and the collection would not pay for advertising.

Among the oil companies resting on a solid basis, there are a countless number which are bogus. The bad failure of a great oil house, carrying down banks and companies, has carried consternation everywhere, and is only the beginning of the end.

Good Friday has become a holiday. The Courts and public offices, with the Board of Brokers, have been closed, and the churches are full. It is quite significant that the motion in the Board of Brokers to adjourn from Thursday over Easter was made by a Jew.

[This latter statement is by no means strange. Why should not a Jew adjourn over the Passover, or feast of unleavened bread?]

WHAT IS FAME.—The Boston Journal says:—

The popular landlord of the old Phenix Hotel, Concord, N. H., Col. S. H. Dumas, has purchased that well known sea-side resort, Ball's Head Hotel, Hampton beach, and will immediately put it in order for the reception of visitors during the hot season.

We thought everybody on the coast knew that *Boar's* Head was at one end of Hampton beach, and probably the editor does know it; but we suspect that the compositor made a *Bull* of it, and that the proofreader did not take him by the horns, but let him run at large.

PRINTERS' STRIKE IN RICHMOND, VA. The newspaper publishers held a final meeting Sunday, and determined to adhere to their ultimatum. They also adopted a resolution to pay the expenses of compositors to Richmond to work at 40 cents per 1000. The only paper that appeared Monday was The Citizen, published by an association of printers. The strike has caused considerable sensation.

[The world does move. Workingmen have some voice in Virginia, if they happen to be white; but ought there not to be some Seward or Johnson policy to keep them down, exactly as in the case of blacks? What is the world coming to?]

☞ A new locomotive came over the Eastern Railroad on Saturday. It is from the shop of Wm. Mason of Taunton, and is named "John Horne," in honor of a former President of the Corporation.

☞ A bone-burning establishment on Pine Island, Roxbury, Mass., was burned on Sunday night, supposed by incendiary hands. The smell of it had reached South Boston, and produced disgust and indignation.

— A correspondent in Savannah, Ga., remarks that Northern emigration is coming in quite fast, notwithstanding the high rates at which property is held.

— A New Orleans letter says: "One marked change in our agriculture is the introduction, to a much greater extent than ever before, of the gang-plows, horse-cultivators, seed-sowers, &c., of Northern farmers. The reduced number of hands compels this; but how far it will aid in cotton raising remains to be seen."

OBITUARY NOTICE.—Died, on Monday March 26, at the residence of her son Col. Joseph Cilley, on Nottingham Square, Mrs. JENNY CILLEY, aged 93 years, 6 months, 4 days:—widow of Greenleaf Cilley, whom she survived 58 years,—and mother also of Hon. Jonathan Cilley, M. C., who lost his life in a duel near Washington, and of several daughters, some of whom survive her. Madam Cilley was a woman of equable temperament, well balanced mind, and manners always agreeable, because always affable and kind. Her mind was well stored, her perceptions clear, her conscience keen, and her christian walk blameless. In the possession of all her faculties, able to hear, read and converse, to the close of life, she took a deep interest in all passing events, religious, moral, social and political, as well as domestic; and from such a rare old age as this, passed peacefully away without a struggle or a groan. Her funeral was attended on Good Friday, with due respect, by many friends:—and with appropriate services by Rev. Messrs. Rogers of Nottingham, Goldsmith of Epping, and Miller of Portsmouth.

CANADA AND THE FENIANS.—A dispatch from Hamilton, C. W., dated Saturday, states that the 13th battalion was mustered out of service that morning, but immediately afterwards received orders to assemble again that afternoon at 2 o'clock, and that all volunteers in the Province had been served with the same order. Much speculation as to the probable cause was indulged in, altho' no alarm was manifested.

FIRES IN THE SOUTH.—A Fortress Monroe letter says the fire which occurred at Danville, Va., on the 26th ult., destroyed a planing mill and woolen factory. Loss $150,000; insured $75,000.

The town of Darling, South Carolina, was almost totally destroyed by fire on Sunday, 25th ult.; 18 stores and twelve dwellings were burned. Loss very heavy. Most of the merchants had received their stock of spring goods.

"WINDFALL."—Mr. Chas. Crowley, a lawyer in Boston, is mentioned in the will of Mrs. D. C. Phillips, a lady of New York city, who died last week, leaving an estate valued at $40,000, as heir to one-fourth of the same. Mrs. Phillips was formerly of Boston, and the legatee was successful about seven years ago in procuring a divorce for her.

HAMPTON.—This town sent to the war, in volunteers, drafted men and substitutes, 144 men. The war cost to the town, including U. S. bounties, was $44,983. 35 citizens furnished substitutes at an individual cost of $4893. Town debt March 1, 1866, was $31,115.20; reduced past year, $5,667.45.

RHODE ISLAND POLITICS.—The Providence Post raises a Democratic State ticket. For Governor, Lyman Pierce of Providence; Lieutenant Governor, Gideon H Durfee of Tiverton; Sec. of State, Wm. J. Miller, of Bristol; Attorney General, Joseph S. Pitman of Providence; General Treasurer, James Atkinson of Newport.

☞ Gov. Smyth of New Hampshire having represented to Secretary Seward that Capt. Cornelius Healy, late of the 8th New Hampshire regiment, was undergoing imprisonment in Ireland on an unjust charge of being a Fenian emissary, Mr. Seward has written to assure the Governor that the matter will be brought to the attention of the British Government without delay.

— There are 5000 masonic lodges and 1,300,000 free and accepted masons in the world. There are lodges in Senegal, Guinea, Mozambique, China, Java, and Arabia.

— April has its share of memorable days. The late war commenced in April, and ended in April with Lee's surrender, and President Lincoln was murdered in April.

— A National Convention of workingmen is to be held at Baltimore, Maryland, on the 20th of August proximo, to which all the different Unions are expected to send delegates, each local organization to be entitled to one representative, and each trades' assembly two.

— A Washington dispatch says that the dead lock in the New Jersey Senate will be removed, as Mr. Scovil, the presiding officer and the possessor of the balance of power, has telegraphed to a Republican Senator that all will be right on Wednesday, and that a successor to Mr. Stockton will be duly appointed.

— Miss Ann R. Adams, an ancient maiden, sixty-eight years of age, residing in Danville, Va., is cutting her fourth set of teeth and growing a new crop of dark hair. Mrs. Elizabeth Christy, a widow lady, sixty-five years of age, living in Winchester, is cutting a new set of teeth, after being toothless for years.

A GOOD WASHING AND WRINGING MACHINE.—One of the great difficulties of house-keeping is in washing clothes. The labor is hard, the derangement it occasions exceedingly annoying, and the cost is no inconsiderable item, where the labor must be paid for. "Blue Monday;" what an awful day is that! The boiler foaming over on the stove and steaming the house from end to end and from kitchen to attic; the suds on the floor requiring boots or boats to get from one room to another; the good women not at all too good on that occasion, and the hired woman directly in the way; the dinner late, and the children cross and crying! If there is any way to lessen the labors and troubles of washing day, the discoverer of that way will be entitled to the thanks of all mankind and of womenkind too. We believe it has been discovered in Bailey's Washing and Wringing Machine, with his patent spring roller and cog wheel, which can be seen at the store of E. A. STEVENS, 46 Market street, and not only seen but purchased, and will be insured to give satisfaction. Concerning this Machine the Newburyport Herald says:

We don't know how many machines we have examined and tested in the fifteen years past, to find one that would answer the purpose; but this is the first that has come up to the mark. It has a great advantage in combining both the washing and wringing, and doing both of them well. The power is in the cog wheels, which saves the rollers and the clothes; the spring rollers make it work with ease and perfection; and its oscillating board, as it is termed, gives it an advantage over all other machines. The roller is so constructed as to yield most in the centre, where the bulk of the clothes come; and the water is pressed from the edges into the thick part so as to keep the stream constantly running through the cloth, cleansing as it passes. The time saved in labor would soon pay the cost of a machine; and the preservation of the clothing, which is now costly, would soon save it many times. Some of the washing machines scour and grind out the cloth; this cleans by pressure, and the most delicate fabric is neither worn out, as on some machines, or wrenched and twisted as when done by hand. A piece of tissue paper may be wet and put between the rollers, and it will come out as whole and perfect as it goes in; and whatever can be washed by any machine can be by this.

For a wringer, this machine has an advantage in being permanent and strong. It is pretty well settled that a wringer must have cog wheels to be valuable; and it can not profitably be attached to a tub. It wants more force than can be applied without holding the tub, and it is a most awkward performance to hold the tub and turn the wringer at the same time. This has strength, permanence and durability; and wherever it is tested it will be approved; and whenever it is used it will be a saving of strength, and clothes, and time, and good temper, which is the essential requisite for a happy life. Look at the machine and try it.

POMOLOGY.—People in the villages of New Hampshire are paying more attention to fruit-raising than those of the agricultural districts. Indeed, in many agricultural portions of the State, apple orchards are running to waste, and their places not supplied by new settings. With no prospect that apples will sink in price to former low water marks; indeed, with the prospect that they will remain at high figures, still vast numbers of orchards have no attention whatever bestowed upon them. This is strange, when the testimony is so clear regarding the prospect of apple-raising. The culture is easy and agreeable work, the sales really and certain, and the profits sufficient to amply remunerate those who engage in this branch of pomology. It may be there are portions of the State where increasing attention is bestowed upon the apple—the standard fruit of New England—but, in such parts as we see, apple-raising on farms is in the decline. This ought not so to be, in a State the climate of which, it is said, produces fruit which encounters transportation better than the apples of the Middle States.

Raising grapes, apples and pears is upon a yearly-accelerated pace by the village people of the State; and whereas only a few years since they bought all they had—and little at that—now they raise in profusion, and many of them in quantities sufficient to enable them to sell or give away to their friends.

But whatever is now done, pomology can be increased to an indefinite extent. The apple is indigenous to the soil of much of New Hampshire. The pear, if placed in a genial soil, does well here, and grapes—various, rich and sure—can be produced amongst us. The very choicest varieties of this luscious fruit ripen in advance of the frosts; and if those who have land adapted to the production of fruits here spoken of, are not raising them, it is their own fault.—*Statesman*

☞ Part 55 of that excellent historical work, "The Rebellion Record," is received from the publisher, D. Van Nostrand, New York. It contains fine portraits of Gens. Slocum and Hunt.
